Regional Plan

The Regional Plan outlines how we will improve transportation, equity, and the environment for people in the greater San Diego area over the next several decades. It takes into account how our region is expected to grow and change and provides a blueprint for our transportation network, coordinated land use, housing, and more. The state and federal governments require us to update this plan every four years. This plan is informed by feedback from the Board of Directors, Policy Advisory Committees, partner agencies, stakeholders, and the public; and the plan is developed by a team of experts using data and research. The projects, programs, and initiatives in the Regional Plan impact every resident of the San Diego region. Visit SANDAG.org/regionalplan to learn more.

Summary of Public Outreach

We have been collecting feedback all over the San Diego region about the transportation improvements people would like to see in the next Regional Plan. This included input from the general public, community organizations, local government planning staff, our Board of Directors, and more. To help collect this feedback, we:

- ▶ Hosted a community workshop in all six subregions of the San Diego area to understand each area's transportation priorities; and a workshop with government and community representatives in Tijuana to collect feedback about transportation needs along our border region.
- Partnered with community-based organizations (CBOs) to host a total of 45 pop-up feedback collection events with approximately 2,400 participants.
- ▶ Promoted an online interactive map tool where residents could submit feedback that received approximately 8,300 visits from unique users and more than 2,000 comments.
- ► Collected feedback from our Board of Directors (elected officials that represent every area of the region) on potential transportation projects, policies, and programs, equity issues, health, and funding sources we can use to pay for our transportation network.
- ► Hosted workshops to collect feedback from our policy advisory committees and working groups that represent communities and government agencies across our region: this included our Transportation, Borders, Regional Planning, and Public Safety Committees; Military, Mobility, Shoreline Preservation, Social Equity, and Sustainable Communities Working Groups; our Social Services Transportation Advisory Council; and the Interagency Technical Working Group on Tribal Transportation Issues.
- Met regularly with state and federal government agencies, including the California Air Resources Board (CARB), to gather feedback about the strategies in the plan. The plan will strive to meet the state and federal requirements, so our region keeps receiving important funding: these requirements are related to improving air quality, reducing greenhouse gas emissions and the amount of miles people in our region are driving.

Along with your feedback, we have analyzed data about how our region is changing and growing, while also making sure we satisfy the state and federal requirements mentioned above. This report will give you a summary of all this feedback and the transportation projects, programs, and policies we are proposing, while continuing to analyze all these factors.

Note: this document is a draft that has not been finalized – before finalizing the network, our staff will need to analyze whether there will be enough potential funding for all the projects, programs and policies in the plan. Then, the public will have another chance to send in comments about the draft in spring 2025, and finally, it will need to be approved by our Board of Directors.

Additionally, many of these projects and policies will require support from individual cities, the County, or other agencies to make them a reality. Any feedback we've collected that is not within SANDAG's authority has been passed on to the appropriate city, County, or other relevant local government agencies.

2025 Regional Plan Project Type Glossary

Arterial Improvement Helps a high-traffic neighborhood street connect to a freeway more efficiently.

Bus Layover Designated area where buses can wait between trips so drivers can take breaks, and where vehicles can be fueled, charged, or cleaned.

Circulator Route A bus that comes frequently and stops at major local destinations in a specific area.

Connector A ramp that connects one highway to another.

Direct Access Ramp (DAR) A special highway entrance where buses, carpoolers, or people who pay a toll can directly enter managed lanes without having to merge from the right side.

Express Route Bus routes that connect suburban areas

to major urban centers that have very few stops at major destinations.

Highway Intersection Improvements Improves safety, and traffic flow in places where a highway crosses a major road.

Highway Straightening Removes curves from highways.

Interchange Where a freeway and a major road or other freeway cross each other.

LOSSAN Improvements Making the railway that connects San Diego to Los Angeles and San Luis Obispo safer, faster and more efficient.

Local Route A bus route that travels around neighborhoods that are near one another.

Managed Lanes (ML) Separated highway lanes set aside for multi-passenger transportation like buses or carpools, or for people who pay a toll.

Managed Lane Connector Ramps that connect managed lanes on different freeways.

