# Introduction

On an annual basis, the SANDAG Criminal Justice Research Division prepares a report on local criminal justice agencies' response to crime in the region as measured by arrest statistics. Compared to other regional crime reports, arrest statistics provide additional insights into the types and levels of offenses, as well as the demographics of those arrested. This information deepens our understanding of crime and provides another valuable tool for justice system planning.

This CJ Bulletin presents arrest data for the 2023 calendar year and draws comparisons to previous years. It includes regional arrest rates per 1,000 residents, as well as total number of arrests by offense type. The following are key considerations for interpreting these numbers:

- Data presented here were provided by the Automated Regional Justice Information System (ARJIS).<sup>1</sup>
- Data were categorized according to the Uniform Crime Reporting (UCR) Summary system. The offense or charge attributed to an arrest reflects only the most serious violation among multiple potential offenses associated with the arrest. This categorization and methodology differs from the CIBRS/NIBRS data used in our recent crime reports.
- Arrest reports document the location where an arrest occurred, which may not reflect the location of the crime incident or the residence of the alleged offender.
- Arrest rates and counts should not be compared to crime rates and counts, as these two events may occur at two different points in time. An arrest can happen months or even years after the related crime was reported, making direct comparisons misleading.
- In regard to youth, even when an arrest report is filed, alternatives such as diversion to a community-based organization or release to a parent or guardian may be considered, rather than processing through the juvenile justice system.
- Numbers presented in this report may vary from those reported in previous years due to updated population estimates.<sup>2</sup>

## Highlights

- The number of arrests for violent and "Other" offenses increased from 2022, while arrests for property crimes, weapons, and alcohol/drug-related offenses declined.
- Juvenile arrest rates increased for the second year in a row, rising 18% from 2022 and 58% from 2021.
- Juveniles were most frequently arrested for violent offenses, a crime type that saw a 25% increase from 2022.
- Adult arrest rates continued their downward trend, dropping 38% from 2019.
- While the felony arrest rate has remained relatively stable, misdemeanor arrest rates have declined by nearly 50% since 2019.
- Weapon-related offenses were the most likely offense type to result in felony charges.
- Arrestees were more likely to be male and in the 20-39 age range.
- Hispanic and Black individuals were overrepresented in arrests, while "Other" and White individuals were underrepresented compared to their population size.

<sup>1</sup> For all reports prior to 2021, data were provided by the California Department of Justice (DOJ). After 2020, the DOJ failed to fulfill the annual request for this data, and SANDAG started using ARJIS data instead. Additional information related to this change in methodology is included in the [2021 Arrests Report](#).

<sup>2</sup> 2023 population estimates were derived from [SANDAG's Population and Housing Estimates](#).

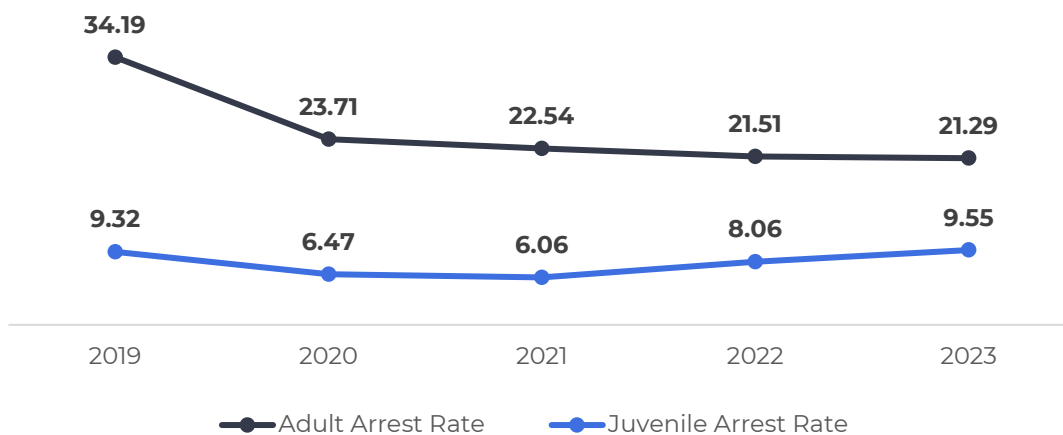

# Arrest rates<sup>3</sup>

## Trends

In 2023, there were 21.29 adults arrested per 1,000 population, representing a 1% decrease from the previous year and the lowest rate recorded in the last five years (Figure 1). Across the jurisdictions, the 2023 adult arrest rate varied from 11.46 (Carlsbad) to 41.65 (Lemon Grove) (Appendix Table 5). Compared to the previous year, 10 jurisdictions experienced decreases (ranging from <-1% in San Diego and Poway to -16% in Coronado), and 8 saw increases (ranging from <1% in Vista to 42% in La Mesa).

For juveniles, the 2023 rate of 9.55 represented an increase of 18% from the previous year and the highest recorded rate in the last five years (Figure 1). Across jurisdictions, the juvenile arrest rate varied from 3.93 (Solana Beach) to 22.08 (Imperial Beach). Of the 12 jurisdictions with juvenile arrest numbers large enough for comparison in 2022 and 2023, 10 had increases (ranging from 5% in Chula Vista to 93% in Carlsbad), and 2 had decreases (-16% in Escondido and -20% in Poway) (Appendix Table 8).

