

FY 2025-2029

# 2025 Regional Transportation Improvement Program

# **September 27, 2024**

SANDAG, as the Metropolitan Planning Organization and the Regional Transportation Planning Agency, is required by state and federal laws to develop and adopt a Regional Transportation Improvement Program (RTIP). The RTIP is a multi-billion-dollar, multi-year program of proposed projects for major transportation projects in the San Diego Region. Transportation projects funded with federal, state and San Diego transportation sales tax program (TransNet) must be included in an approved RTIP. The programming of locally funded projects may also be programmed at the discretion of the agency.

The RTIP covers five fiscal years and incrementally implements San Diego Forward: The Regional Plan (Regional Plan), the long-range transportation plan for the San Diego region. The current Regional Plan was approved by the Board at its meeting on December 10, 2021.

The Program Budget is available in its entirety at sandag.org/funding/budget.

# Board of Directors

The 18 cities and county governments are SANDAG serving as the forum for regional decision-making. SANDAG builds consensus; plans, engineers, and builds public transit; makes strategic plans; obtains and allocates resources; and provides information on a broad range of topics pertinent to the region's quality of life

# Adopting the 2025 Regional Transportation Improvement Program and its Air Quality Conformity Analysis and Air Quality Redetermination

WHEREAS, Title 23 and 49 of the Code of Federal Regulations require the preparation and updating of a Transportation Improvement Program by the Metropolitan Planning Organization (MPO); and

WHEREAS, Sections 14527 and 65082 of the California Government Code require the biennial preparation of a Regional Transportation Improvement Program (RTIP) by the Regional Transportation Planning Agency (RTPA); and

WHEREAS, the San Diego Association of Governments (SANDAG) has been designated the MPO and the RTPA for the San Diego region; and

WHEREAS, SANDAG, through the conduct of a continuing, cooperative, and comprehensive transportation planning process and in conformance with all applicable federal and state requirements, has prepared the 2025 RTIP, including an updated TransNet Program of Projects (POP) for the San Diego region; and

WHEREAS, the 2025 RTIP has been found to be in conformance with San Diego Forward: The Amended 2021 Regional Plan (2021 Regional Plan), the 2022 Regional Air Quality Strategy (RAQS), all applicable State Implementation Plans (SIPs), the California Transportation Commission adopted 2024 State Transportation Improvement Program, Fixing America's Surface Transportation Act and the *TransNet* Ordinance and Expenditure Plans, including reasonable available funding provisions; and

WHEREAS, the 2025 RTIP projects have been developed from the Revenue Constrained Amended 2021 Regional Plan and satisfy the transportation conformity provisions of 40 CFR 93.122(g) and all applicable transportation planning requirements per 23 CFR Part 450 including the establishment of performance management targets for requisite performance measures; and

WHEREAS, the 2025 RTIP projects are fiscally constrained as shown in Tables 4-1a through 4-1c; and

WHEREAS, the 2025 RTIP provides for timely implementation of Transportation Control Measures contained in the adopted RAQS/SIP for air quality and a quantitative emissions analysis demonstrates that implementation of the RTIP projects and programs meet all of the emissions budgets from both the 2008 and 2015 Eight-Hour Ozone Attainment Plan for San Diego County which were found adequate for on-road transportation conformity purposes by U.S. EPA, effective October 19, 2021; and

WHEREAS, the public and affected agencies have been provided notice of and an opportunity to comment on the 2025 RTIP and its air quality conformity determination and the redetermination of conformity for the Revenue Constrained Amended 2021 Regional Plan and agencies with funding allocations in the 2025 RTIP have been directed to hold public meetings on their respective projects; and

WHEREAS the public was given a 30 day comment period on the 2025 RTIP with notices sent in English and Spanish to extensive mailing lists used by SANDAG, including its Community Based Outreach network, which represents a wide variety of minority, low income, disabled, elderly, and limited English proficiency populations; and a public hearing was held at a Transportation Committee meeting on September 20, 2024, to present the 2025 RTIP and its air quality conformity determination and the redetermination of conformity for the Revenue Constrained Amended 2021 Regional Plan; and to solicit additional testimony from the public; NOW THEREFORE

BE IT RESOLVED that the SANDAG Board of Directors, also acting as the San Diego County Regional Transportation Commission (RTC), does hereby resolve as follows:

That the 2025 RTIP and the Revenue Constrained Amended 2021 Regional Plan, is in conformance with the applicable SIPs for the San Diego region; and

That the SANDAG Board of Directors has taken into consideration the comments received by SANDAG from the public on the 2025 RTIP and its air quality conformity determination; and

That the 2025 RTIP, and the FY 2025 to 2029 *TransNet* POP, have been developed based upon an estimate of reasonably available revenues for the program period. Actual transportation fund availability to each eligible recipient/project applicant will be based on actual federal/state fund apportionments, including obligation authority limitations, and *TransNet* sales tax receipts; and

That the SANDAG Board of Directors, also acting as the RTC, does hereby adopt the 2025 RTIP and its air quality conformity determination, and the redetermination of conformity for the Revenue Constrained Amended 2021 Regional Plan; and

That all regionally significant, capacity increasing projects included in the 2025 RTIP are also included in the Revenue Constrained Amended 2021 Regional Plan; and

That the adoption of the 2025 RTIP constitutes the Intergovernmental Review Procedures for those projects listed in the RTIP. The 2025 RTIP approval does not constitute project level design or environmental approval, which is conducted according to state and federal regulations; and

That the inclusion of any federally funded projects in the 2025 RTIP, including all amendments, constitutes the federal Expedited Project Selection Process procedures for the San Diego region, and any projects programmed in the RTIP may proceed to implementation without further project selection action by SANDAG; and

That the approval of the 2025 RTIP also constitutes the federal transit "designated recipient" approval of all Federal Transit Administration grant applications filed by the transit operators that are consistent with the RTIP project programming.

PASSED AND ADOPTED this 27th of September 2024.

# **Chapter 1**

# Executive Summary

# **Chapter 1 Executive Summary**

### **Overview**

The 2025 Regional/Federal Transportation Improvement Program is a multibillion-dollar, five-year program of major transportation projects funded by federal, state, local, and private funding, including the TransNet local sales tax, covering FY 2025 to FY 2029. The 2025 Regional Transportation Improvement Program (RTIP) development process, which includes the air quality emissions analysis for all regionally significant projects, requires approval by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA).

The 2025 RTIP is a prioritized program designed to implement the region's overall strategy for providing mobility and improving the safety, condition, and efficiency of the transportation system while reducing transportation-related air pollution. This is in support of efforts to meet federal performance-management targets, while also attaining federal and state air quality standards for the region. In addition, the 2025 RTIP incrementally implements San Diego Forward: The 2021 Regional Plan (2021 Regional Plan), the long-range transportation plan for the San Diego region approved by the Board of Directors on December 10, 2021.

# **Document Organization**

This document includes five chapters: Chapter 1 provides an overview of the document; Chapter 2 describes the RTIP development process, including federal, state, and TransNet transportation programming requirements; Chapter 3 contains the detailed listings of projects; Chapter 4 provides the financial capacity analysis; and Chapter 5 describes the air quality conformity analysis.

Also included are several appendices. Appendix A provides the listing of projects included in the various grouped-project listings. Appendix B provides the status of all non-carryover projects from the 2023 RTIP. Appendix C outlines the Expedited Project Selection Process, which allows SANDAG to move funding between the first quadrennial element to access prior-year funding or advance the implementation of certain projects different than their programmed dates. Appendix D provides the list of Regional Arterial System projects within San Diego County based upon the approved 2021 Regional Plan. Appendix E lists the projects exempt from regional air quality conformity analysis. Appendix F includes the detailed regional air quality emissions analysis report for non-exempt or Capacity Increasing (CI) projects. Appendix G is the social equity analysis that was performed on the 2025 RTIP. Appendix H focuses on how the projects included address federal performance management requirements. Appendix I describes the SANDAG Funding and Project Selection Process. Appendix J describes the congestion-management process for the federally funded CI projects on the Congestion Management Process Network. Appendix K describes the public participation process. Appendix L includes all public comments and responses. Appendix M is a checklist provided by Caltrans for items necessary to be included in the RTIP. Appendix N includes a glossary of terms and acronyms.

The 2025 RTIP also can be found at sandag.org/RTIP. This webpage is designed to provide background information as well as the latest updates to the program and relevant documentation.

# **Program Summary**

A summary of the major transportation projects is provided in Table 1-1. A map illustrating major transportation projects included in the 2025 RTIP is shown in Figure 1-1. The individual project listings included in Chapter 3 have been developed in coordination with Caltrans, San Diego Metropolitan Transit System, North County Transit District, local jurisdictions, other agencies, and various San Diego Association of Governments (SANDAG) stakeholders and working groups.

# **Financial Capacity Assessment**

Chapter 4 provides a financial capacity analysis of the major program areas. Based upon this analysis, the projects contained within the 2025 RTIP are reasonable when considering available funding sources.

For nonattainment and maintenance areas, the 2025 RTIP must be a revenue-constrained document, with programmed projects based upon committed funding for the first two fiscal years of the RTIP and/or reasonably available for the third fiscal year and beyond. Funding assumptions are generally based upon: (1) authorized or appropriated levels of federal and state funding from current legislation; (2) conservative projections of future federal and state funding based upon a continuation of current funding levels; (3) the most current revenue forecasts for the TransNet Program; and (4) the planning and programming documents of the local transportation providers.

The projects programmed in the 2025 Regional Transportation Improvement Program (RTIP), covering FY 2024/25 to FY 2028/29 are expressed in future dollars. That is, they have been escalated based upon anticipated inflation and other factors to the expected year of obligation or expenditure. For the State Transportation Improvement Program (STIP) and State Highway Operations and Protection Program (SHOPP), the revenues and program are based on the 2024 Fund Estimate adopted by the California Transportation Commission in August 2023.

The STIP is a multi-year capital improvement program of transportation projects on and off the State Highway System, funded with revenues from the Transportation Investment Fund and other funding sources. For the STIP and SHOPP, the revenues and program are based on the 2024 STIP Fund Estimate (STIP FE) adopted by the California Transportation Commission (CTC) in August 2023. The 2024 STIP FE includes a total estimate of \$2.9 billion in program capacity over the five-year FE period. STIP capacity over the 2024 five-year FE period has increased by 37 percent compared to the 2022 five-year FE period, mostly due to higher diesel sales tax revenues in the Public Transportation Account that are available for the STIP.

For the major transportation projects funded with the County transportation sales tax (TransNet), SANDAG forecasts inflation based on recent economic trends in conjunction with three, independent, nationally recognized forecasts related to economic growth. The U.S. Bureau of Labor Statistics reported that prices in the San Diego area, as measured by the Consumer Price Index for All Urban Consumers (CPI-U), advanced 0.4 percent for the two months ending in January 2024. The January increase was influenced by higher prices for shelter. Over the last 12 months, the CPI-U advanced 3.8 percent. Food prices increased 3.7 percent. Energy prices fell 11.6 percent, largely the result of a decrease in the price of natural gas service. The index for all items excluding food and energy increased 5.0 percent over the year.

SANDAG continuously monitors developments in funding programs and funding needs of transportation projects, as reflected by the RTIP project listing. For the TransNet Program of Projects, quarterly updates for each corridor are provided to both the Independent Taxpayer Oversight Committee (ITOC) and the Board of Directors. Any significant budget changes are reviewed by the SANDAG Transportation Committee and/or Board; if needed, SANDAG will take appropriate actions, such as an RTIP revision, to maintain the financial constraint of the RTIP. For the RTIP financial constraint tables, please refer to Chapter 4, Tables 4-1a to 4-1c.

The projects in the 2025 RTIP have been organized into categories that correlate with our Vision Strategy to communicate how we will invest the funds available to the region for the next five years. The Program Summary table below has been structured to illustrate the investment by Multimodal Corridor. All modes for the corridor are included in the corridor total. This table reflects all the funds on the projects, including prior funds. An additional column has been added to account for only the funds programmed for the five-year period of the RTIP.

Table 1-1: 2025 RTIP Program Summary (in \$000s)

Corridors

Subtotal Transportation Systems/Demand Management	\$118,701	\$38,763	\$153,004	\$34,993	\$345,460
Grand Total	\$6,887,116	\$5,399,202	\$6,266,926	\$3,419,934	\$21,973,178

As our region continues to move toward complete corridors that integrate all modes of travel, there is still an interest in how the program is distributed across modes. These charts reflect how the money in the 2025 RTIP is being allocated to different modes for both the total amount programmed and the dollars programmed in the five-year period of the RTIP. The funds in the Complete Corridors above have been broken down to Transit, Highway, and Multimodal. Multimodal facilities are generally highways with High-Occupancy Vehicle (HOV) lanes that support Bus Rapid Transit. The chart also illustrates the percentage of funds spent on Active Transportation, Local Streets and Roads, and Operations and Maintenance.

Figure 1-1: 2025 RTIP Program by Mode – All Years Including Prior

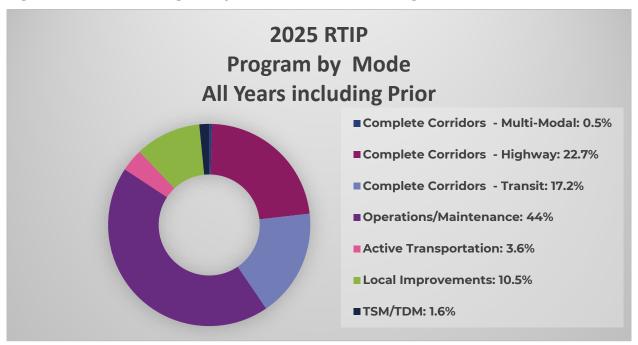

Figure 1-2: 2025 RTIP Program by Mode – Current RTIP Years (2025–2029)

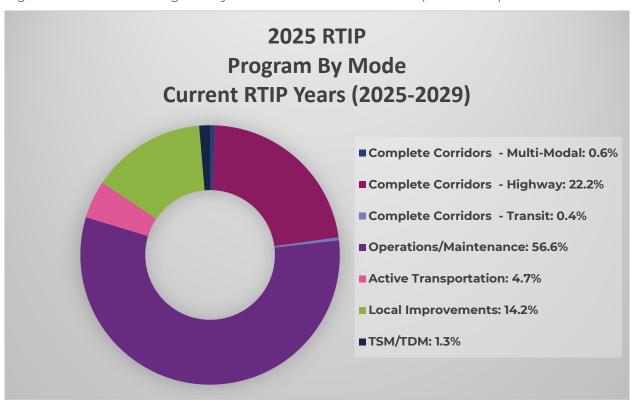

Figure 1-3: Map for 2025 RTIP Major Transportation Projects

## **Consistency with the Regional Plan**

On January 28, 2022, the FHWA and FTA issued a finding that the SANDAG Revenue Constrained 2021 Regional Plan is in conformance with federal air quality and planning regulations. The 2025 RTIP is consistent with the Revenue Constrained Amended 2021 Regional Plan and, as a financially constrained document, it contains only those major transportation projects listed in the Revenue Constrained Amended 2021 Regional Plan.

# **Air Quality Conformity Determination**

Federal metropolitan planning and air quality regulations prescribe the process for determining air quality conformity. These regulations require that the RTIP:

- 1. Include a quantitative emission analysis of projects programmed in the RTIP, including all regionally significant projects
- 2. Be within the region's emissions budgets included in the applicable State Implementation Plan (SIP)
- 3. Provide for the timely implementation of Transportation Control Measures (TCMs)

Quantitative air quality emissions analyses were conducted for the years 2026, 2029, 2032, 2040, and 2050 revenue-constrained transportation scenarios, as shown in Chapter 5. The results of these analyses were distributed to the San Diego Region Conformity Working Group (CWG) for review and comment on June 3, 2024.

The 2025 RTIP meets the conditions for determining conformity with the applicable SIPs for air quality. A detailed description of the regional emissions analysis and modeling procedures is included in Appendix F, while Chapter 5 of this report summarizes the air quality conformity analysis for the 2025 RTIP.

The 2025 RTIP programs substantial funds for the implementation of the four TCMs (identified as Transportation Tactics) in the 1982 SIP and 2016 RAQS, which have been fully implemented. The Transportation Tactics programmed for implementation are provided in Table 5-1, with approximately \$11.2 billion, or 51.28% of the total funds programmed. Included are \$110.4 million for Ridesharing, \$10.2 billion for Transit Improvements, \$725.4 million for Bicycle Facilities and Programs, and \$234.2 million for Traffic Flow Improvements. Based upon this analysis, the 2025 RTIP provides for the expeditious implementation of the existing TCMs in the 1982 SIP and 2016 RAQS, which remain the federally approved TCMs for the San Diego region.

Table 1-2: 2025 RTIP - San Diego Region (in \$000s) Transportation Tactics

Transportation Tactic	Amount
Transportation Demand Management (TDM)	
TDM	\$110,449
Subtotal TDM:	\$110,449
Transit Improvements	
Mid-Coast	\$2,371,134
Major Transit - LOSSAN Corridor	\$561,946
BRT	\$126,866
Purple/Blue Line	\$4,550
Ops/Maint - Transit	\$7,134,289
Subtotal Transit Improvements:	\$10,198,784
Bicycle Facilities	
Bicycle/Pedestrian Projects	\$725,450
Subtotal Bicycle Facilities:	\$725,450
Traffic Flow Improvements	
Transportation Management System/Intelligent Transportation System	\$234,260
Subtotal Traffic Flow Improvements:	\$234,260
Total Transportation Tactics in 2025 RTIP:	\$11,268,944
Total All Transportation Projects in 2025 RTIP:	\$21,973,178
Share of Transportation Tactics Projects in 2025 RTIP:	51.28%

# **Performance Management**

Moving Ahead for Progress in the 21st Century Act (MAP-21) (2012) includes provisions for the establishment of a performance- and outcome-based program, which includes national performance goals for the Federal-Aid Highway Program in several areas. This act established new requirements for Metropolitan Planning Organizations (MPOs) to coordinate with transit providers, set performance targets, and integrate those performance targets and performance plans into their planning documents by certain dates. All subsequent federal transportation acts carry forward Performance Based Planning and Programming. The federal performance measures under the FHWA are categorized into three performance-management (PM) groups:

- PM 1: Safety
- PM 2: Transportation Asset Management
- PM 3: System Reliability, Freight, Congestion, and Air Quality

In addition to the three FHWA PM groups, the FTA has established performance measures and reporting requirements for transit asset management and transit safety. Performance metrics for transit asset management focus on the maintenance of our regional transit system in a state of good repair. Transit agencies have developed Public Transportation Agency Safety Plans that include safety targets for specified performance measures. The 2025 RTIP prioritizes investments in safety, transportation infrastructure, system reliability, freight, Congestion Mitigation and Air Quality, transit assets, and transit safety. These are expected to contribute toward the achievement of the targets in each performance management area. Further details on the investment and types of projects contributing to improving performance management areas are included in Appendix H of the 2025 RTIP.

## **Public Participation**

It is the policy of SANDAG to engage public participation in the development of agency planning and programming activities. SANDAG has various working groups made up of stakeholders and other members of the public. The public is provided opportunities to participate via Board and committee meetings, SANDAG public notices of document availability and public hearings, and through the SANDAG public communications program. Presentations were provided to the Interagency Technical Working Group on Tribal Transportation Issues (Tribal TWG) and Community-Based Organizations (CBOs) requesting comments; additional details are described below. The projects included in the 2025 RTIP were discussed as part of the 2021 Regional Plan public outreach efforts and a public workshop held at SANDAG. Pursuant to 23 U.S.C. 134(i), the Board released the draft 2025 RTIP for public review and comment at its meeting on July 26, 2024, ending August 31, 2024, and scheduled a public hearing for the September 20, 2024, Transportation Committee meeting. These efforts also serve to satisfy the public participation process pertaining to the development of the Program of Projects for the FTA Section 5307 Urbanized Area Formula Program and FTA Section 5339 Bus and Bus Facilities Formula Program, including the provision for public notice and the time established for public review and comment.

Examples of public outreach efforts and ongoing participation include:

Independent Taxpayer Oversight Committee (ITOC): In conformance with the regional transportation sales tax TransNet Ordinance, the ITOC, a citizen advisory committee that oversees projects funded through the TransNet Program, was established. As the document through which SANDAG identifies TransNet-funded projects, the RTIP is reviewed by the ITOC, and its comments on the TransNet Program of Projects are conveyed to the Transportation Committee and ultimately to the Board.

Social Equity: For the development of the RTIP, SANDAG relied on the social equity analysis conducted through the development of the 2021 Regional Plan. Included in the process in developing the 2021 Regional Plan, SANDAG used performance measures to aid in making decisions intended to ensure compliance with Title VI requirements and environmental justice principles. This process included citizen representatives and CBO groups. The social equity analysis can be found in Appendix H of the 2021 Regional Plan.

Public Workshops/Outreach: SANDAG provided information about the RTIP and solicited feedback on the projects included in the draft 2025 document to CBOs through the Regional Plan Social Equity Working Group. In July 2024, information was provided to the Tribal TWG for solicitation and feedback on tribal funding, and to review the project information provided. In addition, as part of the development of the 2021 Regional Plan, multiple public workshops were provided in which SANDAG provided information regarding the RTIP. A series of subregional open houses and workshops, community-based outreach events, and an online comment tool provided a foundation to start developing the plan. More information on the outreach efforts for the Regional Plan can be found at sdforward.com.

Various workshops were held to give the community an opportunity to view maps, talk with planners, and provide comments on the draft 2021 Regional Plan.

Expansion of Electronic Notifications: In addition to the current list of external industry professionals, SANDAG continually strives to expand the notifications to other citizen--involved working groups. For the 2025 RTIP, SANDAG included tribal organizations and a regionwide network of CBOs representing low-income, senior, and disabled populations. The notice of the availability of the draft 2025 RTIP was also sent to Community Planning Groups. In addition, a notice for the public hearing was posted on the SANDAG website in English and Spanish. SANDAG continues to utilize social media outlets such as Facebook and Twitter to ensure maximum outreach.

To make the RTIP more accessible to the public, a public website was developed through ProjectTrak, an online application used by member agencies to enter projects and propose changes to the RTIP. This public website, available at projecttrak.sandag.org, allows users to view and search the most up-to-date versions of federally approved projects included in the SANDAG RTIP as well as amendments that are under development.

Appendix K in the 2025 RTIP describes the SANDAG public participation process and includes a copy of the latest Public Participation Policy (Board Policy No. 25), which contains the section specifically addressing the RTIP development and amendment process.

Public Participation Plan: The Public Participation Plan (PPP) reflects the commitment of SANDAG of public participation and involvement to include all residents and stakeholders in the regional planning and decision--making process. The PPP was developed in accordance with guidelines established by the FHWA for metropolitan transportation planning (23 CFR 450.316). It fully complies with Title VI related nondiscrimination requirements and reflects the principles of social equity and environmental justice. Included in the PPP are procedures, strategies, and outcomes associated with the ten requirements listed in 23 CFR 450.316 and is available at sandag.org/ppp.

## Status of Projects from the 2023 RTIP

When no funding is programmed in the current cycle (e.g., FY 2025 to FY 2029), the project is considered complete for purposes of the RTIP, even though construction may still be ongoing. These projects are either complete, open to traffic, or are currently in construction. There are instances where some projects may be included in the RTIP with no current cycle funding for informational purposes or for environmental purposes. There are several regionally significant projects that will not be carried over into the 2025 RTIP and are shown as complete for RTIP purposes. The projects over \$10 million are listed below:

- (CAL38C) SR125/905 Southbound to Westbound Connector \$29,861,000: This project designed and constructed a southbound SR 125 connector to westbound SR 905.
- (CAL325A) State Routes 905/125/11 Southbound Connectors \$73,662,000: This project involved the separation and construction of southbound connectors from State Route 125 to SR 905 and SR 11.
- **(SAN04) I-15 FasTrak® \$27,356,000:** This project added an Intelligent Technology Statewide Border Wait Time System and implemented a fiber optic cable network to facilitate an advanced traveler information and border wait time system connecting the entire San Diego and Imperial border network.
- (SAN27) San Ysidro Intermodal Freight Facility/South Line Rail \$87,194,000: This project expanded the freight yard, added storage racks, constructed a truck-loading staging area, and upgraded the freight railway, including the crossovers and signals.
- **(SAN46) Super Loop \$35,187,000:** This project added new Rapid bus service, traffic signal priority measures, signalized intersections, street modifications, rapid bus vehicles, and enhanced transit stops.
- (SAN163) Los Penasquitos Lagoon Bridge Replacement \$46,005,000: This project replaced three aging timber trestle railway bridges to maintain compliance with Federal Railroad Administration (FRA) standards and support intercity, commuter and freight rail services in the second busiest rail corridor in the nation.
- (SAN308) Purple Line Alternatives Analysis \$20,000,000: This project used data analytics to inform an Alternatives Analysis that identified a preferred alignment and mode of service that provides a direct and fast connection between densely populated communities along I-805 to major employment centers north of I-8.

There are projects included in the 2025 RTIP that may have already opened to traffic and continue to have funds programmed in the current RTIP cycle. Unlike the projects listed above, these projects were carried over into the 2025 RTIP because funds are programmed (for such purposes as landscaping). All other projects that did not carry over into the 2025 RTIP—because of project completion, delay, or deletion—are included in Appendix B.

# **Chapter 2**

# Chapter 2 Regional Transportation Improvement Program Development Process

This chapter discusses the federal, state, and TransNet programming requirements and the process used by SANDAG to develop this update. It also describes the process for amendments during this cycle.

# **Federal Transportation Requirements**

SANDAG is designated by the U.S. Department of Transportation (U.S. DOT) as the Metropolitan Planning Organization (MPO) for the San Diego region.

As the MPO, SANDAG must have a continuing, comprehensive, and coordinated transportation planning process to receive federal capital or operating funds. The planning process includes the development of: (1) a long-range—minimum of 20 years—transportation plan describing the policies, strategies, and transportation facility needs; and (2) a Federal Transportation Improvement Program (FTIP) covering at least a four-year period. As both the MPO and the state designated Regional Transportation Planning Agency (RTPA), the SANDAG Regional Transportation Improvement Program (RTIP) is equivalent to the FTIP.

Consistent with these requirements, on December 10, 2021, the Board of Directors adopted the Revenue Constrained 2021 Regional Plan (2021 Regional Plan). On January 28, 2022, the U.S. DOT approved and issued an air quality conformity finding for the Revenue Constrained 2021 Regional Plan. On October 13, 2023, the Board approved the Amendment to the 2021 Regional Plan and found the Amended 2021 Regional Plan in conformity with the requirements of the Clean Air Act and applicable SIP. On June 28, 2024, the SANDAG Board of Directors adopted the 2023 Regional Transportation Improvement Program (2023 RTIP) Amendment No. 13 and the Amended 2021 Regional Plan conformity redetermination. This conformity determination applied the reasonable further progress emission budgets from the 2020 San Diego SIP. Both the 2021 Regional Plan and the RTIP documents fulfill federal requirements.

Federal and state regulations identify the development process and required content for the programming document. In general, the RTIP must include all major projects receiving certain categories of federal or state transportation funding that need federal and/or state approval. The RTIP also must include Capacity Increasing (CI) projects and those projects that are identified as regionally significant. A regionally significant project (defined in 23 CFR 450.104) is a transportation project that is on a facility that serves regional transportation needs and would normally be included in the modeling of the metropolitan area's transportation network. The 2025 RTIP also includes the Program of Projects (POP) funded by TransNet, the local transportation sales tax program administered by SANDAG.

The 2025 RTIP indicates the region's priorities for the implementation of transportation projects. It is required to include realistic estimates of project costs and anticipated program revenue. It also must be a financially constrained program. This means that funding must be available and committed to implementing the projects listed in this document. As a result, all projects in the first two fiscal years must have dedicated funding, and projects in the out-years either must have a firm funding commitment or a reasonable strategy or expectation that funds will be available. In addition, all projects within the 2025 RTIP must be consistent with the 2021 Regional Plan. Finally, per federal requirements, the 2025 RTIP must be developed such that, once implemented, it makes progress towards achieving the performance-based targets set in seven areas as established in the Moving Ahead for Progress in the 21st Century Act and continued in subsequent transportation bills.

# **Air Quality Conformity**

On April 15, 2004, the U.S. Environmental Protection Agency (U.S. EPA) designated the San Diego air basin as nonattainment for the 1997 Eight-Hour Ozone Standard, effective June 15, 2004. Several areas that are tribal lands in eastern San Diego County were excluded from the nonattainment designation.

The air basin initially was classified as a basic nonattainment area under Subpart 1 of the Clean Air Act, and the attainment date for the 1997 Eight-Hour Ozone Standard was set as June 15, 2009. In cooperation with SANDAG, the San Diego County Air Pollution Control District (APCD) developed an Eight-Hour Ozone Attainment Plan for the 1997 Eight-Hour Ozone Standard, which was submitted to the U.S. EPA on June 15, 2007. The budgets in the Eight-Hour Ozone Attainment Plan for San Diego County were found adequate for transportation conformity purposes by the U.S. EPA, effective June 9, 2008.

However, on April 27, 2012, in response to a court decision, the U.S. EPA ruled that the San Diego basic nonattainment area be reclassified as a Subpart 2 moderate nonattainment area, with an attainment date of June 15, 2010. This reclassification became effective on June 13, 2012. Air quality data for 2009, 2010, and 2011 demonstrated that the San Diego air basin attained the 1997 Eight-Hour Ozone Standard; APCD prepared a Maintenance Plan with a request for redesignation to attainment/maintenance. On December 6, 2012, the California Air Resources Board (CARB) approved the Redesignation Request and Maintenance Plan for the 1997 National Ozone Standard for San Diego County for submittal to the U.S. EPA as a State Implementation Plan (SIP) revision. Effective July 5, 2013, the U.S. EPA approved California's request to redesignate the San Diego County ozone nonattainment area to attainment for the 1997 Eight-Hour Ozone National Ambient Air Quality Standard (NAAQS) and its plan for continuing to attain the 1997 ozone standard for ten years beyond redesignation.

On May 21, 2012, the U.S. EPA designated the San Diego air basin as a nonattainment area for the 2008 Eight-Hour Ozone National Ambient Air Quality Standard (NAAQS) and classified it as a Marginal area with an attainment date of December 31, 2015. This designation became effective on July 20, 2012. SANDAG determined conformity to the new standard on May 24, 2013, using the applicable model approved by the U.S. EPA to forecast regional emissions (EMFAC2011). The U.S. Department of Transportation (U.S. DOT), in consultation with the U.S. EPA, made its conformity determination on June 28, 2013.

Effective June 3, 2016, the U.S. EPA determined that 11 areas, including the San Diego air basin, failed to attain the 2008 ozone NAAQS by the applicable attainment date of December 31, 2015, and thus were reclassified by operation of law as Moderate nonattainment areas. States containing any portion of these new Moderate areas were required to submit State Implementation Plan (SIP) revisions to meet the statutory and regulatory requirements that apply to Moderate nonattainment areas, by January 1, 2017.

The San Diego County Air Pollution Control District (SDAPCD) submitted a SIP revision addressing Moderate area requirements to the California Air Resources Board (CARB) on December 27, 2016. CARB submitted the SIP revision document to the U.S. EPA on April 12, 2017. Effective December 4, 2017, the U.S. EPA found the motor vehicle emissions budgets for the Reasonable Further Progress milestone year of 2017 from the 2008 Eight- Hour Ozone Attainment Plan for San Diego County adequate for transportation conformity purposes for the 2008 ozone NAAQS.

On August 23, 2019, the U.S. EPA published a final rule in the Federal Register reclassifying the San Diego air basin by operation of law from a Moderate nonattainment area for the 2008 ozone NAAQS to Serious, effective September 23, 2019 (84 FR 44238). This rulemaking changed the 2008 ozone NAAQS attainment deadline to July 20, 2021, with an attainment year of 2020.

On October 26, 2015, the U.S. EPA published in the Federal Code of Regulation a new ozone NAAQS, referred to as the 2015 ozone standard. The new standard revised the allowable ozone level to 0.070 parts per million (ppm). The 2015 ozone standard became effective on December 28, 2015. On June 4, 2018, the U.S. EPA published a final rule that designated the San Diego region as nonattainment, with a classification of Moderate, for the 2015 ozone NAAQS, with an attainment deadline of August 3, 2024, and an attainment year of 2023.

At its May 24, 2019, meeting the Board adopted the 2015 Ozone National Ambient Air Quality Standard Conformity Demonstration for the 2018 Regional Transportation Improvement Program (2018 RTIP) and 2015 Regional Plan and found the documents, as amended, in conformity with the requirements of the federal Clean Air Act (CAA) and applicable SIP. The U.S. DOT, in consultation with the U.S. EPA made its conformity determination on June 21, 2019.

On November 19, 2020, CARB adopted the 2020 Plan for Attaining the National Ambient Air Quality Standards for Ozone in San Diego County (2020 SIP) developed by the SDAPCD, which addressed both the 2008 and 2015 ozone standards. Included in the San Diego 2020 SIP was a request for a voluntary reclassification to Severe nonattainment for both the 2008 and 2015 ozone NAAQS. The reclassification extended the timeline to meet the standards and aligned with air quality modeling. The reclassification was approved by the U.S. EPA on July 2, 2021. On June 4, 2021, the U.S. EPA posted on the Office of Transportation and Air Quality website the adequacy review and public comment on the 2008 and 2015 Eight-Hour Ozone Attainment Plan budgets. On October 4, 2021, the U.S. EPA published in the Federal Register the adequacy finding for the on-road transportation air quality budgets in the 2020 SIP with an effective date of October 19, 2021.

Effective July 2, 2021, the U.S. EPA approved the request from CARB to reclassify the San Diego air basin ozone nonattainment area to Severe for both the 2008 and 2015 ozone NAAQS. The reclassification of the 2008 ozone NAAQS from Serious to Severe changed the attainment date from July 20, 2021, (as a Serious area) to July 20, 2027, (as a Severe area) and the attainment demonstration year from 2020 to 2026. The reclassification of the 2015 ozone NAAQS from Moderate to Severe changed the attainment date from August 3, 2024, (as a Moderate area) to August 3, 2033, (as a Severe area) and the attainment demonstration year from 2023 to 2032. On October 4, 2021, the U.S. EPA published in the Federal Register the adequacy finding for the on-road transportation air quality budgets in the 2020 SIP with an effective date of October 19, 2021. On July 12, 2021, the 2020 SIP was found complete by the U.S. EPA by operation of law six months after the submittal date. On December 19, 2023, the U.S. EPA published in the Federal Register the proposed rulemaking approving the 2020 SIP.

On December 10, 2021, the Board adopted San Diego Forward: The 2021 Regional Plan (2021 Regional Plan) and found it along with the 2021 RTIP, as amended, in conformity with the requirements of the federal CAA and applicable SIP. The U.S. DOT, in consultation with the U.S. EPA, made its conformity determination on January 28, 2022. On October 13, 2023, the Board approved the Amendment to the 2021 Regional Plan and found the Amended 2021 Regional Plan in conformity with the requirements of the Clean Air Act and applicable SIP. On June 28, 2024, the SANDAG Board of Directors adopted the 2023 Regional Transportation Improvement Program (2023 RTIP) Amendment No. 13 and the Amended 2021 Regional Plan conformity redetermination. This conformity determination applied the reasonable further progress emission budgets from the 2020 San Diego SIP.

### **Performance Targets**

The 2025 RTIP must be designed such that once implemented, it makes progress toward achieving the performance targets established under 23 CFR 450.306. It shall include a description of the anticipated effect of the RTIP toward achieving the performance targets identified in the Regional Transportation Plan, linking investment priorities to those performance targets. Details of the various performance measurements, how targets are set, and how the RTIP projects address those targets are detailed in Appendix H of this document.

## **Congestion Management Process**

FHWA 23 CFR 450.322 requires that each Transportation Management Area (TMA) address congestion management through a process involving an analysis of multimodal metropolitan-wide strategies. SANDAG, as the designated TMA for the San Diego region, monitors the Congestion Management Process (CMP) for those federally eligible projects. The passage of Assembly Bill 2419 (Bowler, 1996) allows TMAs to "opt out" of the state CMP. In October 2009, the San Diego region elected to be exempt from the state CMP, and since this decision, SANDAG has been abiding by the federal requirement to ensure the region's continued compliance with the federal CMP.

The 2021 Regional Plan discusses several elements for use in the analysis of multimodal strategies, including: (1) performance monitoring and measurement of the regional transportation system; (2) multimodal alternatives and non-Single Occupancy Vehicle (SOV) analysis; (3) land use impact analysis; (4) the provision of congestion-management tools; and (5) integration with the RTIP process. For the 2025 RTIP, SANDAG monitors projects that add general-purpose lanes on the CMP network by requiring sponsors of these projects seeking federal funds to submit documentation that demonstrates the project was evaluated for multimodal alternatives, including non-SOV capacity improvements. The most recent federal congestion management process can be found in Appendix N to the 2021 Regional Plan and in Appendix J of this document.

### **Federal Funding Programs**

Federal funds programmed are based on the federal authorizing legislation, the Infrastructure Investment and Jobs Act (IIJA), which was signed into law on November 15, 2021. The Infrastructure Investment and Jobs Act includes anticipated appropriations through FFY 2025/26. These federal funding programs include the following:

- Congestion Mitigation and Air Quality Program (CMAQ)
- FTA Sections 5307 (Urbanized Formula Grant), 5310 (Capital Program), 5311 (Rural Transit) Programs, 5337 (State of Good Repair), and 5339 (Bus and Bus Facilities)
- Highway Safety Improvement Program (HSIP)/High-Risk Rural Roads Program
- Surface Transportation Block Grant Program, which is administered through the state and includes Regional Surface Transportation Program (RSTP) and Highway Bridge Program (HBP) funds
- Carbon Reduction Program (CRP)
- Highway Infrastructure Program (HIP)

Federal funding for the CMAQ and RSTP is apportioned by the state to the San Diego region by formula. As the MPO, SANDAG is responsible for administering the program and project selection based on priority established in the 2021 Regional Plan (see Expedited Project Selection Process in Appendix C).

CMAQ funds can be used for most categories of transportation projects that improve air quality, such as purchase of alternative-fuel transit vehicles, Transportation Demand Management (TDM) activities, transit operations, and high-occupancy vehicle facilities as provided in federal law. CMAQ funds cannot be used for projects that increase the transportation system's capacity for SOVs. RSTP funds can be used for state highway, local street and road, transit, bicycle, traffic signal, and TDM projects. Highway Infrastructure Program funds were apportioned by the U.S. DOT Appropriations Act of 2018 and can be used similarly to RSTP funds.

## **Federal Submittal Requirements**

Following approval by the Board, the final 2025 RTIP will be submitted to Caltrans for inclusion in the Federal State Transportation Improvement Program (FSTIP), which incorporates the Transportation Improvement Programs (TIPs) from other MPOs around the state. The 2025 RTIP will also be submitted to the FHWA, FTA, and the U.S. EPA for federal

approval of the air quality conformity determination. The FHWA and FTA approve the RTIP project programming as an element of the FSTIP.

The U.S. EPA acts as a commenting agency to the FHWA and FTA in the RTIP air quality conformity process. The 2025 RTIP may be amended by SANDAG as needed. However, any revisions that add or modify capacity-increasing, non-exempt projects require an air quality conformity redetermination. A listing of projects that are typically exempt from the air quality conformity determination is provided in Appendix E.

## **State Transportation Requirements**

In addition to serving as the federal MPO, SANDAG is designated by the State of California as an RTPA. RTPAs are responsible for implementing state laws regarding transportation planning and funding and ensuring that coordinated planning efforts meet both state and federal requirements. The 2025 RTIP is a document that meets both federal and state regulations and includes major projects receiving state transportation funds.

### **State Transportation Improvement Program**

The 2024 State Transportation Improvement Program (STIP) adopted by the California Transportation Commission (CTC) in March 2024 is the state's spending plan. The Infrastructure Investment and Jobs Act (IIJA) provides funding for a variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs. The Active Transportation Program (ATP) was created by Senate Bill 99 (Committee on Budget and Fiscal Review, 2013) and Assembly Bill 101 (Committee on Budget and Fiscal Review, 2013) to encourage increased use of active modes of transportation, such as biking and walking. The ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program, Bicycle Transportation Account, and State Safe Routes to School into a single program. ATP funds are administered by the CTC, with a separate program administered by the designated MPO, and projects are selected through a competitive process.

Pursuant to Senate Bill 45 (Kopp, 1997) (SB 45), the STIP is comprised of the Regional Improvement Program (RIP) and the Interregional Improvement Program (IIP). Under SB 45, SANDAG, as the RTPA, submits the RIP projects while Caltrans submits its IIP projects, in cooperation with SANDAG, to the CTC by December 15 of each odd-numbered year.

The CTC develops the STIP Fund Estimate (FE), which includes the RIP "County Share" and IIP fund allocations. The program is updated every two years and currently covers the five-year period 2024/25 to 2028/29. STIP-funded projects, like all other state and federally funded projects, must be listed in the RTIP for the sponsor agencies to access funding. The STIP consists of funds from the Transportation Investment Fund as well as from the Public Transportation Account and State Highway Account. Figure 2-1 illustrates the funding distribution.

**State Highway Account** (State and Federal Funds) 70% 30% Non-STIP Projects STIP Projects State Highway Operations Highways and Protection Program Transit (SHOPP): Local Projects Maintenance/Operations Support/Engineering Rehabilitation/Safety Administration Local Assistance Support Engineering Other 75% 25% RIP 40% 60% 60% 40% State North South Interregional Discretionary Counties Counties Program Program SANDAG

Figure 2-1: State Transportation Fund Allocation Process

Seventy-five percent (75%) of the STIP funds flow to the regions by formula, whereby the regional planning agencies are charged with developing an expenditure plan for the funds. Eligible project types include improvements to state highways, local roads, public transit, intercity rail, pedestrian and bicycle facilities, grade separations, transportation system management, TDM, soundwall projects, intermodal facilities, and safety. The regional share is further divided between northern (40%) and southern (60%) areas of the state.

Share (Approximately 6.4% of total RIP)

The remaining 25% of the funds flow through the IIP, which is a statewide competitive program administered by Caltrans. Sixty percent (60%) of the IIP shares are directed to projects that improve interregional transportation, and 40% is programmed at the discretion of the CTC subject to the north/south ratio identified above. Eligible project types include intercity passenger rail, mass transit guideways, grade separations, and state highways.

As the RTPA for the San Diego region, SANDAG is responsible for nominating projects to receive the region's share of regional STIP (STIP–RIP) funding (as discussed above). These projects in total must be constrained to the "County Share" or "target" funding amount specified in the STIP FE published by the CTC. Caltrans is responsible for nominating projects to be funded under the interregional STIP (STIP–IIP) statewide program. The CTC must approve the local projects proposed in the RIP and IIP by including them in the adopted STIP or a STIP amendment for these projects to receive funding.

For the STIP and State Highway Operations and Protection Program (SHOPP), the revenues and program are based on the 2024 STIP Fund Estimate (STIP FE) adopted by the California Transportation Commission (CTC) in August 2023. The 2024 STIP FE includes a total estimate of \$2.9 billion in program capacity over the five-year FE period. STIP capacity over the 2024 five-year FE period has increased by 37 percent compared to the 2022 five-year FE period, mostly due to higher diesel sales tax revenues in the Public Transportation Account that are available for the STIP.

For SANDAG, the priority for STIP-funded projects continues to be based upon the criteria approved by the Transportation Committee at its October 21, 2005, meeting. These criteria include:

- Complete projects currently programmed in the STIP
- Place particular emphasis on programming and completing TransNet Early Action projects
- Program projects at the earliest possible time they can be constructed or implemented
- Maintain existing STIP funding levels as a minimum on existing programmed projects
- Reflect the efforts by the region and Caltrans to complete some of these projects outside the STIP through other funding sources
- Additional programs created by SB1 provide competitive funds. SANDAG has successfully
  competed in two cycles and will continue to submit projects for future grant application
  cycles for state funds under the ATP, Transit and Intercity Rail Capital Program,
  Trade Corridor Enhancement Program, and Solutions for Congested Corridors Program.

The state-administered portion of the ATP is one of the components that would help the region meet its greenhouse gas emissions targets, with the expectation that this program will help fund a number of regionally significant bike projects. The final funding allocation for the statewide-funded ATP projects included in the 2025 RTIP rests with the CTC. The Board approves the regionwide ATP.

A major element of active transportation is the implementation of the Regional Bikeway Program. On September 27, 2013, the Board approved the Regional Bike Plan Early Action Program (Bike EAP), which prioritized regional bike projects to be funded with, among other programs, the TransNet Bicycle, Pedestrian, and Neighborhood Safety (BPNS) Program and the Transportation Development Act (TDA) Bike Program.

In addition, Caltrans develops the 2024 SHOPP, which is divided into six project groupings—bridge preservation, collision reduction, mandates, mobility, roadway preservation, and roadside preservation. Projects funded with STIP and SHOPP are programmed in the 2025 RTIP based upon the final CTC adoption.

### **State Submittal Requirements**

The RTIP, which includes the entire San Diego region's STIP-funded projects and all other federal and locally funded projects, must be submitted to Caltrans by September 30, 2024. Once submitted, the state will post for a 15-day public notice review before federal submittal.

## **TransNet Requirements**

TransNet is the local half-cent transportation sales tax funding program that was approved by San Diego voters in November 2004. As part of the TransNet Ordinance, all local agencies are required to submit a five-year TransNet POP for inclusion in the RTIP. Serving as the San Diego County Regional Transportation Commission (RTC), SANDAG is required to approve a multi-year TransNet POP, consistent with the RTIP update schedule, which identifies all major transportation projects proposed to use the sales tax funds over the multi-year period. To receive TransNet revenue, transportation projects must be included in the approved RTIP/TransNet POP.

