# SD-LOSSAN Regional Rail Corridor Improvements Study Update

Torrey Pines Community Planning Board | July 29, 2021

# Del Mar Realignment

## PURPOSE

- The current study is building upon an alignment study completed in 2017 and is seeking to define what a project could look like
- It seeks to identify two of the most promising alignments for further evaluation, and is **conceptual** in nature
- The study does not address specific environmental or technical questions
- Once additional funding is secured, SANDAG will begin the environmental review process, which will examine all alternative alignments, potential impacts, stakeholder concerns, and costs

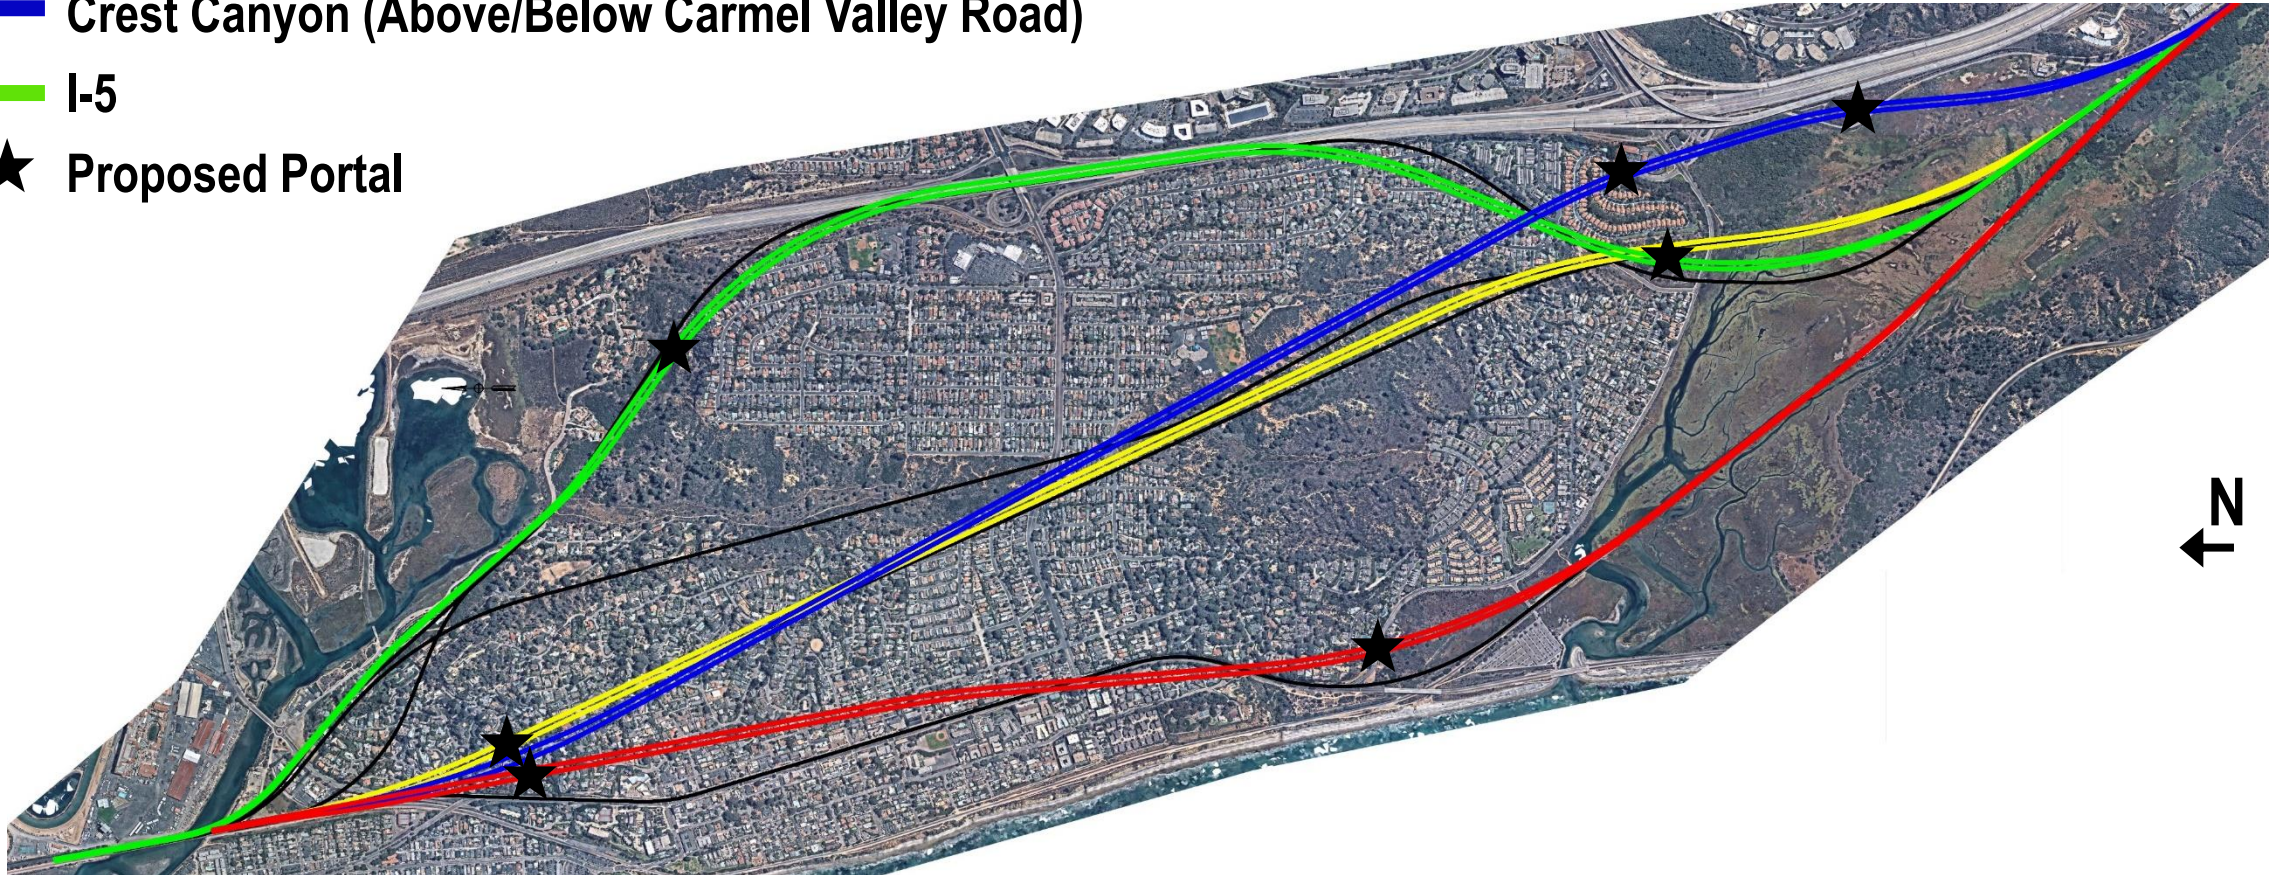

*Alternatives from 2017 study.*