**Figure 1: Adult and juvenile arrest rates per 1,000 population, by year (2019-2023)**

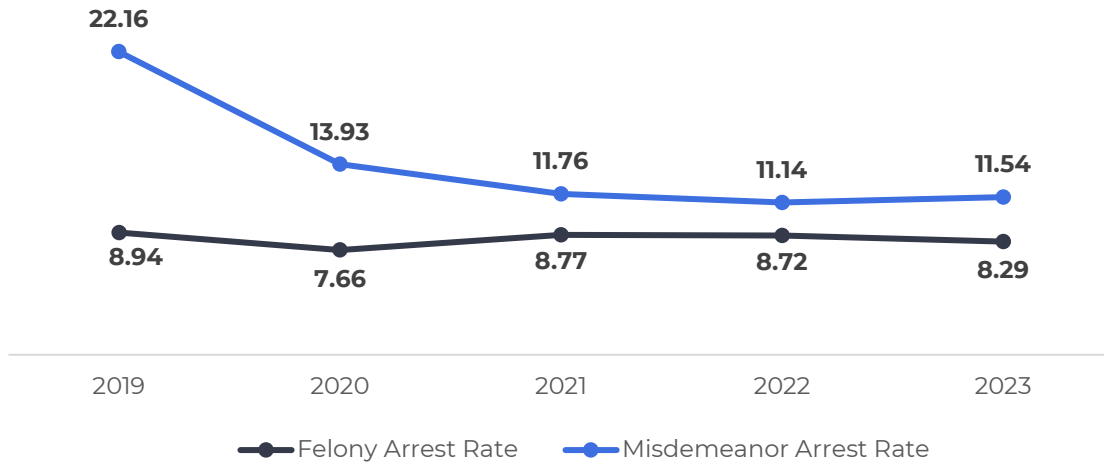

Sources: SANDAG; ARJIS; SANDAG Population and Housing Estimates v2023

## Felonies and misdemeanors

From 2019 to 2023, the felony arrest rate has remained relatively stable, dipping to a low of 7.66 per 1,000 population in 2020 and slightly increasing to 8.29 by 2023 (Figure 2, Appendix Tables 3 and 4). In contrast, the misdemeanor arrest rate has seen a notable decline, dropping 48% from 2019 (from 22.16 to 11.54). As a result, the wide gap between felony and misdemeanor arrests in 2019 has narrowed significantly by 2023. Notably, both felony and misdemeanor arrest rates reached their lowest levels in the past five years in 2020, potentially as a result of the COVID-19 pandemic.

<sup>3</sup> For this analysis, only arrests for individuals aged 10 and older are considered. Individuals less than 10 years old are excluded as they represent less than 1% of total arrests per year. Rates are calculated per 1,000 residents.

**Figure 2: Misdemeanor and felony arrest rates per 1,000 population, by year (2019-2023)**

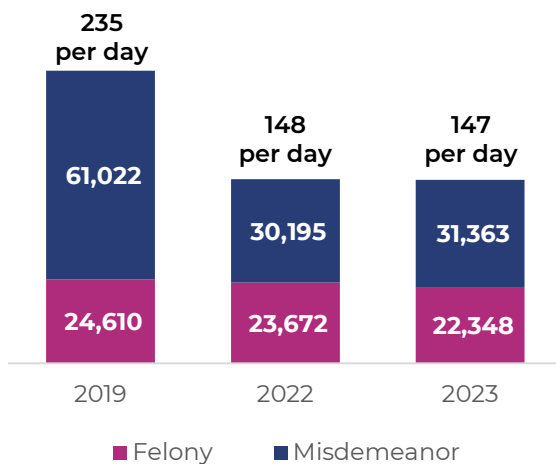

Sources: SANDAG; ARJIS; SANDAG Population and Housing Estimates v2023

## Arrest numbers

In 2023, adult arrests totaled 53,711, representing a slight decrease from 2022 and a notable drop from 85,632 in 2019 (Figure 3A and Appendix Table 12). While felony arrests among adults have slightly decreased, felonies made up a larger share of arrests in 2023 (42%) compared to 2019 (29%). This shift is largely due to a sharp decline in misdemeanor arrests, which have decreased by almost half since 2019.

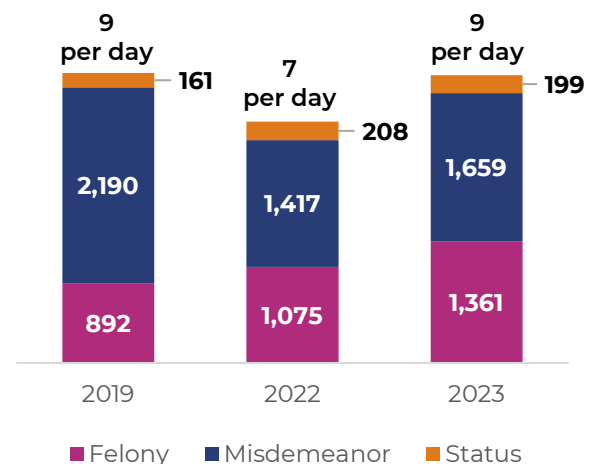

The total number of juvenile arrests in 2023 increased by 19% from 2022, from 2,700 to 3,219 (Figure 3B and Appendix Table 25). This figure is similar to the number of juvenile arrests in 2019, though a larger proportion of arrests in 2023 were for felonies (42% compared to 28% in 2019). Status arrests remained relatively stable compared to previous years.<sup>4</sup>