The TransNet Program includes several subprograms. After deducting for administrative expenses (2%), 2% for BPNS Program projects, and \$250,000 (plus consumer price index) for the Independent Taxpayer Oversight Committee (ITOC), the remainder of the revenues is divided between Major Corridors, Local System Improvements, and Transit System Improvements. Under the TransNet Ordinance, the highway and transit major corridor projects were specified in the approved ballot measure. The schedule and funding of the major TransNet highway and transit projects are developed cooperatively by SANDAG, Caltrans, and the region's transit operators.

The Board-adopted Bike EAP prioritized regional bike projects to be funded with, among other programs, the TransNet BPNS and the TDA Bike Program. Additionally, the Board approved setting aside \$1 million per year to support local, non-motorized projects. Projects funded under the call for projects process with local agencies as the lead agency are generally listed as a grouped-project listing in the RTIP as Various Agencies. EAP projects are listed under SANDAG as the lead agency, which can be included in a group-project listing or individually listed. If a bike project is funded with federal or state funds in addition to the local TransNet or TDA bike funds, those projects can be listed individually by the sponsoring agency.

The San Diego region's 18 cities and the County developed the TransNet Program of local street and road projects. The local TransNet five-year POP is identified as part of the project listing located in Chapter 3. Per Section 6 of the TransNet Ordinance, the projects within each jurisdiction must be approved by each city council or the County Board of Supervisors, after holding a public hearing, in the form of a signed resolution. The TransNet Ordinance requires that this program of projects is updated every two years.

## **RTIP Development Process for TransNet**

Designated as the region's MPO and RTPA as well as the RTC, SANDAG has the overall responsibility for developing the required RTIP document. In a memo dated February 14, 2024, SANDAG requested that project sponsors review and update the projects for submittal for inclusion into the 2025 RTIP. The individual project listings included in Chapter 3 have been submitted by the project sponsors and reviewed for compliance by SANDAG.

The 2025 RTIP has been prepared with input and cooperation from Caltrans, the cities and County of San Diego, the Metropolitan Transit System, the North County Transit District, and the SANDAG Transportation Committee, as well as other technical and advisory working groups.

### **Public Participation**

SANDAG has provided ample opportunity for community involvement and interagency consultation in the development of the 2025 RTIP, and the SANDAG public participation process provides additional opportunity for public review and comment on the draft document prior to its adoption. Opportunities for community involvement and interagency consultation on the transportation projects included in the 2025 RTIP were provided through public meetings of the various SANDAG committees and working groups that are responsible for the development and oversight of the projects. These committees include the Transportation Committee, the Cities/County Transportation Advisory Committee, the Regional Plan Social Equity Working Group, Interagency Technical Working Group on Tribal Transportation Issues, ITOC, and San Diego Region Conformity Working Group.

At its July 26, 2024, meeting, the Board approved the distribution of the draft 2025 RTIP for a 30-day public comment period and scheduled a public hearing on the proposed final 2025 RTIP for the Transportation Committee meeting on September 20, 2024. Public comments received and their corresponding SANDAG responses have been included in Appendix L of this document. The Board adopted the final 2025 RTIP at its September 27, 2024, meeting. The 2025 RTIP is available at sandag.org/RTIP.

### **RTIP Amendment Process**

On occasion, circumstances may dictate changes to the current RTIP following its adoption. Federal regulations allow changes, or amendments, if the procedures are consistent with requirements for TIP development and with procedures for revisions to the FSTIP. SANDAG will consider such amendments when the circumstances prompting the amendments are compelling and when the changes will not adversely affect air quality conformity or financial constraint of the TIP. The proposed changes to projects also must be consistent with the rules of the funding program.

There are two types of processes to update the RTIP: (1) Administrative Modifications; and (2) Amendments (described in detail below). SANDAG generally processes amendments on a quarterly basis and administrative modifications on an as-needed basis. Both the 2025 RTIP and any amendment requests during the 2025 RTIP cycle that involve the TransNet Program must include the sponsor's governing board/council approval in the form of a signed resolution. The 2025 RTIP quarterly amendment schedule can be found at sandag.org/RTIP.

Caltrans currently approves amendments prior to federal approval, and is unable to approve an amendment, with exceptions to specific projects. There are circumstances, however, in which the amended projects may need revisions after SANDAG approval, should Caltrans object to the approval of a specific project. In such instances, SANDAG can revise the original submittal and resubmit the amendment.

#### **Administrative Modifications**

SANDAG received the delegation from Caltrans to approve administrative modifications for the FSTIP on July 30, 2019. The Board delegated its authority to the Chief Executive Officer. Administrative Modifications do not require federal approval. Federal agencies are notified of the updates for informational purposes. The streamlined approach helps expedite the approval process. Project requests that fall within the following criteria can be administratively amended:

- Revise a project description that does not change the scope of the project or conflict with the project environmental document, and wherein the project does not affect air quality or the timely implementation of Transportation Control Measures (TCMs) or impacts financial constraint
- Increase the funding amount up to 50% of the project cost, or \$20 million, whichever is less
- Change in funding source
- Change a project lead agency
- Split or combine individually listed projects as long as cost, schedule, and scope remain unchanged
- Change required information for grouped project (lump sum) listings
- Add or delete projects from grouped project (lump sum) listings with no limit on the changes to funding in grouped listings

### **Amendments**

Project requests that do not meet the Administrative Modification criteria require amendments. The conditions for amendments include, but are not limited to, the following:

- Add a new federal- or state-funded project or delete an existing federal- or state-funded project
- Shift funds from beyond the first four years (FY 2028/2029) to the quadrennial element (FY 2024/2025 through FY 2027/2028) or add funds to a new phase not already programmed
- The request would affect air quality conformity or the timely implementation of TCMs
- The request would require additional air quality emissions analysis and/or a new finding of air quality conformity by adding or deleting a CI project
- The request would impact the financial constraint of the RTIP
- The request would result in major changes in scope, design, and/or concept

Amendments require an action by the Transportation Committee (Board if the amendment requires redetermination of air quality), Caltrans, FHWA, FTA, and the U.S. EPA. Due to the lengthy process involved in determining air quality conformity, amendment requests for regionally significant CI projects requiring new emissions analysis will be scheduled on an asneeded basis (not on any regular schedule).

## **Grouped-Project Listings**

Grouped projects or lump sum line items are projects grouped under a specified work type (projects must be exempt from air quality conformity). The purpose is to provide flexibility where the individual implementation priorities are unclear. In cooperation with the MPOs around the state—Caltrans, FHWA, and the FTA—and based upon 40 CFR 93.126 Exempt Tables 2 and 3, an agreed-upon list of grouped-project listings was developed for use in the RTIP. Examples of some of the groupings include, but are not limited to, the following:

- Bike and Pedestrian Facilities/ATP
- Highway Bridge Program
- HSIP
- Highway Maintenance
- Minor Safety and Hazard Projects (SHOPP)
- Pavement Resurfacing and/or Rehabilitation (SHOPP)
- Rehabilitation/Reconstruction of Track Structures and Trackbed (Coastal Rail Corridor)
- TransNet Smart Growth and Senior Mini-Grant Programs

For each grouped-project listing in the RTIP, SANDAG maintains a detailed list of projects that comprise the grouped listing, which can be found in Appendix A or on the RTIP webpage here.

## **Participation by Federal Agencies**

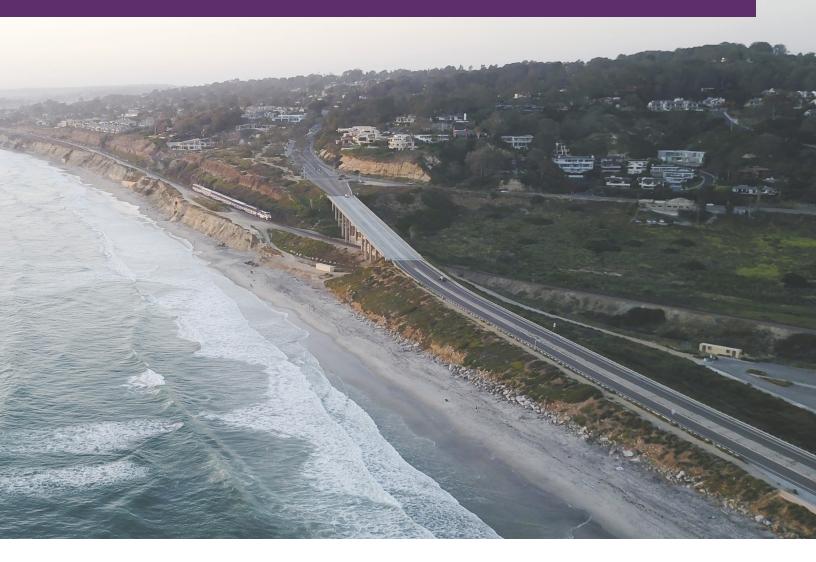

This report was funded in part through grants from the FHWA, FTA, and U.S. DOT. The views and opinions of SANDAG expressed herein do not necessarily state or reflect those of the U.S. DOT.

#### <u>Federal Land Management</u>

SANDAG prepared the 2021 Regional Plan and 2025 RTIP in consultation with the appropriate state and local representatives from environmental and economic communities, airport, transit, and freight; federal land management agencies; state and local agencies responsible for land use, natural resources, environmental protection, conservation and historic preservation; and federally recognized Native American Tribal Governments. SANDAG is committed to ensuring that the 2021 Regional Plan and 2025 RTIP are carried out serving the needs of our diverse communities while helping reduce greenhouse gas emissions. SANDAG has analyzed potential land use impacts to accommodate the San Diego region's population growth, future employment, and housing needs to sustain our economic prosperity and protect our sensitive habitats and resources.

## **Chapter 3**

## Project Listings

# **Chapter 3 Project Listings**

This chapter contains the individual project listings for those major transportation projects and programs proposed to use federal, state, TransNet, and other local funding. The listings are grouped by jurisdiction in alphabetical order. The listings include descriptive material (i.e., type of work, termini length, etc.); the anticipated federal, state, and local revenue sources; and the fiscal year of proposed work. An explanation of the project listing can be found in Figure 3-1.

Federally funded discretionary projects are based upon listings from federal appropriations. Programming levels for formula programs such as Federal Transit Administration (FTA) programs are based upon the urbanized areas estimate as provided in the Federal Register. Caltrans provided the estimated revenues for the Regional Surface Transportation Program (RSTP) and Congestion Mitigation and Air Quality Program (CMAQ) programs. Also included are state-funded projects, the TransNet local sales tax program (including short- and long-term borrowings), other local funding, and private sources.

## **Caltrans Highway Projects**

Caltrans is the project sponsor for most of the highway projects. California Senate Bill 45 (Kopp, 1997) requires that projects in the State Transportation Improvement Program (STIP) be programmed in six categories: (1) project approval and environmental document; (2) design; (3) construction engineering; (4) Right-of-Way (ROW) capital; (5) ROW support; and (6) construction capital to allow the California Transportation Commission to monitor the projects by these phases. However, for purposes of the SANDAG Regional Transportation Improvement Program (RTIP), projects are shown by fiscal year and in three phases: (1) Preliminary Engineering; (2) ROW; and (3) Construction. This provides enough detailed information for regional programming purposes and meets federal requirements.

Several highway programs are identified in the Caltrans listing as grouped projects. These state-administered programs, such as the Highway Bridge Program, State Highway Operations and Protection Program (SHOPP), and Highway Safety Improvement Program (among others) are identified by Caltrans headquarters office and administered by the local Caltrans district offices. All grouped projects listed are exempt for purposes of air quality. The list of individual projects that make up the grouped projects is available on the 2025 RTIP website at sandag.org/RTIP and can be found in Appendix A.

## **Local Agency Projects**

The 18 cities and the County of San Diego are the project sponsors for the local agency projects included in this chapter. The local agency listings, organized alphabetically by jurisdiction and Metropolitan Planning Organization (MPO) identification number, generally consist of regional arterial, local street and road, bicycle, and traffic signal improvement projects. The local agency projects include those funded by federal, state, TransNet, and other local funding programs.

## **Transit Projects**

Pursuant to California Senate Bill 1703 (Peace, 2002), all major regionally significant transit projects are implemented by SANDAG, with minor capital projects and operations continuing under the Metropolitan Transit System and North County Transit District. For all these projects, costs and revenues are listed by fiscal year for each project phase or for the total project.

## Other Regional and Miscellaneous Projects

SANDAG is also the project sponsor for other regional projects. The listing includes the Regional Transportation Demand Management Program, the Freeway Service Patrol Program, the Electric Vehicle Charging Program, and Intelligent Transportation System projects. Planning studies using federal funds and included in the Overall Work Program (OWP) are programmed in the RTIP.

Other project listings are included for project sponsors who are not members of SANDAG that have transportation projects within the San Diego region. These include projects from the San Diego Port Authority, the San Diego County Regional Airport Authority, Tribal Governments who are advisory members of the SANDAG Board, and other requesting agencies. Some projects are programmed because the fund source being used requires inclusion in the RTIP but are not included in our air quality conformity analysis. These projects are listed separately in Table 3-1a.

## **Federal Funding Requirements**

The federal revenue sources shown in this chapter are identified either by specific federal fund category (e.g., RSTP, CMAQ) or by the STIP and SHOPP funding programs. The specific federal fund categories and federal eligibility for the specific projects funded under the STIP and SHOPP are determined by Caltrans as part of a statewide fund-management activity.

The STIP and SHOPP projects listed in this chapter must include any required non-federal matching funds. In general, Caltrans provides the non-federal matching funds for STIP state highway projects, and local agencies provide the non-federal matching funds for local street and road projects. Also, agencies may use 100% federal funding when applicable and use toll credits as a soft match to fulfill the federal match requirements.

In order to receive federal funding, projects listed in this chapter must provide a minimum non-federal local match, depending on the type of federal funds. The federal participation rates range from 50% (FTA, etc.) to 91.57% (Interstate Highway Maintenance).

Full 100% federal funding is applicable for projects such as traffic control signalization, pavement marking, carpooling, and vanpooling, installation of traffic signs, traffic lights, guardrails, impact attenuators, concrete barrier end treatments, breakaway utility poles, and priority control system projects.

## **Status of Prior RTIP Projects**

Appendix B includes a list of projects from the previous RTIP that were not carried over into the 2025 RTIP. The status for each project is indicated in bold text. "Completed" indicates the project has opened to traffic or has begun construction and/or no money is programmed beyond FY 2023/2024. "Delayed" indicates that the project is ongoing but no new funding has been identified for the RTIP period or the agency has determined other priority projects to fund and may be brought back. "Deleted" indicates that the agency has decided to no longer pursue the project. With this appendix, every project from the previous RTIP is accounted for and provides a complete picture of each program's status.

## Consistency with San Diego Forward: The 2021 Regional Transportation Plan

In order to illustrate the level of consistency between San Diego Forward: The 2021 Regional Transportation Plan (2021 Regional Plan) and the RTIP and to provide additional information for each project, the individual project listing in the subsequent pages provides the following: the 2021 Regional Plan unique identification number or page number for those regionally significant projects, the Regional Arterial System as identified in the 2021 Regional Plan, the estimated total project cost, the Caltrans identification numbers, the federal earmark numbers, and TransNet-related identifiers. The RTIP Project Users Guide (Figure 3-1) points to the various sources of information provided for each project.

### **Advanced Construction**

For some of the major projects, as well as projects funded with federal funds, agencies programmed future funds using Advanced Construction (AC). Using the AC fund source allows agencies to front local or state funds in order to fully fund a phase or to advance the project with the anticipation of a future reimbursement once the federal funds become available. In order to provide an accurate project cost, the AC funds are shown as a negative number in the future reimbursement years, netting to zero, while the federal funds are shown as "Conversion," indicating the payback to the AC.

## **Toll Credits**

Toll credits would act as a soft match to federal funds indicated in the RTIP as part of the project description. Although the use of toll credits does not add new funding, it does offer agencies the flexibility to use certain projects with 100% federal funds, while other projects can be funded with 100% local funds.

In March 2014, updated guidance on the use of toll credits for FTA- and FHWA-funded projects was released by Caltrans. This update allows local agencies to use other federal funding to replace the required local match for both On-System Local Highway Bridge Program projects and Highway Safety Improvement Program projects. With this option, toll credits can be applied to each federal funding component in the project to increase the federal reimbursement rate to 100%.

#### **Glossary of Terms for Figure 3-1**

MPO ID RTIP project number

RTIP No. for the 2025 adoption shows as Adoption: 25-00; for all amendments following, this will

state the last amendment the project was approved (Ex. RTIP #: 25-01)

Title/Description name of the project/project information, including location, limits, and scope

EA NO/PPNO unique number assigned by Caltrans as the lead agency or for project oversight

RTP PG NO in order to show consistency between the plan and the program, provides the 2021

Regional Plan page number for reference - only applies to regionally significant projects

SANDAG ID SANDAG capital project or OWP number; provides reference to the SANDAG capital

budget

FUTURE This column includes funding which is programmed in future fiscal years to reflect the

total project cost

**Earmark No.** federal legislative number

RAS Regional Arterial System

CR/Main. for local TransNet-funded projects, identifies either congestion relief or maintenance

RT state route in which this project is located

Capacity Status indicates whether a project will increase system capacity (CI) or not (NCI); important for

regional air quality determination

**Exempt Category** based upon 40 CFR part 93.126 Exempt Tables 2 and 3

**Est Total Cost** sometimes the total program is less than the estimated total project cost because

additional funds are not required to be programmed, are programmed elsewhere, or the project is not yet fully funded; estimated total cost should always be consistent with the

2021 Regional Plan

Open to Traffic all non-exempt projects will have an estimated date when the project will be available for

public use; if project is exempt, the project will not have this information

Footnote indicated with an asterisk; any additional information pertaining to the project

## 2025 Regional Transportation Improvement Program San Diego Region (in \$000s)

within the traveled way (streets, alleys, sidewalks, bike paths). Projects may include rehabilitation of severely damaged areas and construction of a new structural pavement surface greater than 1-inch in depth, replacement of concrete alleys, construction of new or replacement of non-conforming sidewalks.

Locations are prioritized based on the most recent Pavement Management

Program and evaluation/recommendation by staff.

Project Title: Riverford Road Intersection at SR 67

ADOPTION: 25-00

TransNet - LSI: CR

Project Description: Intersection on SR 67 at Riverford Road and Woodside Ave - Improve the

intersection at Riverford Road and SR 67 with two roundabouts at Woodside Ave and N. Woodside Ave. The project will improve overall operations, circulation, and provide a more complete street that is accessible for all users at the SR 67 / Riverford Road Interchange. The proposed project will not increase the number of travel lanes at the project interchange intersections or the vehicle capacity of the roadway. This project will also provide sidewalk and bicycle lane continuity. Modifications to the SR 67 and Riverford Rd. interchange are necessary to improve local and regional traffic, facilitate transit services, and improve trail,

bicycle and pedestrian connectivity.

Project Title: Alvarado Canyon Road Realignment Project TransNet - LSI: CR

Alvarado Canyon Rd from Fairmount Ave to Alvarado Canyon Rd (.3 miles) -

Project will provide traffic congestion relief at the westbound I-8 freeway off-ramp/Fairmount Ave/Camino Del Rio North intersection and the adjoining street segments, and improved bicycle and pedestrian access within the project limits. The project also seeks to alleviate localized flooding through construction of an additional box culvert at the Fairmount Ave crossing over Alvarado Creek. The project will provide improved roadway geometrics, enhanced bikeways, widened sidewalks, enhanced cross-walk striping, improved roadway signing, dedicated bicycle/pedestrian traffic signals, and improved access to public transit

facilities. (CIP S-22005).

TransNet-L	Prop. A Local Transportation Sales Tax - Local Streets & Roads
TransNet-L (Cash)	TransNet - L funds which agencies have received payment, but have not spent
TransNet-LSI	Prop. A Extension Local Transportation Sales Tax - Local System Improvements
TransNet-LSI Carry Over	TransNet - LSI funds previously programmed but not requested/paid in year of allocation
TransNet-LSI (Cash)	TransNet - LSI funds which agencies have received payment, but have not spent
TransNet-MC	Prop. A Extension Local Transportation Sales Tax - Major Corridors
TransNet-MC AC	TransNet - Major Corridors - Advanced Construction; mechanism to advance TransNet funds to be reimbursed at a later fiscal year with federal/state funds
TransNet-REMP	Prop. A Extension Local Transportation Sales Tax - Regional Environmental Mitigation Program
TransNet-SGIP	Prop. A Extension Local Transportation Sales Tax - Regional Smart Growth Incentive Program
TransNet-SS	Prop. A Extension Local Transportation Sales Tax - Senior Services
TransNet-TSI	Prop. A Extension Local Transportation Sales Tax- Transit System Improvements

### **Chapter 4**

# **Chapter 4 Financial Capacity Analysis**

This chapter provides an analysis of the financial capacity of the San Diego region's transportation agencies to implement the programmed projects. Financial capacity is measured by a comparison of the total cost of the proposed projects against the assumed revenues and a test of the reasonableness of the revenue assumptions.

Separate analyses are provided for the state highway and local street and road projects, the Transit Program, and other transportation projects and programs. The assumptions used in the forecasts of available funding are based upon information provided in the 2024 State Transportation Improvement Program (STIP) Fund Estimate (FE) adopted by the California Transportation Commission (CTC), and other forecasts of ongoing transportation funding programs.

#### **Funding Assumptions**

The projects programmed in the 2025 Regional Transportation Improvement Program (RTIP), covering FY 2024/25 to FY 2028/29 are expressed in future dollars. That is, they have been escalated based upon anticipated inflation and other factors to the expected year of obligation or expenditure.

The State Transportation Improvement Program (STIP) is a multi-year capital improvement program of transportation projects on and off the State Highway System, funded with revenues from the Transportation Investment Fund and other funding sources. For the STIP and State Highway Operations and Protection Program (SHOPP), the revenues and program are based on the 2024 STIP Fund Estimate (STIP FE) adopted by the California Transportation Commission (CTC) in August 2023. The 2024 STIP FE includes a total estimate of \$2.9 billion in program capacity over the five-year FE period. STIP capacity over the 2024 five-year FE period has increased by 37 percent compared to the 2022 five-year FE period, mostly due to higher diesel sales tax revenues in the Public Transportation Account that are available for the STIP.

For the major transportation projects funded with the County transportation sales tax, TransNet, the San Diego Association of Governments (SANDAG) forecasts inflation based on recent economic trends in conjunction with three, independent, nationally recognized forecasts related to economic growth. Prices in the San Diego area, as measured by the Consumer Price Index for All Urban Consumers (CPI-U), advanced 0.4 percent for the two months ending in January 2024, the U.S. Bureau of Labor Statistics reported. The January increase was influenced by higher prices for shelter. Over the last 12 months, the CPI-U advanced 3.8 percent. Food prices increased 3.7 percent. Energy prices fell 11.6 percent, largely the result of a decrease in the price of natural gas service. The index for all items less food and energy increased 5.0 percent over the year.

The Board of Directors approved a revenue forecast for the County transportation sales tax, TransNet, on February 23, 2024.

## **Expenditures and Revenues Demonstration of Fiscal Constraint**

Tables 4-la to 4-lc provide a summary by major funding sources (i.e., federal, state, TransNet, and other local funds) for programs, expenditures, and balance of remaining revenues for the RTIP program period. The five-year project costs and programmed revenues are contained within the individual project listings in Chapter 3. Individual projects listed in Chapter 3 include phases where full funding is reasonably anticipated to be available within the time contemplated for completion of the phase or project.

#### **Financing**

With the approval by the voters of San Diego County of the TransNet Program, the Board approved a set of projects for accelerated implementation referred to as the TransNet Early Action Program (EAP). Since the initial list of EAP projects was approved in January 2005, the Board has added other regionally significant projects in subsequent meetings, which total 11. To accomplish this, SANDAG annually updates the TransNet Plan of Finance (POF), the financial strategy for implementing the EAP, which includes major corridor projects identified in the TransNet Extension Ordinance and Expenditure Plan. The POF is the debt-financing mechanism through which SANDAG plans to complete the EAP projects, providing much-needed congestion relief.

SANDAG firmly believes that the continuation of major transportation projects would benefit the regional economic outlook by providing jobs, containing costs (by avoiding cost increases associated with project delays), and providing congestion relief, which saves travel time. With the use of such financial tools as the Transportation Infrastructure Finance and Innovation Act (TIFIA), the financial strategies outlined in the TransNet POF, and other innovative mechanisms, SANDAG, with endorsement from its Board, fully intends to continue to aggressively promote early completion of transportation projects.

On November 22, 2019, the Board approved a new Bond Issuance to finance construction of the Bikeway EAP. First approved by the Board in 2013, the projects in the Bikeway EAP have been progressing through design, and as several of them are ready to begin construction, bonds were issued to finance the construction to lower costs and keep projects moving.

SANDAG actively monitors outstanding debt and has taken advantage of low interest rates to refinance outstanding bonds and lower borrowing costs, thereby freeing up more funds for capital expenditures and expects to continue to do so. However, based on current income projections and uncertain revenue due to the pandemic, SANDAG is approaching maximum debt-financing capacity and is transitioning to implementing projects on a pay-as-you-go basis.

#### **Program Revenues**

#### **Federal Revenues**

Federal funds programmed are based on the federal authorizing legislation; the Fixing America's Surface Transportation (FAST) Act was signed into law by the President on December 4, 2015, covering FY 2016/17 to FY 2019/20. While the Infrastructure Investment and Jobs Act adds significant funding, estimates are held at FAST Act levels until Congress passes a new appropriations bill. The 2025 RTIP will be amended as new estimates are available.

These federal funding programs include the following:

 Congestion Mitigation and Air Quality (CMAQ)/Regional Surface Transportation Block Grant (RSTBG) Program: Both the CMAQ and RSTP formula programs are estimated and apportioned by Caltrans for the San Diego region. By SANDAG Board practice, 90 percent of these funds are allocated to supplement and match the TransNet Major Corridors program funds to complete regionally significant projects in the San Diego region. These programs are continued under the IIJA with minor changes.

- Carbon Reduction Program (CRP): Funding under the Carbon Reduction Program (CRP) can be used for projects designed to reduce transportation emissions, defined as carbon dioxide (CO2) emissions from on-road highway sources. Under the FAST Act, the BIL directs FHWA to apportion funding as a lump sum for each State then divides that total among apportioned programs. Each State's CRP apportionment is calculated based on a percentage specified in law.
- Demonstration/High-Priority Projects: The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) included several San Diego region projects under the High-Priority Project Authorizations program. Projects are funded from the previous authorization; however, no new funds are included in the FAST Act. Annually since 2016, the FHWA releases guidance regarding repurposing projects funded with these discretionary funds; new projects may be proposed for these funds contingent upon approval by the FHWA.
- Federal Railroad Administration: The FAST Act includes authorization for rail programs for the first time in the surface transportation bill, which includes competitive discretionary grants and financing. SANDAG continues to apply for these competitive grants made available through the Consolidated Rail Infrastructure and Safety Improvement grant program, and the Federal-State Partnership for State of Good Repair Grant Program. SANDAG has been awarded an FRA State of Good Repair grant for the Del Mar Bluffs Stabilization project.
- FTA (Federal Transit Administration) Urbanized Area Formula (Section 5307): The FTA
   Section 5307 is a formula-based program. Section 5307 funds ongoing preventive
   maintenance, bus acquisition programs, the Regional Vanpool Program, office and shop
   equipment, and transit capital projects.
- FTA (Federal Transit Administration) Capital Investment Grant (Section 5309): The FTA Section 5309 is a competitive program commonly referred to as New Starts to fund capital investment in heavy rail, commuter rail, light rail, streetcars, and bus rapid transit. FTA and SANDAG entered into a full funding grant agreement in September 2016, with revenue operations commencing in November 2021.
- FTA Formula Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310): This program provides formula funding to increase the mobility of seniors and persons with disabilities. Eligible projects include both "traditional" capital investment and "non-traditional" investment beyond the Americans with Disabilities Act (ADA) complementary paratransit services. Eligible uses of these funds include capital and operating expenses for new public transportation services and alternatives beyond those required by the ADA, designed to assist individuals with disabilities and seniors.

- FTA Rural Area Formula Grants (Section 5311) Program: Section 5311 is administered by Caltrans and provides capital, planning, and operating assistance to support transit services in the non-urbanized areas of the region. Caltrans provides the estimates of revenues for the formula program and announces the award under the discretionary program on an annual basis.
- FTA State of Good Repair (Section 5337) Program: Section 5337 is a formula program. Eligible uses of the funds include replacement and rehabilitation of fixed Guideway assets including railcars, ferry vessels, buses operating in high occupancy vehicle lanes and related infrastructure.
- FTA Bus and Bus Facilities (Section 5339) Program: Section 5339 is a formula program. Eligible uses of these funds include bus and bus facility replacement, rehabilitation, expansion, and enhancement projects. These funds are distributed through formula based on urbanized areas by FTA based population, vehicle revenue miles and passenger miles as well as competitive grants for bus and bus facility projects that support low and zero-emission vehicles.
- Corridors and Borders Infrastructure: Under the FAST Act, up to 5 percent of the state's
   "any area" Regional Surface Transportation Program funds may be set aside for border
   projects. San Diego, as a major border region, has been highly competitive for these funds
   and continues to assume an 80 percent share of the state's set aside. The funds are
   awarded through the California Transportation Commission.
- Highway Bridge Program/High Risk Rural Roads/Highway Safety Improvement Program: These programs are administered by Caltrans at the statewide level. All funding is provided by Caltrans and programmed as a lump sum. The most recent cycle of Highway Safety Improvement Program (HSIP) funding is funded with 100% state dollars. These projects are programmed to support the RTIP's progress towards achieving Performance Management Goals for safety. Under the IIJA, up to 10 percent of HSIP funds can be used for non-infrastructure safety projects. It remains to be seen if California will continue to substitute state funds for HSIP.

#### **State Revenues**

State revenues are based on programming actions by the CTC and/or California State Transportation Agency.

• Active Transportation Program (ATP): This program is to provide for a variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs. The ATP consolidates existing federal and state transportation programs, including the Transportation Alternatives Program, Bicycle Transportation Account, and Safe Routes to School Program, into a single program. This program is nearly doubled with funding available from SB1. ATP funds are administered by the CTC, and the designated Metropolitan Planning Organization. Projects are selected through a multi-tier competitive process.

- California Air Resources Board's Cap-and-Trade Program: Funding from this
  program will go toward direct investments in transit programs that reduce
  Greenhouse Gas emissions and benefit disadvantaged communities throughout
  California and is supplemented with funds from SB1. The LOSSAN Corridor continues
  to receive funds from this program.
- Freeway Service Patrol: Funds are provided through the state legislature and supplemented by SBI. The Freeway Service Patrol (FSP) program costs and revenue estimates have been developed jointly by SANDAG, Caltrans, and the California Highway Patrol based upon the most current statewide FSP Act funding levels.
- STIP and SHOPP: The CTC programs the STIP and SHOPP on a statewide basis. The San Diego projects will be programmed in the RTIP based upon the approved 2024 STIP and 2024 SHOPP. The CTC staff recommendations for the 2024 STIP include programming through FY 2029 and cover the entire duration of this RTIP.
- Senate Bill 1 (SB1): Signed by the governor in April of 2017, the Road Repair and Accountability Act provides the first significant, stable, and on-going increase in the state's transportation funding in more than two decades. Guidelines have been developed for a variety of different funding programs with targeted objectives to relieve congestion, improve freight movement, provide local funds for roadway maintenance, and provide funds for regional projects to self-help areas. Funds are provided through both formula and competitive programs and are programmed based on CTC approved funding levels or awarded funds. Grant funds are programmed once they have been awarded by the CTC.
  - Formula Programs: The Local Partnership Program (LPP) directs approximately \$100 million annually through a 60%/40% split between a formulaic and competitive program for self-help counties. The State Rail Assistance program provides a consistent fund source for intercity rail and commuter rail. Funds are programmed for both capital and operations.
  - Competitive Programs: SB1 provides several competitive programs and adds funds to several other existing programs such as the Active Transportation Program. The Solutions for Congested Corridor Program (SCCP) provides funds to enhance transportation performance improvements in corridors that are part of a comprehensive multi-modal corridor plan. The Local Partnership Program (LPP) competitive portion is available to agencies that have approved or imposed taxes or fees solely for transportation purposes. Finally, the Trade Corridor Enhancement Program (TCEP) provides funding for infrastructure improvements along corridors with a high volume of freight movement. All competitive funds are programmed once they have been awarded by the CTC.

• State Transit Assistance: The State Transit Assistance (STA) budget provides funding for allocation to local transit agencies to fund a portion of the operations and capital costs associated with local mass transportation programs. STA allocations are based on sales tax generated from consumption of diesel fuel and pursuant to AB 1113 (Bloom, 2017) funds are allocated based upon the respective population of the two transit agencies' service areas. The State Controller's office is responsible for providing the estimates in January of each year. SB1 augmented STA funding by creating the State of Good Repair program within the STA Account. Eligible projects for SGR include transit maintenance, rehabilitation, and capital projects.

#### **Local Revenues**

The TransNet Ordinance specifies several sub-programs that augment the major transportation projects in the region including Major Corridors, Bicycle/Pedestrian, and local Transit programs, Local System Improvements, and an innovative program for early mitigation for projects – Environmental Mitigation Program – the first in the state to purchase Right-of-Way (ROW) early to reduce the cost of projects in the future while preserving the ecology of the region.

- TransNet Local Transportation Sales Tax Program: TransNet revenues are estimated based upon taxable retail sales forecasts derived from three factors influencing the growth in taxable retail sales: (1) the population forecast from the California Department of Finance; (2) a consensus (simple average) of three independent national forecasts of real rates of growth in per-capita retail sales (nationally recognized forecasts by IHS Markit, Moody's, and Oxford Economic Forecasting); and (3) the average projected inflation rates from the same independent sources. The SANDAG Board of Directors approved a revenue forecast for TransNet, on February 23, 2024.
- Local Agency Funding: The local agency revenues programmed are based on reasonably expected revenues as submitted by local agencies. Some local funding may include city and county local gas tax subventions, SB1 local streets and roads funds, developer fees, local public funds, and Proposition 42 funds administered by local agencies.
- Local Privatization/Toll Revenues: State Route 125 is a privatization/toll revenue road that provides toll revenues which fund other projects in the 2025 RTIP.
- Transportation Development Act: Although this is a state program, the Transportation Development Act (TDA) is administered locally. Funds are based on a one-fourth percent state sales tax, with revenues made available primarily for transit operating and capital purposes. The San Diego County Auditor's office estimates the apportionment for the upcoming fiscal year. SANDAG prepares forecasts of TDA based on a forecast of sales tax revenues for San Diego County which tie to the methodology used to forecast TransNet.

#### **TransNet Revenue Estimates**

The TransNet Ordinance and Expenditure Plan describe the process for allocating the sales tax program revenues to specified agencies and for selecting which major projects will be eligible to receive sales tax funding. Table 4-2 shows the current forecast of TransNet sales tax revenues to FY 2029.

The TransNet revenues programmed reflect the latest estimate of sales tax revenues based upon the SANDAG short-term forecast model. The programming of TransNet funds for local agencies is typically less than the TransNet receipts since a portion of the annual receipts is committed to bond debt service. Debt service information is provided as part of the annual Cash Flow Update sent to each agency at the beginning of the fiscal year.

#### **Other Transportation Program Revenues**

- Other Funds: These funds include contributions from various state funding sources, local agency contributions, federal discretionary grants, private sector funding, advertising income, investment earnings, passenger fare revenue, and other miscellaneous income. Revenues from these sources are based upon funding commitments from local agencies.
- **Financing:** The SANDAG Board issues long-term debt backed by TransNet to complete major transportation projects early including a Transportation Infrastructure Finance and Innovation Act (TIFIA) loan for the Mid-Coast project.

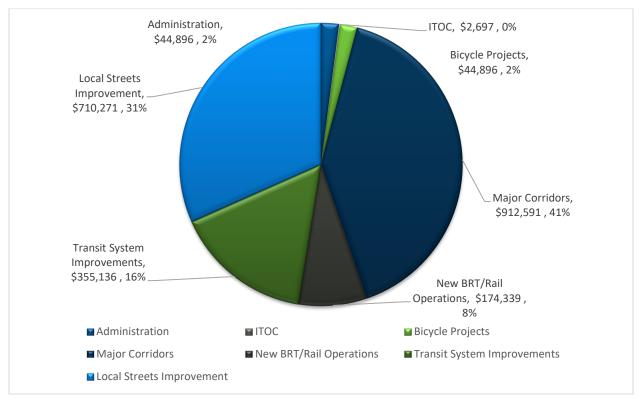

Table 4-2: TransNet Revenue Forecast FY 2025–2029 RTIP – San Diego Region (in \$000s of future dollars)

	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029	Total
Estimated Revenue <sup>1</sup>	\$434,040	\$439,252	\$444,822	\$457,507	\$469,208	\$2,244,829

<b>Total Program Allocations</b>	\$416,163	\$421,153	\$426,489	\$438,655	\$449,877	\$2,152,337

<sup>0.5%</sup> sales tax

Note: Revenue estimates are based upon FY 2025 TransNet budget and current SANDAG short-term forecasting model.

Figure 4-1: Total TransNet Revenue Forecast Breakdown FY 2025–2029 RTIP – San Diego Region (in \$000 of future dollars)

<sup>&</sup>lt;sup>2</sup> 2% maximum

#### **Operations and Maintenance Costs**

Although the RTIP is a program document that includes major transportation capital projects, 23 CFR 450.218(m) and 23 CFR 450.326(j) require that the RTIP financial chapter illustrate the costs and revenue sources to adequately operate and maintain highway, transit, and other federally funded public transportation systems projects.

#### **Transit Operating Costs**

Two transit districts provide transit service in San Diego County–North County Transit District (NCTD) and San Diego Metropolitan Transit System (MTS). NCTD services 1,020 square miles located in the northern portion of the county and provides commuter rail, light rail, fixed-route, general-purpose demand response, and ADA paratransit services. For FY 2025, NCTD estimates providing 8.8 million revenue service miles carrying 9.1 million passengers. MTS provides transit service in the remaining areas of the county. In addition to providing fixed-route and ADA paratransit services, MTS also operates the San Diego Trolley light rail system. MTS estimates carrying approximately 36.7 million passengers over 20.9 million annual service miles in FY 2025. Both NCTD and MTS provide these services on a coordinated basis.

Table 4-3a and 4-3b show the projected ongoing operating costs as developed by the two transit districts for the next five years. The current five-year forecast for MTS shows a deficit in fiscal years 2025 through 2029.

#### **Metropolitan Transit System**

Federal 5307 and 5337 funding levels are projected to increase by 2.1 percent through FY 2029. Cumulative total capital needs for the five-year period exceed the available projected funding levels. Total project needs over the five-year term are projected to be approximately \$2.4 billion. Projected deficits from FY 2026 to FY 2029 total \$350.7 million. MTS is using reserves to eliminate the deficit in FY 2025 and is weighing various options for eliminating the deficits in FY 2026 through FY 2029.

Table 4-3a: MTS Operating Costs and Revenues Forecast (in \$000s)

	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029	Total
Revenues	\$448,225	\$385,521	\$396,479	\$407,037	\$417,733	\$2,054,995
Less Expenses	\$448,225	\$464,760	\$482,385	\$497,338	\$513,059	\$2,405,767
Projected Deficit/Surplus	\$0	(\$79,239)	(\$85,906)	(\$90,301)	(\$95,326)	(\$350,772)

Source: Final Adopted MTS FY 2025 Operating Budget

#### **North County Transit District**

Slower growth of FTA, TDA, and TransNet formula funds is projected, representing approximately 50% to 60% of operating funds. Sales tax revenues grew by 29.1% in FY2023 and decreased to 3% in FY24, while projected growth for FY25 is 0.6%. Projected growth is less than 1% in FY26-FY27 and 2% in FY28-FY29. Sales tax collections have been essentially flat, despite above-average growth in consumer prices. NCTD expects higher operating and capital costs because of inflation. Formula funding will be primarily used for operations and maintenance, with more reliance to be placed on discretionary grants for state of good repair capital needs, causing a capital deficit. Pandemic relief funding is nearing an end, with an estimated carryover remaining of \$25 million for FY25-FY26.

Table 4-3b: NCTD Operating Costs and Revenues Forecast (in \$000s)

	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029	Total
Revenues	\$234,410	\$249,786	\$207,468	\$212,821	\$204,388	\$1,108,873
Less Expenses	\$234,410	\$249,786	\$207,468	\$212,821	\$215,962	\$1,120,448
Projected Deficit/Surplus	\$0	\$0	\$0	\$0	(\$11,575)	(\$11,575)

Source: Final Adopted NCTD FY 2025 Operating Budget

#### **Preventive Maintenance**

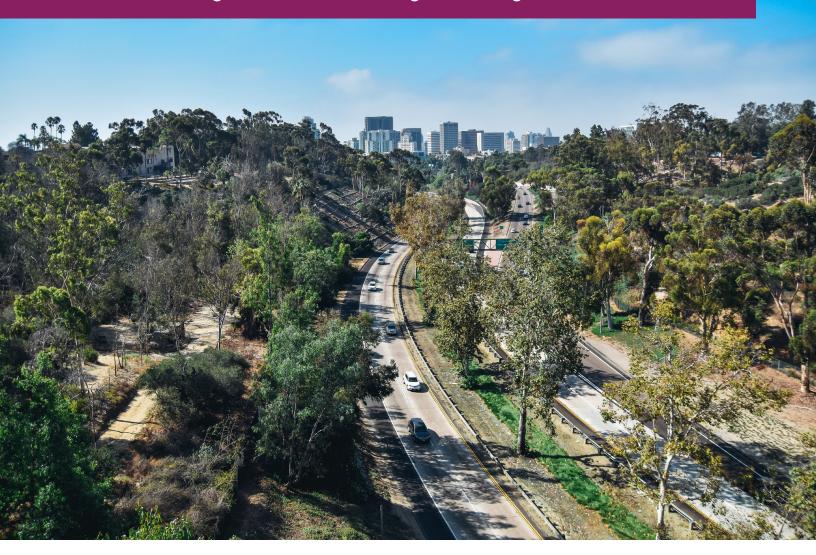

Preventive maintenance projects are projects that focus on maintenance of equipment, rolling stock, and facilities for bus and rail systems. Timely preventive maintenance activities are necessary to ensure proper performance of the transportation infrastructure and enhance safety and accessibility. MTS and NCTD have programmed a total of \$844.5 million for FY 2025–FY 2029. MTS32A and NCTD02 are programmed with \$540.3 million and \$304.2 million, respectively.

#### **Highway Costs**

Caltrans is responsible for the operations, maintenance, and rehabilitation of state highways in the San Diego region. Excluding capital projects, over the next five years, Caltrans estimates approximately \$95 million for operations and administrative costs and \$750 million for maintenance costs.

### **Chapter 5**

## Air Quality Conformity Analysis

# Chapter 5 Air Quality Conformity Analysis

## San Diego Air Basin Transportation Conformity Background

On May 21, 2012, the U.S. Environmental Protection Agency (U.S. EPA) designated the San Diego air basin as a nonattainment area for the 2008 Eight-Hour Ozone National Ambient Air Quality Standard (NAAQS) and classified it as a Marginal area with an attainment date of December 31, 2015. This designation became effective on July 20, 2012. SANDAG determined conformity to the new standard on May 24, 2013, using the applicable model approved by the U.S. EPA to forecast regional emissions (EMFAC2011). The U.S. Department of Transportation (U.S. DOT), in consultation with the U.S. EPA, made its conformity determination on June 28, 2013.

Effective June 3, 2016, the U.S. EPA determined that 11 areas, including the San Diego air basin, failed to attain the 2008 ozone NAAQS by the applicable attainment date of December 31, 2015, and thus were reclassified by operation of law as Moderate nonattainment areas. States containing any portion of these new Moderate areas were required to submit State Implementation Plan (SIP) revisions to meet the statutory and regulatory requirements that apply to Moderate nonattainment areas, by January 1, 2017.

The San Diego County Air Pollution Control District (SDAPCD) submitted a SIP revision addressing Moderate area requirements to the California Air Resources Board (CARB) on December 27, 2016. CARB submitted the SIP revision document to the U.S. EPA on April 12, 2017. Effective December 4, 2017, the U.S. EPA found the motor vehicle emissions budgets for the Reasonable Further Progress milestone year of 2017 from the 2008 Eight--Hour Ozone Attainment Plan for San Diego County adequate for transportation conformity purposes for the 2008 ozone NAAQS.

On August 23, 2019, the U.S. EPA published a final rule in the Federal Register reclassifying the San Diego air basin by operation of law from a Moderate nonattainment area for the 2008 ozone NAAQS to Serious, effective September 23, 2019 (84 FR 44238). This rulemaking changed the 2008 ozone NAAQS attainment deadline to July 20, 2021, with an attainment year of 2020.

On October 26, 2015, the U.S. EPA published in the Federal Code of Regulation a new ozone NAAQS, referred to as the 2015 ozone standard. The new standard revised the allowable ozone level to 0.070 parts per million (ppm). The 2015 ozone standard became effective on December 28, 2015. On June 4, 2018, U.S. EPA published a final rule that designated the San Diego region as nonattainment, with a classification of Moderate, for the 2015 ozone NAAQS, with an attainment deadline of August 3, 2024, and an attainment year of 2023.

At its May 24, 2019, meeting the Board adopted the 2015 Ozone National Ambient Air Quality Standard Conformity Demonstration for the 2018 Regional Transportation Improvement Program (2018 RTIP) and 2015 Regional Plan and found the documents, as amended, in conformity with the requirements of the federal Clean Air Act (CAA) and applicable SIP. The U.S. DOT, in consultation with the U.S. EPA made its conformity determination on June 21, 2019.