**Figure 3A: Number of adult arrests by year (2019, 2022, 2023)**

Sources: SANDAG; ARJIS

**Figure 3B: Number of juvenile arrests by year (2019, 2022, 2023)**

Sources: SANDAG; ARJIS

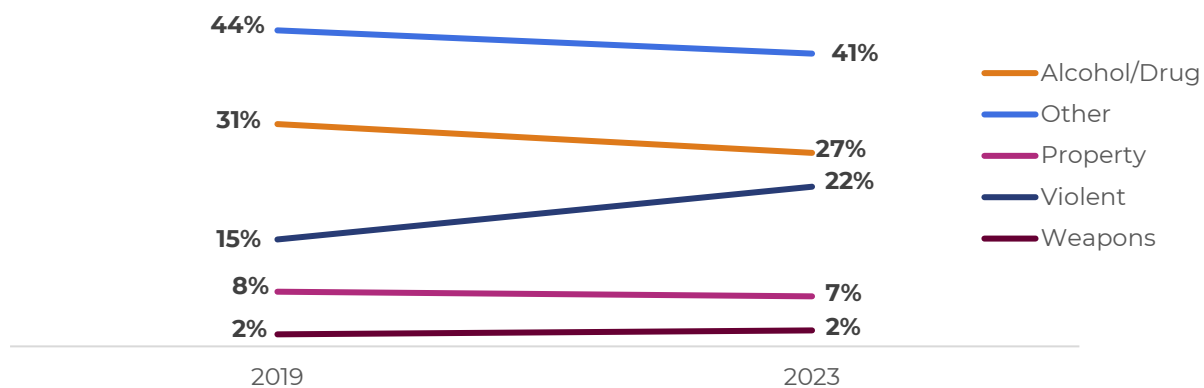

<sup>4</sup> A status offense is an offense for which only juveniles can be arrested. As shown in Appendix Table 38, the only status offenses documented in 2019, 2022, and 2023 were runaway and curfew violations.

## Arrests by offense type

### What types of crimes were adults and juveniles arrested for in 2023?<sup>5</sup>

In 2023, “Other” offenses were the most common arrest category for adults, accounting for 41% of all arrests (Figure 4A). More than one in four arrests (27%) were related to alcohol or drug offenses, making it the second most prevalent category. When drawing a five-year comparison, the category that experienced the most significant change was violent offenses, which increased from 15% of adult arrests in 2019 to 22% in 2023. While arrests for violent offenses have remained steady, the overall decline in arrests has made violent offenses constitute a larger proportion of adult arrests.

**Figure 4A: Proportion of adult arrests by offense type (2019 and 2023)**

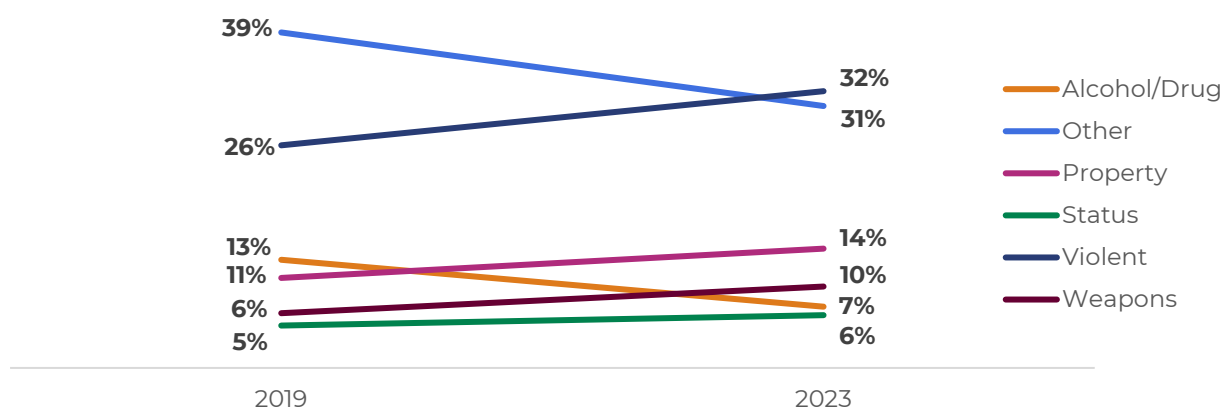

Note: Percentages may not total 100 due to rounding.

Sources: SANDAG; ARJIS

The number of juvenile arrests in 2023 has remained similar to that in 2019. However, decreases in Alcohol/Drug offenses and Other offenses were offset by increases in Violent, Property and Weapons offenses. In 2023, the most common types of juvenile arrests were for violent offenses (32%) and “Other” offenses (31%) (Figure 4B). Comparing 2019 to 2023, “Other” offenses saw the largest proportional drop (-8%), while violent offenses showed the largest increase (6%).

**Figure 4B: Proportion of juvenile arrests by offense type (2019 and 2023)**

Sources: SANDAG; ARJIS

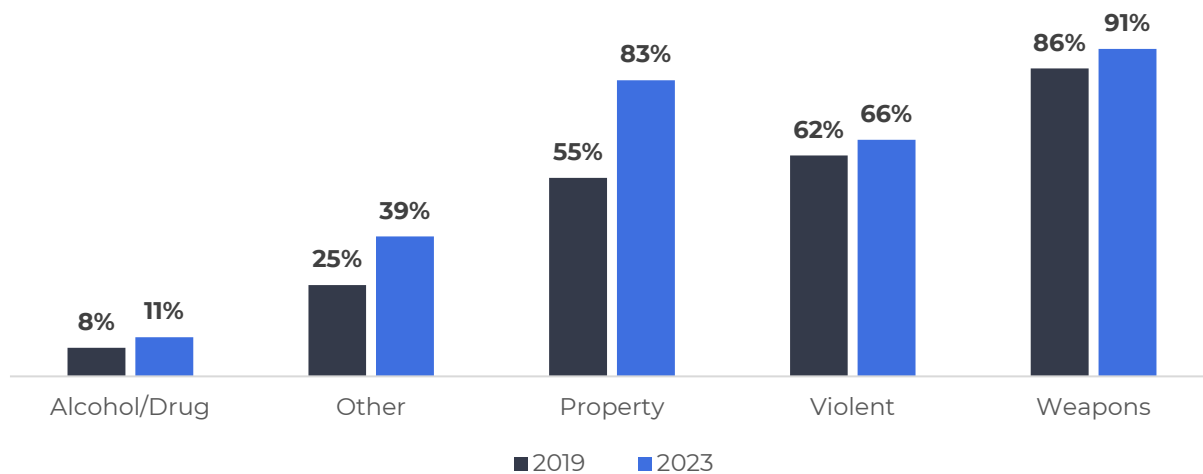

<sup>5</sup> This report categorizes data according to the Uniform Crime Reporting (UCR) Summary system, which classifies crimes differently from the CIBRS/NIBRS system used in our other recent crime publications.

## What types of crimes were more likely to be classified as felonies?

A higher proportion of overall arrests were classified as felonies in 2023 compared to 2019 (Figures 5A and 5B). Specifically, around two in five (42%) arrests were at the felony-level in 2023 (not shown). However, the proportion of arrests that were classified as felonies varied considerably across specific crime types for both adults and juveniles.

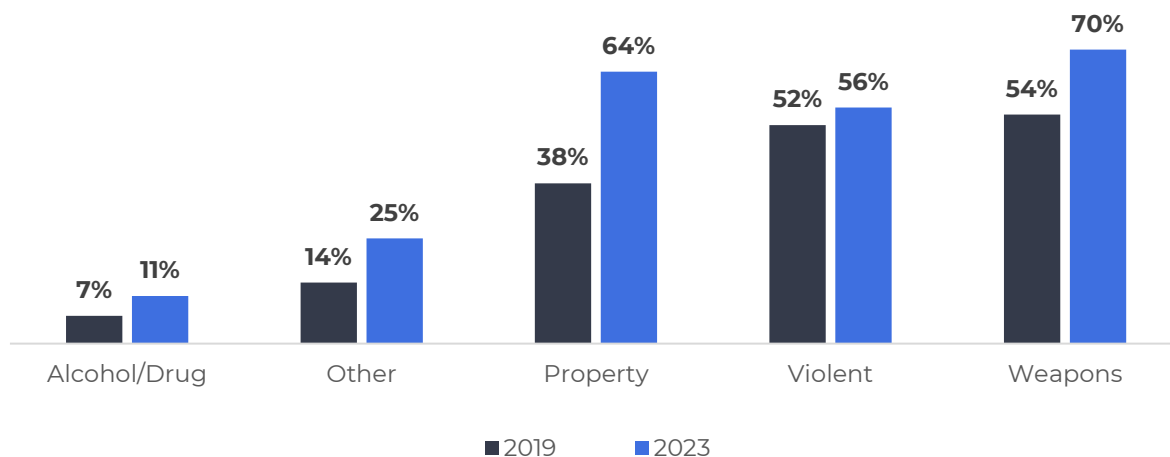

Arrests for weapon-related offenses were more likely to be a felony than a misdemeanor for both adults (91%) and juveniles (70%). Compared to 2019, the most notable increase in the proportion of felony arrests was observed in property offenses. The share of property offenses classified as felonies saw a 28 percentage point increase among adults and a 26 percentage point increase among juveniles. Conversely, “Other” offenses and alcohol/drug-related offenses were the least likely categories to be classified as felonies (for both adults and juveniles).

**Figure 5A: Adult felony arrests by offense type (2019 and 2023)**

Sources: SANDAG; ARJIS

**Figure 5B: Juvenile felony arrests by offense type (2019 and 2023)**

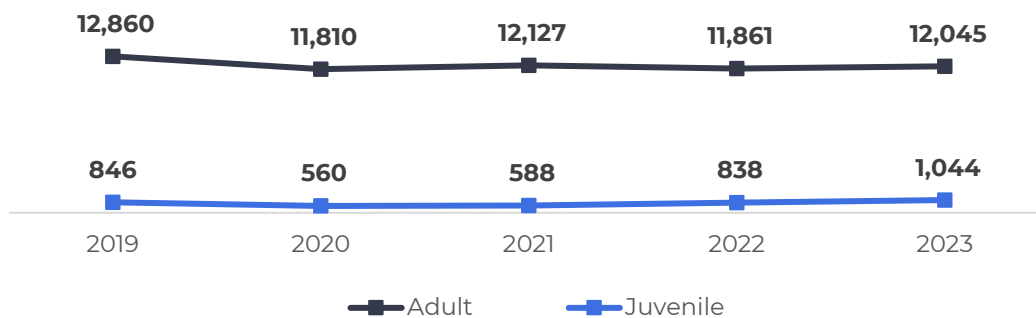

Sources: SANDAG; ARJIS

## Violent offenses

The violent offense arrest category includes four felony-level offenses (homicide, rape, robbery, and aggravated assault) and one misdemeanor-level offense (manslaughter/assault and battery). In 2023, there were 12,045 adult and 1,044 juvenile arrests for violent offenses (Figure 6). Adult arrests for violent offenses saw a 2% increase from 2022 (Appendix Table 19). For juveniles, arrests rose by 25% from the previous year, marking the highest count in the last five years (Appendix Table 32).