On November 19, 2020, CARB adopted the 2020 Plan for Attaining the National Ambient Air Quality Standards for Ozone in San Diego County (2020 SIP) developed by the SDAPCD, which addressed both the 2008 and 2015 ozone standards. Included in the San Diego 2020 SIP was a request for a voluntary reclassification to Severe nonattainment for both the 2008 and 2015 ozone NAAQS. The reclassification extended the timeline to meet the standards and aligned with air quality modeling. The reclassification was approved by U.S. EPA on July 2, 2021. On June 4, 2021, U.S. EPA posted on the Office of Transportation and Air Quality website the adequacy review and public comment on the 2008 and 2015 Eight-Hour Ozone Attainment Plan budgets. On October 4, 2021, U.S. EPA published in the Federal Register the adequacy finding for the on-road transportation air quality budgets in the 2020 SIP with an effective date of October 19, 2021.

Effective July 2, 2021, the U.S. EPA approved the request from CARB to reclassify the San Diego air basin ozone nonattainment area to Severe for both the 2008 and 2015 ozone NAAQS. The reclassification of the 2008 ozone NAAQS from Serious to Severe changed the attainment date from July 20, 2021, (as a Serious area) to July 20, 2027, (as a Severe area) and the attainment demonstration year from 2020 to 2026. The reclassification of the 2015 ozone NAAQS from Moderate to Severe changed the attainment date from August 3, 2024, (as a Moderate area) to August 3, 2033, (as a Severe area) and the attainment demonstration year from 2023 to 2032. On October 4, 2021, the U.S. EPA published in the Federal Register the adequacy finding for the on-road transportation air quality budgets in the 2020 SIP with an effective date of October 19, 2021. On July 12, 2021, the 2020 SIP was found complete by U.S. EPA by operation of law six months after the submittal date. On December 19, 2023, U.S. EPA published in the Federal Register the proposed rulemaking approving the 2020 SIP.

On December 10, 2021, the Board adopted San Diego Forward: The 2021 Regional Plan (2021 Regional Plan) found it along with the 2021 RTIP, as amended, in conformity with the requirements of the federal CAA and applicable SIP. The U.S. DOT, in consultation with the U.S. EPA, made its conformity determination on January 28, 2022. On October 13, 2023, the Board approved the Amendment to the 2021 Regional Plan and found the Amended 2021 Regional Plan in conformity with the requirements of the Clean Air Act and applicable SIP. On June 28, 2024, the SANDAG Board of Directors adopted the 2023 Regional Transportation Improvement Program (2023 RTIP) Amendment No. 13 and the Amended 2021 Regional Plan conformity redetermination. This conformity determination applied the reasonable further progress emission budgets from the 2020 San Diego SIP.

### **Demonstration of Fiscal Constraint**

The 2025 RTIP is consistent with the Amended 2021 Regional Plan. As a financially constrained document, the 2025 RTIP contains only those major transportation projects listed in the Revenue Constrained Amended 2021 Regional Plan. Chapter 4 of the 2025 RTIP includes detailed discussion on fiscal constraint and overall financial capacity to carry out projects included in the RTIP. Tables 4-1a through 4-1c are program summaries for the 2025 RTIP. Based on the analysis, the projects contained in the 2025 RTIP are reasonable when considering available funding sources.

### **Development of Transportation Control Measures**

In 1982, SANDAG adopted four Transportation Tactics as elements of the 1982 Regional Air Quality Strategy (RAQS). These Transportation Tactics are: (1) Transportation Demand Management (TDM); (2) transit improvements; (3) traffic flow improvements; and (4) bicycle facilities and programs.

These four Transportation Tactics were subsequently approved by the SDAPCD Board and are included in the 1982 SIP for Air Quality as Transportation Control Measures (TCMs). The U.S. EPA approved this SIP revision for the San Diego Air Basin in 1983. The four TCMs have been fully implemented, and continue to be funded, although the level of implementation established in the SIP has been surpassed.

The California CAA required the preparation of a 1991 RAQS, including TCMs. During 1991 and 1992, SANDAG, in cooperation with local agencies, transit agencies, and the SDAPCD, developed a TCM Plan. SANDAG approved the TCM Plan on March 27, 1992.

On June 30, 1992, the SDAPCD amended the TCM Plan and adopted the 1991 RAQS, including the amended TCM Plan. TCMs included in the 1991 RAQS include the four Transportation Tactics described above as well as a Transportation Demand Management (TDM) program, vanpools, high-occupancy vehicle lanes, and Park & Ride facilities. On November 12, 1992, CARB gave approval to the 1991 RAQS, including the TCMs.

The 1995 Triennial RAQS Update subsequently deleted the Employee Commute Travel Reduction Program contained in the TDM program because the program was no longer required under federal law. Assembly Bill 3048 (Statutes of 1996, Chapter 777) eliminated all state requirements for mandatory trip-reduction programs. As a result, the Student Travel Reduction Program, the Non-Commute Travel Reduction Program, and the Goods Movement/Truck Operation Program proposed in the 1991 RAQS were no longer statutorily mandated and were deleted from the RAQS in 1998. The 2001, 2004, 2009, and 2016 RAQS Revisions did not make changes to measures related to mobile sources or the TCM Plan.

### **Air Quality Conformity Requirements**

SANDAG—as the Metropolitan Planning Organization—and the U.S. DOT must determine that the 2025 RTIP and the Amended 2021 Regional Plan conform to the applicable SIP. Conformity to the SIP means that transportation activities will not create new air quality violations, worsen existing violations, or delay the attainment of the NAAQS.

Based upon the U.S. EPA's Transportation Conformity Rule, as amended, conformity of transportation plans and programs, including the 2025 RTIP, is determined according to the 1990 CAA Amendments [Section 176(c)(3)(A)] if the following is demonstrated:

- The 2025 RTIP provides for the timely implementation of the Transportation Tactics contained in the 1991 RAQs. These tactics also are included as TCMs in the 1982 SIP.
- A quantitative analysis is conducted on the cumulative emissions of projects
  programmed within the 2025 RTIP including all regionally significant, capacity-increasing
  projects. Further, implementation of the projects and programs must meet the motor
  vehicle emissions budget developed by local and state air quality agencies and be
  approved by the U.S. EPA. The 2025 RTIP must meet the applicable emission budgets
  prescribed in the 2020 Plan for Attaining the National Ambient Air Quality Standards
  which were found adequate for transportation conformity purposes by the U.S. EPA
  effective October 19, 2021, and which were approved by the U.S. EPA effective April 1, 2024.

- In addition to the required emissions tests, consultation with transportation and air quality agencies is required. The consultation process followed to prepare the air quality conformity analysis must comply with the San Diego Transportation Conformity Procedures adopted in July 1998.
- Interagency consultation involves SANDAG, SDAPCD, Caltrans, CARB, the U.S. DOT, and the U.S. EPA, which form the San Diego Region Conformity Working Group (CWG).

Consultation is a three-tier process that:

- 1. Formulates and reviews drafts through a conformity working group.
- 2. Provides local agencies and the public with opportunities for input through existing regional advisory committees and workshops.
- 3. Seeks comments from affected federal and state agencies through participation in the development of draft documents and circulation of supporting materials prior to formal adoption.

SANDAG consulted with the CWG for the preparation of the new air quality analysis of the 2025 RTIP. Conformity of the Amended 2021 Regional Plan also is being redetermined for consistency purposes.

The schedule for the development of the 2025 RTIP, and criteria and procedures for determining conformity, including revenue constrained financial assumptions and revenue strategies, were presented to the CWG on March 6, 2024. The draft list of projects was distributed to the CWG on April 29, 2024. Criteria and procedures for determining conformity, including latest emission model, emission budgets, regional growth forecast, SCS land use pattern, list of transportation projects, list of exempt projects, transportation control measures, and public involvement and outreach, were presented to the CWG on May 1, 2024. The results of the quantitative emissions analyses for the 2025 RTIP conformity determination and Amended 2021 Regional Plan redetermination were distributed on June 3, 2024, to the CWG for an initial review and 30-day comment period.

The draft 2025 RTIP and its conformity analysis and the Amended 2021 Regional Plan conformity redetermination were released for public review and comment on July 31, 2024. The conformity analysis will be brought to the SANDAG Board for consideration on September 27, 2024. The following sections provide a summary of the air quality conformity analysis of the 2025 RTIP and Amended 2021 Regional Plan in relation to the above conformity requirements.

### **Conformity Finding – Transportation Control Measures**

The first requirement of the air quality conformity finding is to provide for the expeditious implementation of adopted TCMs, which are also the Transportation Tactics included in the 1991 RAQS. These tactics are ridesharing, transit improvements, traffic flow improvements, and bicycle facilities and programs.

The 1982 SIP established the TCMs, which identified general objectives and implementing actions for each tactic. Due to substantial investments since 1982, SANDAG has fully implemented the TCMs. Ridesharing, transit, bicycling, and traffic flow improvements continue to be funded, although the level of implementation established in the SIP has been surpassed. No TCMs have been removed or substituted from the SIP.

The 2025 RTIP programs substantial funds for the implementation of the four TCMs (identified as Transportation Tactics) in the 1982 SIP and 2016 RAQS, which have been fully implemented. The Transportation Tactics programmed for implementation are provided in Table 5-1, with approximately \$11.2 billion, or 51.28% of the total funds programmed. Included are \$110.4 million for Ridesharing, \$10.2 billion for Transit Improvements, \$725.4 million for Bicycle Facilities and Programs, and \$234.2 million for Traffic Flow Improvements. Based upon this analysis, the 2025 RTIP provides for the expeditious implementation of the existing TCMs in the 1982 SIP and 2016 RAQS, which remain the federally approved TCMs for the San Diego region.

Table 5-1: 2025 RTIP - San Diego Region (in \$000s) Transportation Tactics

Transportation Tactic	Amount
Transportation Demand Management (TDM)	
TDM	\$110,449
Subtotal TDM:	\$110,449
Transit Improvements	
Mid-Coast	\$2,371,134
Major Transit - LOSSAN Corridor	\$561,946
BRT	\$126,866
Purple/Blue Line	\$4,550
Ops/Maint - Transit	\$7,134,289
Subtotal Transit Improvements:	\$10,198,784
Bicycle Facilities	
Bicycle/Pedestrian Projects	\$725,450
Subtotal Bicycle Facilities:	\$725,450
Traffic Flow Improvements	
Transportation Management System/Intelligent Transportation System	\$234.260
Subtotal Traffic Flow Improvements:	\$234,260
Total Transportation Tactics in 2025 RTIP:	\$11,268,944
Total All Transportation Projects in 2025 RTIP:	\$21,973,178
Share of Transportation Tactics Projects in 2025 RTIP:	51.28%

### **Conformity Finding – Quantitative Emissions Analysis**

The second requirement of the conformity finding is to conduct a quantitative emissions analysis for the 2025 RTIP. The emissions analysis must show that implementation of the 2025 RTIP and Amended 2021 Regional Plan meet the emissions budgets established in the 2020 SIP.

A quantitative emissions analysis was conducted according to the requirements established in the Transportation Conformity Rule under Section 93.122(b). Motor vehicle emissions forecasts were produced for the following analysis years:, 2026, 2029, 2032, 2040, and 2050.

Severe nonattainment area classification for the 2008 Eight-Hour Ozone Standard established 2026 as the attainment year and 2023 as a reasonable further progress demonstration year. The analysis years were selected to comply with 40 CFR 93.106(a)(1) and 93.118(a). According to these sections of the Conformity Rule, analysis years must include the attainment year (2026), the horizon year of the plan's forecast period (2050), and no more than ten years between analysis years (2032, 2040). Additionally, the first horizon year (2026) must be within ten years from the base year used to validate the transportation model (2016).

Severe nonattainment area classification for the 2015 Eight-Hour Ozone Standard established 2032 as the attainment year and 2023, 2026, and 2029 as reasonable further progress demonstration years. The analysis years were selected to comply with 40 CFR 93.106(a)(1) and 93.118(a). According to these sections of the Conformity Rule, analysis years must include reasonable further progress demonstration years (2026, 2029), attainment year (2032), the horizon year of the plan's forecast period (2050), and no more than ten years between analysis years (2040). Additionally, the first horizon year (2026) must be within ten years from the base year used to validate the regional transportation model (2016).

The SANDAG regional growth forecasts and transportation models, as well as the CARB emissions model, were used to generate the emissions forecasts. Transportation forecasts were developed using SANDAG's activity-based model (ABM). The ABM simulates individual and household transportation decisions that comprise their daily travel itinerary. It predicts whether, where, when, and how people travel outside their home for activities such as work, school, shopping, healthcare, and recreation. ABM outputs are used as inputs for regional emissions forecasts.

Emissions Factors, EMFAC2017 v1.0.3, was used to project the regional emissions for the 2025 RTIP and Amended 2021 Regional Plan conformity determination. On August 24, 2020, CARB released EMFAC2017 v1.0.3 to the public. On August 15, 2019, the U.S. EPA approved EMFAC2017 for use in conformity determinations. On November 15, 2022, the U.S. EPA approved EMFAC2021 for use in conformity determinations and set a two-year grace period for continued use of EMFAC2017, expiring on November 15, 2024 (87 FR 68483). Consistent with U.S. EPA rulemaking (87 FR 68483) and 40 CFR 93.111, EMFAC2017 was used to project the regional emissions for the air quality conformity analyses of the 2025 RTIP.

The 2025 RTIP and Amended 2021 Regional Plan air quality conformity analysis was conducted for the years 2026–2050. All the capacity-increasing improvements identified in the 2025 RTIP that are on the Regional Arterial System (as defined in the Regional Plan) or the Federal Highway Administration functional classification system (other principal arterials and higher classifications) were modeled.

Table 5-2 provides a summary of the results of the quantitative emissions analysis conducted for the 2025 RTIP and Amended 2021 Regional Plan using budgets from the 2020 SIP. The table demonstrates that the 2025 RTIP and Amended 2021 Regional Plan meet the budgets for the 2008 and 2015 Eight-Hour Ozone Standards. Projected ROG and NOx emissions for 2026, 2029, 2032, 2040, and 2050 are below the established SIP budgets.

Table 5-2: 2025 RTIP and the Revenue Constrained Amended 2021 Regional Plan Air Quality Conformity Analysis for 2008 and 2015 Eight-Hour Ozone Standards (EMFAC2017)

	Average	Average	RC	OG .	NC	Ox
Year	Weekday Vehicle Starts (1,000s)	Weekday Vehicle Miles (1,000s)	SIP Emissions Budget Tons/Day	ROG Emissions Tons/Day	SIP Emissions Budget Tons/Day	NOx Emissions Tons/Day
2026	11,527	85,432	12.1	11.5	17.3	14.9
2029	11,891	86,244	11.0	10.3	15.9	13.5
2032	12,278	87,360	10.0	9.2	15.1	12.6
2040	12,972	88,612	10.0	7.3	15.1	11.5
2050	13,668	89,765	10.0	6.7	15.1	11.9

Note: Emissions budgets from the 2020 Plan for Attaining the National Ambient Air Quality Standards for Ozone in San Diego County (October 2020) were found adequate for transportation conformity purposes by U.S. EPA, effective October 19, 2021, and were approved by U.S. EPA, effective April 1, 2024.

### Conclusion

Based upon an evaluation of projects and funds programmed and a quantitative emissions analysis, the 2025 RTIP and Amended 2021 Regional Plan meet the U.S. EPA transportation conformity regulations contained within the federal guidelines published on August 15, 1997, and subsequent amendments, as well as the requirements of the federal CAA of 1990.

# Appendix A Grouped Projects Detailed Project Listings

See the appropriate FTIP/FSTIP for current funding commitments. This listing provides the backup project information to support the lump sum amounts programmed in the FTIP.

10/20/2023, 9:17 AM

Notes: 1) This is the FTIP lump sum "backup" list for HBP funded projects. Please see the Local Assistance web site for the most current listings:

http://www.dot.ca.gov/hq/LocalPrograms/hbrr99/HBP FSTIP.html

- 2) The purpose of this list is to show which projects being advanced by local agencies have met the eligibility requirements of the federal Highway Bridge Program and have been prioritized for funding by the Department in cooperation with local agencies for funding.
- 3) Contractual funding levels are determined at time of federal authorization/obligation for given phase of work. For details see Chapter 3 of the Local Assistance Procedures Manual.
- 4) For FTIP/FSTIP purposes, Federal Highway Bridge Program (HBP) funding constraint is managed by Caltrans.
- 5) Prop 1B bond funds for the Local Seismic Safety Retrofit Program (LSSRP) used for matching federal funds are also managed by Caltrans.
- 6) Financial constraint of LOCAL matching funds (including regional STIP funds) and LOCAL Advance Construction (AC) is the responsibility of the MPOs and their local agencies.
- 7) Some projects show that they are programmed using State STP funds. These funds are HBP funds transferred to the STP for bridge work that is not ordinarily eligible for HBP funds. See the HB Program Guidelines for details. Do not confuse these STP funds with Regional STP funds.
- 8) Corrections to this report should be addressed to the District Local Assistance Engineer:

https://dot.ca.gov/programs/local-assistance/other-important-issues/local-assistance-contacts

See the appropriate FTIP/FSTIP for current funding commitments. This listing provides the backup project information to support the lump sum amounts programmed in the FTIP.

## Grouped Projects for TransNet Smart Growth Incentive Program(V10)

Project ID	Lead Agency	Project Title	Project Description	Prior Year	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029	Future	Total Cost
CNTY101	San Diego County	Community Based Transportation Program	Four (4) Neighborhood Mobility Plans for four (4) separate unincorporated areas which will analyze how to better connect to SANDAG's Mobility Hubs, and recommendations for future implementation actions.	\$350,000	\$250,000	\$250,000	\$0	\$0	\$0	\$0	\$850,000
EL40	El Cajon, City of	El Cajon Transit Center Community Connection Improvements	This project is the first phase of proposed improvements that will revitalize the Transit District by creating a sense of place and providing a direct link to transit by installing elements that will encourage smart growth such as wide sidewalks, enhanced crosswalks, thematic lighting, LID basins, streets trees, site furniture, a roundabout, bulb-outs, signage, and Class I bikeway approaches along Johnson Ave.	\$6,701,200	\$3,982,666	\$0	\$0	\$0	\$0	\$0	\$10,683,866
EL41	El Cajon, City of	Main Street - Green Street Gateway	Main St. is the primary access from the Transit Center to downtown El Cajon. To revitalize the corridor into an attractive "urban-forest" gateway, tree-lined widened sidewalks and Class IV bikeways, LID planters, signage, thematic site furnishing, and lighting are proposed. Also, upgraded bike and ped links to the transit center along Marshall will transform the corridor into an accessible and multi-modal Ave.	\$2,651,000	\$2,318,623	\$0	\$0	\$0	\$0	\$0	\$4,969,623
ESC48	Escondido, City of	Grand Avenue Vision Complete Streets Improvement Project	This project implements the Grand Avenue Vision Plan to improve Grand Avenue between Juniper and Escondido, including widened sidewalks, expanded outdoor dining areas, traffic circles, improved pedestrian crossings, market lighting and diagonal parking on one side of the street. Phase I was completed in 2022. Design for Phase II, that improves Grand between Maple and Juniper, is expected to be completed in November 2023. Funding is programmed in FY23/24 to complete Phase II. The five-year planning period shows continued funding toward Phase III of the project between Escondido Blvd and Maple St. Staff recommends that a concept design also be prepared to evaluate the potential expansion of the Vision Plan to extend from Centre City Parkway to Valley Blvd.	\$2,058,126	\$13,669,750	\$1,750,000	\$850,000	\$500,000	\$500,000	\$0	\$19,327,876
ESC54	Escondido, City of	Amendments and	The City of Escondido is completing amendments to the General Plan's Safety Elements and is creating a new Environmental Justice element. These amendments will reduce VMTs, increase environmental sustainability, and improve housing equity. REAP funds will be used for the environmental reviews required to implement these elements.	\$0	\$200,000	\$0	\$0	\$0	\$0	\$0	\$200,000

## Grouped Projects for TransNet Smart Growth Incentive Program(V10)

Project ID	Lead Agency	Project Title	Project Description	Prior Year	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029	Future	Total Cost
LG26	Lemon Grove, City of	Connect Main Street	The project will implement Phase 1 and Phase 2 of the SGIP funded Connect Main Street Plan, construction pedestrian and bicycle facilities from Broadway to San Miguel. It will enhance the north/south movement of people walking/biking by implementing a street conversion, D.G. pedestrian trail, shared-use path, pedestrian crosswalks, bulb outs, lighting, and landscape features.	\$439,188	\$1,090,000	\$972,294	\$0	\$0	\$0	\$0	\$2,501,482
SAN307	San Diego Association of Governments	Santee Specific Plan	Santee Specific Plan	\$160,247	\$239,753	\$0	\$0	\$0	\$0	\$0	\$400,000
SNT31	Santee, City of	Santee Town Center Specific Plan	The proposed project involves updating the goals, policies, and objectives of the General Plan, the Town Center Specific Plan, and the Arts and Entertainment District Overlay to promote and encourage new development including commercial, housing, and mixed-use development. In addition, the project involves expanding the geographic boundary of the Art and Entertainment District Overlay and amending the land use matrix to allow entertainment-oriented uses to provide unique local experiences, attract tourism, and promote economic revitalization. The project area positioning along the San Diego River and the Trolley Station increases the potential to create a focal point that provides a mixeduse activity center with residential, commercial, open space, and entertainment oriented uses. This grant would provide additional resources by supplementing the planning effort to update the 1986 Town Center Specific Plan which will encourage new investment and housing in the City of Santee.	\$750,000	\$50,000	\$0	\$0	\$0	\$0	\$0	\$800,000

## **Appendix B**

# Non-Carryover Projects from the 2023 Regional Transportation Improvement Program

2025 Regional Transportation Improvement Program FY 2025-2029

## Appendix B Non-Carryover Projects from 2023 Regional Transportation Improvement Program

SANDAG has a practice for Regional Transportation Improvement Program (RTIP) project listing wherein the status for each project from the previous RTIP is identified. If a project does not show any funding during the RTIP cycle – for the 2025 RTIP, FY 2024-2025 to FY 2028-2029 – then that project is considered non-active for purposes of programming. However, the sponsor agency may still consider the project active because there are ongoing activities. In order to still show these projects, SANDAG has provided certain status designations as follows for purposes of programming; sponsor agency designations may differ:

- **Completed**: the project opened to traffic or has begun construction; for federally funded projects, the project funding has been obligated; for state-funded projects, the funding has been allocated.
- **Delayed**: project is ongoing but using prior year funding; or the agency has determined there are other higher priority projects. Under either scenario, the project may be brought back into the RTIP as appropriate.
- **Deleted**: indicates that the agency has decided to no longer pursue the project and requested the project be deleted from the program.

Certain grouped projects or lump sum projects such as the State Highway Operations and Protection Program show up as completed in this appendix, but the same project titles may show up in Chapter 3 in the current 2023 RTIP. These completed grouped projects represent those projects within the lump sum that are complete, while those that are continuing or any new projects that were added to the lump sum are shown in Chapter 3.

The list of projects in the following pages fall under one of the above categories.

## 2025 Regional Transportation Improvement Program San Diego Region (in \$000s)

# Appendix C Expedited Project Selection Process

2025 Regional Transportation Improvement Program FY 2025-2029

### **Appendix C Expedited Project-Selection Process**

Federal Regulations 23 CFR 450.332 and Title 23 of the United State Code allow for the movement of projects within the quadrennial element of the Federal Transportation Improvement Program (FTIP), subject to the procedures agreed to by the cooperating parties. SANDAG, as the Metropolitan Planning Organization for the San Diego region, has in place a formal project-selection process agreed to by all of the region's partners, including the two transit districts.

SANDAG developed the project-selection process through numerous consultations and cooperation of our region's partners—Caltrans, North County Transit District, Metropolitan Transit System, and local agencies. The SANDAG Board of Directors formally adopted the process and criteria as part of the San Diego Forward: the 2021 Regional Plan (2021 Regional Plan) in December 2021; the 2021 Regional Plan is SANDAG's Regional Transportation Plan (RTP). The projects included in the 2025 Regional Transportation Improvement Program (RTIP) reflect the projects prioritized in the 2021 RTP via the project-selection process, and projects from the first four years of the 2025 RTIP (2025 FSTIP) have been selected using the approved project-selection procedures as outlined in Appendix I of this document. Projects in the quadrennial element are either already in construction or identified as ready to deliver. The project-selection criteria for these projects are derived from Appendix T from the boar RTP. This appendix describes the process for developing evaluation criteria for prioritizing transportation projects included in the 2021 RTP and the 2025 RTIP.

For projects within the State Transportation Improvement Program, SANDAG would advance projects subject to amendments or allocations approved by the California Transportation Commission.

For projects in which the State acts as the program manager, the decision for priority lies with the State. These programs include, among others, the State Highway Operation and Protection Program, Highway Bridge Program, Active Transportation Program, High-Risk Rural Roads Program, and Highway Safety Improvement Program.

San Diego Forward:
The 2021 Regional Plan
Appendix T
Transportation Project Evaluation
Criteria and Rankings (pages T6-T13)

#### Project Bundle Evaluation Criteria

An extensive effort to update the transportation project evaluation criteria was undertaken during the development of the 2021 Regional Plan, which involved a different approach than those developed for prior RTPs. In the past, SANDAG used transportation project evaluation criteria to prioritize projects by modal category (e.g., individual criteria for highway, transit service, active transportation, etc.). For the 2021 Regional Plan, multimodal bundles of projects were created to better reflect choices travelers face when traveling to and from regional destinations. For example, projects along the I-5 North Coast Corridor were grouped and included both transit and Managed Lane improvements. Evaluation criteria were developed to reflect plan goals and applied to each project bundle in the Vision network.

#### **Background**

Evaluation criteria were developed in three key areas:

- 1. Mobility and Safety
- 2. Environment and Quality of Life
- 3. Economy

The categories align with 2021 Regional Plan goals, which are:

- Fast: The efficient movement of people and goods
- Fair: Access to affordable, reliable, and safe mobility options
- Clean: Healthier air and reduced GHG emissions

#### Methodology

Travelers are increasingly making travel decisions based on a suite of transportation choices and linking these transportation modes together to improve trip experience (e.g., biking to the transit station or driving to the Park & Ride). The traditional approach of evaluating projects by modal category does not take the multimodal nature of the transportation system into account. For the 2021 Regional Plan, SANDAG developed a new methodology with multimodal evaluation criteria and projects.

Following the 5 Big Moves data-driven approach to develop a comprehensive and integrated transportation system, the project-evaluation criteria methodology relied on regional data and information analyzed with geospatial tools (ArcGIS) and spreadsheets (Excel).

#### Development of Project Bundles

The first step was to bundle the Unconstrained Transportation Network projects into project bundles that captured multimodal travel choices for regional routes. A two-phase process was followed first for the creation of the bundles and then for validation.

Murrieta Cahuilli leme cula an Clemente Riverside San Diego Fallbrook Camp Pendieton Marire Corps Base Valley Center condido Ramona La Presa 2021 Regional Plan Project Evaluation June 2020 O Transit Leap Stations 8-1 Transit Leap Network 8-1 Complete Corridors Managed Lanes Tijuana Mobility Hubs SanGIS, Bureau of Land Management, Esri, HERE, Garmin, USGS, NGA, 2 4 8 Miles

Figure T.1: Initial Evaluation Criteria Bundle Analysis

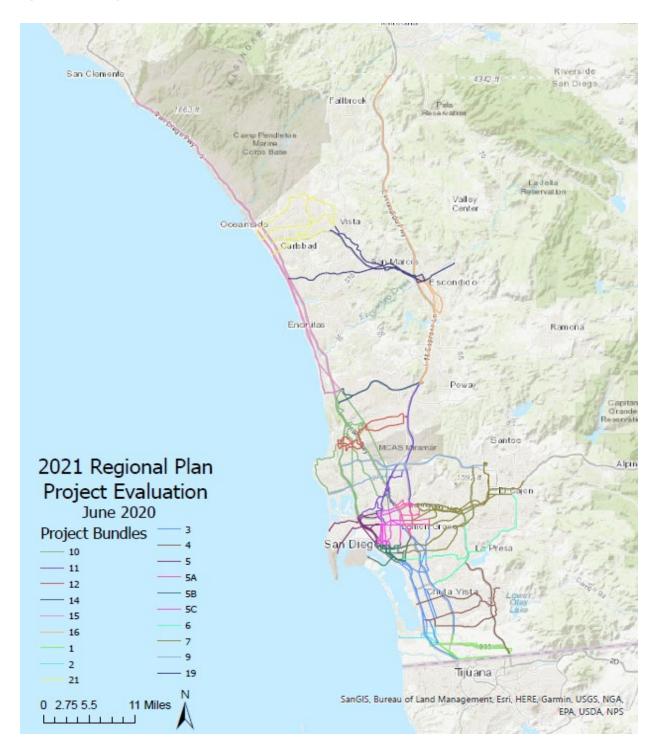

During the first phase, the following steps were followed to generate the project bundles:

- With the understanding that the 2021 Regional Plan Vision was developed to connect key origins and destinations, the work began by overlaying the highway network (Managed Lanes projects), Transit Leap, and Mobility Hub layers from the layer.
   See Table T3.1 in Attachment 3 to this appendix for further detail on data sources.
- 2. The network was then divided by major north–south (e.g., I-5 corridor, I-15 corridor, etc.) and east–west connections (e.g., SR 56, SR 52, SR 78, etc.).
- 3. Longer routes were separated at key regional destinations and Mobility Hubs, such as Sorrento Valley, Downtown, and El Cajon.
- 4. Parallel transit and arterial routes serving a similar north-south and east-west movement were grouped together to create bundles.
- 5. Areas with unique internal travel patterns and characteristics were separated (e.g., border crossing area, Imperial Beach, Downtown, and Oceanside).
- 6. Transit routes were separated at major station locations.
- 7. Complete Corridor Managed Lanes were separated in alignment with transit or at the point where they crossed into a different geography.
- 8. Although not reflected in Figure T.2, regional arterial projects within the bundle area are part of each bundle.
- 9. The project bundles were reviewed by staff and refined into the final GIS layer (for a total of 19 bundles). See Attachment 3.

In the second phase, regional origin and destination trip data acquired from Teralytics was used to validate travel patterns for each bundle. Teralytics determines origins and destinations based on cell tower data. These data are aggregated to Census tract geography and determine a trip to be completed when dwell time is longer than 30 minutes (no intermediate destinations or linked trips).

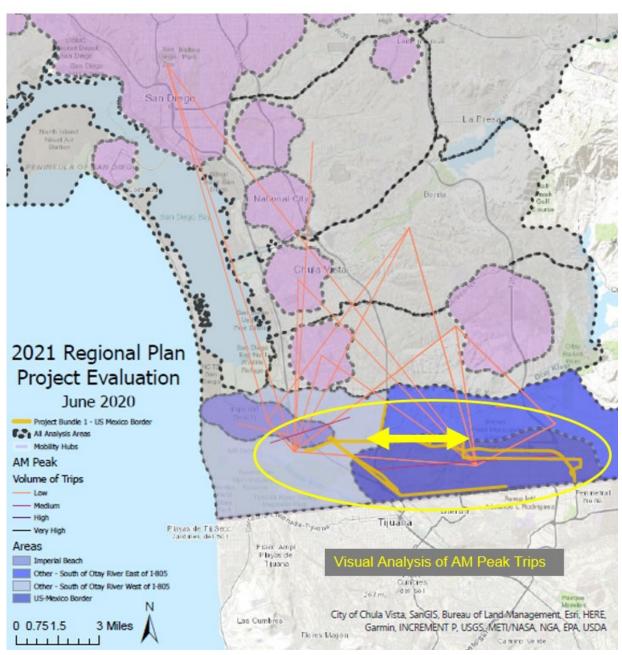

For processing feasibility, Teralytics data was filtered to weekday a.m. peak trip volumes, 6 a.m. to 9 a.m. Teralytics data was aggregated by Mobility Hub. The remaining trips were aggregated into larger "other" geographies delineated at Census tract boundaries to represent similar areas such as a jurisdiction. Natural breaks in the trip data (as identified by ArcGIS software) were used to aggregate trips into five trip-volume thresholds. For clarity, the lowest threshold (very low) is not displayed on the maps (sample shown in Figure T.3).

Figure T.2: Project Bundle Evaluation Corridors

For each bundle, trip data were filtered to show only trips that begin and end within each bundle area. A visual analysis was performed for each bundle. Most of the bundles clearly align with high volume travel patterns. Some of the bundles have lower trip volumes in general but are supporting routes or communities that are affected by regional travel patterns, including trips that have origins and destinations outside of the bundle area but use the corridor identified in the bundle. An example of this analysis is shown in Figure T.3.

#### Project Bundle Evaluation

The evaluation criteria were developed in parallel to the project bundles. Once project bundles were finalized and validated, the evaluation criteria were applied to each project bundle.

#### **Evaluation Criteria**

Indicators were developed for three categories: Environment and Quality of Life (EQL), Mobility and Safety (MS), and Economy (EC). Seventeen separate measures were defined. A weighting was assigned to each indicator (see Table T.2) based on the contribution and alignment of the criteria to the category along with a recognition of evaluation criteria weightings from prior efforts.

Table T.2: Evaluation Criteria

	Evaluation Criteria	
Criteria	Description	Weighting
Environment and Qua	ality of Life	35
EQL1 Access to Transit	People and jobs within a half mile of a transit station or within a Mobility Hub <sup>1</sup>	10
EQL2 Activity Centers	Activity Centers within a quarter mile of a transit station	3
EQL3 Network Connectivity	Number of direct connectors and direct access ramps	2
EQL4 Mode Availability	Measure of mode availability (in miles) for transit, Managed Lanes, and general-purpose lanes	2
EQL5 Bike and Pedestrian Access	Portion of projects that are located within a Mobility Hub <sup>2</sup>	3
EQL6 Communities of Concern	Communities of concern (seniors, minorities, low- income residents) within a half mile of a transit station or within a Mobility Hub	10
EQL7 Transit Access to Future Density	Number of transit stations located within Mobility Hubs <sup>3</sup>	5
Mobility and Safety		30
MS1 Person Peak Throughput Capacity (PTC)	Transit PTC (MS2) + Vehicle PTC (MS3) times vehicle occupancy	5
MS2 Transit PTC	Peak transit capacity (transit rider capacity per number of vehicles/headways per hour)	3
MS3 Vehicle PTC	Peak vehicle capacity (vehicles per lane per hour)	2

<sup>1</sup> Mobility Hubs offer increased services and infrastructure improvements to access transit.

<sup>&</sup>lt;sup>2</sup> Captures concentration of bicycle and pedestrian improvements focused in Mobility Hub areas.

Mobility Hub areas are used as a proxy for future density.

	Evaluation Criteria	
Criteria	Description	Weighting
MS4 Congestion	Travel time reliability and average peak hour of excessive delay per lane (NPMRDS data)	10
MS5 Safety	Safety incidents (fatalities, serious injuries, and visible injuries)	5
MS6 Transit Reliability	Transit reliability measured by miles of dedicated guideway and transit priority investments	5
Economy		15
EC1 Transportation Affordability	Estimated cost of travel	5
EC2 Jobs	Access to employment center	5
EC3 Freight	Relevance to National Highway Freight Network and other freight corridors; proximity to land uses relevant to freight movements (agriculture, industrial, commercial, etc.)	5
Cost-Benefit (Cost E	ffectiveness)	20
	Total	100

#### Evaluation Methodology

The evaluation of the bundles was performed over two phases. First, a geospatial analysis was performed for each indicator. Data results were exported to an Excel evaluation matrix that scored and ranked each bundle per the criteria in Table T.2. Detailed methodology performed for each indicator is found in Attachment 4. Results of this analysis are shown in Table T.3. The scores in Table T.3 represent the cumulative totals assigned per the criteria weightings shown in Table T.2. The highest possible score was 100 points, and the project bundles scored between 23.53 and 65.41. Since cost effectiveness (the measure of all the criteria divided by the cost of the projects in the bundle) can represent a significant weighting, scores are displayed both with and without the cost-effectiveness criteria.

Table T.3: Evaluation Results

Evaluation Results									
Evaluation Results									
Project Bundle	$\mathbf{N} \supset \mathbf{N} \cap \mathbf{A}$				Cost veness				
		Score	Rank	Score	Rank				
1	U.S.–Mexico Border	36.00	16	30.80	17				
2	Imperial Beach	26.91	18	23.53	19				
3	Border to Urban Core North–South	73.64	4	60.91	6				
4	Otay Ranch–Chula Vista	41.82	13	53.46	10				
5	Urban Core	67.37	5	57.90	8				
<b>5A</b>	Urban Core	58.18	9	58.54	7				
5B	Urban Core	74.26	3	65.41	1				
5C	Urban Core	64.33	6	55.47	9				
6	El Cajon–National City	31.28	17	35.03	16				
<b>7</b> <sup>4</sup>	El Cajon–Urban Core	76.30	2	65.04	3				
9	El Cajon-Pacific Beach	41.94	12	49.55	11				
10	Urban Core–Del Mar	79.21	1	65.37	2				
11	Urban Core–Sabre Springs	63.98	7	61.18	5				
12	Mira Mesa–University Community	51.92	11	41.54	13				
14	Poway–Carmel Valley	19.67	19	23.74	18				
15	Del Mar–Oceanside	54.63	10	45.70	12				
16	Sabre Springs–Escondido	41.42	14	41.13	14				
19	Escondido–Vista	60.23	8	62.19	4				
21	Oceanside–Vista	38.74	15	40.99	15				

During bundle refinement, bundles 8, 13, 17, 18, and 20 were combined with other bundles. Bundle 5 was split into four (5, 5A, 5B, and 5C).

# Appendix F Regional Emissions Analysis and Modeling Procedures

2025 Regional Transportation Improvement Program FY 2025-2029

#### **Appendix F:**

#### **Regional Emissions Analysis and Modeling Procedures**

#### **Executive Summary**

The San Diego Association of Governments (SANDAG), as the region's Metropolitan Planning Organization (MPO), must make a transportation air quality conformity determination for regional transportation plans (RTPs) and regional transportation improvement programs (RTIPs). The purpose of transportation conformity is to ensure that federally funded or approved activities are consistent with the State Implementation Plan (SIP). This ensures that no transportation activities will cause or contribute to new air quality violations, worsen existing violations, or delay the attainment of any relevant National Ambient Air Quality Standards (NAAQS). This report documents a demonstration of conformity for the proposed 2025 Regional Transportation Improvement Program (2025 RTIP) and a redetermination of conformity for the Amendment to the 2021 Regional Plan.

#### **Background**

The federal Clean Air Act (CAA), last amended in 1990, requires the U.S. Environmental Protection Agency (EPA) to set NAAQS for pollutants considered harmful to public health and the environment. California has adopted state air quality standards that are

more stringent than the NAAQS. I Areas with levels that violate the standard for specified pollutants are designated as Nonattainment Areas.

The U.S. EPA requires that each state containing nonattainment areas develop and adopt a SIP that meets the NAAQS by a specified attainment deadline. The San Diego County Air Pollution Control District (SDAPCD), in collaboration with the California Air Resources Board (CARB), prepares the San Diego section of the state's SIP. Once the standards are met, further plans—called Maintenance Plans—are required to demonstrate continued maintenance of the NAAOS.

SANDAG and the U.S. Department of Transportation (DOT) must determine that the 2025 RTIP and Amendment to the 2021 Regional Plan conform to the SIP for air quality.

Conformity to the SIP means that transportation activities will not create new air quality violations, worsen existing violations, or delay the attainment of the NAAQS. Conformity determinations are guided by U.S. EPA's Transportation Conformity rule (40 CFR 93.100 et seq.). This document demonstrates regional transportation conformity to the 2020 San Diego Ozone SIP (2020 SIP) for the 2008 and 2015 ozone NAAQS. The year of the SIP corresponds to the year SDAPCD developed the document.

While most California air quality standards are more stringent than those developed by U.S. EPA, the 2015 Eight- Hour Ozone standards are the same.

On November 19, 2020, CARB adopted the proposed San Diego Eight-Hour Ozone Attainment Plan SIP submittal, which addresses the 2008 and 2015 ozone standards. Included in the 2020 SIP is a request for a voluntary reclassification from Serious to Severe Nonattainment for the 2008 ozone standard and a voluntary reclassification from Moderate to Severe Nonattainment for the 2015 ozone standards as permitted under Section 181(b)(3). The reclassification extends the timeline to meet the standards and aligns with air quality modeling. The reclassification was approved by U.S. EPA on July 2, 2021. On June 4, 2021, U.S. EPA posted on the Office of Transportation and Air Quality website the adequacy review and public comment on the 2008 and 2015 Eight-Hour Ozone Attainment Plan budgets. On October 4, 2021, U.S. EPA published in the Federal Register the adequacy finding for the on- road transportation air quality budgets in the 2020 SIP with an effective date of October 19, 2021.

On July 12, 2021, the 2020 SIP was found complete by U.S. EPA by operation of law six months after the submittal date. On December 19, 2023, U.S. EPA published in the Federal Register the proposed rulemaking approving the 2020 SIP.

#### 2008 Ozone Standard

On May 21, 2012, the U.S. EPA designated the San Diego air basin as a Nonattainment Area for the 2008 Eight-Hour Ozone standard and classified it as a Marginal Area with an attainment date of July 20, 2015. This designation became effective on July 20, 2012.

SANDAG demonstrated conformity of the 2011 Regional Plan and 2012 RTIP to the 2008 ozone standard on May 24, 2013, using the applicable model approved by the U.S. EPA to forecast regional emissions (EMFAC2011). The U.S. DOT, in consultation with the U.S. EPA, made its conformity determination on June 28, 2013.

On June 3, 2016, the U.S. EPA determined that 11 areas, including the San Diego air basin, failed to attain the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015, and thus were reclassified by operation of law as Moderate for the 2008 ozone NAAQS (81 FR 26697). States containing these new Moderate Areas were required to submit SIP revisions that met the statutory and regulatory requirements that apply to 2008 ozone nonattainment areas classified as Moderate by January 1, 2017. The 2016 SIP addressed the required revisions.

On August 23, 2019, U.S. EPA published a final rule in the Federal Register reclassifying the San Diego air basin by operation of law from a Moderate Nonattainment Area for the 2008 ozone NAAQS to Serious, effective September 23, 2019 (84 FR 44238). This rulemaking changed the 2008 ozone NAAQS attainment deadline to July 20, 2021, with an attainment year of 2020.

Effective July 2, 2021, U.S. EPA approved the request from the State of California to reclassify San Diego County ozone Nonattainment Area from Serious to Severe for the 2008 Eight-Hour Ozone Standard. The reclassification of the 2008 Eight-Hour Ozone Standard from Serious to Severe changed the attainment date from July 20, 2021, (as a Serious area) to July 20, 2027, (as a Severe area) and the attainment demonstration year from 2020 to 2026.

#### 2015 Ozone Standard

On October 26, 2015, the U.S. EPA announced a revised ozone standard, referred to as the 2015 Ozone standard (80 FR 65292). The new standard revised the allowable ozone level to 0.070 parts per million (ppm). The 2015 ozone standard became effective on December 28, 2015. On June 4, 2018, U.S. EPA published a final rule that designated the San Diego air basin as nonattainment, with a classification of Moderate, for the 2015 ozone NAAQS with an attainment deadline of August 3, 2024, and an attainment year of 2023 (83 FR 25776, effective August 3, 2018).

On May 24, 2019, the SANDAG Board of Directors adopted the 2015 Ozone National Ambient Air Quality Standard Conformity Demonstration for San Diego Forward: The Regional Plan (2015 Regional Plan) and the 2018 RTIP. The conformity demonstration found the 2015 Regional Plan and 2018 RTIP, as amended, in conformity with the requirements of the federal Clean Air Act and applicable SIP. The U.S. DOT, in consultation with U.S. EPA, made its conformity determination on June 21, 2019, indicating that all air quality conformity requirements have been met, including those for the 2015 ozone standard.

Effective July 2, 2021, U.S. EPA approved the request from the State of California to reclassify San Diego County ozone Nonattainment Area from Moderate to Severe for the 2015 Eight-Hour Ozone Standard. The reclassification of the 2015 Eight-Hour Ozone Standard from Moderate to Severe changed the attainment date from August 3, 2024, (as a Moderate area) to August 3, 2033, (as a Severe area) and the attainment demonstration year from 2023 to 2032.

#### **Carbon Monoxide Standard**

The San Diego region had been designated by the U.S. EPA as a federal maintenance area for the Carbon Monoxide (CO) standard. On November 8, 2004, CARB submitted the 2004 revision to the California SIP for CO to the U.S. EPA, which extended the maintenance plan demonstration to 2018. Effective January 30, 2006, the U.S. EPA approved this maintenance plan as a SIP revision. On March 21, 2018, the U.S. EPA documented in a letter that transportation conformity requirements for CO would cease to apply after June 1, 2018. Therefore, this attachment does not include a CO conformity analysis.

# Conformity Determinations for 2021 Regional Plan, and the Amendment to the 2021 Regional Plan

On December 10, 2021, the Board approved the 2021 Regional Plan and found the 2021 Regional Plan in conformity with the requirements of the CAA and applicable SIP. U.S. DOT, in consultation with U.S. EPA, made its conformity determination on January 28, 2022. On October 13, 2023, the Board approved the Amendment to the 2021 Regional Plan and found the Amended 2021 Regional Plan in conformity with the requirements of the CAA and applicable SIP.

#### **Transportation Conformity: Modeling Procedures**

The 2025 RTIP is consistent with the Amended 2021 Regional Plan. As a financially constrained program, the 2025 RTIP only contains major transportation projects listed in the Revenue Constrained Amended 2021 Regional Plan that are being implemented in the five- year 2025 RTIP period. Table F-9 includes the conformity analysis for both the 2025 RTIP and the conformity redetermination for the Amended 2021 Regional Plan. In addition, this conformity determination fulfills the requirement of California Senate Bill 375 (Steinberg, 2008), which requires a Sustainable Communities Strategy (SCS) to allow for compliance with Section 176 of the CAA. (California Government Code Section 65080[b][2][B][viii]).