Among adults, there were increases in arrests for manslaughter/assault and battery (5%) and robbery (1%) from 2022 to 2023 (Appendix Table 20). All other categories decreased during this period, including rape (-18%), homicide (-8%), and aggravated assault (<-1%). Juvenile arrests increased for aggravated assault (50%) and manslaughter/assault and battery (22%), while robbery arrests decreased by 3% (Appendix Table 33). Due to small sample sizes for homicide and rape arrests among juveniles (12 and 2, respectively), year-over-year comparisons were not made.

**Figure 6: Number of arrests for violent offenses for adults and juveniles (2019-2023)**

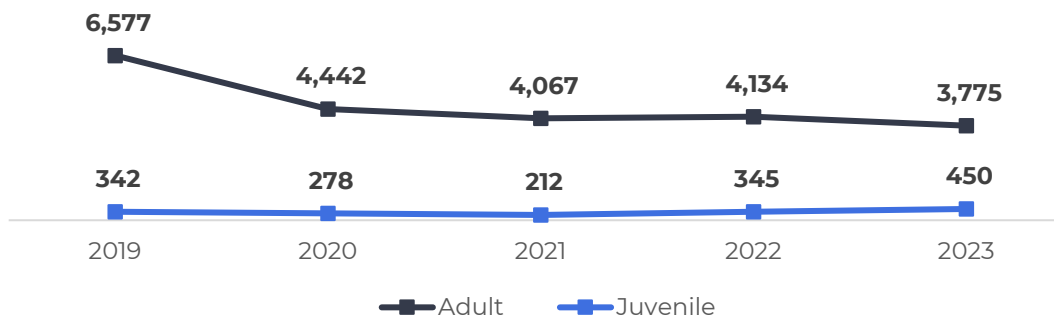

Sources: SANDAG; ARJIS

## Property offenses

Property offenses include three felony-level offenses (burglary, larceny, motor vehicle theft) and one misdemeanor-level offense (petty theft/burglary). In 2023, adult arrests for property crimes reached their lowest level in the past five years, reflecting a 9% decrease from the year prior and a 43% decline from 2019 (Figure 7 and Appendix Table 19). Conversely, juvenile arrests for property crimes increased by 30% from the previous year, reaching the highest total since 2019 (Appendix Table 32).

For adults, arrests for motor vehicle theft and burglary offenses saw notable decreases (dropping by 45% and 11%, respectively), while arrests for larceny thefts and petty theft/burglary offenses increased (by 9% and 5%, respectively) (Appendix Table 21). In contrast, juvenile arrests for property offenses rose across all observed categories (Appendix Table 34).

**Figure 7: Number of arrests for property offenses for adults and juveniles (2019-2023)**

Sources: SANDAG; ARJIS

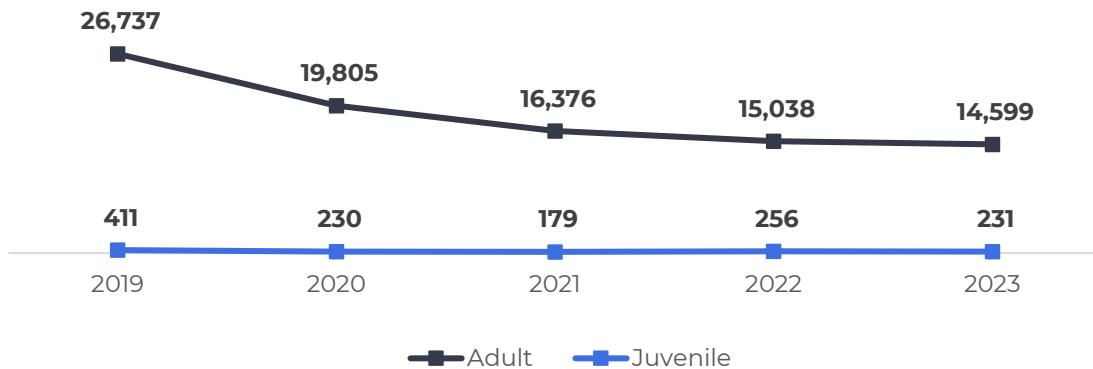

## Alcohol/drug-related offenses

In 2023, there were 14,599 adult arrests and 231 juvenile arrests for alcohol/drug-related offenses (Figure 8). Both figures reflect declines from 2022—adult arrests decreased by 3%, while juvenile arrests dropped by 10% (Appendix Tables 19 and 32).

The alcohol/drug-related offense category includes five felonies and five misdemeanors. Among adults, five out of eight comparable categories showed a decrease from 2022. These declines ranged from less than 1% for driving under the influence to a 9% decrease for dangerous drug offenses. Three categories saw increases, ranging from 14% for “Other” drug offenses to 78% for liquor law violations (Appendix Table 22).

For juveniles, arrests for drunk offenses increased by 21%, while arrests for liquor law violations decreased by -21% (Appendix Table 35). The numbers for other categories were too small to draw meaningful comparisons across years.

**Figure 8: Number of arrests for alcohol/drug-related offenses for adults and juveniles (2019-2023)**

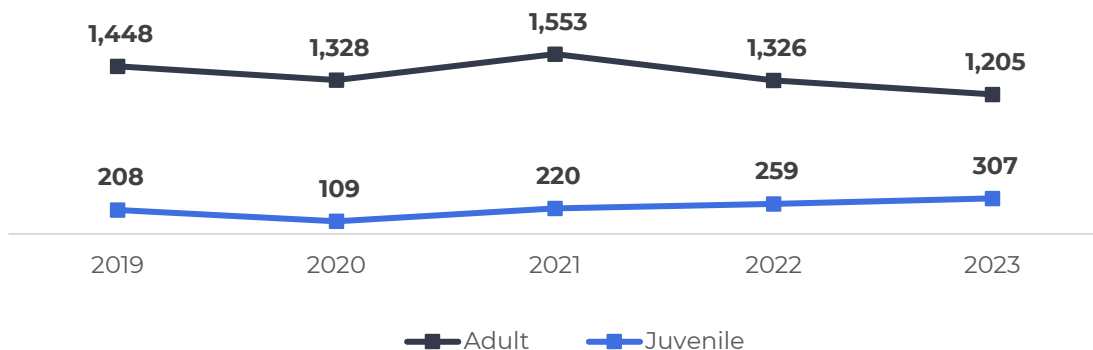

Sources: SANDAG; ARJIS

## Weapons offenses

In 2023, there were 1,205 adult and 307 juvenile arrests for weapons violations (Figure 9), representing a 9% decrease in adult arrests and a 19% increase in juvenile arrests compared to the previous year (Appendix Tables 19 and 32). For adults, arrests for both felony and misdemeanor-level weapons offenses were down from 2022 (-8% and -17%, respectively) (Appendix Table 23). Conversely, among juveniles, there were increases for both felonies (20%), and misdemeanors (16%) (Appendix Table 36).

**Figure 9: Number of arrests for weapons offenses for adults and juveniles (2019-2023)**

Sources: SANDAG; ARJIS

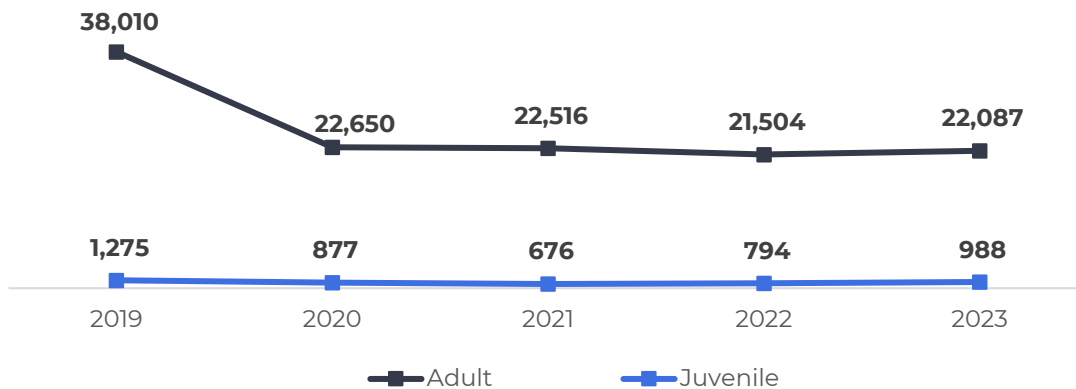

## Other offenses

There were 22,087 adult and 988 juvenile arrests for “Other” offenses in 2023 (Figure 10). Compared to 2022, total adult arrests for “Other” offenses saw a marginal increase of 3%, while juvenile arrests saw an increase of 24% (Appendix Tables 24 and 37). Within this category, 4 offenses are classified at the felony level, and 10 at the misdemeanor level.

For adults, there were decreases in all felony-level offenses, including arson (-15%), “Other” felonies (-9%), forgery (-8%), and sex-related offenses (<-1%). At the misdemeanor level, there were decreases in prostitution (-34%), hit-and-run (-34%) and disturbing the peace (-7%); all other categories experienced increases, ranging from 2% for vandalism/graffiti offenses to 26% for selected traffic offenses (Appendix Table 24).

Among juvenile arrests, four of five categories that had numbers large enough for comparison experienced increases, ranging from 21% (“Other” felonies) to 42% (disturbing the peace), while one category (related to city/county ordinances) experienced a decrease (-16%) (Appendix Table 37).

**Figure 10: Number of arrests for “Other” offenses for adults and juveniles (2019-2023)**

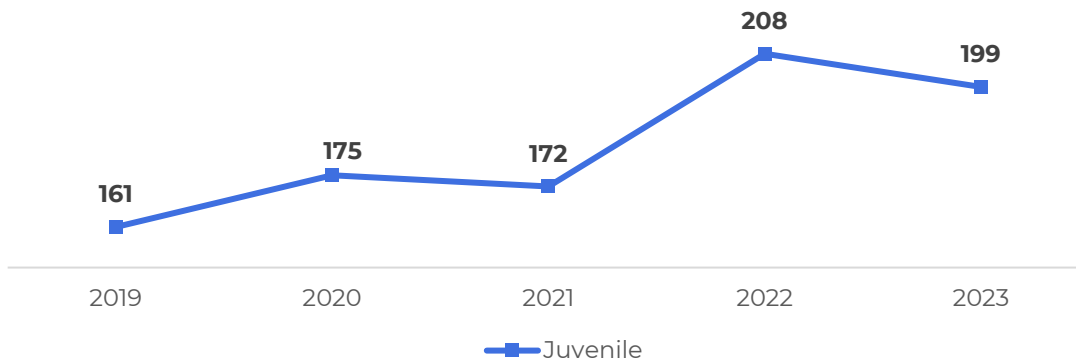

Sources: SANDAG; ARJIS

## Status offenses

A status offense refers to an act that is deemed unlawful solely due to the individual's status as a minor, such as truancy or curfew violations. In 2023, there were 199 status offense arrests (all of which were curfew arrests), marking a slight decrease of 4% from 2022 (Figure 11 and Appendix Table 38).