The following sections provide an overview of models, modeling inputs, and processes used in transportation conformity.

#### **Growth Forecasts**

Every three to five years, SANDAG produces a long-range forecast of population, housing, and employment growth for the San Diego region. The process relies upon an integrated forecasting model. The first element is the San Diego Demographic and Economic model, which provides a detailed socioeconomic forecast for the region. Next, the regionwide data are allocated to the parcel level based upon the forecasted development pattern for the

2021 Regional Plan SCS land use pattern, which must use the most recent planning assumptions considering local general plans and other factors. This includes current plans and policies of the jurisdictions and increasing density near transit and job centers, consistent with regional goals for sustainability, mobility, housing affordability, and economic prosperity. The parcel-level forecast data can be aggregated up to larger subregional areas of interest. The Series 14 Regional Growth Forecast assumptions were presented to the Board on May 25, 2018. At its July 10, 2020, meeting, the Board adopted the 6th Cycle Regional Housing Needs Assessment Plan, which allocated the regional housing needs at the subregional level.

In 2022, anomalous traffic counts and employment at some large employment location sites and Traffic Analysis Zones (TAZs) were identified and corrected, and the Series 14 Regional Growth Forecast was updated to incorporate these corrections. The corrected inputs resulted in slight changes to regional employment figures and more concentrated employment across a handful of sectors at a limited number of employment locations; previously employment had been more dispersed across the region. These corrections resulted in a regional vehicle miles traveled (VMT) increase. Total regional numbers for population and housing units in the Series 14 Regional Growth Forecast were not changed by the corrected inputs.

On May 1, 2024, SANDAG consulted with the San Diego Region Conformity Working Group (CWG) on the use of the Series 14 Regional Growth Forecast, SCS land use pattern, as corrected, for the air quality conformity analyses of the 2025 RTIP conformity determination and the Amendment to the 2021 Regional Plan conformity redetermination. Previously, both the U.S. DOT and the U.S. EPA concurred that approved plans should be used as input in the air quality conformity process. Figure F.1 and Table F.1 show the regional population, jobs, and housing growth forecast for the San Diego region through 2050.

Figure F.1

San Diego Regional Population, Jobs, and Housing Forecast

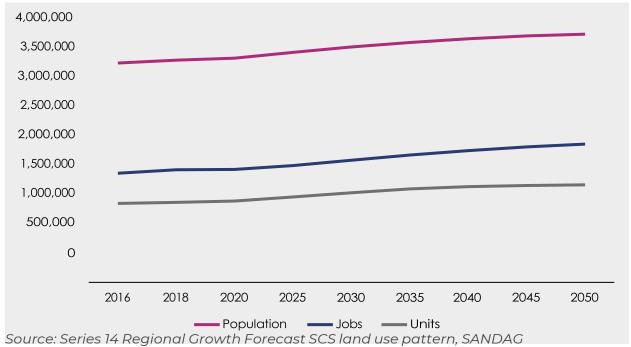

Table F.1

#### San Diego Regional Population and Employment Forecast

San Diego	San Diego Regional Population and Employment Forecast			
Year	Population	Employment		
2016	3,309,509	1,646,419		
2025	3,470,849	1,762,701		
2035	3,620,349	1,922,412		
2050	3,746,077	2,087,208		

Source: Series 14 Regional Growth Forecast SCS land use pattern, SANDAG

The Series 14 Regional Growth Forecast, SCS land use pattern, uses planning assumptions from the adopted general plans and community plans and policies of the 18 cities and the County. Because many of the local general plans have horizon years of 2030—20 years before the Series 14 Regional Growth Forecast horizon year—the later part of the forecast was developed in collaboration with each of the local jurisdictions through an iterative process that allowed each city to provide their projections for land uses in those later years.

The Series 14 Regional Growth Forecast SCS land use pattern thus represents in compliance with 40 CFR 93.110(a), the "latest planning assumptions" in force at the time this conformity analysis began.

#### **Travel Modeling**

The following sections provide an overview of the SANDAG travel model and the travel model flow, spatial and temporal resolution, residents travel model, special market models, trip assignment, model inputs, data sources, and emissions modeling.

SANDAG uses an updated second-generation activity-based model (ABM2+) that incorporates the latest planning assumptions at the time the conformity analysis began per 40 CFR 93.110 to support the development of the RTP and its conformity demonstration.

An ABM simulates individual and household transportation decisions that comprise their daily travel itinerary. It predicts whether, where, when, and how people travel outside their home for activities such as work, school, shopping, healthcare, and recreation.

The SANDAG ABM2+ includes several methodological strengths. It predicts the travel decisions of San Diego residents at a detailed level, considering the way people schedule their day, their behavioral patterns, and the need to cooperate with other household members. When simulating a person's travel patterns, the ABM takes into consideration a multitude of personal and household attributes like age, income, gender, and employment status. The model's fine temporal and spatial resolution ensures that it can capture subtle aspects of travel behavior.

To support the 2021 Regional Plan, SANDAG enhanced the ABM2+ functionality for application to the 5 Big Moves planning efforts. These enhancements included functions to address new trends in teleworking, use of micromobility modes and transportation network companies (TNC), and new mobility options for flexible fleets and microtransit within mobility hubs.

The ABM2+ outputs are used as inputs for regional emissions forecasts. The estimates of regional transportation-related emissions analyses conducted for the conformity analyses of the 2025 RTIP and Amendment to the 2021 Regional Plan meet the requirements established in the Transportation Conformity Regulation (40 CFR §93.122[b] and §93.122[c]). These requirements relate to the procedures to determine regional transportation-related emissions, including the use of network-based travel models, methods to estimate traffic speeds and delays, and the estimation of VMT.

The ABM2+ accounts for a variety of different weekday travel markets in the region, including San Diego region resident travel, travel by Mexican residents and other travelers crossing

San Diego County's borders, visitor travel, airport passengers at both the San Diego International Airport and the Cross Border Xpress (CBX) bridge to the Tijuana International Airport, and commercial travel. Many of the models used to represent demand are simulation-based models, such as activity-based or tour-based approaches, while others use an aggregate three- or four-step representations of travel. Table F.2 lists the SANDAG travel markets along several key dimensions.

There are two broad types of models, and three specific types of models identified in Table F.2. Disaggregate models refer to models whose demand is generated via a stochastic simulation paradigm. Both activity-based and tour-based models are simulation-based. They rely upon a synthetic population to generate travel and stochastic processes to choose alternatives. The models output disaggregate demand in the form of tour and trip lists.

The resident travel model is an ABM, in which all tours and activities are scheduled into available time windows across the entire day. The approach recognizes that a person can be in only one place at one time, and their entire day is accounted for in the model. A tour-based treatment is used for other special travel markets, such as Mexican resident crossborder travel, visitor travel, airport passenger travel, and commercial vehicle travel. Tour-based models do not attempt to model all travel throughout the day for each person; rather, once tours are generated, they are modeled independently of each other.

A tour-based model does not attempt to schedule all travel into available time windows. Aggregate models rely upon probability accumulation processes to produce travel demand and output trip tables. The external heavy-duty truck model and certain external travel models are aggregated.

Table F.2

SANDAG ABM2+ Travel Markets

	SANDAG ABM2+	Travel Markets		
Travel Market	Description	Model Type	Temporal Resolutio n	Spatial Resolution
San Diego resident travel (internal)	Average weekday travel made by San Diego residents within San Diego County	Disaggregate activity-based	30-minute	MGRA <sup>2</sup>
San Diego resident travel (internal– external)	Average weekday travel by San Diego residents between San Diego County and another county (Mexico)	Disaggregate tour- based	30-minute	Internal MGRA – External cordon TAZ <sup>3</sup>
Mexican resident crossborder travel (external– internal and internal– internal)	Average weekday travel by Mexican residents into, out of, and within San Diego County	Disaggregate tour- based	30-minute	Internal MGRA – External cordon TAZ
Overnight visitor	Average weekday travel made by overnight visitors in San Diego County	Disaggregate tour- based	30-minute	MGRA
	Average weekday travel made by air passengers and related trips such as taxis to/from airport	Disaggregate Trip- based	30-minute	MGRA
External–External	Average weekday travel with neither origin nor destination in San Diego County	Aggregate Trip- based	5 time periods	External cordon TAZ
Other U.S.– Internal travel	Average weekday external- internal trips made by non-San Diego and non-Mexican residents	Aggregate Trip- based	5 time periods	External cordon TAZ – Internal TAZ
Commercial vehicle model	Average weekday vehicle trips made for commercial purposes (in addition to heavy trucks, includes light truck goods	Disaggregate tour- based	5 time periods	TAZ

<sup>&</sup>lt;sup>2</sup> MGRA = Master Geographic Reference Area; 23,002 MGRAs in the Region

<sup>&</sup>lt;sup>3</sup> TAZ = Transportation Analysis Zone; 4,996 TAZs in the Region

#### movements and service vehicles)

travel

5 time periods External cordon TAZ – External cordon TAZ; External cordon TAZ – Internal TAZ

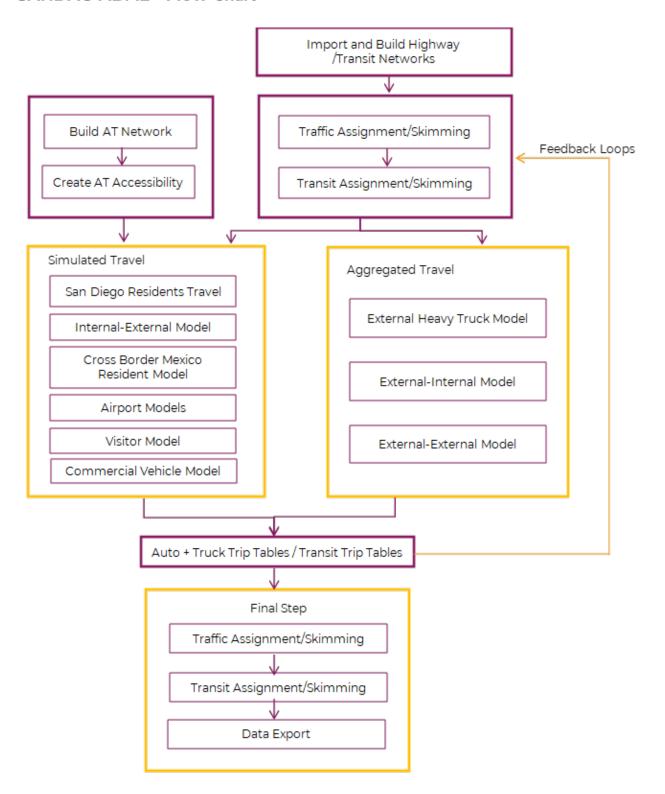

#### **ABM2+ Model Flow**

To simulate how San Diego residents, non-residents, and freight travel in the region, the SANDAG ABM2+ includes several models and steps. Figure F.2 outlines the overall flow of the SANDAG ABM2+. It starts with building an all-street-based active transportation network and creating Master Geographic Reference Area (MGRA) to MGRA and MGRA to transit access point (TAP) walk, micromobility, or microtransit equivalent accessibility files; highway and transit network building and importing into Emme (traffic modeling software licensed from INRO); then traffic and transit assignment with warm start trip tables to get the congested highway and transit skims.

After the network skims and walk access files are created, the resident travel model is executed, followed by the other disaggregate models (visitor, San Diego International Airport, CBX terminal, crossborder, and commercial vehicle) and aggregate models (external heavy truck, external—external, and external—internal). The trip tables from all the models are summed up by vehicle classes, time of day (TOD), and value of time (VOT), and are used in traffic assignment. The skims after the traffic assignment are used for the subsequent iteration in a three-feedback-loop model run. The final traffic and transit assignment and data export concludes the ABM2+ modeling procedure. The outputs from the final step are used to generate input for Emission Factors (EMFAC) emissions modeling.

Figure F.2

SANDAG ABM2+ Flow Chart

#### **Spatial and Temporal Resolution**

As indicated in Table F.2, different travel markets are operated in different model types with different spatial and temporal resolutions. The following section describes the treatment of space and time in the SANDAG ABM2+.

SANDAG ABM2+ utilizes the SANDAG MGRA zone system, which is the one of the most disaggregate zonal systems used in travel demand models in the United States. The SANDAG MGRA system used in ABM2+ consists of 23,002 zones, which are roughly equivalent to Census blocks. To avoid computational burden, SANDAG relies on a 4,996 TAZ system for roadway skims and assignment but performs transit calculations at the more detailed MGRA level, where all activity locations are tracked. The MGRA geography offers both the advantage of fine spatial resolution and consistency with network levels of service that make it ideal for tracking activity locations.

The disaggregated models function at a temporal resolution of one-half hour. These one-half hour increments begin at 3 a.m. and end at 3 a.m. the next day, though the hours between 1 a.m. and 5 a.m. are aggregated to reduce computational burden.

Temporal integrity is ensured so that no activities are scheduled with conflicting time windows except for short activities/tours that are completed within a one-half hour increment. For example, a person may have a very short tour that begins and ends within the 8 a.m. to 8:30 a.m. period as well as a second, longer tour that begins within this period but ends later in the day.

Time periods are typically defined by their midpoint in the scheduling software. For example, in a model system using one-half hour temporal resolution, the 9 a.m. period would capture activities of travel between 8:45 a.m. and 9:15 a.m. If there is a desire to break time periods at "round" half-hourly intervals, either the estimation data must be processed to reflect the aggregation of activity and travel data into these discrete half-hourly bins or a more detailed temporal resolution must be used, such as half-hours (which could then potentially be aggregated to "round" half-hours).

A critical aspect of the model system is the relationship between the temporal resolution used for scheduling activities and the temporal resolution of the network simulation periods. Although each activity generated by the model system is identified with a start time and end time in one-half hour increments, level-of-service matrices are only created for five aggregate time periods:

(1) early a.m.; (2) a.m.; (3) midday; (4) p.m.; and (5) evening. The trips occurring in each period reference the appropriate transport network depending on their trip mode and the midpoint trip time. All aggregated models operate on five aggregated time periods. Table B.3 lists the definition of time periods for level-of-service matrices.

Table F.3

Time Periods for Level-ofService Skims and Assignment

Time Period for Level-of-Service Skims and Assignment			
Number	Description	Begin Time	End Time
1	Early	3 a.m.	5:59 a.m.
2	a.m. Peak	6 a.m.	8:59 a.m.
3	Midday	9 a.m.	3:29 p.m.
4	p.m. Peak	3:30 p.m.	6:59 p.m.
5	Evening	7 p.m.	2:59 a.m.

#### **Resident Travel Model**

The resident travel model is based on the Coordinated Travel Regional Activity-Based Modeling Platform family of ABMs. This model system is an advanced, but operational, ABM that fits the needs and planning processes of SANDAG.

The resident travel model has its roots in a wide array of analytical developments. They include discrete choice forms (multinomial and nested logit), activity duration models, time-use models, models of individual microsimulation with constraints, entropy- maximization models, etc. These advanced modeling tools are combined to ensure maximum behavioral realism, replication of the observed activity-travel patterns, and model sensitivity to key projects and policies. The model is implemented in a microsimulation framework. Microsimulation methods capture aggregate behavior through the representation of the behavior of individual decision-makers. In travel demand modeling, these decision-makers are typically households and persons.

#### **Decision Modeling Units**

Decision-makers in the model system include both persons and households. These decision- makers are created (synthesized) for each simulation year based on tables of households and persons from Census data and forecasted TAZ-level distributions of households and persons by key socioeconomic categories. These decision-makers are used in the subsequent discrete- choice models to select a single alternative from a list of available alternatives according to a probability distribution. The probability distribution is generated from a logit model that considers the attributes of the decision-maker and various alternatives. The decision-making unit is an important element of model estimation and implementation and is explicitly identified for each model specified in the following sections.

To simulate trips and tours made by individuals and households, the SANDAG ABM2+ includes a total of eight person types (shown in Table F.4). The person types are mutually exclusive with respect to age, work status, and school status.

Table F.4

#### **Person Types**

Person Types				
Number	Person-Type	Age	Work Status	School Status
1	Full-time worker <sup>4</sup>	18+	Full-time	None
2	Part-time worker	18+	Part-time	None
3	College student	18+	Any	College+
4	Non-working adult	18–64	Unemployed	None
5	Non-working senior	65+	Unemployed	None
6	Driving-age student	16–17	Any	Pre-college
7	Non-driving student	6–15	None	Pre-college
8	Preschooler	0–5	None	None

<sup>&</sup>lt;sup>4</sup> Full-time employment is defined in the SANDAG 2016 household survey as at least 30 hours/week. Part-time is less than 30 hours/week on a regular basis.

Further, workers are stratified by their occupation to take full advantage of information provided by the land use and demographic models. Table F.5 outlines the worker categories. These models are used to segment destination choice attractiveness for work location choice based on the occupation of the worker.

The SANDAG ABM2+ assigns one of the activity types to each out-of-home location that a person travels to in the simulation (shown in Table B.6). The activity types are grouped according to whether the activity is mandatory, maintenance, or discretionary. The classification scheme of activities into the three categories helps differentiate the importance of the activities. "Mandatory" includes work and school activities. "Maintenance" includes household- related activities, such as drop-off and pick-up of

Table F.5

Occupation Types

	Occupation Types
Number	Description
1	Management, Business, Science, and Arts
2	Services
3	Sales and Office
4	Natural Resources, Construction, and Maintenance
5	Production, Transportation, and Material Moving
6	Military

children, shopping, and medical appointments. "Discretionary" includes social and recreational activities. To determine which person types can be used for generating each activity type, the model assigns eligibility requirements. For example, a full-time worker will generate mandatory work activities, while a non-working adult or senior is eligible for non-mandatory activities. The classification scheme of each activity type reflects the relative importance or natural hierarchy of the activity, where work and school activities are typically the most inflexible in the person's daily travel itinerary.

Table F.6

Activity Types

		Activity Type:	s	
Туре	Purpose	Description	Classification	Eligibility
1	Work	Working at regular workplace or work-related activities outside the home	Mandatory	Workers and students
2	University	College+	Mandatory	Age 18+
3	High School	Grades 9–12	Mandatory	Age 14–17
4	Grade School	Grades K–8	Mandatory	Age 5-13
5	Escorting	Pick-up/drop-off passengers	Maintenance	Age 16+
6	Shopping	Auto trips only	Maintenance	5+ (if joint travel, all persons)
7	Other Maintenance	Shopping away from home	Maintenance	5+ (if joint travel, all persons)
8	Social/Recreational	Personal business/services and medical appointments	Discretionary	5+ (if joint travel, all persons)
9	Eat Out	Recreation, visiting friends/family	Discretionary	5+ (if joint travel, all persons)
10	Other Discretionary	Eating outside of home	Discretionary	5+ (if joint travel, all persons)

The ABM2+ includes 22 modes available to residents, including auto by occupancy by VOT, walk, micromobility and bike modes, and walk and drive access to local, premium, or local and premium transit modes. All auto modes are included in traffic assignment, with Kiss & Ride to transit and TNC and taxi as shared ride modes and Park & Ride to transit as drive- alone mode. All transit modes are included in transit assignment, with TNC to transit as Kiss & Ride to transit. Table F.7 lists the trip modes defined in the resident travel model.

Table F.7

#### **Trip Modes**

	Trip Modes	
Number	Mode	
1	Drive-Alone Non-Transponder	
2	Drive-Alone Transponder	
3	Shared Ride 2 Person	
4	Shared Ride 3+ Person (Non-Toll)	
5	Walk – Local Bus Only	
6	Walk – Premium Transit Only	
7	Walk – Local Bus and Premium Transit	
8	Park & Ride – Local Bus Only	
9	Park & Ride – Premium Transit Only	
10	Park & Ride – Local Bus and Premium Transit	
11	Kiss & Ride – Local Bus Only	
12	Kiss & Ride – Premium Transit Only	
13	Kiss & Ride – Local Bus and Premium Transit	
14	TNC to Transit – Local Bus Only	
15	TNC to Transit – Premium Transit Only	
16	TNC to Transit – Local and Premium Transit	
17	Walk (walk, micromobility, and microtransit modes)	
18	Bike	
19	Taxi	
20	TNC Single	
21	TNC Pooled	
22	School Bus (only available for school purpose)	

To model transit flow, the ABM2+ uses three transit modes: (1) local bus only; (2) premium mode only; and (3) local bus plus premium. Each mode is by three access modes of walk, Park & Ride, Kiss & Ride (including TNC) to transit, resulting in total of nine transit trip TAP- TAP matrices. The premium modes include any non-local bus modes: Tier 1 heavy rail; Commuter Rail (COASTER); Light Rail Transit (LRT) (including Trolley, SPRINTER, and Streetcar); Bus Rapid Transit (Rapid)/Rapid Bus and Express Bus. The local bus plus premium mode includes transfer between local bus and premium modes.

The resident travel model comprises numerous interacting components, called "submodules." It starts with generating a representative population for the San Diego region. Once a representative population is created, the model predicts long-term and medium- term decisions such as a choice of work or school location and a household's choice of number of cars to own. Next, each person's day is scheduled, considering the priority of various activities and interaction among the household members. Once all journeys to and from home have been scheduled, the model predicts specific travel details such as mode, the number of stops to make, where to stop, and when to depart from each stop to continue the tour. The results of resident travel model are a list of trips and tours by person by household by time of day.

The following section discusses the submodules in the order that each submodule is taken within the resident travel model.

## Step 1: Population synthesis (build a representative population that looks like San Diego)

The first step is to create a "synthetic" population of San Diego County. A synthetic population is a table that has a record for every individual and household with the individual's and the household's characteristics. For example, if there are 41,000 18-year-old males in the region in 2050, there would be approximately 41,000 records in the table for males aged 18, with each record also having other characteristics, such as school enrollment and labor force participation status. Taken as a whole, this synthetic population represents the decision- makers whose travel choices the model will simulate in later steps. For each simulation year, a full population is synthesized to match the forecasted socioeconomic and housing characteristics of each part of the region at the zonal level. These forecasts, a key ABM2+ input, come from the land use model. Synthesis works by replicating a sample of Census records (each containing complete household and individual characteristics) and placing them around the region in such a way that the forecasted characteristics of each zone are matched.

# Step 2: Work and school location (assign a work location to workers and a school location to students)

The second step predicts where everyone will go to work or school, if applicable. The work and school location submodule simulates each worker's choice of work location, considering many factors, including ease of travel and the number of employees by occupation type in each location. The submodule also simulates each student's choice of school, considering factors that include the distance from home to school, school enrollment, and district boundaries. The results from this step affect later travel choices significantly because of the prominent role that workplace and school usually play in the itinerary of workers and students.

# Step 3: Determine certain mobility characteristics of individuals and households

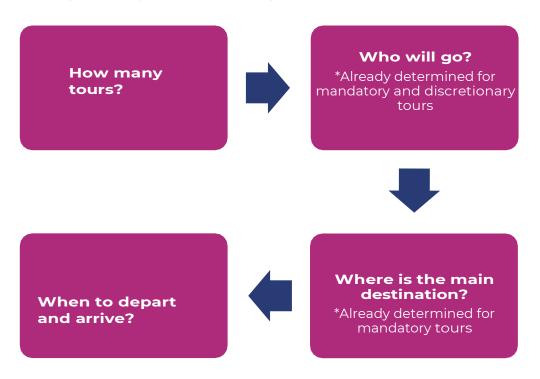

This step predicts the number of automobiles each household owns, whether each household owns a toll transponder, and whether worker parking costs are employer reimbursed. The submodule assigns each household zero, one, two, three, or four or more cars, considering several criteria, including household size, income, number of drivers, and how easy it is to reach destinations from the household's place of residence. This step sets certain mobility characteristics that influence how people travel.

#### Step 4: Schedule the day

The fourth step begins by predicting a "daily activity" pattern for everyone. This pattern is a theme that dictates an individual's schedule. A "mandatory" pattern means that an individual travels to work and/or school, then schedules other activities around work/school. An "at-home" pattern means that an individual's daily schedule involves no travel in the region. A "non- mandatory" pattern means that an individual's daily schedule involves traveling, but only to destinations other than work or school. The pattern type of other household members influences an individual's daily pattern type. For example, if a child stays home from school, a working parent might be more likely to stay home from work as well.

Once the submodule selects an individual's daily activity pattern, it schedules the tours that he or she will take. Recall that a tour is a journey that begins and ends at home, and it can include stops at other destinations on the way to or from the primary destination. The ABM2+ deals with three main categories of tours: (1) mandatory; (2) joint; and (3) non-mandatory. Mandatory tours have work or school as the primary destination. Joint tours involve out-of-home activities that multiple members of a household partake in together. Non-mandatory tours involve purposes other than work or school that an individual undertakes independent of other members of his or her household. The submodule schedules each tour type by predicting how many tours of that type there are, who will participate in the tour, where the main destination is, and when to depart and arrive (see Figure F.3).

Figure F.3 **Predicting Tour Type Scheduling Details** 

For individuals assigned a "mandatory" activity pattern, the submodule first assigns the number of work tours and/or school tours they will make. After the number of these mandatory tours has been determined, the submodule selects the time of departure from and arrival back home for each tour.

After scheduling the mandatory tours, the submodule calculates time remaining for other tours. Remaining intervals of time are called "residual time windows," and other tours can only be scheduled in these open slots (see Figure F.4 for an example) to guarantee temporal consistency.

Figure F.4

#### **Tour Scheduling Windows**

In time remaining after mandatory tours are scheduled, the submodule determines the number of joint tours to be made for each household. It only schedules joint tours in the time windows that overlap between individuals after it accounts for mandatory activities. After the number and purpose of these joint tours has been determined, the submodule decides which household members will participate in each joint tour and whether it must involve a combination of children and adults. The submodule then chooses a specific destination for the tour and the specific times when participants will depart from and arrive back home together. Next, "non-mandatory" tours are scheduled. For each household, the submodule decides what other tours need to be made for the purpose of household "maintenance" activities such as shopping. These tours are assigned to specific household members to carry out individually. For the person who is assigned each maintenance tour, the model selects a specific destination and schedules the tour to take place in a time window that mandatory and joint tours have left open. Finally, in what time remains, the model decides whether each individual will take nonmandatory "discretionary" tours. These low-priority tours involve activities related to recreation, eating out, and social functions, and can only take place in time windows that remain after all other tours have been scheduled.

The submodule chooses a specific destination and departure/arrival combination for each discretionary tour a person makes.

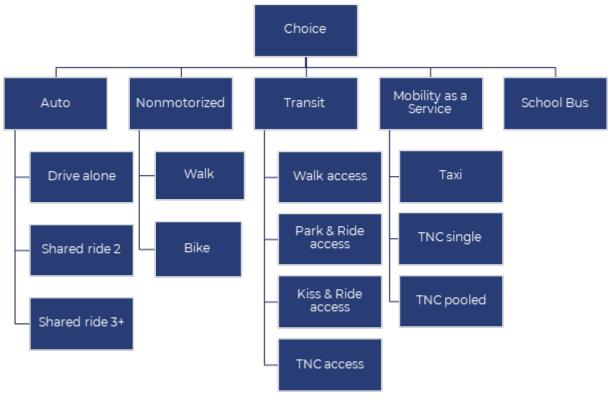

#### Step 5: Make tour- and trip-level decisions

The ABM2+ then selects more detailed characteristics of each tour for every traveler. This step fills in travel details after the major aspects of the day have been scheduled. Tour characteristics that need to be determined include primary mode of the tour, how many times to stop, where to stop, and when to depart from each stop to continue the tour.

Figure F.5 includes the available modes and mode hierarchy. After tour characteristics are set, the submodule determines the mode of each trip (conditional upon tour mode).

Recall that trips are segments of tours that have a given origin and destination. If the trip mode involves an automobile and the destination is a parking-constrained area, then the model chooses a parking location for the traveler at the trip destination.

The ABM2+ has three access modes to transit (walk, Park & Ride, and Kiss & Ride including TNC to transit) and three transit sets (local bus only, premium transit only, and local bus and premium transit sets), for nine total demand classes by five TOD. These classes are assigned in slices, one at a time, to produce the total transit passenger flows on the network and total transit ridership forecasts.

#### **Special Market Models**

Besides the resident travel model, ABM2+ includes a few special market models: crossborder; San Diego International Airport ground access; CBX terminal; visitor; external; commercial vehicle; and external heavy truck.

#### Crossborder Model

The model measures the impact of Mexican resident travel on the San Diego transport network. The model accounts for Mexican resident demand (such as auto volume, transit boarding, and toll usage) for transportation infrastructure in San Diego County. It also forecasts border crossings at each current and potential future border-crossing station.

The model is based on the 2010 SANDAG Cross-Border Survey, Mexican resident border crossings and their travel patterns into and within the United States. Data were collected at the San Ysidro, Otay Mesa, and Tecate border crossing stations. In 2022, a software bug was discovered in the crossborder model that affected the number of crossings via Otay Mesa East and resulting traffic volumes on SR 11. The software bug was fixed, improving the accuracy of traffic volumes on SR 11. The fix had minor impacts on regional VMT.

#### San Diego International Airport Ground Access Model

This model captures airport travel demand on transportation facilities in San Diego County, modeling travel to and from the airport for arriving and departing passengers. It allows SANDAG to test the impacts of various parking price and supply scenarios at the airport. The model is based on the 2008 San Diego International Airport Survey of airport passengers in which data were collected on their travel to the airport prior to their departure.

#### **Cross Border Xpress Terminal Model**

The CBX terminal is a unique facility that provides access to Tijuana International Airport from the United States via a pedestrian bridge. The terminal provides a much faster border crossing than is available at either San Ysidro or Otay Mesa, especially for returning passengers. To use the facility, each traveler must have a Tijuana International Airport boarding pass and pay a fee to cross each direction. The terminal offers parking, rental car services, airline check-in services, duty-free shopping, and dining. It opened in December 2015.

#### Visitor Model

The visitor model captures the demand of visitor travel on transportation facilities in San Diego County. The model is estimated based on the 2011 SANDAG Visitor Survey of

airport passengers and hotel guests in which data were collected while visiting San Diego.

#### **External Models**

The external travel models predict characteristics of all vehicle trips and selected transit trips crossing the San Diego County border. This includes trips that travel through the region without stopping and trips that are destined for locations within the region.

The external–external, external–internal, and internal–external trips in San Diego County were segmented into the following trip types:

- **U.S.-U.S.: External-external** trips whose production and attraction are both in the United States, but not in San Diego County.
- **US-M.X.: External-external** trips with one trip end in the United States and the other in Mexico.
- **US–S.D.: External–internal** trips with a production elsewhere in the United States and an attraction in San Diego County.
- **MX-S.D.: External-internal** trips with a production in Mexico and an attraction in San Diego County (covered by the Mexican resident crossborder model).
- **SD-U.S.: Internal-external trips** with a production in San Diego and an attraction elsewhere in the United States.
- **SD-MX: Internal**-external trips with a production in San Diego County and an attraction in Mexico.

#### External heavy truck model

The external heavy truck model predicts truck flows into, out of, and through San Diego County. The model is based upon a dataset created by the Bureau of Transportation Statistics and the Federal Highway Administration (FHA) known as the Freight Analysis Framework (FAF). The FAF integrates data from a variety of sources to create a comprehensive picture of freight movement among states and major metropolitan areas by all modes of transportation. The model utilizes FAF4 data, which is based on the 2012 Commodify Flow Survey, and provides forecasts through 2045.

#### Commercial vehicle model

The commercial vehicle model is a disaggregated tour-based model developed in 2014. This model was based upon a local commercial vehicle survey and replaces the aggregate intraregional Heavy-Duty Truck Model (HDTM) and nonfreight commercial vehicle components of the original aggregate commercial vehicle model. The internal/external component of the HDTM was retained in the new model system but was updated to FAF4 data.

#### **Trip Assignment**

The final steps of the SANDAG ABM2+ are to assign the trip demand onto the roadway and transit networks. Assignments are run for the five time periods identified in Table F.3.

#### **Traffic Assignment**

The traffic assignment for the ABM2+ is a 15-class assignment with generalized cost by five times of day. Auto vehicle classes are broken out by VOT for low-, medium-, and high-income groups, respectively. The 15 classes are drive-alone non-transponder, drive-alone transponder, shared ride 2, and shared ride 3+ by VOT and heavy truck by weight class (light-heavy, medium-heavy, and heavy-heavy).

The traffic assignment model works by finding roads that provide the shortest travel impedance between each zone pair. Trips between zone pairs are then accumulated on road segments making up minimum paths. Highway impedances consider posted speed limits, signal delays, congestion delays, and costs. The model computes congestion delays for each segment based on the ratio of the traffic volume to roadway capacity. Motorists may choose different paths during peak hours, when congestion can be heavy, and off-peak hours, when roadways are typically free flowing. For this reason, traffic is assigned separately for five time periods (as defined in the Key Modeling Units section). Vehicle trip tables for each scenario reflect increased trip-making due to population growth and variations in travel patterns due to the alternative transportation facilities/networks proposed. Customized programs process outputs from traffic assignment and generate total VMTs by vehicle class, and percentage of VMTs by speed bin and by vehicle class. This information was input to the EMFAC program to generate emissions summaries.

#### **Transit Assignment**

The transit assignment uses a headway-based approach, where the average headway between vehicle arrivals for each transit line is known, but exact schedules are not. Passengers and vehicles arrive at stops randomly and passengers choose their travel itineraries considering the expected average waiting time.

The Emme extended transit assignment is based on the concept of optimal strategy but extended to support several behavioral variants. The optimal strategy is a set of rules that define sequence(s) of walking links and boarding and alighting stops, producing the minimum expected travel time (generalized cost) to a destination. At each boarding point, the strategy may include multiple possible attractive transit lines with different itineraries. A transit strategy will often be a tree of options, not just a single path. A line is considered attractive if it reduces the total expected travel time by its inclusion. The demand is assigned to the attractive lines in proportion to their relative frequencies.

#### **Model Inputs**

The SANDAG ABM2+ utilizes a variety of data as inputs. Besides the Series 14 Regional Growth Forecast, SCS land use pattern, inputs (used to provide existing and planned land use and demographic characteristics), there are three major inputs: highway networks used to describe existing and planned roadway facilities, transit networks used to describe existing and planned public transit service, and an active transportation network used to describe non-motorized bicycle and pedestrian facilities.

The regionally significant projects and the years they are expected to open to traffic for each analysis year are documented in Tables F.11 through F.13. The design concept and scope of projects allow adequate model representation to determine intersections with regionally significant facilities, route options, travel times, transit ridership, and land use. The VMT for federal projects that are not regionally significant are also accounted for in the regional emissions analysis.

#### **Highway Networks**

The regional highway networks in the Amendment to the 2021 Regional Plan include all roads classified by local jurisdictions in their general plan circulation elements. These roads include freeways, expressways, and the Regional Arterial System (RAS), which consists of all conventional state highways, prime arterials, and selected major streets. In addition, some local streets are included in the networks for connectivity between TAZs.

All regionally significant projects are included in the quantitative emissions analysis for the amendment. These include all state highways, proposed national highway system routes, regionally significant arterials, and "other principal arterials" functionally classified by the FHA. These include federal and non-federal regionally significant projects.

The networks also account for programs intended to improve the operation of the highway system, including High-Occupancy Vehicle (HOV) lanes, Managed Lanes, and ramp metering. Existing and proposed toll facilities also are modeled to reflect time, cost, and capacity effects.

In addition, several Managed/HOV lanes are included in the Amendment to the 2021 Regional Plan (Tables F11a–F.14b,). Managed Lanes offer priority access to people using transit, carpooling, motorcycles, or vanpooling along with emergency vehicles and some low-emission vehicles with appropriate decals. Additionally, one-lane HOV facilities that operate as two-person carpool lanes in earlier years transition to Managed Lanes by 2035. It is assumed that the excess capacity not utilized by carpools and transit on these facilities would be managed so that single-occupant vehicles could use these lanes under a pricing mechanism. Traffic flows would be managed so that the facility would operate at LOS D or better.

SANDAG maintains a master transportation network from which a specific year network, between 2010 and 2050, can be built.

For the air quality conformity analyses of the 2025 RTIP and Amendment to the 2021 Regional Plan, using emissions budgets from the 2020 SIP, SANDAG built and verified five highway networks (2026, 2029, 2032, 2040, and 2050) from the master transportation network.

A list of the major highway and near-term regional arterial projects included in the conformity analyses, along with information on phasing for their implementation, are included in Tables F.11a and F.14b. Locally funded, regionally significant projects have also been or are included in the air quality conformity analysis. These projects are funded with TransNet Extension funds—a 40-year, half-cent local sales tax extension approved by voters in 2004 that expires in 2048—and other local revenue sources.

#### **Transit Networks**

SANDAG also maintains transit network datasets for existing and proposed transit systems. Most transit routes run over the same streets, freeways, HOV lanes, and ramps used in the highway networks. The only additional facilities that are added to the master transportation network for transit modeling purposes are as follows:

- Rail lines used by commuter rail, Trolleys, and streetcars.
- Streets used by buses that are not part of local general plan circulation elements.

Rapid service has stop spacing like commuter (Freeway Rapid) or light rail (Arterial Rapid) rail stations and operating characteristics midway between rail and bus service. Rapid service is provided by advanced design buses operating on HOV lanes or Managed Lanes, some atgrade transit ways, and surface streets with priority transit systems.

Bus speeds assumed in the transit networks are derived from modeled highway speeds and reflect the effects of congestion. Higher bus speeds may result in transit vehicles operating on highways with HOV lanes and HOV bypass lanes at ramp meters compared to those routes that operate on highways where these facilities do not exist.

In addition to transit travel times, transit fares are required as input to the mode choice model. A customized procedure using the traffic assignment software replicates the San Diego region's fare policies for riders (seniors, disabled, students):

- Local buses collect a flat fare of \$2.50 (COASTER Connection buses are free, some future shuttle routes charge \$1)
- Trolleys and SPRINTER charge \$2.50 for all trips
- Commuter rail (COASTER) has a zone-based fare of between \$5 and \$6.50 currently and an assumed flat fare (along with a future Tier 1 high-speed commuter rail mode) of \$6.
- Express Freeway Rapid routes are assumed to charge \$5.
- Rapid Bus routes are assumed to charge \$2.50.

Transit fares reflect ridership costs at the time the transportation model was developed. Fares are expressed in 2010 dollars and are held constant in inflation-adjusted dollars over the forecast period.

Near-term transit route changes are drawn from the Coordinated Plan, which was produced in cooperation with the region's transit agencies. Longer-range and other transit corridor studies remain unchanged by this 2025 RTIP. In addition to federal-and state- funded projects, locally funded transit projects that are regionally significant are included in this air quality conformity analysis.

#### **Active Transportation Networks**

SANDAG maintains an all-street active transportation network including existing and planned bike projects to support bike project evaluation and impact analysis. Based on the proposed bike projects in the regional bikeway system developed through Riding to 2050: San Diego Regional Bike Plan, SANDAG generates year-specific active transportation networks and uses these networks to create accessibility measures from MGRA to MGRA for walking and biking and from TAZ to TAZ for biking modes. These active transportation accessibility measures are inputs to the SANDAG ABM2+ to simulate people's choice of travel mode and choice of bike routes.

The active transportation network has unique characteristics that account for facility type, bike treatments, and elevation change. The active transportation networks include five classification types for bike facilities in the regional bikeway system: Class I: bike paths; Class II: bike lanes; Class III: bike routes; Class IV: cycle tracks; and Class "V": bike boulevards.

Class V is an internal designation and not a California vehicle code facility type. Once network coding is completed, the ABM2+ is run for the applicable scenarios: 2026, 2029, 2032, 2040, and 2050 for the 2020 SIP.

#### **Data Sources**

Aside from network inputs, SANDAG relies on several survey datasets to estimate and calibrate the model parameters. The most important survey data is household travel. The latest household travel survey conducted for SANDAG was the 2016–2017 Household Travel Behavior Survey (HTS2016) with smartphone-based travel diaries as the primary means of travel data collection. Since 1966, consistent with the state of the practice for the California Household Travel Survey and National Household Travel Survey, SANDAG and Caltrans conduct a comprehensive travel survey of San Diego County every ten years. HTS2016 surveyed 6,139 households in San Diego County. The survey asked all households with smartphones to participate using the smartphone-based GPS travel diary and survey app (rMove) for one week and accommodated participating households without smartphones by allowing them to complete their one-day travel diary online or by calling the study call center.

As part of a joint survey effort with the Metropolitan Transportation Commission and the Southern California Association of Governments funded by California Senate Bill 1 (Beall, 2017) (SB 1), SANDAG conducted a TNC survey in 2019 to better understand TNC usage in the San

Diego region. The TNC survey includes 2,800 complete persons,<sup>5</sup> 17,340 completed person-days, and 1,578 TNC trips. SANDAG used the 2019 TNC survey data to estimate TNC single and pooled in the mode choice model.

Additional data needed for the mode choice components of the ABM2+ come from a transit on-board survey. The most recent SANDAG survey of this kind is the 2015 Transit On-Board Survey (OBS2015). OBS2015 collected data on transit trip purpose, origin and destination address, access, and egress mode to and from transit stops, the on/off stop for surveyed transit routes, number of transit routes used, and demographic information.

<sup>&</sup>lt;sup>5</sup> A complete person is when a person completes all trip surveys and the daily survey for a given travel day. A person is considered complete if they have at least one complete person-day.

Population synthesis requires two types of data: individual household and person Census records from San Diego County and aggregate data pertaining to the sociodemographic characteristics of each zone in the region. The first type of data is available from the Public Use Microdata Sample (PUMS), a representative sample of complete household and person records that is released with the Census and American Communities Survey. The second type of data is from the Census for the base year and from land use forecasts for future years.

Table B.8 lists data sources mentioned above along with other necessary sources of data. Modeling parking location choice and employer reimbursement of parking cost depends on parking survey data collected from 2010 into early 2011 as well as a parking supply inventory. The transponder-ownership sub-model requires data on transponder users. Data needed for model validation and calibration includes traffic counts, transit-boarding data, Census Transportation Planning Package (CTPP), Caltrans Performance Measurement System (PeMS), and Highway Performance Monitoring System (HPMS).

#### **Motor Vehicle Emissions Modeling**

#### **Emissions Model**

On November 15, 2022, the U.S. EPA approved EMFAC2021 for use in conformity determinations and set a two-year grace period for continued use of EMFAC2017, expiring on November 15, 2024 (87 FR 68483). Consistent with U.S. EPA rulemaking (87 FR 68483) and 40 CFR 93.111, EMFAC2017 was used to project the regional emissions for the air quality conformity analyses of the 2025 RTIP and Amendment to the 2021 Regional Plan.

Projections of daily regional emissions were prepared for reactive organic gases (ROG) and nitrogen oxides (NOx).

The following process emissions are generated for each pollutant:

- All pollutants: Running exhaust, idling exhaust, starting exhaust, total exhaust.
- ROG and total organic gases: Diurnal losses, hot-soak losses, running losses, resting losses, total losses.

EMFAC2017 models multiple vehicle categories, including the following:

- Passenger cars
- Motor homes
- Medium-duty trucks
- Medium-heavy-duty trucks
- School buses
- Motor coaches

- Motorcycles
- Light-duty trucks
- Light-heavy-duty trucks
- Heavy-heavy-duty trucks
- Urban buses
- Other bus types

EMFAC2017 includes updated motor vehicle fleet information from the California Department of Motor Vehicles for 2013–2016 and a new module that improves the characterization of activity and emissions from transit buses. Additionally, it allows users to estimate emissions of natural gas–powered vehicles in addition to gasoline- and diesel- powered vehicles.

#### **Regional Emissions Forecasts**

Regional travel demand forecasts were initiated in April 2024. Output from the ABM2+ was then summarized to create EMFAC2017 inputs for emissions modeling.

In May 2024, SANDAG prepared countywide forecasts of average weekday ROG and NOx emissions for 2026, 2029, 2032, 2040, and 2050 for the 2020 SIP using the EMFAC2017 v1.0.2 model. ROG and NOx emissions are based upon the summer season.

#### 2008 Eight-Hour Ozone Standard

On October 19, 2021, the U.S. EPA found the motor vehicle emissions budgets from the 2020 SIP adequate for transportation conformity purposes for the 2008 ozone NAAQS (86 FR 54692).

Severe Nonattainment Area classification established 2026 as the attainment year and 2023 as a reasonable further progress demonstration year for the 2008 Eight-Hour Ozone Standard. The analysis years were selected to comply with 40 CFR 93.106(a)(1) and 93.118(a). According to these sections of the Conformity Rule, analysis years must include attainment year (2026), the horizon year of the plan's forecast period (2050), and no more than ten years between analysis years (2032, 2040). Additionally, the first horizon year (2026) must be within ten years from the base year used to validate the regional transportation model (2016).

#### 2015 Eight-Hour Ozone Standard

On October 19, 2021, the U.S. EPA found the motor vehicle emissions budgets from the 2020 SIP adequate for transportation conformity purposes for the 2015 ozone NAAQS (86 FR 54692).

Severe Nonattainment Area classification established 2032 as the attainment year for the 2015 Eight-Hour Ozone Standard. The 2020 SIP established air quality budgets for the 2015 ozone standard. The 2020 SIP included a voluntary Nonattainment Area classification change from Moderate to Severe Nonattainment Area for the 2015 Eight-Hour Ozone Standard. The new classification established 2032 as the attainment year and 2023, 2026, and 2029 as reasonable further progress demonstration years. The analysis years were selected to comply with 40 CFR 93.106(a)(1) and 93.118(a). According to these sections of the Conformity Rule, analysis years must include reasonable further progress demonstration years (2026, 2029), attainment year (2032), the horizon year of the plan's forecast period (2050), and no more than ten years between analysis years (2040). Additionally, the first horizon year (2026) must be within ten years from the base year used to validate the regional transportation model (2016).

#### **Emissions Modeling Results**

An emissions budget is the part of the SIP that identifies emissions levels necessary for meeting emissions reduction milestones, attainment, or maintenance demonstrations. To determine conformity of the 2025 RTIP and redetermine the conformity of the Amendment to the 2021 Regional Plan, the emission analysis described in the Regional Emissions Forecast section was used.