**Figure 11: Number of juvenile arrests for status offenses (2019-2023)**

Sources: SANDAG; ARJIS

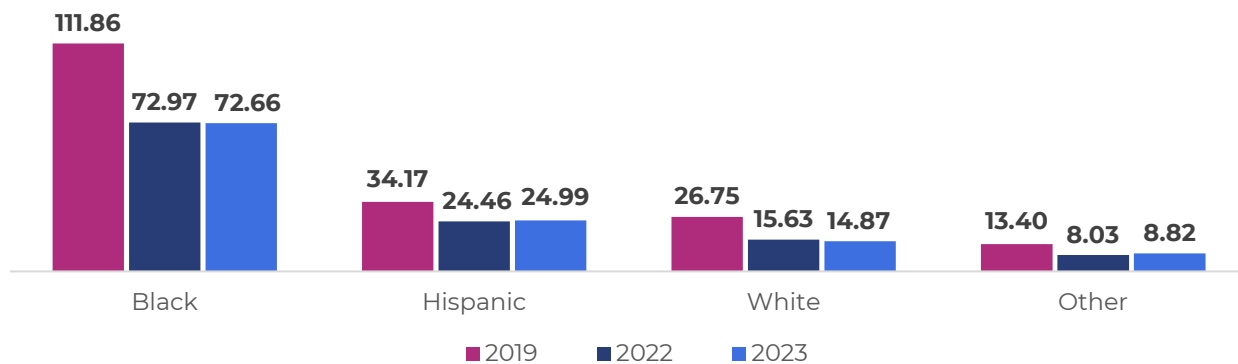

# Arrests across race/ethnicity, gender and age

## Race/Ethnicity

To better understand the relationship between demographic factors and arrest rates, this analysis examines arrest rates across race/ethnicity, gender, and age.<sup>6</sup> When interpreting these data, it is crucial to acknowledge the broader context of historical racial disparities within the United States criminal justice system. Complex social, economic, and geographic factors contribute to disparities in arrest rates and cannot be fully understood from these arrest statistics alone.

From 2022 to 2023, arrest rates increased for Hispanic and “Other” ethnicities (by 2% and 10%, respectively), while rates decreased for Black and White individuals (<-1% and -5%, respectively) (Appendix Table 2A). The findings reveal a notable disproportionality in arrest rates, with Black individuals exhibiting the highest arrest rate, while those identifying as “Other” have consistently had the lowest (Figure 12).<sup>7</sup> Demographic data for adults and juveniles are presented separately in Appendix Table 2A.

**Figure 12: Arrest rates per 1,000 population, by race/ethnicity (2019, 2022 and 2023)**

Sources: SANDAG; ARJIS; SANDAG Population and Housing Estimates v2023

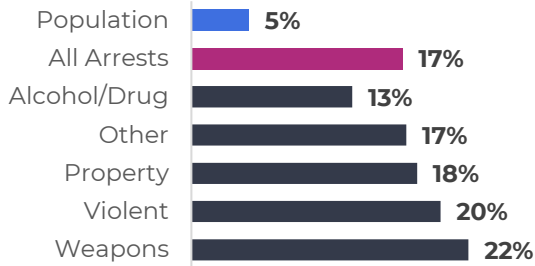

To further examine the types of crimes for which individuals of different races and ethnicities were arrested, Figures 13A through 13D compare the proportions of each racial/ethnic group in the region’s population to their proportions in arrests, highlighting any disparities in representation. Key findings include:

- Black individuals represented 5% of the population in the San Diego region in 2023 and 17% of all arrests. They were overrepresented in all arrest categories, ranging from 13% for arrests related to alcohol/drug to 22% for weapons arrests.
- Hispanic individuals represented 34% of the population and 42% of all arrests in 2023. They were overrepresented in all categories, ranging from 41% (for property, violent, and “other” offenses) to 51% for weapons.
- Individuals in the “Other” race/ethnicity category represented 17% of the population and 8% of all arrests in 2023. These individuals were underrepresented in each of the five arrest categories.
- White individuals represented 44% of the population and 33% of all arrests made in 2023. White individuals were underrepresented in each of the five arrest categories.

<sup>6</sup> The categories presented here reflect terminology used by the U.S. Census, which is the foundation for SANDAG population estimates. The “Other” category includes population estimates for individuals who identify as Asian/Pacific Islander, Native American, and Two or more/Other.

<sup>7</sup> Race/ethnicity information is compiled from law enforcement records, which may vary in terms of whether individuals self-identified or if an assumption was made by an officer.

**Figure 13D: Proportion of White individuals in population and across arrest types (2023)**

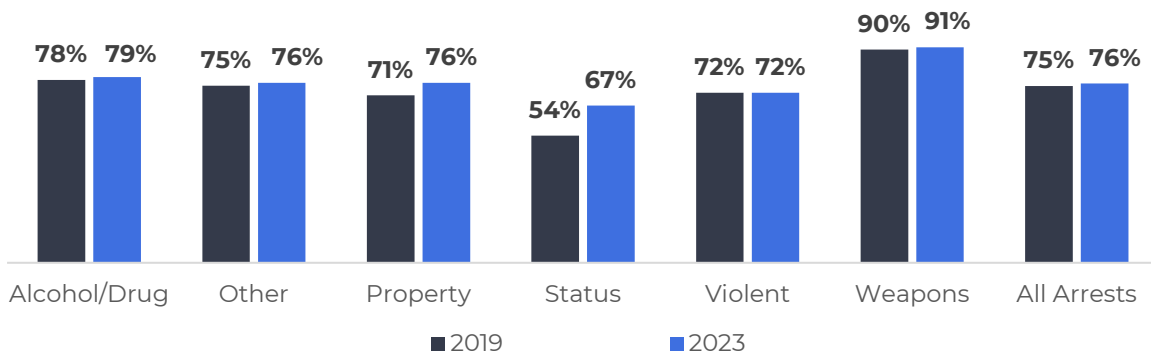

Sources: SANDAG; ARJIS; SANDAG Population and Housing Estimates v2023

### Arrests by gender

Both in 2019 and 2023, about three-fourths of arrested individuals were male (Figure 14). Across the different arrest categories in 2023, males were most notably overrepresented in weapons offenses, accounting for 91% of arrests, while their smallest share was observed in status offenses, where they represented 67%.