Table F.9 shows that the projected ROG and NOx emissions from the 2025 RTIP and Amendment to the 2021 Regional Plan are below the applicable ROG and NOx budgets from the 2020 SIP for the 2008 and 2015 ozone standards.

Table F.9

2025 RTIP and Amendment to the 2021 Regional Plan 2020 SIP Conformity Analyses for the 2008 and 2015 Eight-Hour Ozone Standards (EMFAC2017)

2025 RTIP and Amendment to the 2021 Regional Plan 2020 SIP Conformity Analyses for the 2008 and 2015 Eight-Hour Ozone Standards (EMFAC2017)						
	Average Weekday Vehicle Starts (1,000s)	Average Weekday Vehicle Miles (1,000s)	ROG		NOx	
Year			SIP Emissions Budget Tons/Day	ROG Emissions Tons/Day	SIP Emissions Budget Tons/Day	NOx Emissions Tons/Day
2026	11,527	85,434	12.1	11.5	17.3	14.9
2029	11,891	86,244	11.0	10.3	15.9	13.5
2032	12,278	87,360	10.0	9.2	15.1	12.6
2040	12,972	88,612	10.0	7.3	15.1	11.5
2050	13,668	89,765	10.0	6.7	15.1	11.9

Note: Emissions budgets from the 2020 SIP were found adequate for transportation conformity purposes by U.S. EPA, effective October 19, 2021.

#### **Exempt Projects**

40 CFR Section 93.126 exempts certain highway and transit projects from the requirement to determine conformity. The categories of exempt projects include safety, mass transit, air quality (ridesharing and bicycle and pedestrian facilities), and other (such as planning studies).

Table F.10 illustrates the exempt projects considered in the 2025 RTIP and Amendment to the 2021 Regional Plan. This table shows short-term exempt projects. Additional unidentified projects could be funded with revenues expected to be available from the continuation of existing state and federal programs.

#### **Exempt Projects**

#### **Exempt Projects**

#### **Project/Program Description**

### Bikeway, Rail, Trail, and Pedestrian Projects

- Bayshore Bikeway
- Bay-to-Ranch Bikeway
- Bayshore to Imperial Bikeway
- Border to Bayshore Bikeway
- Camp Pendleton Trail
- Carlsbad San Marcos Bicycle Corridor
- Central Avenue Bikeway
- Central Coast Bicycle Corridor
- Central Mobility Bikeway (Coastal Rail Trail: Pacific Highway)
- Chula Vista Greenbelt
- Downtown to Imperial Avenue Bikeway
- Clairemont Centre City Bicycle Corridor
- Coastal Rail Trail
- East County Northern Bicycle Loop
- East County Southern Bicycle Loop
- El Camino Real Bicycle Corridor
- El Portal Pedestrian and Bicycle Underpass
- Encinitas San Marcos Bicycle Corridor
- Escondido Creek Bike Path Bridge and Bikeway
- Coastal Rail Trail: Rose Creek
- North Park/Mid-City Bikeways: University Bikeway
- Inland Rail Trail

- San Diego River Bikeways
- Interstate 805 Bicycle Corridor
- Kearny Mesa Beaches Bicycle Corridor
- Mid-County Bikeway
- Mira Mesa Bicycle Corridor
- Uptown Bikeways
- National City Highland Avenue Community Corridor
- North Park/Mid-City Bikeways
- Oceanside Bicycle Master Plan
- Otay Mesa Port of Entry Pedestrian/Bicycle Facilities
- Park Boulevard–Downtown Mobility Plan
- Pacific Coast Highway/Central Mobility Bikeway
- Pershing Bikeway
- San Diego Regional Bicycle Plan
- San Diego River Trail
- San Luis Rey River Trail
- Santee El Cajon Bicycle Corridor
- SR 15 Bikeway
- SR 52 Bikeway
- SR 125 Bicycle Corridor
- SR 905 Bicycle Corridor
- Tecate International Border Crossing Pedestrian Facilities
- Vista Way Bicycle Connector

#### **Safety Improvement Program**

- Bridge Rehabilitation/ Preservation/Retrofit
- Collision Reduction
- Emergency Response
- Hazard Elimination/Safe Routes to School
- Highway Maintenance

- Safety Improvement Program
- Roadway/Roadside Preservation
- Smart Growth Incentive Program
- Safe Routes to Transit
- Safe Routes to School

#### **Exempt Projects**

#### Project/Program Description

#### **Transportation Systems and Demand Management**

- Traveler Information System
- Compass Card
- FasTrak®
- Freeway Service Patrol
- Vehicle Automation
- Regional Rideshare Program
- Multimodal Integration and Performance-Based Management
- Intelligent Transportation System for Transit
- ITS Operations
- Joint Transportation Operations Center
- Trolley Fiber Communication Network

- Electronic Payment Systems and Universal Transportation Account
- Various Traffic Signal Optimization/Prioritization
- Transit Infrastructure Electrification
- Employer Services and Outreach
- Flexible Fleet Pilots
- Regional Electric Vehicle Charging Incentive Program
- Commuter Services and Bike Program
- Mobility Hubs
- Active Traffic and Demand Management
- Shared Mobility Services

#### **Transit Terminals**

- Central Mobility Hub/Airport Intermodal Transit Center/Terminal
- San Ysidro Intermodal Transit Center/Terminal

#### **Implementation of Transportation Control Measures**

There are four federally approved Transportation Control Measures (TCMs) that must be implemented in San Diego, which the SIP refers to as transportation tactics. They include ridesharing, transit improvements, traffic flow improvements, and bicycle facilities and programs.

These TCMs were established in the 1982 SIP, which identified general objectives and

implementing actions for each tactic. The TCMs have been fully implemented.<sup>6</sup> Ridesharing, transit, bicycling, and traffic flow improvements continue to be funded, although the level of implementation established in the SIP has been surpassed.

#### **Interagency Consultation Process and Public Input**

The consultation process followed to prepare the Air Quality Planning and Transportation Conformity Analysis for the 2025 RTIP, 2023 RTIP Amendment No. 13, and redetermination of conformity for the Amendment to the 2021 Regional Plan complies with the San Diego Transportation Conformity Procedures adopted in July 1998. In turn, these procedures comply with federal requirements under 40 CFR Part 93. Interagency consultation involves SANDAG (as the MPO for San Diego County), the SDAPCD, Caltrans, CARB, U.S. DOT, and U.S. EPA.

Consultation is a three-tier process that:

- 1. Formulates and reviews drafts through a conformity working group.
- 2. Provides local agencies and the public with opportunities for input through existing regional advisory committees and workshops.

<sup>6 2020</sup> SIP

3. Seeks comments from affected federal and state agencies through participation in the development of draft documents and circulation of supporting materials prior to formal adoption.

SANDAG consulted on the development of the air quality conformity analyses of the 2025 RTIP and Amendment to the 2021 Regional Plan on March 6, 2024, and May 1, 2024.

- At the March 6th meeting, Staff presented information on the overall schedule for the 2025 RTIP as well as the schedule for review of the draft determination of conformity for the 2025 RTIP. Staff also presented information on the conformity criteria and procedures for the draft conformity analysis of the 2025 RTIP and draft redetermination of conformity of the Amendment to the 2021 Regional Plan, including information on the revenue constrained financial assumptions and revenue strategies,
- At the May 1, 2024, CWG meeting Staff presented information on the schedule and conformity criteria and procedures for the draft conformity analysis of the 2025 RTIP and draft redetermination of conformity of the Amendment to the 2021 Regional Plan, including: latest emission model; emission budgets; regional growth forecast; SCS land use pattern; list of transportation projects; list of exempt projects; transportation control measures; and public involvement and outreach.
- On June 3, 2024, SANDAG distributed the draft determination of conformity for 2025 RTIP and draft redetermination of conformity for the Amendment to the 2021 Regional Plan for interagency consultation.
- The draft 2025 RTIP conformity determination and draft Amendment to the 2021 Regional Plan conformity redetermination was released for public comment on July 31, 2024.
- A public hearing on the proposed final 2025 RTIP and its conformity determination was held by the SANDAG Transportation Committee on September 20, 2024.
- The proposed final 2025 RTIP Amendment conformity determination and draft Amendment to the 2021 Regional Plan conformity redetermination were brought to the SANDAG Board for consideration and adopted by the SANDAG Board on September 27, 2024.

Members of the public were welcome to provide comments at CWG and Board meetings.

#### 2025 RTIP and Amendment to the 2021 Regional Plan Projects

This section contains the capacity-increasing projects included in the 2025 RTIP and Amendment to the 2021 Regional Plan. The tables include the conformity analysis year, project details, and estimated cost (\$2020). Tables F.11 through F.14 include the projects included in the 2025 RTIP and the Amendment to the 2021 Regional Plan by 2020 SIP Air Quality Phasing. Table F.11 has the major goods movement, complete corridor, and transit leap projects by each regional corridor. Table F.15 lists additional transit projects that did not apply to the prior tables.

Conformity Analysis Year	TIP ID	Lead Agency	Project Name	Description	
2026	CAL114	Caltrans	I-5/SR 56 Interchange	At I-5/SR 56 interchange - in San Diego, final environmental document for freeway-to-freeway interchange, associated operational improvements, and the relocation of the fiber optic cable line; connector phases are outside of TIP cycle but included in the long-range plan. Phase I: Final design and construction of HOV operational lanes in the east and westbound directions on SR-56 from El Camino Real to Carmel Valley Road.	
2026	CB31	Carlsbad	El Camino Real Widening – La Costa Avenue to Arenal Road	In Carlsbad, along El Camino Real from 700 feet north of La Costa Avenue to Arenal Road, widening along the southbound side of the roadway to provide three travel lanes, sidewalk, and a bike lane in accordance with Prime Arterial Standards. Widen bridge to accommodate sidewalks on both sides of the bridge.	
2026	CB32	Carlsbad	El Camino Real Widening – Poinsettia to Camino Vida Roble	El Camino Real from Cassia Road to Camino Vida Roble (.5 miles) – in Carlsbad, along El Camino Real from Poinsettia Lane to Camino Vida Roble, re-stripe from Poinsettia Lane to Cinnabar Way and widen El Camino Real from Cinnabar Way to Camino Vida Roble, along the northbound/east side of the roadway to provide three travel lanes, sidewalk, and a bike lane in accordance with arterial street standards	
2026	CB59	Carlsbad	El Camino Real Widening – Sunny Creek to Jackspar	El Camino Real from Sunny Creek to Jackspar (.3 miles) – in Carlsbad, on El Camino Real from Sunny Creek to Jackspar, widen along the northbound side of the El Camino Real to provide three travel lanes (currently two lanes northbound), sidewalk, and a bike lane.

Conformity Analysis Year	TIP ID	Lead Agency	Project Name	Description			
2026	CHV69	Chula Vista	Heritage Road Bridge	Bridge 57C0670 - widen and lengthen bridge over Otay River from four-lane to six-lane bridge that accommodates shoulders, sidewalk, and median; project is on Heritage Road from the intersection of Main Street to Entertainment Circle. Also includes Main Street widening to accommodate a third eastbound travel lane from the intersection of Nirvana Avenue to Heritage Road.			
2026	CHV87	Chula Vista	E Street Extension from Bay Boulevard to H Street	E Street from Bay Boulevard to H Street (1 miles) - Extension of E Street and F Street west of Bay Boulevard to H Street, and the realignment of Gun Powder Point Drive for the Chula Vista Bayfront redevelopment. Project also includes the construction of a roundabout (at the new intersection of E Street and Gunpowder Point Drive), Class I and II Bike Paths, and sidewalks. E Street between Bay Boulevard to the roundabout will be 4 travel lanes (2 per direction); all other segments will be 2 travel lanes (1 per direction). Phase 1: E Street from Bay Boulevard to Gunpowder Point Drive Roundabout. (Now Open to Traffic) Phase 2: E Street from Gunpowder Point Drive Roundabout to H Street. The project is identified and included in the Chula Vista Bayfront Master Plan and the Bayfront Transportation Development Impact Fee Nexus Study as "BAY-13."			
2026	CHV91	Chula Vista	H Street Construction from Marina Parkway to E Street and widening of Bay Boulevard to Street A	H Street from E Street to Bay Boulevard (.3 miles) - This project includes construction of a two to three lane road from E Street to Marina Parkway and a five lane Major Road from Street A to Bay Boulevard to integrate with the new segment of H Street that is currently under construction for redevelopment of the area as part of the Chula Vista Bayfront Master Plan. Street Improvements will include streetscape enhancements such as street trees, lighting, furnishings, etc. The project is identified and included in the Chula Vista Bayfront Master Plan and the Bayfront Transportation Development Impact Fee Nexus Study as "BAY-17".			

Arterial Projects Air Quality Phasing						
Conformity Analysis Year	TIP ID	Lead Agency	Project Name	Description		
2026	CNTY14A	San Diego County	South Santa Fe Avenue South	South Santa Fe from Robelini Drive to Similax Road (1.19 miles) – This project will improve South Santa Fe to a four-lane divided road from west of Robelini Drive to Smilax Road, including improvements to Robelini Drive. The project will be in phases.		
2026	CNTY21	San Diego County	Bradley Avenue Widening and Overpass at SR 67	Bridge 57-0552 - On Bradley Ave from Magnolia Ave to Mollison Ave, Phase 1-Widen Bradley Avenue between Graves Ave and Mollison Ave from 2 lanes to 4 lanes including sidewalks and bicycle lanes; Phase 2 - replace 2-lane bridge over SR 67 with a 6- lane bridge including turn pockets. Construction funding shown only for Phase 1. Phase 2 construction will be funded by <i>TransNet</i> .		
2026	ESC04	Escondido	Citracado Parkway II	Citracado Parkway from West Valley to Andreason (.5 miles) – widen from 2 to 4 lanes with raised medians, construct bridge over Escondido Creek.		
2026	O22	Oceanside	College Boulevard Improvements from Vista Way to Old Grove Road	College Boulevard from Vista Way to Old Grove Road (2.5 miles) - Traffic calming without additional lanes between Waring Road/Barnard and Road Roselle Street (first phase). The second phase is widening from the existing four lanes to six lanes with bike lanes and raised median between Olive Avenue and Old Grove.		
2026	SAN260	North County Transit District	COASTER Train Sets	In the San Diego Region along the COASTER Corridor - Two additional train sets to provide more frequent commuter rail service, including 30-minute peak period service. Toll Credits will be used to match federal funds for the CON phase.		
2026	SD34	San Diego	El Camino Real	Bridge 57C0042 - In San Diego on El Camino Real from San Dieguito Road to Via de la Valle - reconstruct & widen from 2 to 4 lanes and extend transition lane and additional grading to avoid biological impacts (CIP 52-479.0/S-00856).		

	Arterial Projects Air Quality Phasing					
Conformity Analysis Year	TIP ID	Lead Agency	Project Name	Description		
2026	SD102A	San Diego	Otay Truck Route Widening (Phase 4)	Otay Truck Route - In San Diego, from Drucker Lane to La Media Rd, add one lane, for a total of three lanes: two for trucks and one lane for emergency vehicles (Border Patrol/fire department access). From Britannia Blvd to La Media Rd, add one lane for trucks and one lane for emergency vehicles. Also, along Britannia Blvd from Britannia Court to the Otay Truck Route, add one lane for trucks and one lane for emergency vehicles. This project will be constructed in two phases; an Eastern Phase between La Media Rd and Drucker Lane, and a Western Phase from Britannia Blvd to La Media Rd. Current construction programming is for the Eastern Phase only. (CIP S-11060).		
2026	SD250	San Diego	La Media Road Improvements	La Media Road from SR 905 to Siempre Viva Road (.75 miles) - In San Diego, on La Media Road from SR905 to Siempre Viva Road, widen La Media Road to a six-lane primary arterial from SR 905 to Airway Road, and a to a five-lane major between Airway Road and Siempre Viva Road with three southbound lanes and two northbound lanes. This project will also improve drainage at the intersection of La Media Road and Airway Road (CIP # S-15018).		
2026	SM19	San Marcos	Grand Avenue Bridge and Street Improvements	From Discovery Street to San Marcos Boulevard – construct 4- lane secondary arterial bridge and a 6-lane arterial street from Craven Road to Grand Avenue.		
2026	SM24	San Marcos	Woodland Parkway Interchange and Barham Drive Widening & Street Improvements #88005	SR 78 Bridge 57 0389 - This project includes reconstruction of the State Route 78 overcrossing at Woodland Parkway, reconfiguration of on/off ramps, widening and realigning portions of Woodland Parkway, Barham Drive and Rancheros Drive. Improvements would also include continuation of new bike lanes and trails.		

	Arterial Projects Air Quality Phasing					
Conformity Analysis Year	TIP ID	Lead Agency	Project Name	Description		
2026	SM31	San Marcos	San Marcos Creek Specific Plan – Discovery St. Widening and Flood Control Improvements #88265	From Via Vera Cruz Rd to Bent Ave/Craven Rd - Part of San Marcos Creek Specific Plan group of projects to widen Discovery St. to four lanes secondary arterial between Via Vera Cruz and Bent Ave. Improvements include construction of roadway improvements, bike lanes and trails.		
2026	SM32	San Marcos	Via Vera Cruz Bridge and Street Improvements #88264	Bridge 57C0867 - Part of San Marcos Creek Specific Plan group of projects to widen to four lanes secondary arterial and construct a bridge at San Marcos Creek.		
2026	SM42	San Marcos	Discovery St. from Craven to Twin Oaks #ST007	Discovery Street from Craven Road to Twin Oaks Valley Road (.9 miles) – The project includes the design and construction of all intersections, signals, utilities, drainage and water quality components of Discovery St. as a four-lane arterial from Bent Ave. and Craven Dr. and east to Twin Oaks Valley Rd.  Improvements will also include bike lanes and trails along the road.		
2026	SM48	San Marcos	San Marcos Creek Specific Plan: Creekside Drive and Pad Grading #88505	Creekside Drive from Via Vera Cruz to Grand Ave (.57 miles) – construct approximately 3,000 feet of a two-lane collector road from Via Vera Cruz to Grand Avenue in the City of San Marcos; will include two 12' lanes, diagonal parking on the north side, and parallel parking on the south side; the project will also include a 10' bike trail meandering along the south side.		
2026	SM69	San Marcos	Twin Oaks Valley Rd. & Barham Dr. Improvements #ST008	Barham Dr from Campus Dr to Twin Oaks Valley Rd (.1 miles) - This project involves surface improvements including asphalt, concrete, medians, sidewalks, signage and traffic lights.  Underground improvements include utility and drainage improvements, relocations and water treatment within the public right of way to accommodate the construction of additional lanes.		

	Arterial Projects Air Quality Phasing					
Conformity Analysis Year	TIP ID	Lead Agency	Project Name	Description		
2029	CAL38	Caltrans	SR-905 New Freeway	SR 905 from I-805 to Otay Mesa Port of Entry Milepost begins at 6.4 ends at 15 (8.6 miles) - construct 6-lane freeway (Phase 1) Toll Credits will be used to match federal funds for the PE and CON phase. Toll Credits will be used to match federal funds for the PE phase, Toll Credits will be used to match federal funds for the CON phase.		
2029	CAL68	Caltrans	SR 94 / 125 Interchange and Arterial Operational Improvements	Interchange on SR 94 at SR 94 and SR125 Milepost begins at 1 ends at 2 - In San Diego County in and near La Mesa on Route 94 from Spring Street Undercrossing to Kenwood Drive Undercrossing and on Route 125 from Spring Street Undercrossing to 0.1 mile north of Murray Drive Undercrossing. Design and Right-Of-Way of southbound 125 to eastbound SR 94 direct connector.		
2029	CAL277	Caltrans	I-15/SR 78 ML Connectors	SR-78 from Post Mile 15.49 to R16.6 and on I-15 from Post Mile R30.63 to R31.56 - preliminary engineering for northbound I-15 to westbound SR-78 and eastbound SR-78 to southbound I-15 HOV connectors and operational improvements.		
2029	CAL536	Caltrans	SR-52 Operational Improvements	SR 52 from I-805 to SR 125 Milepost begins at 7.4 ends at 14.9 (7.5 miles) - operational improvements including a truck climbing lane WB from Mast Boulevard to Santo Road and EB auxiliary lane from I-15 to Santo Road.		
2029	CHV93	Chula Vista	SR125 at Main Street and Otay Valley Road Interchanges	Interchange on SR 125 at Main Street and Otay Valley Road - Construction of freeway interchanges/overpasses on SR125 at Main Street and Otay Valley Road.		
2029	CHV97	Chula Vista	Main Street from Heritage Road to Wolf Canyon Bridge	Main Street from Heritage Road to Wolf Canyon Bridge (.82 miles) – Construction of a 6-lane Prime Arterial from Heritage Road to Wolf Canyon Bridge including bike lanes and sidewalk facilities. (TDIF Facility 60A).		

	Arterial Projects Air Quality Phasing					
Conformity Analysis Year	TIP ID	Lead Agency	Project Name	Description		
2029	SNT33	Santee	State Route 52 Improvements between SR-125 and I-15	SR 52 from SR-125 to I-15 Milepost begins at 7.4 ends at 14.6 (7.2 miles) – This project will improve Highway 52 between State Route 125 and Interstate 15 to alleviate congestion on the freeway and on Santee streets. The project will add a westbound lane from Mast Boulevard to the summit, relocate the bike lane to the south side of the freeway, add an additional lane to the westbound on-ramp at Mast Boulevard, and restripe the section between Mast Boulevard and SR 125 to add an additional lane in each direction.		
2032	CNTY34	San Diego County	Dye Road Extension	Dye Road to San Vicente Road from 500 ft west of Ramona Street to Intersection of Warnock Dr and San Vicente Rd (1.15 miles) - In Ramona - study, design and construct a 2-lane community collector road with intermittent turn lanes, bike lanes, curb, gutter, and pathway/walkway.		
2032	CNTY35	San Diego County	Ramona Street Extension	Ramona Street from Boundary Ave. to Warnock Dr. (.25 miles) - in the community of Ramona, construct new road extension; 2 lanes with intermittent turn lanes, bike lanes and walkway/pathway.

# Conformity Analysis Documentation Checklist for MPO TIPs/RTPs

40 CFR	Criteria	<u>P.</u>	<u>Comments</u>
§93.102	Document the applicable pollutants and precursors for which EPA designates the area as nonattainment or maintenance. Describe the nonattainment or maintenance area and its boundaries.	Appendix F:  • Background pp. 2-4	
§93.104 (b, c)	Document the date that the MPO officially adopted, accepted or approved the TIP/RTP and made a conformity determination. Include a copy of the MPO resolution. Include the date of the last prior conformity finding.		See Appendix F, p. 4
§93.104 (e)	If the conformity determination is being made to meet the timelines included in this section, document when the new motor vehicle emissions budget was approved or found adequate.	Appendix F:  • Background pp. 2-4  • 2008 Eight-Hour Ozone Standard p. 25  • 2015 Eight-Hour Ozone Standard pp. 25-26	See Appendix F pp. 3-4
§93.106	If the metropolitan planning area is in a serious, severe, or extreme ozone nonattainment area and/or serious carbon monoxide nonattainment area and contains an urbanized population over 200,000, then RTP must specifically describe the transportation system envisioned for future years called "horizon years."	Appendix F:  • 2008 Eight-Hour Ozone Standard p. 25  • 2015 Eight-Hour Ozone Standard p. 25  • Tables 11, 12, 13, and 14 on pp. 32-53	
§93.106 (a)(2)ii	Describe the regionally significant additions or modifications to the existing transportation network that are expected to be open to traffic in each analysis year. Document that the design concept and scope of projects allows adequate model representation to determine intersections with regionally significant facilities, route options, travel times, transit ridership and land use.	Appendix F:  Tables 11, 12, 13, and 14 on pp. 32-53  Travel Modeling pp. 7–21  Model Inputs pp. 21-25	
§93.108	Document the TIP/RTP is fiscally constrained consistent with DOT's metropolitan planning regulations at (23 CFR 450) in order to be found in conformity.	Amendment to the 2021 Regional Plan:  Revenue Assumptions pp. 3-4	

September 2024

40 CFR	Criteria	<u>P.</u>	<u>Comments</u>
§93.109 (a, b)	Document that the TIP/RTP complies with any applicable conformity requirements of air quality implementation plans (SIPs) and court orders.	Appendix F:      Background pp. 2-4      Motor Vehicle     Emissions Modeling     pp. 25-26	
§93.109 (c-k)	Provide either a table or text description that details, for each pollutant and precursor, whether the interim emissions tests and/or the budget test apply for conformity. Indicate which emissions budgets have been found adequate by EPA, and which budgets are currently applicable for what analysis years.	<ul> <li>Appendix F</li> <li>Regional Emissions Forecast pp. 25-26</li> <li>2008 Eight-Hour Ozone Standard p. 25</li> <li>2015 Eight-Hour Ozone Standard pp. 25-26</li> <li>Emissions Modeling Results pp. 25-26</li> </ul>	
§93.110 (a, b)	Document the use of latest planning assumptions (source and year) at the "time the conformity analysis begins," including current and future population, employment, travel and congestion. Document the use of the most recent available vehicle registration data. Document the date upon which the conformity analysis was begun.	Appendix F:  Growth Forecasts pp. 5–6  Travel Modeling pp. 7-21  Model Inputs pp. 21-25  Motor Vehicle Emissions Modeling pp. 25-26  Interagency Consultation Process and Public Input pp. 29-30	
USDOT/EPA guidance	Documents planning assumptions are less than 5 years old at the time the conformity analysis begins. If assumptions are older than 5 years documents justification for not reviewing and updating assumptions at least every 5 years.	Appendix F:      Growth Forecasts     pp. 5–6      Travel Modeling pp. 7-     21      Interagency     Consultation Process     and Public Input     pp. 29-30	
§93.110 (c.d.e.f)	Document any changes in transit operating policies and assumed ridership levels since the previous conformity determination. Document the use of the latest transit fares and road and bridge tolls. Document the use of the latest information on the effectiveness of TCMs and other SIP measures that have been implemented. Document the key assumptions and show that they were agreed to through Interagency and public consultation.	Appendix F:  Model Inputs pp. 21-25  Interagency Consultation Process and Public Input pp. 29-30	
§93.111	Document the use of the latest emissions model approved by EPA.	Appendix F:  • Motor Vehicle Emissions Modeling pp. 25-26	

40 CFR	Criteria	<u>P.</u>	<u>Comments</u>
§93.112	Document fulfillment of the interagency and public consultation requirements outlined in a specific implementation plan according to \$51.390 or, if a SIP revision has not been completed, according to \$93.105 and 23 CFR 450. Include documentation of consultation on conformity tests and methodologies as well as responses to written comments.	Appendix F:  Interagency Consultation Process and Public Input pp. 29-30	
§93.113	Document timely implementation of all TCMs in approved SIPs. Document that implementation is consistent with schedules in the applicable SIP and document whether anything interferes with timely implementation. Document any delayed TCMs in the applicable SIP and describe the measures being taken to overcome obstacles to implementation.	Appendix F  Implementation of TCMs p. 29	
§93.114	Document that the conformity analyses performed for the TIP is consistent with the analysis performed for the Plan, in accordance with 23 CFR 450.324(f)(2).	Appendix F      Motor Vehicle     Emissions Modeling     pp. 25-26	
§93.115	Describe how the projects come from a conforming RTP and TIP. If this criterion is not satisfied, the project must satisfy all criteria in Table 1 of §93.109(b) for a project not from a RTP and TIP.	Amendment to the 2021 Regional Plan:  Project Modifications pp. 2-3 Appendix F:  Background p. 4  Amendment to the 2021 Regional Plan Projects p. 30  Tables 11, 12, 13, and 14 on pp. 32-53	
§93.118 (a, c, e)	For areas with SIP budgets: Document that emissions from the transportation network for each applicable pollutant and precursor, including projects in any associated donut area that are in the Statewide TIP and regionally significant non-Federal projects, are consistent with any adequate or approved motor vehicle emissions budget for all pollutants and precursors in applicable SIPs.	Appendix F:      Background pp. 2–4      Motor Vehicle     Emissions Modeling     pp. 25-26	
§93.118 (b)	Document for which years consistency with motor vehicle emissions budgets must be shown.	Appendix F  Regional Emissions Forecasts pp. 25-26 Emission Modeling Results pp. 25-26 Interagency Consultation Process and Public Input pp. 29-30	

September 2024

40 CFR	Criteria	<u>P.</u>	<u>Comments</u>
§93.118 (d)	Document the use of the appropriate analysis years in the regional emissions analysis for areas with SIP budgets, and the analysis results for these years. Document any interpolation performed to meet tests for years in which specific analysis is not required.	Appendix F:  • Motor Vehicle Emissions Modeling pp. 25-26	
§93.119 <sup>1</sup>	For areas without applicable SIP budgets: Document that emissions from the transportation network for each applicable pollutant and precursor, including projects in any associated donut area that are in the Statewide TIP and regionally significant non-Federal projects, are consistent with the requirements of the "Action/Baseline", "Action/1990" and/or "Action/2002" interim emissions tests as applicable.	N/A	
§93.119 (g)	Document the use of the appropriate analysis years in the regional emissions analysis for areas without applicable SIP budgets. The regional emissions analysis must be performed for analysis years that are no more than ten years apart. The first analysis year must be no more than five years beyond the year in which the conformity determination is being made. The last year of the timeframe of the conformity determination (as described under §93.106(d)) must also be an analysis year.	N/A	
§93.119 (h,i)	Document how the baseline and action scenarios are defined for each analysis year.	Appendix F:	The baseline year is 2016.
§93.122 (a)(1)	Document that all regionally significant federal and non-Federal projects in the nonattainment/maintenance area are explicitly modeled in the regional emissions analysis. For each project, identify by which analysis it will be open to traffic. Document that VMT for non-regionally significant Federal projects is accounted for in the regional emissions analysis	Appendix F:  Travel Modeling pp. 7-21  Model Inputs pp. 21-24  Tables 11, 12, 13, and 14 on pp. 32-53	

40 CFR	Criteria	<u>P.</u>	<u>Comments</u>
§93.122 (a)(2, 3)	Document that only emission reduction credits from TCMs on schedule have been included or that partial credit has been taken for partially implemented TCMs. Document that the regional emissions analysis only includes emissions credit for projects, programs, or activities that require regulatory action if: the regulatory action has been adopted; the project, program, activity or a written commitment is included in the SIP; EPA has approved an opt-in to the program, EPA has promulgated the program, or the Clean Air Act requires the program (indicate applicable date). Discuss the implementation status of these programs and the associated emissions credit for each analysis year.	N/A	
§93.122 (a)(4,5,6)	For nonregulatory measures that are not included in the STIP, include written commitments from appropriate agencies. Document that assumptions for measures outside the transportation system (e.g. fuels measures) are the same for baseline and action scenarios. Document that factors such as ambient temperature are consistent with those used in the SIP unless modified through interagency consultation.	N/A	
§93.122 (b)(1)(i) <sup>2</sup>	Document that a network-based travel model is in use that is validated against observed counts for a base year no more than 10 years before the date of the conformity determination. Document that the model results have been analyzed for reasonableness and compared to historical trends and explain any significant differences between past trends and forecasts (for per capita vehicle-trips, VMT, trip lengths mode shares, time of day, etc.).	Appendix F:  • Travel Modeling pp. 7- 21	
§93.122 (b)(1)(ii) <sup>2</sup>	Document the land use, population, employment, and other network-based travel model assumptions.	Appendix F:  Transportation Conformity: Modeling Procedures pp. 4-24	
§93.122 (b)(1)(iii) <sup>2</sup>	Document how land use development scenarios are consistent with future transportation system alternatives, and the reasonable distribution of employment and residences for each alternative.	Appendix F:     Growth Forecasts     pp. 5-6     Data Sources pp. 23- 24	
§93.122 (b)(1)(iv) <sup>2</sup>	Document use of capacity sensitive assignment methodology and emissions estimates based on a methodology that differentiates between peak and off-peak volumes and speeds, and bases speeds on final assigned volumes.	Appendix F:  Travel Modeling pp. 7- 21	

40 CFR	Criteria	<u>P.</u>	<u>Comments</u>
§93.122 (b)(1)(v) <sup>2</sup>	Document the use of zone-to-zone travel impedances to distribute trips in reasonable agreement with the travel times estimated from final assigned traffic volumes. Where transit is a significant factor, document that zone-to-zone travel impedances used to distribute trips are used to model mode split.	Appendix F:  Travel Modeling pp. 7- 21	
§93.122 (b)(1)(vi) <sup>2</sup>	Document how travel models are reasonably sensitive to changes in time, cost, and other factors affecting travel choices.	Appendix F: Travel Modeling pp. 7- 21	
§93.122 (b)(2) <sup>2</sup>	Document that reasonable methods were used to estimate traffic speeds and delays in a manner sensitive to the estimated volume of travel on each roadway segment represented in the travel model.	Appendix F:  Travel Modeling pp. 7- 21	
§93.122 (b)(3) <sup>2</sup>	Document the use of HPMS, or a locally developed count-based program or procedures that have been chosen through the consultation process, to reconcile and calibrate the network-based travel model estimates of VMT.	Appendix F:      Data Sources pp. 23-24      Interagency     Consultation Process     and Public Input     pp. 29-30	
§93.122 (d)	In areas not subject to §93.122(b), document the continued use of modeling techniques or the use of appropriate alternative techniques to estimate vehicle miles traveled	N/A	
§93.122 (e, f)	Document, in areas where a SIP identifies construction-related PM10 or PM 2.5 as significant pollutants, the inclusion of PM10 and/or PM 2.5 construction emissions in the conformity analysis.	N/A	
§93.122 (g)	If appropriate, document that the conformity determination relies on a previous regional emissions analysis and is consistent with that analysis.	N/A	
§93.126, §93.127, §93.128	Document all projects in the TIP/RTP that are exempt from conformity requirements or exempt from the regional emissions analysis. Indicate the reason for the exemption (Table 2, Table 3, traffic signal synchronization) and that the interagency consultation process found these projects to have no potentially adverse emissions impacts.	Appendix F:  • Exempt Projects pp. 27-29  • Interagency Consultation Process and Public Input pp. 29-30	

Note that some areas are required to complete both interim emissions tests.

<u>Disclaimers</u> This checklist is intended solely as an informational guideline to be used in reviewing Transportation Plans and Transportation Improvement Programs for adequacy of their conformity documentation. It is in no way intended to replace or supersede the Transportation Conformity regulations of 40 CFR Parts 51 and 93, the Statewide and Metropolitan Planning Regulations of 23 CFR Part 450 or any other EPA, FHWA or FTA guidance pertaining to transportation conformity or statewide and metropolitan planning. This checklist is not intended for use in documenting transportation conformity for individual transportation projects in nonattainment or maintenance areas. 40 CFR Parts 51 and 93 contain additional criteria for project-level conformity determinations.

<sup>&</sup>lt;sup>2</sup> 40 CFR 93.122(b) refers only to serious, severe and extreme ozone areas and serious CO areas above 200,000 population

# Appendix G Social Equity Analysis

2025 Regional Transportation Improvement Program FY 2025-2029

# Appendix G Social Equity Analysis

# **Social Equity and Environmental Justice**

#### Introduction

Transportation projects have a significant effect on the quality of life for a region's residents by shaping access to jobs, education, housing, services, and recreational opportunities. Without proper planning and development, transportation systems can have a negative impact on the quality of life in communities. The construction of roads, freeways, and rail transit systems have historically placed health burdens on many low-income communities and communities of color. Transportation projects may also physically divide communities, resulting in long-lasting social and economic costs.

Therefore, it is important to understand the impacts of transportation investments on our most vulnerable communities, including low-income communities and communities of color. A social equity analysis for the Regional Transportation Improvement Program (RTIP) will provide an understanding of whether short-term investments are contributing to equitable transportation outcomes in the region.

#### **Purpose**

This appendix aims to identify which projects in the 2025 RTIP proportionately allocate investments towards social equity focus/vulnerable communities and the overall proportion of total project funding dedicated to these communities.

The findings in this analysis will create reference points for future iterations of the RTIP social equity analyses.

# **Background**

Through feedback from the Regional Plan Social Equity Working Group in 2021 and other stakeholders, SANDAG initially developed this appendix in the 2023 RTIP to address one of the key recommendations in the U.S. Department of Transportation's (DOT) Equity Action Plan. More specifically, the DOT recommends developing a quantitative social equity screening process for their long-term and short-term improvement plans to uplift the power of community involvement.<sup>1</sup>

A social equity analysis for the RTIP was proposed to provide an understanding of whether short-term investments were contributing to equitable transportation outcomes in the region.

The social equity analysis performed for the 2021 Regional Plan transportation network models projected levels of transportation access for vulnerable populations to key destinations through the build-out horizon year of 2050.

U.S. Department of Transportation (DOT). (2022). Equity Action Plan. Washington, DC: U.S. DOT Equity Action Plan.

The RTIP itself is the short-term five-year program of projects in the San Diego region, which incrementally implements the Regional Plan. The RTIP includes investments from SANDAG, Caltrans, the transit agencies, all 18 member agencies, and the County of San Diego. As most projects are not completed during the development of each RTIP, the metrics examined in this analysis are based only on information we can collect and measure in a five-year timeframe.

## **Legal Framework**

#### Title VI and California Government Code Section 65040.12(e)

Throughout the last several decades, federal law and guidance have been written to ensure that the spirit and intent of the Civil Rights Act are incorporated into the guiding principles and missions of federal, state, and local public agencies. Title VI of the Civil Rights Act of 1964 states that:

"No person in the United States, shall, on the grounds of race, color or national origin be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program or activity receiving federal financial assistance."

As a recipient of federal funding, SANDAG follows the Caltrans environmental justice guidelines for its transportation planning<sup>2</sup>. The guidelines derive from California Government Code Section 65040.12(e)<sup>3</sup>, which defines environmental justice as fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income in respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.

#### SANDAG Commitment to Equity Statement and Regional Social Equity Planning Framework

The Board of Directors adopted a Commitment to Equity Statement to address systemic racism in all its forms and establish a meaningful and relevant equity action plan that will guide SANDAG as it carries out its multifaceted functions. As a component to the agency's early action plan, SANDAG developed a Social Equity Planning Framework composed of five inter-reliant actions geared towards continuous learning, meaningful involvement, and long-term investment in communities that have been and continue to be impacted by systemic inequities.

To learn more about the Commitment to Equity Statement and the Social Equity Planning Framework, please see Appendix H: Social Equity Engagement and Analysis of the 2021 Regional Plan.<sup>4</sup>

<sup>&</sup>lt;sup>2</sup> Chapter 8 Title VI and Environmental Justice (ca.gov)

<sup>&</sup>lt;sup>3</sup> California Government Code Section 65040.12 (public.law)

<sup>&</sup>lt;sup>4</sup> 2021 Regional Plan: Appendix H: Social Equity: Engagement and Analysis.

## **Methodology Development**

To prepare for this analysis, SANDAG formed a cross-disciplined team with staff from programming, planning, modeling, geographic information systems, and diversity and equity. Staff began best practice research of other metropolitan planning organizations (MPOs) that had published an equity analysis of their RTIP. Staff also participated in a nationwide MPO working group to discuss environmental topics and share best practices, analysis tools, and social equity methodologies.

Staff chose an investment analysis based on project location methodology, given the data available at the time. For each RTIP project that is in a vulnerable census tract, the percent of its total area found within vulnerable census tracts were multiplied by the project costs as defined in the RTIP. The 2025 RTIP analysis will focus on projects located within vulnerable census tracts, defined as the top 50% scoring census tracts in CalEnviroScreen 4.0<sup>5</sup>, which is inclusive of most vulnerable census tracts, or top 25% scoring census tracts in CalEnviroScreen 4.0.

Staff then compared the sum of these investments in vulnerable census tracts as a percentage of the total investment of the projects evaluated. That yielded a social equity investment percentage that was then compared to the RTIP's overall 5-year programming budget.

In addition to the location-based analysis, additional data relating to social equity was collected for each project through the project database input screens. This data was meant to provide a more in-depth view of the project's equity.

Staff acknowledges there are limitations to the methodology developed, including making broad-based, reasonable assumptions to show investments in vulnerable census tracts. These limitations and assumptions are elaborated on in the Methodology Challenges and Next Steps sections of this appendix.

#### **Selection of Projects to Analyze**

The RTIP includes a variety of projects, which are funded with federal, state, and local dollars. The projects programmed in the RTIP include projects from the Regional Transportation Plan as well as operational improvements, maintenance, safety, and operating projects. Because the TransNet Extension Ordinance requires TransNet funds to be programmed in the RTIP, the RTIP includes many projects funded by local agencies, which ordinarily would not be programmed in a Transportation Improvement Program.

Many of these projects come from local agency Capital Improvement Programs (CIPs) to fund annual transportation maintenance and improvement projects such as street overlay, sidewalk repair, and streetlight and drainage improvements. Additionally, the transit agencies program their operations and maintenance dollars with limited location information shared. Some of these projects cannot be assigned to a specific location and therefore the analysis of where the investment is, and which populations are impacted, is not possible. Some cities aggregate their similar CIP projects together on one project ID.

<sup>5</sup> CalEnviroScreen 4.0 | Office of Environmental Health Hazard Assessment

For instance, a city may program streetlight upgrades as "various locations throughout the city." Many cities only develop a firm location plan for projects one year at a time, so we often do not have a complete picture of the locations that will be impacted. Some projects programmed in the RTIP are planning in nature and impact an entire city or region, not a specific site. Finally, the RTIP includes programming for project operations, which connect and cross jurisdictions, such as signal interconnections, transit operations, and operations of toll roads. Below are the representative types of projects programmed in the RTIP:

- Projects from the 2021 Regional Plan
  - o Capacity Increasing & Regional Arterial
  - o Bicycle and Pedestrian
  - Transit (Rail and Bus Rapid Transit)
- Operational Improvements
  - o Traffic Calming
  - o Signals
  - o Streetlights
- Programs
  - Vanpool/Carpool
  - o Youth Opportunity Passes
  - Signal Interconnect
- Operating and Maintenance Projects
  - o Pavement and Bridge Rehab
  - o Drainage Improvements
  - Highway Culvert/Railing/Signage
  - Transit Operations and Maintenance
    - Rideshare
    - Senior Services
    - Transit Equity Pilot (ext. through June 2026)<sup>6</sup>

Table G-1: Types of projects in the 2025 RTIP

Project Types	# of Projects	% of Total
Projects from the 2021 Regional Plan	152	38%
Operational Improvements	62	16%
Programs	20	5%
Operating and Maintenance Projects	161	41%
Total Projects	395	100%

<sup>&</sup>lt;sup>6</sup> SANDAG Board of Directors Agenda Oct 27., 2023: Proposed FY 2024 Program Budget Amendment

This table illustrates the different types of projects and the incidence of those projects in the 2025 RTIP in its entirety. Note only projects with identifiable locations could be analyzed for the social equity analysis.

In addition to user submitted geographic data, projects that SANDAG staff can assign to a specific location have been mapped in ProjectTrak, the RTIP database software, based on the route and limits indicated in the project description.

Available mapping data for projects in the database with a defined location was imported to SANDAG's geographic information system (GIS).

#### Methodology

The methodology for this analysis is performed in three steps:

- Define vulnerable and most vulnerable communities in the San Diego region
- Geospatially identify project locations and social equity areas
- Calculate overall RTIP social equity investment with social equity multiplier

#### **Key Terms**

Below is a list of key terms and their definitions to better understand the RTIP social equity analysis.

- Office of Environmental Health Hazard Assessment (OEHHA)<sup>7</sup>: one of six Boards, Departments, and Offices of the California Environmental Protection Agency (EPA). OEHHA's mission is to protect and enhance the state's environment through scientific evaluations that inform, support, and guide regulatory and other actions.
- **Geographical Information System (GIS)**<sup>8</sup>: a database system that connects location based geographic data to illustrative mapping software for data visualization and analysis
- Social equity census tract: a census tract that scores within at least the top 50% of CalEnviroScreen 4.0 scores.
- **Vulnerable communities**: census tracts scoring in the top 50% of CalEnviroScreen 4.0 scores
- **Most vulnerable communities**: census tracts scoring in the top 25% of CalEnviroScreen 4.0 scores
- **Total project area**: the entire area of a project that is geospatially populated into mapping software and its area of influence (illustrated by a 1/2-mile buffer)
- **Area of influence**: describes the area within the 1/2-mile buffer of a project boundary where its access and benefits are most impactful
- **Total social equity area**: the total area of social equity census tracts found within the project's area plus the 1/2-mile buffer
- Social equity ratio: the ratio of total social equity area to the total project area
- **Social equity investment ratio**: the ratio of project dollars allocated towards vulnerable communities to the total five-year RTIP programming project dollars, also known as the **social equity multiplier**

<sup>&</sup>lt;sup>7</sup> Organizational Chart - Office of Environmental Health Hazard Assessment (ca.gov)

<sup>&</sup>lt;sup>8</sup> Chang, K.-t. (2016). Introduction to Geographic Information Systems. New York City, NY: McGraw Hill.

- **Total five-year RTIP programming investment**: total project dollars as identified in the 5-year period of the 2025 RTIP
- **Total social equity investment**: total project dollars allocated towards vulnerable communities in comparison to the total five-year RTIP programming investment

#### 2025 RTIP Social Equity Analysis Updates

#### **Low-income and Minority Populations**

In accordance with Title VI and California Government Code Section 65040.12(e), SANDAG employed an additional analysis of 2025 RTIP project locations and their geographic distribution towards low-income and minority populations in the region, respectively.

Additionally, one of the limitations identified in the 2023 RTIP social equity analysis is its primary index, CalEnviroScreen 4.0, not incorporating race and ethnicity into its cumulative impact scores due to California's 1996 Proposition 209 on Affirmative Action in 2020. Staff determined an additional analysis of 2025 RTIP project locations and minority populations was necessary to provide a supplemental, racial equity lens to our findings.

Although CalEnviroScreen 4.0 does include low-income populations in its scores, California Government Code Section 65040.12(e) identifies income as a consideration in assessing environmental justice in respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.

Staff utilized census tract data from SANDAG's Series 15 Forecast<sup>9</sup> to identify the population density of both low-income and minority populations in the region. It is important to note that SANDAG's Series 15 Forecast utilizes 2022 census tract data whereas CalEnviroScreen 4.0 utilizes 2010 census tract data.

#### **Mapping Improvements**

The previous 2023 RTIP social equity analysis analyzed 160 of 433 projects, which is less than 40% of total projects. The 2025 RTIP social equity analysis evaluates 276 of 399 projects, which is approximately 70% of total projects in the 2025 RTIP. The improvement in projects mapped is due in large part to staff examination of supporting documents and providing jurisdictions support in supplemental mapping.

Since every RTIP spans a 5-year period and is updated every 2 years, most projects included in the 2023 RTIP were carried over to the 2025 RTIP, unless the project is completed or has no funding programmed within the 5-year period between 2025 and 2029.

Given the estimated 30% difference in the number of projects mapped between the 2023 and 2025 RTIPs, the results of the 2025 RTIP's analysis cannot be reliably compared against the 2023 results. Therefore, staff elected to not conduct a comparative analysis for the 2025 RTIP as was performed for the 2023 RTIP.

<sup>&</sup>lt;sup>9</sup> SANDAG Series 15 Forecast: What will the San Diego Region look like in 2050?

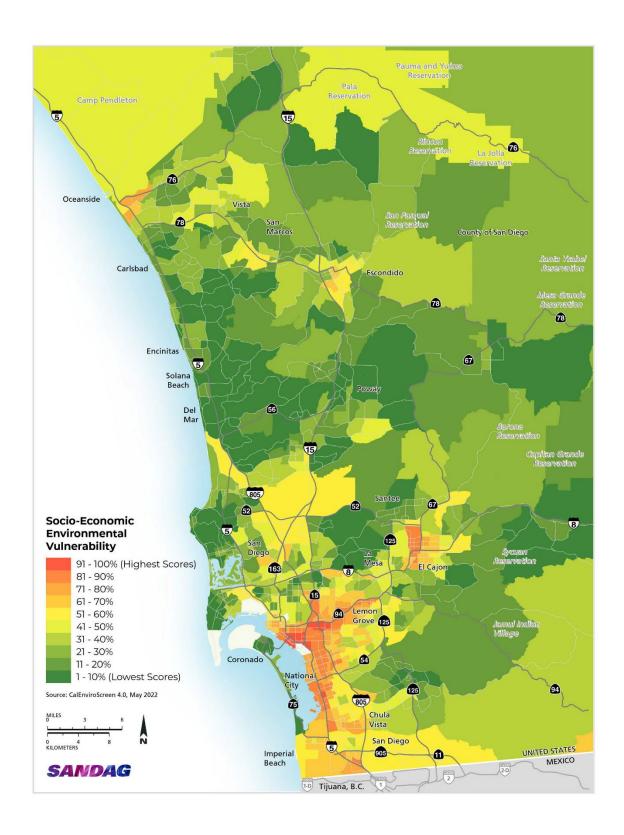

#### **Defining Disadvantaged Communities with CalEnviroScreen 4.0**

CalEnviroScreen 4.0 (CES 4.0) was used to identify and overlay vulnerable and most vulnerable communities throughout the region with RTIP project locations.

Developed by the California Office of Environmental Health Hazard Assessment (OEHHA), CalEnviroScreen 4.0 evaluates multiple pollutants and stressors, in addition to low-income status, at the census tract level to evaluate socioeconomic and health factors that may exacerbate adverse impacts and vulnerability. As a cumulative index based on a scale of 100, CalEnviroScreen 4.0 identifies and maps the communities in the state that meet the pollution exposure and demographic characteristics of disadvantaged communities.

Figure G-1 shows the distribution of CalEnviroScreen 4.0 scores in the San Diego region.

Figure G-1: CalEnviroScreen 4.0 Census Tracts in San Diego County

While the OEHHA considers the top 25% of CES 4.0 scores to be the most vulnerable, it is important to note that for programs and projects such as the 2021 Regional Plan, SANDAG identifies communities in the top 50% of CalEnviroScreen scores as vulnerable or disadvantaged.

The rationale for using the top 50% of CalEnviroScreen scores as a disadvantaged community comes in two parts:

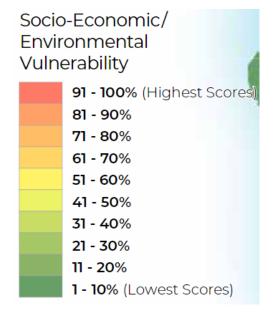

- 1. Statewide, out of the 1,984 Census tracts that are considered most vulnerable, only 50 of them are in San Diego County. That is only 3%; therefore, making the 25% cutoff overly limiting.
- Using a more extensive range will account for varying levels of vulnerability throughout the region and hold SANDAG to a higher standard in addressing environmental and social inequities.

Therefore, for this analysis, a Census tract in the top 50% of CalEnviroScreen 4.0 scores will qualify as social equity (SE) Census tract. Census tracts that score in the top 50% of CalEnviroScreen 4.0 scores will be referred to as vulnerable communities, while tracts that score in the top 25% will be referred to as the region's most vulnerable communities.

Figure G-2 shows a closer look at the color grading of each CalEnviroScreen 4.0 percentage range, with yellow marking the top 50% and the dark red indicating the highest of scores and vulnerability.

Throughout San Diego, 230,904 San Diego County residents reside the region's most vulnerable census tracts – which is

Figure G-2: CalEnviroScreen 4.0 Percentiles

approximately 7% of the total population while 28% reside in vulnerable census tracts.

Table G-2: San Diego County Population Distribution per CalEnviroScreen

CalEnviroScreen 4.0 Percent		Percentage of Census Tracts Identified as Social Equity in San Diego County	Total Disadvantaged Population in San Diego County	Percentage of Disadvantaged Population in San Diego County
Top 50%	184	30%	946,325	28%
Top 25%	50	8%	230,904	7%

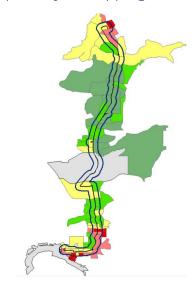

#### **Identifying Project Locations and Social Equity Areas**

Having identified the criteria for vulnerable and most vulnerable communities, the next step was to map and overlay these with RTIP project locations. This was done by first locating a project in GIS and placing a 1/2-mile buffer drawn around its project boundary to represent its area of influence.

This buffer accounts for the impact a project has on its surroundings, including access to services and other benefits provided by key amenities. In other words, people found within the buffer will have the most access to and are more likely receive greater project benefits.

Figure G-3 provides an example of a sample project, illustrated by the black line, with a 1/2-mile buffer and the census tracts it runs through. The entire area found within the 1/2-mile buffer of a project is the total project area. The portions of a total project area that fall within a top 50% or top 25% of CalEnviroScreen 4.0 census tract are called social equity areas. The sum of all social equity areas in any given project is its total social equity area.

Figure G-3: Sample Project Mapping

Next, staff calculated the social equity ratio, which serves as a multiplier in determining the proportion of vulnerable communities found in a project's total area.

This calculation is done by dividing the total social equity area by the total project area.

$$\frac{Total\ social\ equity\ area}{Total\ project\ area}\ =\ Social\ equity\ ratio$$

Once the social equity ratio is identified, the same ratio can be applied to a project's five-year RTIP funding as the social equity investment ratio.

Note that a key assumption of this methodology is that the social equity ratio will equal the social equity investment ratio. In other words, the proportion of a project that encompasses social equity areas is the same proportion of funding going towards these communities.

In terms of project dollars, the total social equity investment of a project is found by multiplying the social equity ratio by the total five-year RTIP programming project dollars.

Social equity ratio  $\times$  5 yr RTIP programming project dollars (USD)

= Total 5 yr RTIP social equity investment (USD)

For example, if the social equity ratio for Project A is 40%, meaning 40% of a project's total area is planned to be located in social equity areas, then we assumed 40% of its total five-year RTIP project dollars are invested in these areas. Therefore, it is assumed that 40% of Project A's benefits are going towards vulnerable communities. An example of how this would be applied is described below:

If Project A's total five-year RTIP investment is \$10 million, the sum would be multiplied by the social equity ratio – which was identified to be .4, or 40%.

As a result, \$4 million, or 40% of Project A's total five-year RTIP investment goes towards vulnerable communities.

#### Analyzing San Diego's Most Vulnerable Communities (Top 25%)

The same method can be applied to identify the proportion of five-year RTIP project dollars allocated towards San Diego's most vulnerable communities, or census tracts that score in the top 25% of CalEnviroScreen 4.0 scores. Rather than calculating areas in the top 50%, and therefore into the multiplier, we limited the ratio to only include the top 25%. This is considered the top 25% investment ratio.

#### **Results Analysis**

#### **2025 RTIP Projects**

Of the 395 total 2025 RTIP projects, 276 were able to be mapped and analyzed. Of those, 89 were found within most vulnerable communities, and 190, inclusive of the 89, were found within vulnerable communities.

The social equity areas of each mapped project were identified to create each project's social equity multiplier. Each multiplier was then applied to their corresponding total dollar amount to identify their total social equity investments. In total, social equity investments of mappable 2025 RTIP projects amount to approximately \$5 billion, or 38% of the total funding allocation of mapped projects.

Note the percentage of social equity RTIP investments analyzed in the 2025 RTIP does not include the remaining 119 unmappable projects.

Table G-3: Social Equity Investments in 2025 RTIP

CalEnviroScreen 4.0	Total Mapped Projects	2025 SE RTIP Investments (%)	2025 SE RTIP Investments (\$)
Vulnerable	190	38%	\$4.9b
Most Vulnerable	89	6%	\$830m

Table G-3 illustrates the total mapped projects identified within vulnerable and most vulnerable communities and their corresponding social equity investments.

#### **Additional Analyses:**

#### **Pollution Burden and Population Characteristics**

To provide more insight into each Census tract's cumulative CalEnviroScreen 4.0 score, each tract was broken down into its pollution burden and population characteristics percentiles.

The rationale for doing so is to identify the varying factors that make up each census tract's CalEnviroScreen 4.0 cumulative score as some components may contribute more to a tract's vulnerability than others.

For instance, a census tract alongside heavy-use freeways for goods movement and freight may have a higher overall pollution burden score and qualify as a disadvantaged community despite possibly scoring less in the population characteristics.

Each component group is comprised of two categories each:

- Exposures and Environmental Effects representing Pollution Burden
- Sensitive Populations and Socioeconomic Factors representing Population Characteristics.

Figure G-5 provides a breakdown of indicators that make up each Pollution Burden and Population Characteristics score, respectively.

For more information of the indicators that make up each category, please see the OEHHA's October 2021 CalEnviroScreen 4.0 report<sup>10</sup>.

<sup>&</sup>lt;sup>10</sup> CalEnviroScreen 4.0 Report 2021

Figure G-5: CalEnviroScreen 4.0 All Indicators & Component Groups

# **Pollution Burden**

#### **Exposures**

- · Ozone Concentrations
- · PM2.5 Concentrations
- · Diesel PM Emissions
- · Drinking Water Contaminants
- · Children's Lead Risk from Housing
- · Pesticide Use
- · Toxic Releases from Facilities
- · Traffic Impacts

#### **Environmental Effects**

- · Cleanup Sites
- · Groundwater Threats
- · Hazardous Waste
- · Impaired Water Bodies
- · Solid Waste Sites and Facilities

## Population Characteristics

#### **Sensitive Populations**

- Asthma Emergency Department Visits
- Cardiovascular Disease (Emergency Department visits for Heart Attacks)
- · Low Birth-Weight Infants

#### Socioeconomic Factors

- · Educational Attainment
- Housing-Burdened Low-Income Households
- · Linguistic Isolation
- · Poverty
- · Unemployment

Both component groups are weighted equally with a maximum score of 10 and are multiplied to find the cumulative CalEnviroScreen score.

Figure G-6 provides a visual representation of the formula used to identify each CalEnviroScreen 4.0 score.

Figure G-6: CalEnviroScreen 4.0 Formula

\*The Environmental Effects score was weighted half as much as the Exposures score.

Each CalEnviroScreen 4.0 cumulative score is modeled after two component groups multiplied together: Pollution Burden and Population Characteristics.

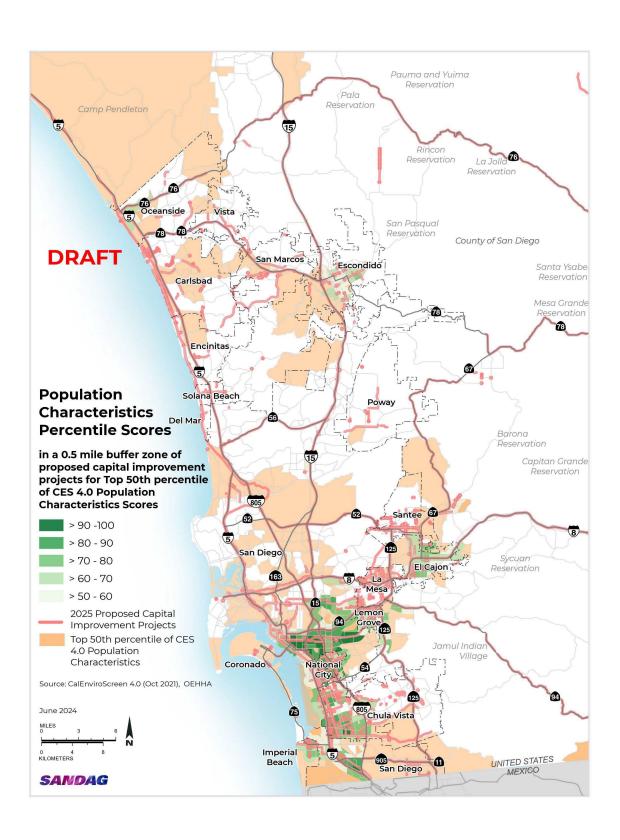

As with the CalEnviroScreen 4.0 scores, we analyzed the top 25 and 50% of both Pollution Burden scores and Population Characteristics scores in the San Diego region to identify census tracts that are vulnerable and most vulnerable to these component groups.

Figures G-7 and G-8 shows the 2025 RTIP project locations in the region that are in the top 50% of Pollution Burden scores and Population Characteristics scores, respectively.

#### **Low-income and Minority Populations**

As forementioned, staff conducted an additional analysis of 2025 RTIP project locations and low-income and minority populations in accordance with Title VI and California Government Code Section 65040.12(e).

Figures G-9 and G-10 illustrate the 2025 RTIP project locations overlaid with the region's population density for low-income and minority groups, respectively.

Figure G-9: Low-Income Population Density and 2025 RTIP Project Locations

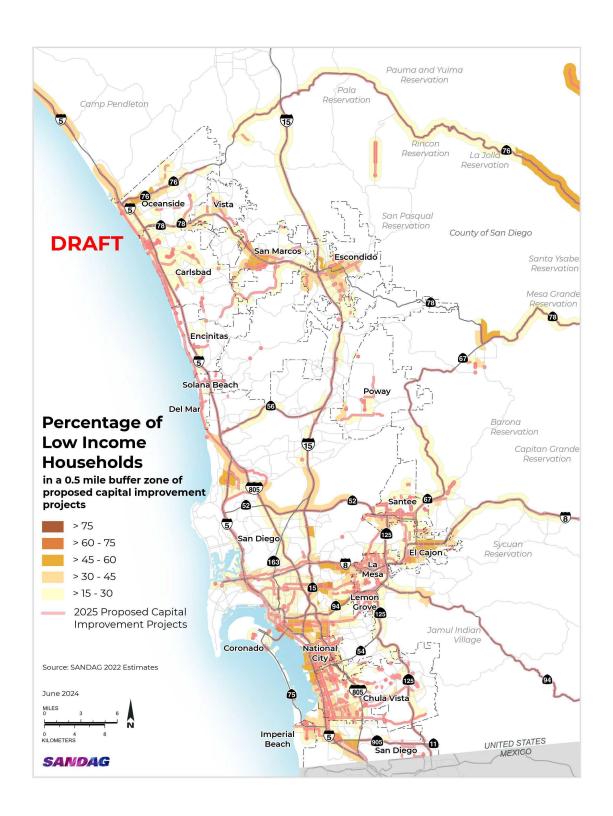

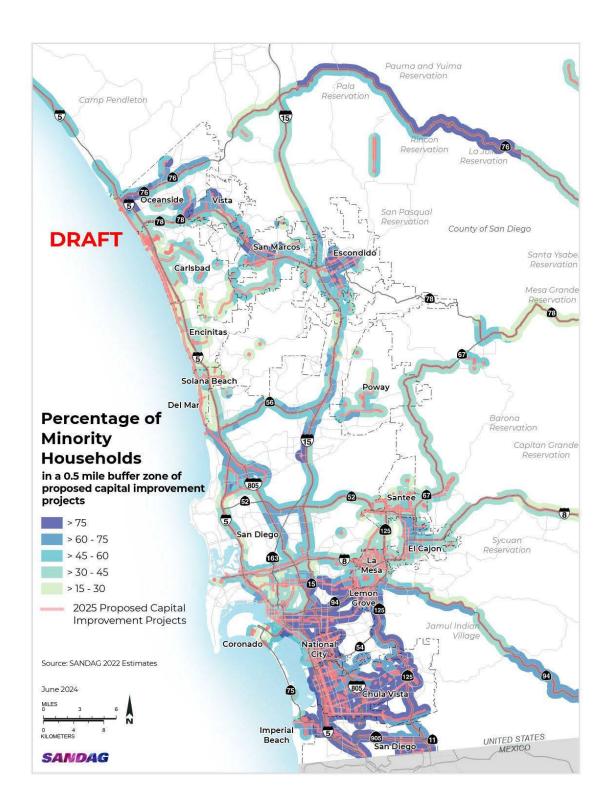

Figure G-10: Minority Population Density and 2025 RTIP Project Locations

#### Additional Social Equity Data from ProjectTrak

Four questions were added into ProjectTrak for the 2025 RTIP to gauge local planning agencies' understanding of social equity best practices. In doing so, we hope to prompt planning agencies to center social equity in the development of their projects and programs.

#### **Questions Asked**

- 1. Has a Title VI Analysis been performed? Answer choices were either (Yes, No, or Not Required/Not Applicable)
- 2. As a result of this project's improvements, what benefits are anticipated for SANDAG's priority populations (i.e., minorities, low-income populations, and seniors)? (Open-ended answers)
- 3. As a result of this project's construction/implementation, how many housing units, businesses, and/or jobs will be displaced (either temporarily or permanently)?
- 4. As a result of this project's construction/implementation, how many acres of parks, open space, and other public facilities will be converted to transportation uses?

#### **Agency Responses**

Table G-4: Question Responses

Social Equity Questions  Agency Responses					
Question	# Projects	Agencies Responding	Responses		
Has a Title VI Analysis been performed?	160	10	36 - Yes 58 - No 66 - Not Required		
As a result of this project's improvements, what benefits are anticipated for SANDAG's minority populations (i.e., minorities, lowincome populations, and seniors)?	16 Responses	2	Open-ended response		
As a result of this project's construction/implementation, how many housing units, businesses, and/or jobs will be displaced (either temporarily or permanently)?	19 Responses	3	Open-ended response		
As a result of this project's construction/implementation, how many acres of parks, open space, and other public facilities will be converted to transportation uses?	19 Responses	3	Open-ended response		

Table G-4 shows the questions asked, the number of projects corresponding to the responses, and the number of agencies responding to each respective question.

#### **Key Takeaways**

 Most respondents answered Not Required when asked if their project had performed a Title VI analysis.

- Notable project benefits to SANDAG's minority populations include overall resurfacing and roadway safety improvements, improved ADA crossing infrastructures, improved signal and communications at intersections and crosswalks, and evaluation of affordable housing locations and community amenities.
- All respondents answered "None" or "0" when asked about temporary or permanent displacement and conversion acreage.

#### **Limitations**

- Answers are self-reported and therefore there is no way to confirm accuracy.
- Quantifiable information such as measuring displacement and conversion acreage may be unable to capture during the planning and construction phase.
- Whether a Title VI analysis resulted in compliance or violation of Title VI legislation.
- Some listed benefits may impact the public at-large and include SANDAG's minority populations, however, whether a benefit proportionately impacts these populations is undetermined.

#### **Local Jurisdiction Interviews**

With the help of a consultant, SANDAG conducted interviews with selected jurisdictions to compile initial feedback, identify trends, and inform recommended improvements for the RTIP's project data collection system, or ProjectTrak. The interviews focused on previous experiences with ProjectTrak, methods for collecting and storing project data, and how social equity is mapped in transportation projects. Ten jurisdictions, chosen to represent the diversity of San Diego County with a focus on historically underinvested communities, were interviewed: Cities of Chula Vista, El Cajon, Escondido, Imperial Beach, Lemon Grove, Oceanside, San Diego, Santee, Vista, and the County of San Diego.

#### **Feedback Summary**

Below is a summary of overall themes and takeaways gathered from the interviews.

- Jurisdictions generally have a positive experience using ProjectTrak, while employing various methods for project data tracking and differing approaches to social equity.
- Generally, jurisdictions prioritized projects in areas that have been historically excluded from community infrastructure improvements.
- Example methods of tracking social equity include Community Needs Assessments, Environmental Justice Elements, and Community Development Programs.
- In cities with low overall socioeconomic status, mapping specific areas was often unnecessary as the entire city met social equity criteria.
- Understaffed jurisdictions or those facing high staff turnover have difficulty obtaining social equity-related project information.
- Inconsistent data tracking methods and staffing challenges across jurisdictions hinder data management.

#### **Recommendations for Improvements**

Below is a list of recommended improvements for project data collection based on the interviews.

- Increase mapping solutions for non-roadway projects. Examples may include but are not limited to city-wide studies.
- Adding a clickable 'question mark' for more background information on questions and data entry fields.
- Create easier access to past project submittals for financial tracking.
- Define technical language and acronyms.
- Provide metrics for requested social equity measurements.
- Provide background information and context on yes/no questions.

#### What does this tell us?

- Standardizing data management practices across jurisdictions is necessary for planning equitable infrastructure improvements.
- Providing adequate support and resources to jurisdictions, especially those with limited staff or high turnover rates, is necessary to further equitable infrastructure improvements.

#### **Methodology Challenges**

As staff continues to improve data collection and strengthen the analysis, certain challenges continue to present themselves as opportunities for improvement during future iterations.

#### **Project Location**

Although the 2025 RTIP analysis increased the number of projects mapped, continuing to increase this number will provide more comprehensive results. Continued follow-up with local agencies and evaluation of supplemental project information can help achieve this. However, a dedicated user-friendly GIS system for projects and additional staff support to enter information would greatly benefit the data collection process.

#### CalEnviroScreen 4.0

CalEnviroScreen 4.0 uses 2010 census tract boundaries made available by the Census Bureau. As this update of CalEnviroScreen was released in 2021, boundaries from the 2020 Census will not be incorporated until the OEHHA updates and releases the next CalEnviroScreen update, presumably CalEnviroScreen 5.0. In contrast, SANDAG's Series 15 Forecast uses 2022 census data with 2020 census tract boundaries and is the geographic unit for the supplemental analyses for low-income and minority populations in the region. Staff will explore alternative indices to CalEnviroScreen 4.0 that are more recent and more frequently updated, including exploring the adoption of an internal social equity index.

As forementioned, due to the repeal of California's 1996 Proposition 209 on Affirmative Action in 2020, CalEnviroScreen 4.0 does not incorporate race and ethnicity into its cumulative impact scores. However, a report released by the OEHHA found that areas with the highest percentages of people of color received the highest pollution burden scores statewide.<sup>11</sup>

#### **Five-Year Investments in RTIP**

Due to the nature of the five-year RTIP, there will be variations in the dollars programmed as projects progress through phases. Projects which are in the design phase typically have fewer funds committed than projects in construction despite the project area remaining the same. After construction has been completed, a project's remaining costs accounted for in the RTIP are typically for budget closeout, plant reestablishment, and debt repayment. Programming rules do not allow for the construction phase to be programmed until a project is fully funded. Therefore, as we seek funding for a project's construction phase, major project costs may not be included in the RTIP.

Conversely, because the RTIP is a mechanism by which the federal government authorizes funding, once the work has been and authorized and/or funding has been reimbursed for work, those funds may be reflected in prior years, and not shown in the current five-year element.

#### **Measuring Beneficial and Negative Impacts**

This analysis does not account for the social, economic, and environmental impacts of a project on a particular area or specific populations.

Another key assumption within the current methodology is that the project dollars in a specific location are synonymous with a project's benefits. As a result, negative impacts like increased pollution, housing displacement, and overall community disruption are not captured in this analysis. Conversely, this method does not measure the potential benefits of projects which may not fall primarily in a vulnerable community, but nonetheless provide access for vulnerable populations to further destinations, jobs, education, and healthcare.

#### **Next Steps**

Staff will continue to refine the social equity analysis for future RTIP updates. In future iterations of this analysis, it is recommended to provide more nuanced understandings of a project's impacts on vulnerable communities beyond solely relying on location and project dollars.

As forementioned, the social, economic, and environmental costs and benefits are not captured through this methodology.

Future goals for this analysis include but are not limited to:

- 1. Identify factors to measure positive and negative impacts of projects which cannot be assigned to a specific location
- 2. Explore alternative indices to CalEnviroScreen 4.0
- 3. Provide local agencies assistance and incentive to provide better location information

<sup>&</sup>lt;sup>11</sup>Analysis of Race/Ethnicity and CalEnviroScreen 4.0 Scores

- 4. Measure positive and negative impacts of projects in terms of social, economic, and environmental outcomes
- 5. Further delineate project locations, project types, and investments by vulnerable populations/demographics both regionally and sub-regionally
- 6. Secure funding and resources to improve methodology, automate, and improve data collection in future cycles of analyses.

#### Conclusion

The results of this analysis connected location-based data, planning principles, and financial programming to provide baseline knowledge of investments in our vulnerable communities within a 5-year programming window. More importantly, the results provide insight into the implementation of the 2021 Regional Plan and its strides towards social equity in the San Diego region. The analysis for the 2025 RTIP accomplished two major improvements compared to its predecessor: an increase in geographic data collection and incorporating population-based analyses. Both improvements help build the foundations for a comprehensive and standardized analysis that will continue to inform SANDAG projects and programming. SANDAG is committed to continuously refining this process in the years to come through meaningful stakeholder engagement and cross-departmental collaboration.

# Appendix H Federal Performance Management

# Appendix H Federal Performance Management

### **Transportation Performance Management**

#### Introduction

Signed into law in 2012, the federal surface transportation bill Moving Ahead for Progress in the 21st Century Act (MAP-21) included provisions for the establishment of a performance-and outcome-based program that includes national performance goals for the Federal-Aid Highway Program in seven areas: safety, infrastructure condition, congestion reduction, system reliability, freight movement and economic vitality, environmental sustainability, and reduced project delivery delays (23 USC 150[b]). This act significantly advanced the application of performance-based planning and programming in the field of transportation. It established a system to further inform transportation planning and programming with the unified application of observed data, performance measures, and performance targets in the areas of safety, asset condition, and system performance.

The subsequent surface transportation bills, Fixing America's Surface Transportation (FAST) Act and Bipartisan Infrastructure Law (BIL), continued these performance provisions. Starting in 2016, the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) issued a series of Final Rules to implement the performance provisions. These rules establish the protocols, including the timelines, processes, data, and reporting requirements, to comply with the performance provisions.

The rules were designed to be applicable nationwide and to provide meaningful information at regional scales and larger. FHWA released three rules: transportation safety; infrastructure conditions; and system performance, freight movement, and Congestion Mitigation and Air Quality (CMAQ) (23 CFR Part 490). The performance management (PM) rules are also referred to by the order they were released: PM I for safety, PM 2 for infrastructure condition, and PM 3 for system performance, freight movement, and Congestion Mitigation and Air Quality (CMAQ) (23 CFR Part 490). FTA released a transit asset management (TAM) rule establishing procedures to help maintain key transit assets in a state of good repair and a public transportation safety rule. A separate transportation planning rule (23 CFR Parts 450 and 771 and 49 CFR Part 613), jointly released by FHWA and FTA, guides how performance is integrated into planning and programming processes and documents. This rule states that the regional Transportation Improvement Program (TIP) shall be designed such that it "makes progress towards achieving performance targets" and that it includes, "to the maximum extent practicable, a description of the anticipated effect of the TIP towards achieving the performance targets."

In support of these rules, SANDAG has entered into data-sharing and target-setting coordination agreements with Caltrans, San Diego Metropolitan Transit System (MTS), and North County Transit District (NCTD). In March 2018, SANDAG and Caltrans signed an addendum to the Memorandum of Understanding (MOU) on Planning and Programming to meet the performance-based planning and programming requirements established in MAP-21. In April 2018, SANDAG and Caltrans entered into a data concurrence agreement to enable the use of mutually agreed-upon datasets for target-setting purposes. In May 2018, SANDAG, MTS, and NCTD signed an addendum to the master MOU adding coordination efforts on data collection and data sharing to support transit asset management regional targets. In February 2021, SANDAG, MTS, and NCTD finalized an MOU addendum on safety data, planning, and programming.

As the Metropolitan Planning Organization (MPO) for the San Diego region, SANDAG is required to set targets for the performance measures in these rules. This appendix includes the targets for each federal performance measure, target-setting process details, and regional investments that help support achievement of the targets. Progress on targets and observed conditions are included in San Diego Forward: the 2021 Regional Plan (2021 Regional Plan), <u>Appendix O: Federal System Performance Report</u>.

#### **Interagency Coordination**

SANDAG coordinates and collaborates on performance target setting and monitoring performance updates using a public process. Coordination involves local jurisdictions, Caltrans, public transit providers, public safety agencies, and community members. SANDAG utilizes its public meeting structure of task forces, working groups, and policy advisory committees as the public interagency coordination process. The specific meetings for target setting and performance monitoring vary by performance management content area. Starting November of 2022, SANDAG's Transportation Committee has delegated authority to approve all federal performance management targets.

#### **Transportation Safety (PM 1)**

#### **Target Setting Process**

Transportation safety performance management, also referred to as PM 1, includes five performance measures. The target-setting process consists of Caltrans, in consultation with California MPOs and the Office of Traffic Safety, establishing statewide safety targets. The statewide safety target-setting process is informed by safety plans including the Caltrans Strategic Highway Safety Plan (SHSP) and Office of Traffic Safety Highway Safety Plan (HSP). Once Caltrans has established statewide targets, SANDAG has 180 days to adopt the statewide targets or develop and adopt regional targets. Adoption of targets includes commitment to support their achievement. PM 1 requires annual target updates.

The Board of Directors approved supporting the statewide targets on the following dates:

- January 26, 2018, for the 2018 statewide safety targets
- January 25, 2019, for the 2019 statewide safety targets
- January 24, 2020, for the 2020 statewide safety targets
- December 18, 2020, for the 2021 statewide safety targets
- January 28, 2022, for the 2022 statewide safety targets

The Transportation Committee approved supporting the statewide targets on the following dates:

- February 3, 2023, for the 2023 statewide safety targets.
- February 16, 2024, for the 2024 statewide safety targets.

To support the statewide safety targets, SANDAG will plan and program projects that contribute to achieving the statewide safety targets. The 2018-2024 statewide safety targets for the transportation safety performance measures are shown in Table H-1.

Table H-1: Statewide Transportation Safety Performance Management Targets

Performance Measure	2018	2019	2020	2021	2022	2023	2024
Number of Fatalities	3,590.8	3,445.4	3,518.0	3,624.8	3,491.8	3,808.2	4,080.6
Rate of Fatalities per 100 Million Vehicle Miles Traveled (VMT)	1.029	0.995	1.023	1.044	1.042	1.216	1.300
Number of Serious Injuries	12,823.4	12,688.1	13,740.4	15,419.4	16,704.2	15,156.2	16,628.1
Rate of Serious Injuries per 100 Million VMT	3.831	3.661	3.994	4.423	4.879	4.904	4.918
Number of Nonmotorized Fatalities and Serious Injuries	4,271.1	3,929.8	4,147.4	4,340.8	4,684.4	4,131.7	4,380.5

Source: Caltrans, 2017-2024

#### **Measures and Methodology**

The performance measures included in transportation safety are applicable to all public roads regardless of ownership or maintenance responsibility. Table H-2 provides an overview of the calculations and data sources for each performance measure included in the transportation safety performance management area.

Table H-2: Transportation Safety Performance Measure Methodology

	Transportation Safety Performance Measure Methodology						
Per	formance Measure	Calculation	Data Source				
1.	Number of Fatalities	Five-year rolling average	<ul> <li>Fatality Analysis         Reporting System         (FARS)</li> </ul>				
2.	Rate of Fatalities per 100 million VMT	Five-year rolling average of annual fatality rate	<ul> <li>FARS</li> <li>Highway         Performance             Monitoring System             (HPMS)     </li> </ul>				
3.	Number of Serious Injuries	Five-year rolling average	<ul> <li>Statewide Integrated Traffic Records System (SWITRS)</li> </ul>				
4.	Rate of Serious Injuries per 100 million VMT	Five-year rolling average of annual serious injury rate	<ul><li>SWITRS</li><li>HPMS</li></ul>				
5.	Number of Non- motorized Fatalities and Non-motorized Serious Injuries	Five-year rolling average of the annual sum of non-motorized fatalities and non-motorized serious injuries	<ul><li>FARS</li><li>SWITRS</li></ul>				

Source: 23 CFR 490

#### 2021 Regional Plan and 2025 RTIP Investments

SANDAG is taking an active role to advance regional traffic safety goals for the San Diego region. The SANDAG Board of Directors adopted a <u>Regional Vision Zero Resolution</u> with steps toward eliminating all traffic fatalities and severe injuries while increasing safe, healthy, and equitable mobility options for all. <u>Vision Zero</u> rejects the idea that traffic crashes are inevitable and instead views them as preventable incidents. SANDAG has launched the <u>Traffic Safety Dashboard</u> that includes more than a decade of robust, thoroughly analyzed crash data in an easy to use platform. Data from this dashboard are the foundation of the Vision Zero Action Plan currently being developed that will include data analysis and inform future decision makers about the traffic and safety conditions in their jurisdictions.

The 2021 Regional Plan includes as a policy objective the provision of safe and secure travel choices. This policy is supported by the Regional Plan's Active Transportation Implementation Strategy and Urban Area Transit Study which include safety strategies for active transportation. The RTIP Database (ProjectTrak) includes a Performance Management section wherein project sponsors provide project information related to investments in safety. The 2025 RTIP includes 242 safety-related projects. These projects were identified by the project sponsors and include more than \$1.6 billion in investments for the four-year RTIP program (FY 2025–FY 2028). Just over half of these projects are considered categorical safety projects under the conformity rule, with safety improvements being the main project goal. These safety category projects account for approximately 75% of the programmed safety dollars. The remaining projects include a variety of project categories and include projects where only a portion of the overall investment includes safety-related elements such as the addition of bike lanes as part of a roadway widening project. Table H-3 summarizes the 2025 RTIP safety investments by project category.

Table H-3: 2025 RTIP Safety Program Summary by Project Category

2025 RTIP Safety Program Summary by Project Area (FY 25–FY 28)					
Project Category	Safety Programming (\$000)				
Safety-Focused Projects <sup>1</sup>	\$1,208,000				
Intersection and Interchange Projects <sup>2</sup>	\$32,000				
Studies, Landscaping, and Enhancement Projects <sup>3</sup>	\$110,000				
Additional Safety Improvements included in other projects <sup>4</sup>	\$26,000				
Public Transit <sup>5</sup>	\$204				
Bicycle and Pedestrian Improvements <sup>6</sup>	\$234,000				
Total <sup>7</sup>	\$1,609,000				

Source: ProjectTrak, August 2024

Notes: <sup>1</sup>Examples of projects in this category include Safety Improvement Program projects, railroad/highway crossings, pavement resurfacing and/or rehabilitation, non-signalization traffic control, lighting improvements, increasing sight distance, hazard-elimination program, guardrails, median barriers, crash cushions, and adding medians.

#### **Illustrative Projects**

• Regionwide, Caltrans District 11 is delivering the grouped projects for Highway Safety Improvements Program, CAL105. Activities include installation of high visibility crosswalks, streetlights, guard rails, and Leading Pedestrian Interval Signals. This project will also construct sidewalks, bike lanes, and implement Complete Streets measures.

<sup>&</sup>lt;sup>2</sup> Projects in this category include traffic signal synchronization projects, intersection signalization, interchange channelization, and interchange reconfiguration.

<sup>&</sup>lt;sup>3</sup> Some examples of projects contained within this category include engineering studies, landscaping, and transportation-enhancement projects.

<sup>&</sup>lt;sup>4</sup> This category includes safety elements that are part of a larger project.

<sup>&</sup>lt;sup>5</sup> This category includes safety elements related to public transit. Additional transit safety projects are included in the Public Transportation Agency Safety section of this document.

<sup>&</sup>lt;sup>6</sup> This category includes bicycle and pedestrian projects.

<sup>&</sup>lt;sup>7</sup> Total may not match due to rounding.

- In the City of San Diego, SAN234 Uptown Bikeways: Eastern Bikeways includes the design and construction of 1.7 miles of on-street bikeway, including design and construction of the Normal Street Promenade, enhancing bike and pedestrian safety in the Uptown neighborhoods.
- Regionwide, Caltrans District 11 is delivering the Grouped Projects for Safety
  Improvements SHOPP Collision Reduction Program, CAL46B, which widens shoulders,
  constructs retaining walls with safety barriers, removes boulders, and relocates and
  reconstructs drainage systems to improve safety.

#### **Interagency Coordination**

SANDAG coordinates and collaborates on transportation infrastructure–related concerns and projects with local jurisdictions, Caltrans, and the public through several working groups and committees. The PM I safety targets were developed in coordination with the Transportation Committee. For more information see Interagency Coordination in the introduction section.

#### **Target Achievement and Future Target Setting**

Final empirical safety data are available approximately two years after a crash occurs. These data are currently available through 2022. When annual final empirical safety data are published, FHWA reviews statewide performance relative to established targets. FWHA defines significant progress as performance that meets or is better than targets or performance is better than baseline for four out of the five safety performance measures. For the years with available data, California has not met FHWA's significant progress definition. As a result, Caltrans developed a Highway Safety Improvement Program Implementation Plan.

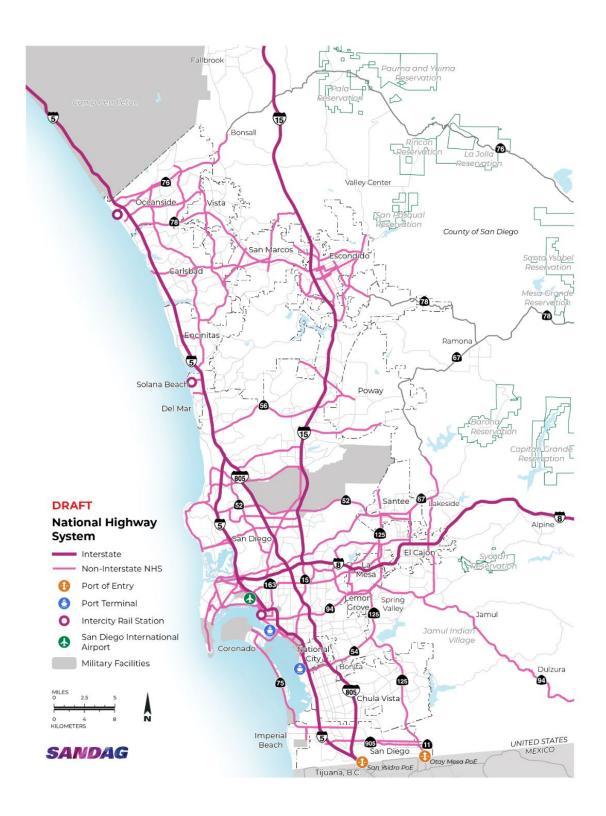

SANDAG will continue to update annual safety targets and collaborate with Caltrans, FHWA, and other California MPOs on future safety targets.

#### **Infrastructure Conditions (PM 2)**

#### **Target-Setting Process**

The infrastructure conditions performance management area, also referred to as PM 2, includes six performance measures on pavements and bridges. The performance measures included in PM 2 are applicable to the National Highway System (NHS) which is depicted in Figure H-1. In 2022, Caltrans established statewide targets for the PM 2 performance measures, shown in Table H-4. The statewide targets were informed by Caltrans Transportation Asset Management Plan, which considers life-cycle costs, risk, and cost-effectiveness. For this performance management area, MPOs like SANDAG have the option of supporting the state department of transportation's pavement and bridge condition targets or developing and supporting regional targets. On February 3, 2023, the SANDAG Transportation Committee approved supporting the statewide targets for pavement and bridge condition established by Caltrans in accordance with the FAST Act.

Figure H-1: National Highway System

Targets for Infrastructure Conditions (PM 2) are based on a four-year performance period. The current performance period spans from 2022 to 2025. In addition to the four-year target, a midcycle two-year target is established. At the performance period midpoint, agencies can review and update the four-year target. In 2023 Caltrans and MPOs evaluated the progress to the four-year target and elected not to update any of the four-year targets.

Table H-4: Statewide Infrastructure Conditions Performance Management Targets (PM 2)

Statewide Infrastructure Conditions Performance Targets (PM 2)					
	Two-Year NHS Targets				
Performance Measures	Performance Measures 2023		2025		
	Good	Poor	Good	Poor	
Pavements on the NHS					
Interstate	47.2%	1.9%	49.2%	1.7%	
Non-Interstate	21.7%	10.5%	28.2%	9.0%	
Bridges on the NHS	49.1%	5.9%	47.3%	4.4%	

Source: Caltrans, 2022

#### **Measures and Methodology**

Pavement condition is based on roughness, cracking, rutting, and faulting. The pavement measures are aggregated to roadway lane miles and based on measurements taken for curb lane conditions.

Bridge condition is based on engineering assessment of the deck and support structures. The bridge measures are aggregated to the bridge deck area. This section, including Tables H-5 and H-6, summarizes the calculation and data sources for each performance measure included in the Infrastructure Conditions performance rule.

For performance monitoring, pavement is categorized into asphalt, Jointed Concrete Pavement (JCP), and Continuously Reinforced Concrete Pavement (CRCP). Each category of pavement is assessed using various rating systems as listed below. The pavement category rating system is included in Table H-6.

Asphalt: International Roughness Index (IRI), rutting, cracking percent

JCP: IRI, faulting, cracking percent

CRCP: IRI, cracking percent

Table H-5: PM 2 Performance Measure Methodology

	PM 2 Performance Measure Methodology					
Р	erformance Measure	Calculation	Data Source			
1.	Pavement on the Interstate in good condition	Lane miles with all metrics rated as good	Highway Performance Monitoring System (HPMS)			
2.	Pavement on the interstate in poor condition	Lane miles with two or more metric rated poor	HPMS			
3.	Pavement on the non- interstate NHS in good condition	Lane miles with all metrics rated as good	HPMS			
4.	Pavement on the non- interstate NHS in poor condition	Lane miles with two or more metric rated poor	HPMS			
5.	Percentage of NHS bridges by deck area in good condition	Deck area of NHS bridges with condition index of 7 or above (deck, superstructure, and substructure) divided by deck area of all NHS bridges	National Bridge Inventory (NBI)			
6.	Percentage of NHS bridges by deck area in Poor condition	Deck area of NHS bridges with any condition index of below 5 (deck, superstructure, and substructure) divided by deck area of all NHS bridges	NBI

Table H-6: Pavement Category Rating System

	Good	Fair	Poor
IRI (inches/mile)	<95	95–170	>170
Rutting (inches)	<0.20	0.20-0.40	>0.40
Faulting (inches)	<0.10	0.10-0.15	>0.15
Cracking (%)	<5	5–20 (asphalt) 5–10 (CRCP)	>20 (asphalt) >15 (JCP) >10 (CRCP)

Source: FHWA, Transportation Performance Management (TPM)

#### 2021 Regional Plan and 2025 RTIP Investments

The 2021 Regional Plan includes \$163 billion dollars¹ in expenditures; approximately 20% of that is established for maintenance and operations on highways and local streets and roads. As projects transition from the Regional Plan and are programmed into the RTIP, project sponsors provide information that allows summary statistics of investments on the NHS. The 2025 RTIP includes investments that are anticipated to help preserve, maintain, or enhance the condition of NHS facilities. This includes 32 pavement and 14 bridge projects on the NHS totaling over \$480 million dollars in the first four years of the 2025 RTIP. Tables H-7 and H-8 summarize the investments currently programmed in the 2025 RTIP that support the pavement and bridge performance targets, respectively.

Table H-7: 2025 RTIP Pavement Program Summary

2025 RTIP NHS Pavement Investments (FY 25–FY 28)	
Project Phase	Investment (\$000)
Environmental / Preliminary Engineering / Design	\$62,000
Right-of-Way	\$3,000
Construction	\$235,000
Total <sup>2</sup>	\$300,000

Source: ProjectTrak, August 2024

Table H-8: 2023 RTIP Bridge Program Summary

2025 RTIP NHS Bridge Investments (FY 25-FY 28)	
Project Phase	Investment (\$000)
Environmental / Preliminary Engineering / Design	\$25,000
Right-of-Way	\$1,000
Construction	\$154,000
Total <sup>3</sup>	\$180,000

<sup>&</sup>lt;sup>2</sup> Total may not match due to rounding

<sup>&</sup>lt;sup>3</sup> Total may not match due to rounding

#### **Illustrative Projects**

- Regionwide, Caltrans District 11 is delivering the Grouped Projects for Pavement
  Resurfacing and Rehabilitation SHOPP Roadway Preservation Program, CAL46E, which
  makes drainage system restoration, system enhancements, and pavement rehabilitation
  to various parts of the county.
- Regionwide, Caltrans District 11 is delivering the Grouped Highway Bridge Program and SHOPP Bridge Rehabilitation and Reconstruction programs. CAL46D upgrades and reconstructs bridges countywide.