**Figure 14: Percentage of male arrests by crime type (2019 and 2023)**

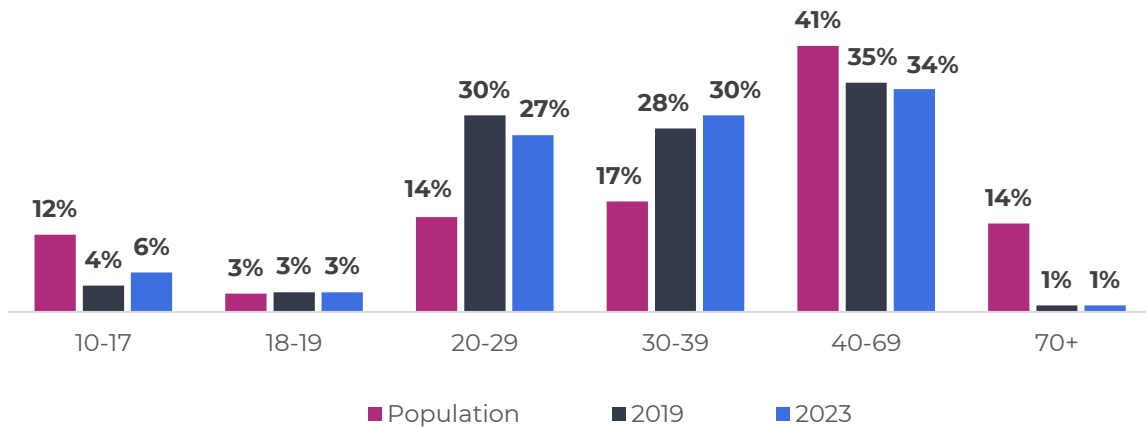

Sources: SANDAG; ARJIS

## Arrests by age

In 2023, arrest distributions across age groups closely mirrored those of 2019, with about one in three (34%) arrestees falling within the 40-69 age group, followed by 30% in the 30-39 age group (Figure 15). Younger adults—particularly those in a combined 20-39 age range—were overrepresented in arrests relative to their proportion of the region’s population. In contrast, youth (10-17) and older age groups (40 and over) were less represented in arrests relative to their population size.

**Figure 15: Percentage of arrests by age group (2019 and 2023)**

*Note: Total percentages may not total 100 due to rounding.*

*Sources: SANDAG; ARJIS; SANDAG Population Estimates 2023*

## Summary

This CJ Bulletin provides a comprehensive analysis of arrest trends in the San Diego region for 2023, with comparisons to previous years. The total number of adult arrests saw a slight decline of less than 1% from 2022, marking the lowest figure in the five-year observation period. In contrast, juvenile arrests increased for the second consecutive year, primarily driven by a rise in violent and “Other” offenses. Over the past five years (2019 to 2023), misdemeanor arrest rates have dropped by nearly half; after a sharp decline in 2020, the rate has remained consistently lower than pre-pandemic levels. Conversely, felony arrest rates have remained relatively stable during this same period. Demographically, arrestees were more likely to be male and in a combined 20-39 age range, with Hispanic and Black individuals disproportionately represented relative to their share of the region’s population. These observations underscore an ongoing shift toward fewer misdemeanor arrests, an increase in juvenile arrests linked to violent crime, and enduring gender and racial disparities.

## Additional notes on the methodology

All data from 2019 to 2023 were analyzed from an ARJIS extract of all regional arrests and citations in March 2024.

In an attempt to replicate methodology used in prior reports, only arrests and citations that were indicated as “Reported to the State Monthly Arrest and Citations Register (MACR)” within the ARJIS database in the MACR status field were included in this report. Arrests/citations with a MACR status of “booked” and “other” were kept in the analysis, while those with a status of “cited” were removed to avoid duplication. Arrests with “infraction” as the highest charge level or one that could not be determined were also excluded from the analysis.

This report should not be directly compared to prior reports, as changes in data and methodologies may affect the figures. For instance, juvenile arrest records may be sealed once an individual reaches 18 years of age, or an increased proportion of arrests may be categorized as “Other” compared to previous years. Additionally, the data source for this report (ARJIS) differs from the source used for CJ Arrest Bulletins prior to 2020 (DOJ). Furthermore, SANDAG’s annual population estimates are now benchmarked to the 2020 Census rather than the 2010 Census, reflecting improved methodologies and geographies. Population estimates for years prior to 2020 were not retroactively revised.

It should also be noted that the numbers in this report represent a snapshot of arrests at the time the data were extracted from ARJIS, whereas the previous DOJ dataset was a static source. Discrepancies may also exist between this report and other sources, as there is a possibility that an arrest could be counted multiple times if both an arrest and citation record were created for the same event. Additionally, the ARJIS charge table is not synchronized with the California Master Charge Table, and assumptions were made to replicate previously reported categories.

# Appendices