#### **Interagency Coordination**

SANDAG coordinates and collaborates on transportation infrastructure–related concerns and projects with local jurisdictions, Caltrans, and the public through several working groups and committees. The Infrastructure Conditions performance targets on pavement and bridge conditions were developed in coordination with the Transportation Committee. For more information see Interagency Coordination in the introduction section.

#### **Target Achievement and Future Target Setting**

On October 5, 2018, the Transportation Committee approved supporting the two-year and four-year statewide pavement and bridge condition targets established by Caltrans for the first performance period. This performance period spanned from 2018 to 2021. In consultation with MPOs, Caltrans reviewed the statewide data in 2020 and elected not to change the four-year targets. In 2022 FHWA determined that California made significant progress on Interstate and poor condition non-Interstate NHS pavements based on target achievement. Significant progress was not made for non-Interstate good pavements and bridges conditions requiring additional reporting by Caltrans.

The second performance period spans from 2022 to 2025. SANDAG participated in the development of Caltrans' 2022 Transportation Asset Management Plan which informed the second performance period targets. On February 3, 2023, the Transportation Committee approved Caltrans two and four-year targets for statewide pavement and bridge conditions. Once the full performance period has elapsed, FHWA will determine if California has made significant progress toward meeting the pavement and bridge condition targets. SANDAG continues to collaborate with Caltrans, FHWA, and other California MPOs on monitoring progress towards targets.

# System Performance, Freight, and Congestion Mitigation and Air Quality (PM 3)

#### **Target-Setting Process**

The System Performance, Freight, and Congestion Mitigation and Air Quality performance management area (System Performance), also referred to as PM 3, consists of six performance measures that support three federal programs: National Highway Performance Program (NHPP), freight movement, and CMAQ. The target-setting process and timeframe are specific to each of these programs. This section summarizes the target-setting timeframes, processes, and performance periods for the performance measures included in System Performance.

Three of the performance measures included in System Performance allow SANDAG and all MPOs the option of supporting the state department of transportation's targets or developing and supporting regional targets. For these performance measures SANDAG has elected to support the statewide targets. These measures include the percent of reliable person-miles traveled on the interstate, percent of reliable person-miles traveled on the non-interstate NHS, and percent of interstate system mileage providing reliable truck travel time.

The performance measure related to total emissions reductions by applicable pollutants under the CMAQ Program allows MPOs to establish regional targets based on emissions anticipated to be reduced from CMAQ-funded projects.

The following two performance measures require Caltrans and SANDAG to establish a single, unified target for the urbanized area within the SANDAG planning area. Figure H-2 shows Census Urbanized Area.

- Annual Hours of Peak-Hour Excessive Delay per Capita
- Percent of Non-Single-Occupancy Vehicle (SOV) Travel

Figure H-2: 2010 and 2020 Census Urbanized Areas

Source: US Census Bureau, 2010 and 2020 Census

The target-setting timeframes for PM 3 performance measures vary by the associated federal program. Table H-9 summarizes the target-setting dates for each of the PM 3 performance measures. On February 3, 2023, the Transportation Committee approved supporting the statewide targets for system performance, freight, and CMAQ established by Caltrans in accordance with the FAST Act.

The CMAQ emissions-reduction measure's four-year performance period follows the federal fiscal year and spans from October 1, 2022, to September 30, 2025. The remaining performance measures follow the calendar year, starting January 1, 2022, and ending December 31, 2025.

Table H-9: Statewide and Regional System Performance Management Target-Setting Approvals

Performance Measures Target Approval Dates for System Performance						
Program	Performance Measure	Dates Targets Established				
NHPP	Percent of Reliable Person-Miles Traveled on the Interstate					
MIPP	Percent of Reliable Person-Miles Traveled on the Non-Interstate NHS	May 18, 2023				
Freight Movement on the Interstate System	Percent of Interstate System Mileage Providing Reliable Truck Travel Time (Truck Travel Time Reliability Index)					
	Percent of Non-SOV Travel	- September 23,				
CMAQ	Annual Hours of Peak-Hour Excessive Delay per Capita	2022				
	Total Emissions Reductions by Applicable Pollutants under the CMAQ Program	September 23, 2022				

Source: 23 CFR 490, SANDAG

Table H-10 includes the adopted target for each PM 3 performance measure and 2022 baseline data where available. The CMAQ total emission-reduction performance target reflects the anticipated cumulative emission reduction to be reported in the CMAQ Public Access System.

Table H-10: Statewide and Regional System Performance Management Targets

Statewide and Regional System Performance Targets								
Performance Measures	2022 Baseline Data	Two-Year Target 2023	Four-Year Target 2025					
Percent of Reliable Person-Miles Traveled on the Interstate	73.8%	74.3% (+0.5%)	74.8% (+1%)					
Percent of Reliable Person-Miles Traveled on the Non-Interstate NHS	83.7%	84.2% (+.05)	84.7% (+1%)					
Percent of Interstate System Mileage Providing Reliable Truck Travel Time (Truck Travel Time Reliability Index)	1.60	1.60 (0.00)	1.60 (0.00)					
Total Emissions Reductions by Applicable Pollutants under the CMAQ Program								
San Diego Urban Area (UA) <sup>1</sup>								
VOC (kg/day)		66	137					
CO (kg/day)		0	0					
NOx (kg/day)		82	168					
Statewide								
VOC (kg/day)	2,551.00	2,862.00	5,724.00					
CO (kg/day)	21,771.00	12,798.00	25,596.00					
NOx (kg/day)	7,213.00	4,317.00	8,635.00					
PM10 (kg/day)	3,830.00	2,152.00	4,305.00					
PM 2.5 (kg/day)	1,537.00	1,830.00	3,659.00					
Annual Hours of Peak-Hour Excessive Delay per Capita <sup>1</sup>								
San Diego UA	11.9 hours	11.9 hours	11.9 hours					
Percent of Non-SOV Travel <sup>2</sup>								
San Diego UA	26.0%	36.2%	36.4%

### **Measures and Methodology**

For the reliable person-miles traveled performance measures, the Level of Travel Time Reliability (LOTTR) is first calculated for each applicable roadway segment for four time periods: 6 to 10 a.m., 10 a.m. to 4 p.m., 4 to 8 p.m. on weekdays, and 6 a.m. to 8 p.m. during weekends. The LOTTR is the 80th percentile travel time divided by the 50th percentile travel time. The LOTTR is weighed by the facility segment length, annual traffic volume, and vehicle occupancy value.

Freight movement is assessed by a Truck Travel Time Reliability (TTTR) Index. Reporting is divided into five periods: morning peak (6 to 10 a.m.), midday (10 a.m. to 4 p.m.) and afternoon peak (4 to 8 p.m.) Mondays through Fridays; weekends (6 a.m. to 8 p.m.); and overnights for all days (8 p.m. to 6 a.m.). The TTTR ratio is generated by dividing the 95th percentile time by the normal time (50th percentile) for each segment. Then, the TTTR Index is generated by multiplying each segment's largest ratio of the five periods by its length then dividing the sum of all length-weighted segments by the total length of Interstate.

The Annual Hours of Peak Hour Excessive Delay per Capita is the amount of time spent in congested conditions, which are defined as conditions that result in excess delay at speeds of 20 miles per hour (mph) or 60% of the posted speed limit, whichever is greater. Travel time data is aggregated in 15-minute intervals per vehicle. The morning period is 6 to 10 a.m. on weekdays. The afternoon period is 3 to 7 p.m. or 4 to 8 p.m., providing flexibility to state DOTs and MPOs.

Additional details on the methodology used in calculating the six performance measures included in System Performance are summarized in Table H-11.

Table H-11: System Performance Measure Methodology

	System Performance Measure Methodology							
	Performance Measure	Calculation	Data Source					
1.	Percent of Reliable Person-Miles Traveled on the Interstate	Percent of Interstate by length with an LOTTR less than 1.5	National Performance Measure Research Data Set (NPMRDS)					
2.	Percent of Reliable Person-Miles Traveled on the Non-Interstate NHS	Percent of non-Interstate NHS by length with an LOTTR less than 1.5	NPMRDS					
3.	Percent of Interstate System Mileage Providing Reliable Truck Travel Time (Truck Travel Time Reliability Index)	Weighted sum of reliable segments divided by all segments	NPMRDS					
4.	Total Emissions Reductions by Applicable Pollutants under the CMAQ Program	Daily Kilograms of Emission Reductions	CMAQ Public Access System					
5.	Annual Hours of Peak-Hour Excessive Delay per Capita	Time of excess delay weighted by average vehicle volume and occupancy by vehicle class	NPMRDS, Highway Performance Monitoring System (HPMS)					
6.	Percent of Non-SOV Travel	Commute to work totaled by mode, five-year estimate	American Community Survey (ACS)					

Source: 23 CFR 490

### 2021 Regional Plan and 2025 RTIP Investments

A foundational element of the 2021 Regional Plan is the continued development of a regional transportation system that provides multimodal transportation options to the traveling public. Fostering travel choices between the places where people live, work, and play supports travel time reliability, promotes non-SOV travel, and reduces excessive delay and pollutant emissions. Of the more than \$5.9 billion dollars programmed in the first four years of the 2025 RTIP; more than a third, or \$2.1 billion dollars, is programmed for multimodal facilities, transit, active transportation, transportation systems, and demand management, including more than \$28 million in the region's rideshare programs.

Table H-12 summarizes the program investments anticipated to support each of the System Performance measures. Supporting projects were identified by their project title, description, and type. Sixteen interstate projects such as safety, pavement, and shoulder improvements support both Reliable Person-Miles Traveled on the Interstate and Truck Travel Time Reliability Index. Reliability on the non-Interstate NHS is supported by four projects. CMAQ emission reductions are supported by three projects aimed at managed lane development. Twenty-eight projects support reduction in Annual Hours of Peak-Hour Excessive Delay principally through Intelligent Transportation Systems (ITS) improvement. Percent of Non-SOV Travel is supported by 89 multimodal projects such as pedestrian, bicycle, transit, and managed lane improvements.

Table H-12: 2025 RTIP System Performance Program Summary

2025 RTIP System Performance Program Summary (FY 25–FY 28)					
Performance Measures	Investment (\$000)				
Percent of Reliable Person-Miles Traveled on the Interstate	\$450,000				
Percent of Reliable Person-Miles Traveled on the Non-Interstate NHS	\$12,000				
Percent of Interstate System Mileage Providing Reliable Truck Travel Time (Truck Travel Time Reliability Index)	\$93,000				
Total Emissions Reductions by Applicable Pollutants under the CMAQ Program	\$513,000				
Annual Hours of Peak-Hour Excessive Delay per Capita	\$52,000				
Percent of Non-SOV Travel	\$952,000				
Total⁴	\$2,072,000				

Source: ProjectTrak, August 2024

### **Illustrative Projects**

- In San Diego County, CAL571 funds preliminary engineering of transit priority lanes along Interstate 805 between State Routes 15 and 52.
- Regionwide, SAN54 funds the implementation and deployment of ITS projects such as Intermodal Transportation Management System, 511 Advanced Traveler Information System; activities include data collection, dissemination, and software upgrades.
- Regionwide, SAN11A funds Regional Rideshare Program, a component of the regional Transportation Demand Management program.

<sup>&</sup>lt;sup>4</sup> Total may not match due to rounding.

### **Interagency Coordination**

SANDAG coordinates and collaborates on transportation infrastructure–related concerns and projects with local jurisdictions, Caltrans, and the public through established working groups and committees. The PM 3 targets on System Performance, Freight, and CMAQ were developed in coordination with the Transportation Committee. For more information see Interagency Coordination in the introduction section.

### **Target Achievement and Future Target Setting**

On October 5, 2018, the Transportation Committee approved supporting the statewide targets established by Caltrans for the three reliability performance measures in accordance with the FAST Act. This performance period covered the years 2018-2021. In consultation with MPOs, Caltrans reviewed the statewide data in 2020 and elected not to change the fourth-year targets. In 2022 FHWA determined that California made significant in the areas of Interstate and non-Interstate travel time reliability and freight reliability. For person hours of excessive delay and non-single occupancy vehicle travel, the San Diego urbanized area met the four-year targets and FHWA noted that the region planned and implemented projects that helped meet their target<sup>5</sup>.

On February 3, 2023, the Transportation Committee approved supporting the statewide targets for the three reliability performance measures for the second performance period covering the years 2022-2025. Following the completion of the performance period, FHWA will determine if California has made significant progress toward meeting the targets established for Interstate and non-Interstate NHS travel time reliability and freight reliability measures. SANDAG continues to collaborate with Caltrans, FHWA, and other California MPOs on the monitoring of progress towards targets.

### **Regional Transit Asset Management**

### **Target-Setting Process**

TAM focuses on maintaining transit assets in a state of good repair. The SANDAG planning area includes three providers of public transportation subject to the agency target-setting requirement: MTS, NCTD, and SANDAG. The provider targets are established by each transit agency separately for their service areas during the development of their four-year TAM Plan. The provider targets are updated annually. MPOs, in coordination with providers, are responsible for developing regional TAM targets. MPOs are required to set TAM targets with each update of their Regional Transportation Plan.

The TAM Final Rule includes four asset categories: equipment, facilities, infrastructure, and rolling stock. There is one performance measure for each asset category. Each asset category may contain several asset types, which are calculated separately. Regional TAM targets are required for each asset type. The performance measures are calculated such that a value of zero indicates that the asset type is in a state of good repair. The 2019 and 2020 regional TAM targets are shown in Table H-13.

<sup>&</sup>lt;sup>5</sup> Source: FHWA Transportation Performance Management website https://www.fhwa.dot.gov/tpm/reporting/state/uza.cfm?uacc=78661

Table H-13: Regional TAM Targets

Regional Transit Asset Management Performance Measures and Targets								
Asset Category	Performance Measure	Asset Type	2019 Regional Targets	2020 Regional Targets				
Equipment:  Non-revenue support- service and  maintenance vehicles  Percentage of nonrevenue vehicles met or exceeded Useful Life Benchmark (ULB) <sup>1</sup>		Automobiles	33.3%	61.7%				
		Trucks and other Rubber Tire Vehicles	50.5%	50.0%				
		Steel Wheel Vehicles	0.0%	0.0%				
Facilities: Maintenance and administrative facilities; and passenger stations (buildings) and parking facilities	Percentage of assets with condition rating below 3.0 on FTA Transit Economic Requirements Model (TERM) Scale <sup>2</sup>	Passenger Facilities	0.0%	0.0%				
		Passenger Parking Facilities	0.0%	0.0%				
		Maintenance Facilities	0.0%	0.0%				
		Administrative Facilities	0.0%	0.0%				
Infrastructure: Only rail fixed- guideway, track, signals, and systems	Percentage of track segments with performance restrictions	Commuter Rail	2.0%	1.0%				
		Hybrid Rail <sup>3</sup>	0%	0.5%				
		Light Rail	1.8%	2.0%				
Rolling Stock: Revenue vehicles by mode	Percentage of revenue vehicles met or exceeded Useful Life Benchmark	Articulated bus	0.0%	0.0%				
		Over-the-road bus	0.0%	0.0%				
		Bus	13.8%	11.7%				
		Cutaway Bus	7.2%	3.7%				
		Light rail vehicle	0.0%	0.0%				
		Minivan	100.0%	100.0%				
		Commuter rail locomotive	71.0%	71.4%				
		Commuter rail passenger coach	57.0%	57.1%				
Source: 49 CER 625: SAND		Vintage trolley/streetcar <sup>4</sup>	0.0%	100.0%				

Source: 49 CFR 625; SANDAG, MTS, and NCTD

Notes: <sup>1</sup> Useful Life Benchmark (ULB) is a value used with lifecycle cost to assess when an asset costs more to maintain than to replace. MTS and NCTD used the same ULB.

<sup>&</sup>lt;sup>2</sup> TERM is a five-point scale (1–5) with one signifying poor condition and five excellent.

<sup>&</sup>lt;sup>3</sup>The NCTD SPRINTER rail was reclassified as hybrid rail for 2020. Previously it was classified as light rail.

<sup>&</sup>lt;sup>4</sup>Vintage rolling stock are older vehicles that are not anticipated to improve in their ULB but are used in limited purposes.

To coordinate the development of regional TAM targets, MTS and NCTD provided SANDAG with their respective target values and inventory quantities by asset type. MTS and NCTD target and inventory values were applied in developing regional TAM targets using a weighted average calculation.<sup>6</sup>

### **Measures and Methodology**

The performance measures and their calculations are specified in the TAM Final Rule. Additionally, the asset types that are included in each asset category are established by FTA and detailed in the FTA Asset Inventory Module. The infrastructure asset category assesses performance restrictions on rail segments. A performance restriction exists when the permissible speed is less than the guideway's full-service speed. For more details on infrastructure performance, refer to the FTA Performance Restriction (Slow Zone) Calculation.

### 2021 Regional Plan and 2025 RTIP Investments

The 2021 Regional Plan includes \$163 billion dollars in transportation investments; 26% of that is for operations and 51% for capital, the majority of which are complete corridor investments that support transit. Transit capital investments include construction of transit facilities and procurement of transit fleet vehicles. Transit operations and maintenance include costs associated with running the transit system, repairs, and preventative maintenance. The 2025 RTIP was reviewed for projects sponsored by SANDAG, MTS, and NCTD that include elements that corresponded to a TAM asset category as shown in Table H-14. The 2025 RTIP includes 38 projects totaling approximately \$1.1 billion dollars in support of TAM targets.

Table H-14: 2025 RTIP Regional TAM Programming

2025 RTIP Transit Asset Management Program Summary Category <sup>1</sup> (FY 25–FY 28)								
Project Asset Category	MTS (\$000)	NCTD (\$000)	SANDAG (\$000)	Total TAM Programming (\$000)				
Equipment	\$0	\$0	\$0	\$0				
Facilities	\$14,000	\$235,000	\$51,000	\$300,000				
Infrastructure	\$263,000	\$69,000	\$136,000	\$468,000				
Rolling Stock	\$298,000	\$50,000	\$22,000	\$370,000				
Total	\$575,000	\$354,000	\$209,000	\$1,138,000				

Source: ProjectTrak, August 2024

Notes: <sup>1</sup> Many projects address multiple TAM priority areas, such as rolling stock replacement and infrastructure upgrades. For Table H-14, each qualifying project was assigned one project asset category that best aligned with the project description.

### **Illustrative Projects**

• In the MTS service area, MTS28 funds the purchase of new buses and rail cars to replace existing vehicles or support minor expansions of the fleet. This project helps ensure that the region's transit assets remain in a state of good repair.

<sup>&</sup>lt;sup>6</sup> The calculation involved multiplying each provider's target by their inventory. The results were added together, divided by the sum of the inventories, and multiplied by 100.

<sup>&</sup>lt;sup>7</sup> Year of expenditure dollars

• In the NCTD Service Area, NCTD05 funds the purchase of new buses and rail cars to replace existing vehicles or support minor expansions of the fleet, ensuring that the region's transit assets remain in a state of good repair.

### **Interagency Coordination**

In 2018, SANDAG, MTS, and NCTD updated their master MOU agreements to include provisions on the sharing of TAM and performance data, including targets, inventory, and asset conditions. SANDAG continues to coordinate and collaborate with the MTS, NCTD, and FTA to support TAM objectives. For more information see Interagency Coordination in the introduction section.

### **Target Achievement and Future Target Setting**

The Board approved the 2019 regional TAM targets at its September 28, 2018, meeting and the 2020 targets at the February 28, 2020, meeting. As data is shared by MTS and NCTD, in alignment with their annual updates, SANDAG will continue to work with the providers and FTA to monitor progress on achievement of regional TAM targets.

### **Regional Public Transportation Safety**

### **Target-Setting Process**

Regional public transportation safety focuses on transit safety events. The SANDAG planning area includes two providers of public transportation subject to the agency target-setting requirement: MTS and NCTD. The provider targets are established by each transit agency separately for their service areas during the development of their four-year Public Transportation Agency Safety Plan (PTASP). The provider targets are updated annually. MPOs, in coordination with providers, are responsible for developing regional public transportation safety targets. MPOs are required to set regional public transportation safety targets with each update of their Regional Transportation Plan.

Staff from MTS, NCTD, and SANDAG reviewed transit safety data from 2015 to 2019 to develop the regional targets included in Table H-15. Data from the National Transit Database was reviewed with performance measure calculation processes from FTA's PTASP Technical Assistance Center. Historic trends along with the most current observed data informed target development.

Table H-15: Regional Public Transportation Safety Targets

Regional Public Transportation Safety Performance Measures and Targets							
Performance Measure	20: Fixed Route Bus	20 Regional Targe ADA / Paratransit	ts Rail Transit				
Number of fatalities	0	Ο	0				
Fatality rate by 100 thousand vehicle revenue miles (VRM)	0	0	0				
Number of injuries	150	6	120				
Injury Rate by 100 thousand VRM	0.5	0.1	1.2				
Number of safety events	140	7	130				
Safety event rate by 100 thousand VRM	0.7	0.1	2.3				
System reliability	6,000	20,000	15,000				

Source: SANDAG – In coordination with MTS and NCTD

### **Measures and Methodology**

The performance measures and their calculations are specified by FTA's National Public Transportation Safety Plan. Additional information on calculation processes is included in FTA's PTASP Technical Assistance Center. The data used is from the National Transit Database. Performance measures relating to fatalities, injuries, and safety events include all reportable incidents with the exceptions of trespass and suicide. System reliability is the mean distance between major mechanical failure by mode.

### 2021 Regional Plan and 2025 RTIP Investments

Public transportation safety is embedded into every project that touches the region's transit system. Some projects are explicitly focused on safety outcomes while others include safety benefits through procurement, maintenance, or capital improvements. Procurement of new equipment brings the latest safety features, maintenance extends system reliability and keeps safety features operational, capital improvements include safety elements within project designs. Roadway construction projects that focus on safety or include safety elements will also help public transportation safety where the transit network overlaps with the improvements. Investments in roadway construction projects that benefit safety are summarized in the Transportation Safety (PM 1) section of this appendix.

Projects included in the 2025 RTIP investment for regional public transportation safety included new equipment procurement, vehicle and public facility maintenance, transit specific facility upgrades, and communications projects. In the 2025 RTIP 19 transit safety projects were identified totaling \$791 million dollars in investments.

Table H-16: 2025 RTIP Regional Public Transportation Safety Programming

2025 RTIP Public Transportation Safety Funding (\$000)					
MTS	NCTD	SANDAG	Total programming		
\$277,000	\$342,000	\$172,000	\$791,000		

Source: ProjectTrak, August 2024

### **Illustrative Projects**

- In Chula Vista, SAN261 funds the installation of railroad and highway crossing warning devices along Palomar Street.
- In the MTS service area, MTS28 procures fixed route bus and light rail vehicle replacements. Light rail vehicle procurement includes replacements of high-floor vehicles with low-floor vehicles.
- In the NCTD service area, NCTD05 procures fixed route buses, and the programmatic rebuild of fixed route bus engines and transmissions.

### **Interagency Coordination**

In 2020 and 2021, SANDAG, MTS, and NCTD updated their master MOU to include provisions on the sharing of public transportation safety performance data, including targets. SANDAG continues to coordinate and collaborate with the MTS, NCTD, and FTA to support public transportation safety objectives. For more information see Interagency Coordination in the introduction section.

### **Target Achievement and Future Target Setting**

The Board approved the 2020 regional public transportation safety targets at its December 18, 2020, meeting. As data is shared by MTS and NCTD, in alignment with their annual updates, SANDAG will continue to work with the providers and FTA to monitor progress on achievement of regional PTASP targets.

# Appendix I SANDAG Funding and Project Selection Process

2025 Regional Transportation Improvement Program FY 2025-2029

## Appendix I SANDAG Funding and Project Selection Process

### 1.0 Introduction

Federal Guidelines for Congestion Mitigation and Air Quality (CMAQ) funding state Metropolitan Planning Organizations (MPOs), state Departments of Transportation, (DOTs) and transit agencies "should develop CMAQ project selection processes in accordance with the metropolitan and/or statewide planning process under 23 U.S.C. 134 and 135." The project selection process should be transparent, in writing, and publicly available. State DOTs and MPOs should develop an appropriate project list of CMAQ programming priorities that will have the greatest impact on air quality.

This document provides that selection process and describes the agency's strategy for applying Regional Surface Transportation Program (RSTP) also known as Surface Transportation Block Grant (STBG) funding to projects. The process will be updated for new federal formula funding types that will be made available through the Infrastructure Investments and Jobs Act (2021).

### 2.0 Background

Planning and programming actions for federal formula funded projects and programs are guided by the Board-adopted Regional Plan, the SANDAG Capital Improvement Program (CIP) as included in the SANDAG Program Budget, the Regional Transportation Improvement Program (RTIP), and Federal Performance Management Targets.

The Regional Plan provides the long-term vision and goals for how SANDAG will build and support transformative transportation projects for the region. SANDAG's Regional Plan demonstrates how transportation projects and programs in San Diego County conform to State of California and federal air quality mandates for funding eligibility. It identifies strategies to reduce regional greenhouse gas (GHG) and criteria air pollutant emissions (including ozone, CO, and PM2.5).

Unlike many MPOs, SANDAG funds and builds regional capital projects identified in the long-range transportation plan. SANDAG is governed by a Board composed of mayors, councilmembers, and county supervisors from each of the region's 19 local governments. Supplementing these voting members are advisory representatives from Imperial County, the U.S. Department of Defense, Caltrans, San Diego Unified Port District, Metropolitan Transit System, North County Transit District, San Diego County Water Authority, Southern California Tribal Chairmen's Association, Mexico, and the San Diego County Regional Airport Authority. The CIP is a ten-year action plan for the investments, policies, and system improvements and capital projects needed to advance the Regional Plan vision. The CIP addresses regional economic growth, while improving regional mobility, air quality, economic resilience, and access to opportunity such as jobs, education, health care and recreation.

The RTIP lists the projects, programs and activities that will be funded during the next five years after receiving federal approval. It includes those projects selected for federal formula funds from both the CIP and the Overall Work Program as approved by the Board. SANDAG must adopt a financially constrained RTIP, which also meets other federal requirements, to remain eligible to receive federal and state funding.

Federal Performance Management Targets, adopted by the Board, provide near and midterm anticipated outcomes for the transportation network. These inform and are informed by planning and programming actions.

### 3.0 Funding Principles

The following are the funding principles of SANDAG regarding federal formula funds:

- SANDAG's long-established practice for project funding is to spend outside funds before local funds and to spend the least flexible funds first with the objective of providing maximum flexibility to complete more transportation projects sooner and more costeffectively. All projects in the SANDAG budget, which are eligible for federal funding, will be considered for federal formula funds.
  - a) Priority for new CMAQ and RSTP allocations will be given in the following order:
    - i) Previously approved and underway project phases will be funded to completion with RSTP and CMAQ funds unless additional funds are obtained through a competitive process.
    - ii) Future phases of projects already funded with CMAQ and RSTP will be prioritized for funding in the order needed based on project schedules to complete project delivery milestones.
    - iii) Other on-going project phases (not currently funded with RSTP or CMAQ) that are eligible for CMAQ and RSTP funding will be evaluated and ranked. Funding will depend on project readiness and ability to timely expend the funds.
    - iv) Unfunded and new candidate projects will be evaluated for consideration following project readiness, network connectivity, Board priorities, and evaluation criteria from the adopted Regional Transportation Plan.
- 2) SANDAG also endeavors to expend as much of its annual appropriation of federal formula funds as possible by obligating funds early and competing for additional Obligation Authority (OA) from the state. If possible, SANDAG will request to obligate more than the annual OA to support California in obtaining additional funds in the August redistribution. SANDAG does not, as a matter of practice, attempt to carry over a reserve of federal formula funds.
- 3) Program five years of federal formula funds in the RTIP based on estimated apportionment amounts provided by Caltrans, consistent with how they will be obligated and expended as shown in the CIP.

### 4.0 Project Selection and Funding Process

1) The Board prioritizes the projects, which it will implement through the annual budget process. The budget is guided by the projects in the Regional Plan, which are regional priorities, as well as projects in the TransNet Extension Ordinance, approved by voters in 2004, and amended as needed by the Board.

- 2) Since SANDAG does not conduct a call for projects for federal formula funds, SANDAG applies regional funds to projects which SANDAG implements for the benefit of the region. These projects are included in the CIP and are selected from projects in the TransNet Ordinance and the Regional Transportation Plan.
  - a) TransNet Ordinance The projects in the TransNet Ordinance can be amended by a 2/3 majority of the Board and the TransNet Ordinance is amended to be consistent with the adopted Regional Plan. The TransNet Ordinance also provides funding to local agencies on a formula basis which is driven by population and maintained miles. Board practice has been to apply 90% of federal formula funds to projects identified in the TransNet Ordinance.
  - b) Regional Transportation Plan Projects are prioritized in the Regional Transportation Plan. The projects in the Regional Plan are evaluated and prioritized in multimodal project bundles using evaluation criteria developed, through a robust public process, to reflect plan goals. The evaluation criteria encompass federal transportation performance management planning objectives for safety, infrastructure condition, congestion reduction, system reliability, freight movement and economic vitality, environmental sustainability, and reduction of delivery delays. The project bundling and evaluation criteria are described in Appendix T of the 2021 Regional Plan in Table T.2. The data sources for the evaluation criteria are included in Attachment 3 of Appendix T and the detailed methodology for each evaluation criteria indicator in included in Attachment 4. Attachment 4 details how federal performance measures, including safety (PM 1) peak delay, congestion, and freight (PM 3) were incorporated in prioritizing projects. The projects selected in the Regional Plan will help the region make progress towards achieving PM targets. Reliability is informed by evaluation criteria Mode Availability and Transit Reliability. Appendix O provides a more detailed discussion of how the Regional Plan is designed to make progress towards achieving PM targets including project selection and funding as well as implementation strategies. This discussion is included for each performance measure.
  - c) CIP The Region's priorities, established in the TransNet Ordinance and the Regional Plan, combined with project phasing, inform the development and inclusion of projects in the annual CIP. Projects are selected to be implemented in the budget based on the Open to Traffic dates modeled for the Regional Plan and the project development plan of the individual project. For instance, if a project needs to open in 2035 and it is expected to take ten years, then it must be included in the budget by 2025. The Board occasionally establishes additional priorities which would give increased weighting to a project.
- 3) During the budget development cycle, all projects will be evaluated for eligibility for federal funds per the SANDAG funding priorities. Those projects that are eligible will be further evaluated for eligibility for each fund type. If the projects can potentially demonstrate emissions reductions, they will be added to the list of potential CMAQ projects. Recommendations to the Board on funding for projects included in the Capital Improvement Program are made by the Financial Planning, Budgets and Grants department, approved by the Executive Committee and adopted by the Board.

### 5.0 CMAQ Project Selection

The CMAQ funding program was created under the federal Intermodal Surface Transportation Equity Act (1991) and reauthorized under the Transportation Equity Act for the 21st Century (1998), the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU, 2005), the Moving Ahead for Progress in the 21st Century Act (2012) and the Fixing Americas Surface Transportation Act (FAST Act, 2015) and the Infrastructure Investment and Jobs Act.

The purpose of the CMAQ program is to fund transportation projects/programs, which will contribute to the attainment or maintenance of the National Ambient Air Quality Standards for ozone, carbon monoxide (CO), and particulate matter (both PM 10 and PM 2.5).

According to the latest guidance (Nov 2013) from the Air Quality and Transportation Conformity Team in FHWA's Office of National Environment, in cooperation with the FTA's Office of Planning and Environment, the CMAQ program supports two important goals of the U.S. DOT: improving air quality and relieving congestion – in other words, reducing pollution and adverse environmental effects of transportation projects and transportation system inefficiencies. The CMAQ program provides funding for a broad array of tools to accomplish these goals while ensuring compliance with the transportation conformity provisions of the Clean Air Act Amendments of 1990.

### **Project Screening**

All capital projects in the SANDAG budget will be screened for CMAQ eligibility. This screening will consider the project type from the list below, its current funding levels and project readiness. Projects which are eligible project types will be considered eligible for CMAQ if they can achieve/expect to achieve National Environmental Policy Act.

- 1) Eligibility The following activities are eligible for funding with CMAQ:
  - a) Transportation activities in the approved State Implementation Plan
  - b) Bicycle and pedestrian programs
  - c) Traffic monitoring, management, and control operations
  - d) Emission inspection and maintenance programs
  - e) Planning and air quality monitoring projects that lead directly to construction or new services or programs that have an air quality benefit
  - f) Public-private partnerships which allow limited eligibility for privately owned or operated alternative fuel vehicles and facilities under certain circumstances
  - g) Extreme low temperature cold start programs
  - h) Other transportation projects or programs not listed above may be considered for funding if endorsed by the air quality control district if the project can be shown to help attain federal air quality standards for the region.

i) Specific transportation control measures listed in the federal Clean Air Act, which include:

Programs for improved public transit; restriction of certain roads or lanes to, or construction of such roads or lanes for use by passenger buses or high occupancy vehicles; employer-based transportation management plans, including incentives; trip-reduction ordinances; traffic flow improvement programs that achieve emission reduction; fringe and transportation corridor parking facilities serving multiple occupancy vehicle programs or transit service; programs to limit or restrict vehicle use in downtown areas or other areas of emission concentration particularly during periods of peak use; programs for the provision of all forms of high occupancy, sharedride services; programs to limit portions of road surfaces or certain sections of the urbanized area to the use of non-motorized vehicles or pedestrian use, both as to time and place; programs for secure bicycle storage facilities and other facilities, including bicycle lanes, for the convenience and protection of bicyclists, in both public and private areas; programs to control extending idling of vehicles; employer-sponsored programs to permit flexible work schedules; programs and ordinances to facilitate non-automotive travel, provision and utilization mass transit, and to generally reduce the need for single-occupant vehicle travel, as part of transportation planning and development efforts of a locality, including programs and ordinances applicable to new shopping centers, special events, and other centers of vehicle activity; programs for new construction and major reconstruction of paths, tracks or areas solely for the use by pedestrian or other non-motorized means of transportation when economically feasible and in the public interest.

The guidance document cited above states that MPOs, state DOTs, and transit agencies "should develop CMAQ project selection processes in accordance with the metropolitan and/or statewide planning process under 23 U.S.C. 134 and 135." The project selection process should be transparent, in writing, and publicly available. State DOT's and MPO's should develop an appropriate project list of CMAQ programming priorities that will have the greatest impact on air quality.

### **Ranking Process**

- 1) Each CMAQ eligible project identified in the capital budget will be scored on five factors. A project will be given one point for each factor below:
  - a) provides potential emissions reductions
  - b) reduces SOV travel
  - c) reduces delay
  - d) enhances safety
  - e) advances environmental justice
  - f) Projects which have been determined by the Board the be priority projects will be given an additional point
- 2) Next, the rank of each project in the Regional Plan will be determined and the total score will be weighted by the Regional Plan Cost Effectiveness ranking. Projects previously funded with CMAQ, which either have cost increases or have moved to a new phase of work will be assigned the highest ranking.

As the ranking in the Regional Plan incorporates the impact of a project on achieving federal performance management targets, it is anticipated that by funding the highest priority projects, CMAQ funding will support the region in reducing emissions causing Ozone and reducing traffic congestion.

- 3) Finally, funds will be assigned to the highest-ranking projects based on total project need and appropriation levels.
  - In certain cases, the Board may choose to prioritize different criteria, which may move a project ahead of other projects on the list. In addition, if a project is awarded a discretionary grant which CMAQ is eligible to match, that project may be accelerated in priority to meet the requirements of the grant.
- 4) Once developed, this list will be shared annually with the San Diego Air Pollution Control District (APCD). SANDAG will consult with APCD prior to finalizing the budget to obtain input on the projects selected for CMAQ. This will fulfill SANDAG's requirement to involve the local air quality agency.
  - The final approved list will be included in the RTIP with each biannual update and will be posted on the RTIP's webpage sandag.org/rtip. The programming of CMAQ and the project list will be reviewed by the Transportation Committee with the RTIP. The Transportation Committee will recommend that the Board adopt the RTIP.
- 5) Changes to funding levels or projects on the list will be guided by the policies governing changes to the program budget and will be incorporated in an RTIP amendment as needed. If additional projects are added to the list during an amendment, an updated list will be posted.

### **Cost-effectiveness**

Projects nominated for CMAQ should make effective use of limited state and federal funds. Projects are weighted by the cost effectiveness adjusted ranking in the Regional Plan. Projects which are in the early stages of development, may estimate cost effectiveness based on the cost-effectiveness tables as updated by FHWA in July 2020.

In consultation with the APCD, SANDAG has not set a specific policy for cost effectiveness on the basis of cost/benefit ratio or dollars spent per pound of pollutants reduced, this decision will be revisited in yearly check-ins.

### 6.0 RSTP Project Selection

Under the FAST Act, the long-standing RSTP was converted into the STBG. The STBG promotes flexibility in state and local transportation decisions and provides flexible funding to best address State and local transportation needs. (FAST Act § 1109(a)).

Per SANDAG's funding principles, a project will be funded with RSTP if it is federally eligible per the guidelines, including NEPA clearance. Per the guidance, a project is eligible based on project location and activity. A project must not be undertaken on a local road or rural minor collector unless listed as an exception in the guidance. Eligible activities include:

6) Construction of highways, bridges, and tunnels; ferry boats and terminals; transit capital projects; infrastructure-based intelligent transportation systems capital improvements; truck parking facilities and border infrastructure projects.

- 7) Operational improvements and capital and operating costs for traffic monitoring, management, and control facilities and programs. Operational improvement is defined in 23 U.S.C. 101(a)(18).
- 8) Environmental measures eligible under 23 U.S.C. 119(g), 328, and 329, and transportation control measures listed in Section 108(f)(1)(A) (other than clause (xvi) of that section) of the Clean Air Act (42 U.S.C. 7408(f)(1)(A)).
- 9) Highway and transit safety infrastructure improvements and programs, including railway-highway grade crossings.
- 10) Fringe and corridor parking facilities and programs in accordance with 23 U.S.C. 137 and carpool projects in accordance with 23 U.S.C. 146. Carpool project is defined in 23 U.S.C. 101(a)(3).
- 11) Recreational trails projects eligible under 23 U.S.C. 206, pedestrian and bicycle projects in accordance with 23 U.S.C. 217 (including modifications to comply with accessibility requirements under the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.)), and the Safe Routes to School Program under Section 1404 of SAFETEA-LU (23 U.S.C. 402 note).
- 12) Planning, design, or construction of boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.
- 13) Development and implementation of a state asset management plan for the National Highway System and a performance-based management program for other public roads.
- 14) Protection (including painting, scour countermeasures, seismic retrofits, impact protection measures, security countermeasures, and protection against extreme events) for bridges (including approaches to bridges and other elevated structures) and tunnels on public roads, and inspection and evaluation of bridges and tunnels and other highway assets.
- 15) Surface transportation planning programs, highway and transit research and development and technology transfer programs, and workforce development, training, and education under Chapter 5 of Title 23, United States Code.
- 16) Surface transportation infrastructure modifications to facilitate direct intermodal interchange, transfer, and access into and out of a port terminal.
- 17) Projects and strategies designed to support congestion pricing, including electronic toll collection and travel demand management strategies and programs.
- 18) Upon request of a state and subject to the approval of the Secretary, if Transportation Infrastructure Finance and Innovation Act credit assistance is approved for an STBG-eligible project, then the state may use STBG funds to pay the subsidy and administrative costs associated with providing federal credit assistance for the projects.

- 19) The creation and operation by a state of an office to assist in the design, implementation, and oversight of public-private partnerships eligible to receive funding under Title 23 and Chapter 53 of Title 49, United States Code, and the payment of a stipend to unsuccessful private bidders to offset their proposal development costs, if necessary to encourage robust competition in public-private partnership procurements.
- 20) Any type of project eligible under 23 U.S.C. 133 as in effect on the day before the FAST Act was enacted.

Projects included in the CIP will be eligible for RSTP funding as prioritized in the Regional Plan.

The projects in the Regional Plan were evaluated and prioritized in bundles by corridor. These projects will be implemented in the CIP per project schedules to open within the time frames and conformity windows as established in the Regional Plan. Those projects will then be programmed in the RTIP.

In addition, programs and planning efforts in the Overall Work Program may be eligible for RSTP provided that those planning efforts will lead to surface transportation projects.

RSTP will be applied to projects with available match or if needed to provide required match to state funded projects or projects successfully competing for grant funds where RSTP can be used as a match.

Finally, the Board can choose to supersede the priorities set in the Regional Plan and accelerate a project in the CIP and RTIP based on regional needs.

# Appendix J Congestion Management Process

2025 Regional Transportation Improvement Program FY 2025-2029

## San Diego Forward: The 2021 Regional Plan Appendix N SANDAG Federal Congestion Management Process

## Appendix N: SANDAG Federal Congestion Management Process

### Introduction

Federal Highway Administration (FHWA) 23 CFR §450.322 requires that each transportation management area (TMA) address congestion management through a process involving an analysis of multimodal metropolitan-wide strategies. These are to be cooperatively developed to foster safety and integrated management of new and existing transportation facilities that are eligible for federal funding. The requirements specifically state that "in TMAs designated as nonattainment for ozone or carbon monoxide, the congestion management process shall provide an appropriate analysis of reasonable (including multimodal) travel demand reduction and operational management strategies for the corridor in which a project that will result in a significant increase in capacity for single-occupancy vehicles (SOVs) is proposed to be advanced with federal funds." Additionally, the guidelines state that "federal funds may not be programmed for any project that will result in a significant increase in the carrying capacity for SOVs (i.e., a new general-purpose highway on a new location or adding general-purpose lanes, with the exception of safety improvements or the elimination of bottlenecks), unless the project is addressed through a congestion management process meeting the requirements of this section."

The San Diego Association of Governments (SANDAG) is the designated TMA for the San Diego region. San Diego Forward: The 2021 Regional Plan (2021 Regional Plan) meets the requirements of 23 CFR §450.322 by incorporating the following federal congestion management process (CMP) key points: (1) performance monitoring and measurement of the regional transportation system; (2) multimodal alternatives and non-SOV analysis; (3) the provision of congestion management tools; and (4) integration with the Regional Transportation Improvement Program (RTIP) process. The 2021 Regional Plan serves as the San Diego region's Regional Transportation Plan (RTP).

The 2021 RTIP, adopted by the SANDAG Board of Directors on February 26, 2021, was reviewed following the CMP procedures detailed in this appendix. The 2021 RTIP did not contain any new projects that required additional multimodal analysis due to increasing SOV capacity on the CMP network.

### **Background**

California State Proposition 111, passed by voters in 1990, established a requirement that urbanized areas must prepare and regularly update a Congestion Management Program (State CMP). The requirements within the State CMP were developed to monitor the performance of the transportation system, develop programs to address near-term and long-term congestion, and better integrate transportation and land use planning. SANDAG provided regular updates for the State CMP from 1991 through 2008. In October 2009, the San Diego region elected to be exempt from the State CMP. SANDAG continues to follow federal CMP regulations, which consist of a performance monitoring program and required analysis for projects that increase the carrying capacity of SOVs.

### **Congestion Management Process Elements**

The CMP is cyclical; successive elements inform previous elements in an iterative process. The CMP is reviewed with each update of the Regional Plan for improvements in efficiency, data sources, and strategies. The CMP¹ includes the following elements: regional objectives, multimodal transportation network, performance measures, data collection, analysis of congestion, strategy identification, strategy implementation, and evaluation. Figure N.1 illustrates these elements paired with corresponding SANDAG processes. The following section describes each SANDAG process within the context of the CMP.

Based upon the FHWA Congestion Management Process Guidebook (2011).

Figure N.1: Congestion Management Process Elements – Federal Guidance/ SANDAG Process

Federal Guidance	SANDAG Process
Develop Regional Objectives	RTP Objectives
Define CMP Network	State of the Commute Report Network
Develop Multimodal Performance Measures	State of the Commute Report Performance Measures
Collect Data/ Monitor System Performance	PeMS, Travel Time Data, MTS, NCTD, SANDAG Passenger and Active Transportation Count Programs
Analyze Congestion	State of the Commute Report
Identify and Assess Strategies	ITS, TDM, TSM, AT, ICMS, New Capacity
Program and Implement Strategies	RTP and RTIP Development
Evaluate Strategy Effectiveness	Ongoing Monitoring for Change

### SANDAG Process Abbreviations Listed in Figure N.1

RTP: Regional Transportation Plan

**CMP:** Congestion Management Process

**PeMS:** Performance Measurement System

MTS: San Diego Metropolitan Transit System (transit operator)

**NCTD:** North County Transit District (transit operator)

ITS: Intelligent Transportation System

**TDM:** Transportation Demand Management

**TSM:** Transportation System Management

AT: Active Transportation

**ICMS:** Integrated Corridor Management Study

RTIP: Regional Transportation Improvement Program

### Develop Regional Objectives

SANDAG updates the Regional Plan every four years, and the SANDAG Board of Directors discusses the Regional Plan's vision, goals, objectives, and challenges (introduced in Chapter 1).

Given the challenges, anticipated growth, and opportunities that technology can provide to transform our region, the 2021 Regional Plan is guided by a Vision and three primary goals:

Vision: A fast, fair, and clean transportation system and a resilient region

Goals: The efficient movement of people and goods

Access to affordable, reliable, and safe mobility options Healthier air and reduced greenhouse gas emissions

### Define the Congestion Management Process Network

The CMP requires a multimodal transportation network that is developed regionally to monitor and analyze performance. The CMP multimodal network of freeways, highways, railways, and select bus routes, illustrated in Figure N.2, was updated with the 2019 Federal RTP and continues in this form for the 2021 Regional Plan. This network was developed with input from Caltrans, the County of San Diego, and the 18 cities in the SANDAG planning area.

The freeway and highway corridors are instrumented with equipment that monitors system performance. Caltrans operates this equipment within its Performance Measurement System (PeMS). This system enables SANDAG to monitor and analyze observed data. More than half of the region's vehicle miles traveled are carried by this network of freeways and highway corridors. All railways and select bus routes that are on or closely parallel to highway corridors are also included. Bus routes include *Rapid* Routes 215, 225, and 235, and *Rapid Express* 280.

Figure N.2: Congestion Management Process Network

### Develop Multimodal Performance Measures

The CMP network matches the SANDAG State of the Commute (SOC) network. The SOC is a monitoring program that monitors the performance of the transportation network and provides information on freeway, transit, and local roadway use and performance data collected annually. The SOC includes multimodal performance measures that use observed data to monitor the system's performance over time. These measures were developed with input from Caltrans, local jurisdictions, and transit operators. As new data become available, they are evaluated for new performance measures across this network. Current performance measures that are being monitored include:

- Average Travel Time
- Screenline Average Annual Daily Traffic
- Average Weekday Transit Ridership (screenline, select routes)
- Transit Passengers per Revenue Mile (select routes)
- Active Transportation Counts

### Collect Data/Monitor System Performance

Data collected to support the SANDAG CMP include PeMS, transit operations, SANDAG count programs, and travel time data. Routine review of performance measures on the CMP network allows SANDAG to determine if there has been a reduction of service. Early stages of the SOC reporting program compile these datasets and organize them for comparison over time. This enables high-level system monitoring.

### Analyze Congestion

SOC reporting presents an in-depth analysis of congestion for the CMP network in addition to larger trends that impact travel demand. The SOC includes economic and demographic data, and it provides context for changes to the San Diego region relative to peer cities across the nation. Detailed reports are generated biennially or as needed. These reports help inform the region's planning and programming processes.

The SOC analysis includes the CMP multimodal performance measures. Each major roadway corridor is evaluated by morning and afternoon peak-period delay, as well as travel time reliability over successive years. Transit is analyzed by load factor and passengers per revenue mile, among other metrics. The regional analysis includes a summary of significant changes in performance, operations, and investments.

The 2020 State of the Commute Report reviews ten years of data to establish regionwide trends in freeway travel, delay, and transit ridership on multiple modes. These and other transportation performance metrics are presented in the context of population, employment, and economic activity growth values. Past SOC reports are available on the SANDAG State of the Commute webpage.

### Identify and Assess Strategies

Facilities within the CMP network are guided by comprehensive multimodal corridor plans. These plans help identify strategies appropriate for the corridor. This process begins with understanding the characteristics and performance of the corridor and surrounding network. Land use and future growth are also considered when identifying appropriate strategies. SANDAG has developed a suite of strategies to possibly include in each corridor plan.

Strategies for addressing congestion can focus on transportation system development, transportation system management (TSM), or transportation demand management (TDM) strategies. Improvements that focus on transportation system development are those that focus on improving access, providing priority treatments, or providing dedicated lanes that support and increase the use of multimodal travel options. TSM improvements aim to use the existing or future transportation system more efficiently. TDM reduces congestion by decreasing SOV trips and shifting trips to other modes or off-peak travel periods.

SANDAG has identified several proposed strategies that address congestion that include transportation system development, TSM, and TDM that are foundational to the 5 Big Moves (see Chapter 2 for more details on the 5 Big Moves). These strategies focus on leveraging existing and emerging technologies to optimize system management and operations for the multimodal transportation system while also considering advancements in transportation services to improve TDM services. Historically, the implementation of these strategies was carried out independently and only addressed project-specific needs; rarely were these systems or services designed and operated to meet the needs of multimodal networks and travelers, and rarely were they integrated to make the entire transportation system work optimally.

SANDAG's undertaking of the 5 Big Moves directly addresses the implementation of these strategies as an integrated and multimodal transportation system that offers improved access to transportation alternatives for meeting the need for all transportation users to help address congestion, improve system performance, and increase safety. Together, proposed strategies under the 5 Big Moves will result in a transportation system that is greater than the sum of its parts. Each strategy will tackle an aspect of the total system, but the success of each will rely on the success of the others.

At the heart of the proposed 5 Big Moves congestion management strategies is the implementation of the Next Operating System (Next OS). Next OS will knit together the region's numerous transportation management systems and will enable Complete Corridors, Transit Leap, Mobility Hubs, and Flexible Fleets to work seamlessly and optimize the transportation system for all users. Next OS will be the digital network that analyzes data in real time from the region's physical networks, making them all work better—more integrated, more efficient, and most of all, more responsive to help address congestion.

A menu of proposed strategies that will be considered under the 5 Big Moves is detailed below. This list is not meant to be exhaustive. These strategies are regularly reviewed for updates and improvements.

### Transportation System Development Strategies

- Advance traffic signal systems and equipment to provide for advance operations during typical commuting periods; provide priority access for transit services and first responders, and priority treatment to commuters during times of emergency evacuations
- Communications infrastructure to provide fast and reliable access to transportation services, improve and address digital equity, and improve regional communications redundancy
- Curb management to dynamically manage and accommodate different users throughout the day
- Public charging facilities for electric vehicles and hydrogen-fueled vehicles
- Active lane management systems that will improve the convenience, efficiency, and travel speeds for high-occupancy vehicles including transit services
- Transit services that will improve transit in more areas and offer new service types designed to attract new riders to transit
- Transit customer experience to make transit easier, safer, and more enjoyable to use; enhancements can include increased station amenities and low-floor vehicles to improve accessibility
- Active transportation infrastructure such as bike and pedestrian facilities, secure and convenient micromobility parking options, and implementation of the adopted Regional Bike Plan
- Safe Routes to School plans and strategies, including the San Diego Regional Safe Routes to School Strategic Plan<sup>2</sup>
- Electronic payment services including Compass Card, FasTrak® Open Road Tolling, and smart parking systems
- Next OS app providing an integrated platform to plan, book, and pay for a variety of travel options
- Transit infrastructure electrification/regional charger program
- Smart parking solutions at Transit Leap stations and along Complete Corridors

In 2012, the SANDAG Transportation Committee accepted the San Diego Regional Safe Routes to School Strategic Plan to support local communities in establishing new Safe Routes to School programs as well as sustaining and enhancing existing efforts. Regional efforts to implement this strategy are funded as part of the Active Transportation Program.

### Transportation System Management Strategies

- Traveler information programs aim to increase awareness and the information available on travel choice and impact so that travelers can actively participate in reducing both network demand and personal trip impact. The program delivers systems and education outreach campaigns to raise awareness of the direct relationship that route choice, personal driving habits, and trip timing have on fuel consumption, vehicle operating expenses, and vehicle emissions.
- Smart arterial management focuses on managing arterial roadways (major streets) to reduce delays, resulting in quicker trips and lower vehicle emissions. Improvements to arterial detection and signal interconnect will provide the ability to create a traffic signal system that is dynamic and coordinated throughout the region. Improving the flow of traffic on arterial roadways is among the most cost-effective TSM strategies for reducing stop-and-go traffic, cutting overall travel times, and lowering fuel consumption and pollution.
- Freeway management is responsible for deploying systems that improve the operational efficiency of freeway control infrastructure; enabling freeway managers to have greater control over vehicle operating speeds; and facilitating the freeway managers' ability to communicate the impact of events, incidents, and congestion to the traveling public. It also provides freeway managers with greater operational visibility of conditions on and off network. Some of the systems included in this program include traffic detection technologies, closed-circuit television cameras, ramp meters, electronic message signs, and the Advanced Transportation Management System, which provides central monitoring and sign control for managing incidents.
- Active Traffic and Demand Management (ATDM) builds on Integrated Corridor
  Management to dynamically monitor, control, and influence travel demand, traffic
  demand, and traffic flow of key corridors. ATDM facilitates the use of transportation
  alternatives through various approaches, including dynamic ridesharing, dynamic
  speed limits, dynamically priced parking, and predictive traveler information to
  improve overall highway efficiency.
- The Regional Border Management System serves as the transportation management tool that will manage crossborder traffic and will include border-specific congestion management strategies, including congestion pricing, an approach to lane management, and traveler information strategies.
- Transit management refers to bus and light rail and includes a regional scheduling system, a regional transit management system, positive train control, and centralized train control.

### Transportation Demand Management Strategies

- iCommute is the regional TDM program. iCommute coordinates services that increase the number of commuters who carpool, vanpool, take transit, bike, walk, and telework. This includes the SANDAG Vanpool Program, carpool incentive program, employer outreach program, support for teleworking, bike encouragement and education programs, and regional campaigns like Rideshare Week and Bike Month.
- Mobility Hubs are communities with a high concentration of people, destinations, and travel choices. They offer on-demand travel options and supporting infrastructure to enhance connections to high-quality Transit Leap services while helping people make short trips around the community on Flexible Fleets. Mobility Hubs can span one, two, or a few miles based on community characteristics and are uniquely designed to fulfill a variety of travel needs while strengthening a sense of place.
- Flexible Fleets are shared, on-demand transportation services that provide convenient and personalized travel options. While they build on the popularity of services such as rideshare, bikeshare, and scootershare, fleets can also include neighborhood shuttles and delivery services. These fleets provide services for all types of trips, 24/7, which can reduce the need to own a car.

SANDAG supports these strategies with planning resources for local agencies, developers, and mobility operators. The 2019 Mobility Management Toolbox and 2019 San Diego and Western Riverside Interregional Park & Ride Strategy are two planning products supporting these strategies.<sup>3</sup> SANDAG also plays a role in subsidizing and advising on a wide variety of Mobility Hub and Flexible Fleet pilots.

### Program and Implementation Strategies

Corridor managers and planning and programming staff review traffic performance data to identify corridors with reduced performance. Strategies to improve the condition must be context-sensitive and fit the corridor's needs. The menu of CMP strategies offers a variety of approaches, and additional strategies are reviewed as requested. Once a strategy is selected, it is programmed through the RTIP. The RTIP is a multi-billion-dollar, five-year program of major highway, transit, arterial, and nonmotorized projects funded by federal and state taxes, *TransNet* local sales tax, and other local and private funding.

The RTIP serves as a prioritized program designed to implement the region's overall strategy for providing mobility and for improving the efficiency and safety of the transportation system while reducing transportation-related air pollution. This supports efforts to attain federal and state air quality standards for the region. SANDAG supports implementation strategies through a variety of programs and tools. These same programs and tools can be used to help select strategies. A list of implementation strategies is included in Appendix B: Implementation Actions, which also establishes the actions' statuses as near-term or continuing.

More SANDAG TDM and TSM planning products can be found at iCommuteSD.com/LocalGov.

### Evaluate Strategy Effectiveness

Evaluation of strategy effectiveness relies on locally observed data as well as larger professional studies. Where possible, SANDAG reviews observed data prior to and after the implementation of congestion-reduction strategies. The transition to the instrumented PeMS highway network—and continued collaboration with transit operators—will greatly improve this evaluation process. Professional studies are used to evaluate strategies that are more difficult to isolate. This is often the case with small-scale projects and highly complex projects.

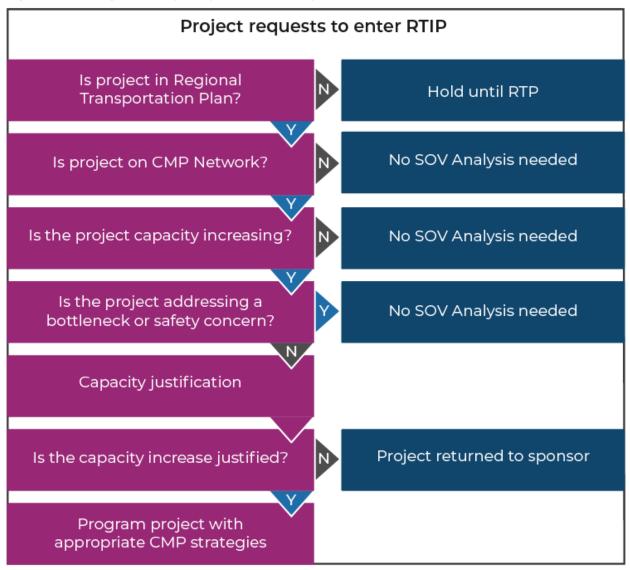

# Multimodal Alternatives and Non-Single-Occupancy Vehicle Analysis

In addition to the CMP elements, TMAs that include a nonattainment or maintenance area for air quality are required to conduct additional analysis for projects that add SOV capacity. The SOV Capacity Analysis is limited to projects that add general-purpose lanes on the CMP network that are not addressing an identified safety or bottleneck concern. Projects subject to this analysis are required to demonstrate that appropriate, non-capacity-increasing strategies were evaluated. If this evaluation finds that the strategies do not meet the needs for additional capacity in the corridor, then the project can proceed with adding SOV capacity. This analysis is a requirement to program a capital phase of the project.

SANDAG has implemented CMP checks in its programming process. Project sponsors enter data in an online data portal, ProjectTrak, to request inclusion in the RTIP. Projects that use federal funds and are capacity increasing are flagged for further review. Figure N.3 shows the process for identifying projects that require SOV analysis.

Corridor plans, following the Caltrans Corridor Planning Process Guide and environmental review documentation, have been identified as appropriate SOV Capacity Analysis for the proposed CMP. These documents are uploaded to ProjectTrak for SANDAG review and archival. Projects that advance through this process are to incorporate, per federal regulation, all reasonable TDM and operational strategies into the project.

Figure N.3: Single-Occupancy Vehicle Analysis Process

# Appendix K Public Participation

2025 Regional Transportation Improvement Program FY 2025-2029

## BOARD POLICY NO. 025

### **PUBLIC PARTICIPATION PLAN POLICY**

### **Purpose**

This policy establishes a process for obtaining input from and providing information to the public concerning agency programs, projects, and program funding in order to ensure the public is informed and has the opportunity to provide SANDAG with input so plans can reflect the public's desire. SANDAG will review and update its Public Participation Plan and this policy periodically as required by law, but no less often than every five years. Various federal and state laws and regulations require that an agency such as SANDAG conduct and establish a Public Participation Plan to ensure that the public is involved and that community concerns are addressed. For example, planning of mass transit capital projects, development of short-range service policies and plans, and fare policy and structure changes to public transportation require public participation. The California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA) also have public information components that require an agency such as SANDAG to conduct public participation programs to ensure that the public is involved and that community concerns are addressed.

A significant component of the SANDAG mission is a strong commitment to public participation and involvement to include all residents and stakeholders in the regional planning process. SANDAG recognizes that the public has a right to expect the business of SANDAG to be conducted with efficiency, fairness, impartiality, and integrity. SANDAG's work carries with it an obligation to the public interest. SANDAG officials and employees are expected to have high standards of honesty and professionalism, as well as a straightforward and transparent communication approach, in order to promote and maintain public confidence and trust.

This policy is consistent with the requirements of Section 450.316(a)(1)(x) of Title 23 in the Code of Federal Regulations and Public Utility Code Section 132360.1, which reads as follows:

(c) The agency shall engage in a public collaborative planning process; recommendations from that process shall be made available and considered for integration into the plan. A procedure to carry out this process including a method of addressing and responding to recommendations from the public shall be adopted.

### Social Equity and Environmental Justice

Ensuring the meaningful involvement of low income, minority, disabled, senior, and other traditionally underrepresented communities is a key component of SANDAG public participation activities. SANDAG policies, procedures, and programs are consistent with federal and state environmental justice laws, regulations, and requirements, Title VI, related nondiscrimination requirements, and reflect the principles of social equity and environmental justice. Social equity means ensuring that all people are treated fairly and are given equal opportunity to participate in the planning and decision-making process, with an emphasis on ensuring that traditionally disadvantaged groups are not left behind. Environmental justice means ensuring that plans, policies, and actions do not disproportionately affect low income and minority communities.

### Data Collection

SANDAG collects and uses racial and ethnic data showing the extent to which members of minority groups are beneficiaries of programs receiving Federal financial assistance through SANDAG programs and projects. The agency uses the data to confirm that populations protected by Title VI are not subject to discrimination or disparate impacts by SANDAG.

### Title VI Training

SANDAG provides training on Title VI, social equity, and environmental justice matters to its employees near the time of hire. Updates to Title VI training are provided periodically thereafter on an as-needed basis.

Complaint Process and Title VI Compliance Officer Contact Information

SANDAG does not discriminate on the basis of race, color, sex, creed, religion, national origin, age, marital status, ancestry, medical condition, disability, veteran status, or sexual orientation in conducting government business. Persons who believe they have been subjected to discrimination or have been denied access to services or accommodations required by law, have the right to use the discrimination complaint procedures in Board Policy No. 009. The SANDAG Office of General Counsel is the Title VI Compliance Officer for this policy and is responsible for administering this complaint procedure. as well as ensuring compliance with applicable laws. The Compliance Officer can be reached at: SANDAG, 401 B Street, Suite 800, San Diego, California 92101; (619) 699-1900. Scope of Public Participation Efforts

The policy addresses public participation policies and public information efforts in the following areas:

- A. Overall Public Participation Plan
- B. Short Range Program Regional Transportation Improvement Program
- C. Development Planning
- D. Design and Construction
- E. Fare Changes
- F. Short Range Transit Planning
- G. Native American Consultation
- A. Overall Public Participation Plan -- Unless otherwise noted or required, the Public Participation Plan provides SANDAG general policies for public participation for major planning initiatives such as the Regional Plan, Regional Short Range Transit Plan, and other planning and programming projects, including any tailored public involvement plans associated with them.
  - 1. The SANDAG Public Participation Plan is designed to inform and involve the region's residents in the decision-making process on issues such as growth, transportation, environmental management, housing, open space, air quality, energy, fiscal management, economic development, and public safety.

- 2. The Public Participation Plan seeks to involve all citizens, including but not limited to low income households, limited English proficient individuals, Hispanic, African American, Asian, Native American, senior, and other communities, persons with disabilities, as well as community and civic organizations, public agencies, business groups and associations, environmental organizations, and other stakeholders.
- 3. SANDAG Board meetings provide the public forum and decision point for significant regional issues. SANDAG Directors usually hold one or two Board meetings each month: a Board Policy Meeting the second Friday of each month and a Board Business Meeting the fourth Friday of each month. Meetings held at the SANDAG office are accessible by public transit. During these meetings, Directors adopt plans, allocate transportation funds, approve transit construction plans, approve transit fare changes, and establish policies and develop programs that are used by local governments as well as other public and private organizations.
- 4. The SANDAG Public Participation/Involvement Program shall comply with the Americans with Disabilities Act (ADA). SANDAG shall hold public meetings in buildings, rooms, or locations that are accessible to persons with disabilities. SANDAG shall provide public meeting information in alternate formats and shall provide special accommodations at public meetings with three business days notice.
- 5. The SANDAG Public Participation Plan is carried out as an integrated work element of the agency's Overall Work Program and Budget and as part of other programming, development, and implementation processes such as the Regional Plan, Regional Short Range Transit Plan, Regional Transportation Improvement Program, Environmental Impact Reports, transit capital project development, project construction, transit fare changes, corridor studies, and other projects.
- 6. SANDAG shall proactively seek and promote public participation in SANDAG workshops and public hearings, as well as participation and attendance at committees, working groups, and task forces. SANDAG shall follow local, state, and federal guidelines for posting public meeting and hearing notices. Depending upon the specific project, SANDAG shall endeavor to hold meetings at times that can attract as many participants as possible, including evenings and weekends and at locations in communities throughout the region. SANDAG shall endeavor to hold these meetings in locations that are accessible by public transit.
- 7. SANDAG shall inform the public in a timely manner about regional issues, actions, and pending decisions through a number of efforts. As needed or required, SANDAG shall post public notices in newspapers of general circulation for publication of legal notices. Other publication and distribution efforts can include mail distribution to residents, agencies, and city/county governments, the SANDAG website, email lists, text messaging, the SANDAG social media channels, and Region the SANDAG monthly electronic newsletter. As needed, SANDAG also shall distribute press releases and media alerts to local, regional, and Mexico border area print and broadcast media.
- 8. SANDAG shall regularly inform local print, online, and broadcast media about SANDAG decisions, events, research, and other issues. SANDAG shall regularly

distribute press releases to news services, Daily Transcript, East County Californian, El Latino, La Prensa, Los Angeles Times, San Diego Business Journal, San Diego Metropolitan, San Diego Union-Tribune, San Diego Voice & Viewpoint, The Star News, and numerous community newspapers. SANDAG shall also distribute information to local and Mexico radio and television stations.

- 9. SANDAG shall use its website and social media channels to provide the public with useful and timely information, including: project updates and construction information; meeting schedules and agendas; plans and environmental documents; reports and other publications; demographic profiles and data downloads; and interactive database and mapping applications.
- 10. As appropriate and as required by local, state, and federal guidelines, SANDAG shall translate into Spanish, and other languages, publications, announcements, and web content. In addition, numerous staff members are bilingual Spanish-English speakers and participate in public outreach and conduct presentations in Spanish. Translators shall be hired as outlined in the SANDAG Language Assistance Plan and as required by local, state, and federal guidelines to provide services in Spanish and other languages as appropriate.
- 11. SANDAG conducts periodic public opinion surveys as part of the outreach and citizen participation component of the SANDAG work program. These surveys shall be designed to include the San Diego region's residents in the regional planning process and to keep SANDAG officials aware of issues that are of concern to the people who live here.
- 12. SANDAG will endeavor to respond to general comments received by phone, fax, letter, or email within five (5) business days of receipt. Comments shall be routed to the SANDAG staff person who is responsible for that issue. Comments may be responded to in writing (email or letter) or may be resolved with the initial phone call. Some comments may need to be resolved by another agency or jurisdiction so the customer is referred to the appropriate entity. When a comment is submitted as part of a public review process (e.g., a plan or environmental report) the comment and response is logged into a database. Comments, concerns, and responses received as part of a public review process shall be included in the final plan or report. Comments received via SANDAG social media channels will be addressed as stated in the SANDAG Social Media Policy.
- **B.** Short Range Program Regional Transportation Improvement Program (RTIP) document updated every two years outlining major transportation projects to be implemented during a five-year period.
  - 1. SANDAG shall follow the latest federal and state regulations regarding participation by interested parties.
  - 2. As the document that implements the long range plan, the RTIP shall be incorporated as part of the Board-adopted public involvement process established for the Regional Plan, including participating in public outreach efforts, providing adequate public notice (legal notice publications), employing visualization techniques, and holding

- public meetings at convenient and accessible locations.
- 3. SANDAG shall respond to any significant public input or comment received during the development of the biennial update and/or during the amendment cycle as part of its report to the Board or Transportation Committee (as appropriate).
- 4. The biennial RTIP update will be noticed in newspapers of general circulation, including in alternate languages, and a public hearing shall be held prior to final adoption by the Board of Directors.
- 5. During the amendment cycle, SANDAG will provide a draft of the amendment to all interested parties for a 15-day comment period.
- **C. Development Planning –** *Planning, environmental, preliminary engineering activities on major capital projects.* 
  - 1. SANDAG shall follow current federal and state regulations regarding public involvement processes and procedures. SANDAG shall develop public involvement programs tailored to meet specific project needs which address the unique challenges presented by each project. Programs shall be developed using the joint Federal Highway Administration and Federal Transit Administration (FHWA/FTA) guidelines titled "Public Involvement Techniques for Transportation Decision-Making."
  - 2. The public involvement program shall set objectives, identify people to be reached, develop public involvement strategy, and define specific outreach techniques.
  - 3. The public involvement program shall be developed so that critical community concerns and technical issues are identified in the study. The issues need to address the engineering, environmental, economic, and financial analyses that respond effectively to community needs and preferences and satisfy local, state, and federal environmental clearance requirements.
  - 4. To facilitate community participation, lists of individuals, agencies, and organizations shall be developed for distribution of agency materials. These lists will include persons who have indicated an interest in transportation planning projects during previous public information efforts and/or focused on the specific project. Project information will be distributed to the persons on this list in conjunction with public meetings and workshops, to solicit comments and recommendations.
  - 5. Environmental documents shall be prepared in accordance with California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA), as appropriate, and in coordination and consultation with various federal, state, and local agencies, and with elected officials, community leaders, organizations, and other individuals from the neighborhoods and communities potentially affected by the proposed action. Coordination and public involvement shall be achieved through a variety of means, such as formal public hearings and meetings, circulation of draft documents, mailings, focus group meetings, workshops, and individual/group contacts.

- 6. Formal scoping meetings, public hearings, and/or other meetings during the comment period and environmental document certification shall be held in accordance with the requisite environmental document. As required, meetings shall be announced in the Federal Register, local publications, and on the SANDAG website. Persons and organizations on the project mailing list and social media channels also will be notified. SANDAG shall endeavor to hold public meetings in locations accessible by public transit.
- 7. SANDAG shall prepare and distribute appropriate notices and communications to comply with CEQA and NEPA requirements.
- 8. A public information program shall be developed to inform the community of factors related to the project. The information program may include briefings for the news media, informational meetings, presentations to include community and professional associations and educational institutions, business groups and associations, environmental organizations, outreach via social media, and other public forums.
- 9. A project working group may be organized to review and comment on the project to build understanding and identify support for feasible alternatives. This group may consist of various elected officials/staff, community and neighborhood organizations, business organizations, property owners, and other stakeholders and interested parties. This group would be formed to provide comment and guidance regarding technical issues, review study alternatives and evaluation results, and provide community input regarding the alternatives. This iterative process would allow for identified issues and concerns to receive follow-up responses. Meeting summaries of project working group activities shall be produced. Meeting notices, agendas, and/or other information shall be posted to the SANDAG website.
- 10. Other public input opportunities include SANDAG Board of Directors meetings and meetings of SANDAG policy committees: Executive, Transportation, Regional Planning, Borders, and Public Safety. Other opportunities for public participation are at working group meetings, general public meetings, and presentations to planning and community groups.

### **D. Design and Construction –** *Design and construction of capital projects.*

- For all capital improvement projects with significant community impacts, SANDAG shall provide opportunities for members of the public to provide input and express concerns. SANDAG also shall implement a program designed to inform the public of progress, as well as safety and community impacts in the event of construction.
- SANDAG shall hold publicly noticed meetings at key stages of project development and implementation in the area(s) being impacted. The location of the meetings shall depend upon the geographic location of the project. Meetings concerning projects exclusively within the North County Transit District (NCTD) service area shall be held in North County locations, and if appropriate, at SANDAG offices. Meetings concerning projects exclusively within the Metropolitan Transit System (MTS) service area shall be held in MTS service areas affected, and if appropriate, at SANDAG offices. Meetings concerning all other projects shall be held at SANDAG offices or other

locations specified in SANDAG agendas. SANDAG, MTS, and NCTD offices are accessible by public transit. SANDAG shall endeavor to hold off-site public meetings at locations accessible by public transit.

- 3. SANDAG shall solicit input from the representatives of interest groups of the local population, such as community groups, planning groups, business groups and associations, business improvement districts, environmental organizations, neighborhood associations, limited English proficient populations, and senior and disabled riders. These stakeholders will be consulted during the design and construction of capital projects.
- 4. SANDAG shall work to advise the public regarding actual and perceived disruption during construction of capital projects by distributing informational, educational, and public information materials, and by using other traditional community relations tools.
- 5. SANDAG shall endeavor to meet citizen concerns as they arise and attempt to resolve those concerns.
- 6. For all projects requiring environmental review under CEQA and NEPA, such as major capital improvement projects, SANDAG shall provide opportunities for members of the public to provide input and comply with all related legal requirements.
  - 6.1 SANDAG shall solicit input from the representatives of interest groups of the local population, such as community groups, planning groups, business groups and associations, and neighborhood associations.
  - 6.2 SANDAG shall incorporate public input into project planning and development where practical and feasible.
  - 6.3 SANDAG shall hold a public hearing to seek public comment whenever required under CEQA and/or NEPA.
    - 6.3.1 Published notifications for such hearings shall be published in newspapers of general circulation for publication of legal notices. Notices also may be published in regional, community, or Spanishlanguage newspapers to reach the affected area.
    - 6.3.2 Any item subject to a public hearing will be listed and described in the Board's published agenda, which shall be posted at least 72 hours in advance of the meeting at the Board's meeting place and on the SANDAG website.
    - 6.3.3 Public hearings shall be conducted by SANDAG at the published date, time, and place. The public hearing will allow for interested parties to be heard. The Board also will consider any written comments that were forwarded to the Board prior to the hearing.

### E. Fare Changes

- SANDAG has adopted Board Policy No. 029 to provide policy guidance for fare changes. This section of this policy is designed to inform and involve public transit riders, stakeholders, and the general public about proposed changes in transit fares. It is not intended to apply to transit route changes within the purview of the transit operators.
  - 1.1 Consistent with Board Policy No. 004, SANDAG staff shall hold one or more public meetings to provide the public an opportunity to comment on proposed fare changes. A minimum of two public meetings shall be held prior to the first reading of any proposed fare change that affects services operating in both the MTS and NCTD service areas. At least one public meeting shall be held in the MTS service area, and at least one public meeting shall be held in the NCTD service area. If one or more public meetings are conducted by a public meeting officer pursuant to Board Policy No. 004, at least one of the public meetings shall be held with a starting time no earlier than 6 p.m. A public meeting for proposed fare changes that do not affect the entire region may be held exclusively within the general geographic area that is being affected by the fare change. Such public meeting shall be held at a time convenient for users and potential users of the affected service. Public meetings at which formal public testimony will be taken shall be held at locations that are accessible by users of public transit. An official transcriber or other means of recording all public input received shall be utilized at all public hearings, meetings, workshops or open-houses at which formal public testimony is taken. A record of the input received shall be provided to the Transportation Committee or Board of Directors at the time of the first and second readings of amendments to the fare ordinance for the purpose of adjusting fare prices.
  - 1.2 Public comments on proposed fare changes also shall be accepted at the SANDAG Board or Transportation Committee meeting before any final action is taken.
  - 1.3 Take One, Rider Alerts, or other public notices in both English and Spanish will be posted on all affected public transit vehicles within the affected area at least 15 calendar days prior to the public hearing and will include a description of the proposed fare change, the date, time, intent and location of the public meeting, and the deadline for written, email, and phone comments from the public. The notices will be posted to the SANDAG and Transit Agency website(s).
  - 1.4 Print notice of public meetings at which formal public testimony will be taken will be provided at least 15 calendar days prior to the public meeting date in newspapers of general circulation in the affected area(s), including appropriate minority and community publications. Public notices will be printed in Spanish in Spanish-language newspapers. Such public meeting notices will include a description of proposed fare changes, the date, time,

- intent, and location of the public meeting(s), and the deadline for written, email, and phone comments from the public.
- 1.5 An open phone line will be made available to take public comments at least 15 calendar days prior to adoption of fare changes.
- 1.6 A Transportation Committee and/or Board report (as appropriate) will be completed and available for public review at least 72 hours prior to the public meeting at which the fare changes are proposed for adoption and posted to the SANDAG website(s).
- 2. After a fare change is approved by SANDAG:
  - 2.1. The public will be notified via news release(s)
  - 2.2. Take One, Rider Alerts, or other public notices in both English and Spanish will be posted on all affected transit vehicles at least 15 calendar days prior to changes going into effect and posted to the SANDAG and Transit Agency website(s).
- 3. SANDAG shall follow federal Title VI and environmental justice requirements when implementing transit fare changes.
  - 3.1. Residential, employment, and transportation patterns of low-income, limited English speaking, and minority populations shall be identified so that their needs can be identified and addressed, and the benefits and burdens of transportation investments can be fairly distributed. SANDAG shall endeavor to involve the affected communities in evaluating the benefits and burdens of transportation investments.
  - 3.2. SANDAG shall evaluate and where necessary improve the public involvement processes to eliminate participation barriers and engage minority and low-income populations in transportation decision making.

### F. Short Range Transit Planning

- 1. Public information and involvement programs for the Regional Short Range Transit Plan and the Coordinated Human Resources and Public Transit Transportation Plan shall be the responsibility of SANDAG.
- 2. Public information and involvement programs for transit service changes will fall under adopted policies of MTS and NCTD.

### G. Native American Consultation

1. SANDAG shall establish and adhere to government-to-government relationships when interacting with Tribal Governments, acknowledging these tribes as unique and separate governments within the United States.

- 2. SANDAG shall recognize and respect important California Native American rights, sites, traditions, and practices.
- 3. SANDAG engages in "consultation" with Tribal Governments prior to making decisions, taking actions, or implementing programs that may impact their communities.
- 4. To facilitate effective consultation with Tribal Governments, SANDAG has established a Tribal Government Liaison. The Liaison shall serve as an initial contact for Tribal Governments and communicates with tribal governments regarding SANDAG activities.
  - 4.1. "Consultation" is the active, affirmative process of: (1) identifying and seeking input from appropriate American Indian government bodies, community groups, and individuals; and (2) considering their interests as a necessary and integral part of the decision-making process.

Adopted November 2004 Amended March 2005 Amended January 2006 Amended December 2007 Amended December 2008 Amended January 2010 Amended November 2012 Amended September 2017 Amended February 2018

# Appendix L Public Comments and Responses

# 2025 Regional Transportation Improvement Program (RTIP) Public Comments and Responses on Draft RTIP

Comment No.	Agency	Last Name	First Name	Comment	Response	Comment Date	Form
1	Caltrans Federal Programming Group	Kang	Peter	Page 190 (4-1), Chapter 4-Funding Assumptions: Second paragraph states the 2024 STIP FE includes a total estimate of \$2.9 billion in program capacity over the five-year FE period and is a 37% increase compared to the 2022 five- year FE period. Page 2-8 (34) paragraph two states the 2024 STIP FE includes total STIP program capacity over the five- year FE period of \$1.7 billion including \$1.6 billion of new program capacity and it is a 101% increase from the 2022 STIP. Please ensure the STIP funding estimates and increase amounts are accurate and consistent.	Updated reference in Chapter 2 for consistency with Chapter 4 reference	8/28/2024	Email
2	Caltrans Federal Programming Group	Kang	Peter	Page 202 (4-13), Chapter 4-Funding Assumptions: How is SANDAG addressing the projected deficit for the Metropolitan Transit System?	Updated section based on Final Adopted FY2025 MTS Budget; MTS is using reserves to eliminate the deficit in FY 2025, and is weighing various options for eliminating the deficits in FY 2026 through FY 2029.	8/28/2024	Email
3	Caltrans Federal Programming Group	Kang	Peter	Page TBD: Please add a section discussing SANDAGs Federal Land Management Agency (FLMA) Consultation. If there are no federal lands, then please add wording that there are no federal lands that are managed by Federal Land Management Agencies. FTIP Development Guidance states MPOs should include a description in the FTIP about how they coordinate their programming process with FLMAs in the region. Describe projects in the region that are providing better access to federal lands and describe any federal funding sources for projects that are coordinated with FLMAs.	Added paragraph on page 2-12 in Chapter 2.	8/28/2024	Email
4	Caltrans Federal Programming Group	Kang	Peter	Page TBD: Please provide the SANDAG Board Resolution in the final RTIP.	Adoption resolution included in Final 2025 RTIP	8/28/2024	Email
5	Caltrans Federal Programming Group	Kang	Peter	Page 266, Appendix B-Table B-1: HSIP back up list dated 5/7/24 includes the following projects that are not listed in the RTIP: H9-11-006, H9-11-016, H8-11-016; please clarify (see attached HSIP back up list).	The 3 projects are programmed in the 2025 RTIP, but the HSIP project numbers were not visible, have added the HSIP project numbers to the project descriptions	8/28/2024	Email
6	Caltrans Federal Programming Group	Kang	Peter	Pages 192 & 193: Please update the SHOPP revenue and programmed funding per attached latest SHOPP funding report (see attachment). SHOPP funding report and 2025 RTIP show prior SHOPP funding, but no prior funding is listed in 2025 SANDAG Financial Summary template; please clarify. Please ensure all updates are also reflected in the revenue and programmed tables in the 2025 SANDAG Financial Summary template.	SHOPP programming and revenues have been updated to align with listing dated 8/16/2024, except for the Sustainability & Miscellaneous project, as this will be added in the first amendment to the 2025 RTIP.  •CAL602/EA 43088x: 4/2024 PCR approved moving CON & RW from FY25 and FY26  •CAL558/EA 43031x: 6/2024 (8/2024) CTC approved 12-month CON Allocation TE, expires 6/2025, Need all of CON moved to FY25 - RTL anticipated 4/2025, need funding in approved FTIP to submit E76  •CAL564/EA 43034x: 2020 SHOPP – FY24 CON G13 Contingency, 6/2024 (8/2024) CTC approved 14-month CON Allocation TE, expires 8/2025 - CTIPS attached, had to place \$1k in FY25 for CON - RTL anticipated 5/2025, need funding in approved FTIP to submit E76  •CAL565/EA 43026x: 2020 SHOPP – FY24 CON G13 Contingency, 6/2024 (8/2024) CTC approved 14-month CON Allocation TE, expires 8/2025, had to place \$1k in FY25 for CON - RTL anticipated 6/2025, need funding in approved FTIP to submit E76  •CAL570/EA 43023x: 2020 SHOPP – FY24 CON G13 Contingency, 6/2024 (8/2024) CTC approved 11-month CON Allocation TE, expires 5/2025, had to place \$1k in FY25 for CON - RTL anticipated 11-month CON Allocation TE, expires 5/2025, had to place \$1k in FY25 for CON - RTL anticipated 11-month CON Allocation TE, expires 5/2025, had to place \$1k in FY25 for CON - RTL anticipated 11-month CON Allocation TE, expires 5/2025, had to place \$1k in FY25 for CON - RTL anticipated 11-month CON Allocation TE, expires 5/2025, had to place \$1k in FY25 for CON - RTL anticipated 11-month CON Allocation TE, expires 5/2025, had to place \$1k in FY25 for CON - RTL anticipated 11-month CON Allocation TE, expires 5/2025, had to place \$1k in FY25 for CON - RTL anticipated 1/2025, need funding in approved FTIP to submit E76	8/28/2024	Email
7	Caltrans Federal Programming Group	Kang	Peter	Pages 192 & 193: 2025 SANDAG Financial Summary template shows Carbon Reduction Program (CRP) funding, but none is listed in revenue and programmed funding; please clarify.	CRP funding is shown as part of "Federal Tansit Administration (FTA) Other"	8/28/2024	Email
8	Caltrans Federal Programming Group	Kang	Peter	Pages 192 & 193: Please check SANDAGs CMAQ apportionments for the four FYs on the revenue and programmed tab. The apportionments are well under what is provided for SANDAG for FYs 25, 27 and 28; please clarify.	CMAQ apportionments are accurate. The reason for the large balances in FYs 2025, 2027, and 2028 is that we are working to update project budgets to program additional CMAQ funding.	8/28/2024	Email

9	Caltrans Federal Programming Group	Kang	Peter	Page 50, Chapter 3-Table 3-1: CAL26 Detailed project description does not match CTIPS; please clarify if CTIPS should be updated. Please add note from CTIPS that toll credits will be used to match federal funds for the CON phase. Please confirm if STIP funds are programmed correctly as AC.	Toll credit notations should be removed from CTIPS. All STIP funding on this project is in prior years.	8/28/2024	Email
10	Caltrans Federal Programming Group	Kang	Peter	Page 50, Chapter 3-Table 3-1: CAL38 Please confirm if STIP funds are programmed correctly as AC.	All STIP funding on this project is in prior years.	8/28/2024	Email
11	Caltrans Federal Programming Group	Kang	Peter	Page 125, Chapter 3-Table 3-1: SAN29 Please confirm IIP funds are programmed correctly.	All IIP funding on this project is in prior years.	8/28/2024	Email
12	Caltrans Federal Programming Group	Kang	Peter	Page 132, Chapter 3-Table 3-1: SAN 264 Description states toll credits will be used to match federal funds for the CON phase, but the only funding types are TransNet and Local Funds; please clarify.	Will remove Toll credits notation from the project description.	8/28/2024	Email
13	Caltrans Federal Programming Group	Kang	Peter	Page 145, Chapter 3-Table 3-1: MTS28 Total project cost does not match CTIPS; please clarify.	The reason for the difference in total cost is that we omit prior transit ops/maintenance funding from the project tables, as it does not accurately reflect the current work on the project. The total cost (incl. prior ops/maint) of \$1,059,120,000 matches CTIPS.	8/28/2024	Email
14	Caltrans Air Quality Branch	Espinosa Araiza	Erika	For the Conformity Analysis Documentation Checklist, the document name and footer both say 2023 RTIP Amendment #13 and Amendment to the Regional Plan. Please correct.	Updated footer and document name	8/28/2024	Email
15	Caltrans Air Quality Branch	Espinosa Araiza	Erika	93.104 (b, c) Include the final board adoption resolution in the final draft of the Conformity Finding. Document the date of the final board adoption resolution in the Conformity Documentation checklist.	Final draft of Board resolution included, date of adoption has been included in the checklist	8/28/2024	Email
16	Caltrans Air Quality Branch	Espinosa Araiza	Erika	93.108 This is documented on p. 5 of the Draft Conformity Finding as well. We recommend including this in the Conformity Documentation Checklist.	Added to the checklist	8/28/2024	Email
17	N/A	Weiss	Shirli	The comment addressed concerns regarding the San Dieguito Double Track and Special Events Platform Project (DM02; CAL44) in relation to the Regional Transportation Improvement Program (RTIP). The commenter argues that it is premature to approve funding for this project because it is part of a larger \$4 billion realignment of the LOSSAN corridor, which requires a full environmental review under NEPA. The comment emphasized the need for careful consideration of the project's impacts, especially regarding potential eminent domain and disruptions to Del Mar's economy and residents. Additionally, the commenter pointed out the lack of budgeting for required mitigation measures related to previous Coastal Commission approvals, urging SANDAG to include necessary preconstruction and construction costs for these obligations in the RTIP.	Comment received and documented	9/20/2024	Public Hearing (Email)
18	N/A	Clement	Rita	The comment expressed support for Item number 6 and emphasized the importance of prioritizing health impacts, air quality, and equity in transportation planning. Commenter advocated for investments aimed at reducing traffic, improving crumbling infrastructure, and enhancing the countywide transit system to create a safer and more livable San Diego. They commended the staff for their efforts and stressed the need to encourage fewer cars on the road.	Comment received and documented	9/20/2024	Public Hearing
19	N/A	N/A	The Original Dra	The commenter critiqued the allocation of funding in Social Equity Areas, highlighting a disparity where less is spent on the most vulnerable populations compared to others. The commenter questioned the effectiveness of current traffic reduction strategies, arguing that they may actually contribute to increased traffic and greenhouse gas emissions. They proposed that planting more trees could help mitigate health impacts instead. The comment also raised concerns about the environmental and health risks associated with electric vehicles and their infrastructure, including potential radiation from charging stations and the dangers of lithium batteries.		9/20/2024	Public Hearing (Zoom)
20	N/A	Rhodes	Kathryn	The commenter raised two main issues regarding transportation funding and accountability. First, the commenter expressed concerns about allocating \$5 million for a bus stop facility without confirming seismic safety issues that have been unresolved for years. They suggested holding off on funding until proper evaluations are completed. Second, the commenter criticized the Airport Authority for allegedly hoarding funds that could be used for transit improvements, particularly transit to the airport. They referenced previous commitments that were not fulfilled and called for SANDAG to take action, including potentially suing the Airport Authority for failing to meet its obligations.		9/20/2024	Public Hearing

# Appendix M Caltrans 2025 Federal State Transportation Improvement Program Checklist

2025 Regional Transportation Improvement Program FY 2025-2029

# 2025 Federal Transportation Improvement Program (FTIP) Checklist for Caltrans FTIP Coordinator

### I. Timeline:

Ensure each Metropolitan Planning Organization (MPO) submits the following items to Caltrans:

- The Draft 2025 FTIP at the start of the FTIP public review period but no later than August 30, 2024.
- Upload the Final 2025 FTIP, along with any amendments and to the 2025 FTIP in the California Transportation Improvement Program System (CTIPS) by September 30, 2024.
- Email web-link to the Final 2025 FTIP and amendments to Caltrans by September 30, 2024.

### II. FTIP Package Submittal:

Paper copies of the draft or final 2025 FTIPs are not required.

Verify that the draft and final FTIP package includes the following:

- - Projects that are Transportation Control Measures (TCMs) are identified
- Detailed listings for highway and transit grouped projects (back-up listings)
- Projects consistent with 23 CFR 667 requirements/analysis

  Board resolution that addresses the following. Include

signed board resolution with your final 2025 FTIP.

- Consistency with the metropolitan transportation planning regulations per Title 23 Code of Federal Regulations (CFR) Part 450
- Consistency with the Regional Transportation Plan (RTP)\_(e.g. RTP 2030)
- Financial constraint the enclosed financial summary affirms availability of funding
- Meets air quality conformity
- Does not interfere with the timely implementation of the TCMs contained in the State Implementation Plan
- Compliance with the performance-based planning requirements
- Completion of the public participation process in accordance with the MPO's Public Participation Plan (PPP)
- ✓ Federal Performance Measures:
  - The FTIP must be designed such that once implemented, it makes progress toward achieving the performance targets established under

Updated: 2/16/2024

23 CFR 450.306(d).

- Include description of the anticipated effect of the FTIP toward achieving the performance targets identified in the metropolitan transportation plan/RTP, linking investment priorities to the performance targets.
- Submit FTIP Performance Measures Reporting Workbook in Excel via email.
- ✓ Financial Summary
  - Includes financial information covering the first four years of the FTIP
  - Excel file submitted electronically using template dated 9/27/2024
- Include analysis of revenues dedicated for maintaining and operating the federal-aid system
- Air quality conformity analysis and determination, including the Conformity Analysis Checklist for MPO TIPs/RTPs
- Public Participation Process/Interagency Consultation
- Expedited Project Selection Procedures (EPSP) documentation
- Web link to the CMAQ and STBGP project selection process