On-demand public shuttle service for short trips within a neighborhood.

Mobility Hub An area where many types of transportation connect (ex. public transit routes, bike lanes, or shuttles).

Multimodal Corridor Improvements Projects that make all transportation on the same route more efficient, including walking, biking, transit, trains, and/or vehicles.

(NEV) Service Small, on-demand electric shuttle available for short trips in a small area (ex. FRED San Diego).

(OME POE) A new U.S./Mexico border crossing.

Purple Line Future transit route connecting the border region to University Town Center (UTC) and Sorrento Mesa.

Rapid Bus A bus route that gets priority in high-traffic areas to speed up trips.

Reversible Managed Lanes A managed lane that can change traffic direction depending on the time of day or traffic conditions.

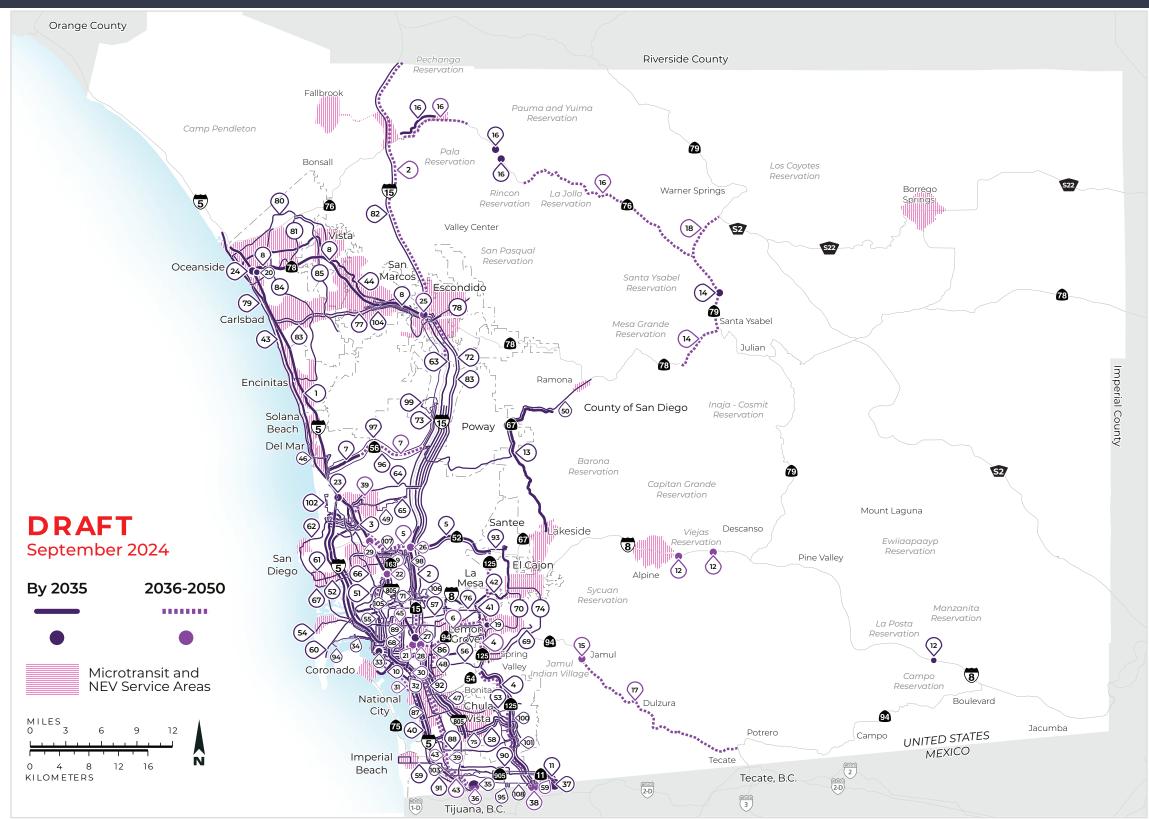

Shoulder Widening Project that widens pavement on the side of a freeway for safety in case of emergencies.

Train and Trolley Improvements (ex. on the Blue, Green, or Orange Line, SPRINTER, or COASTER) Projects that make rail trips more efficient: for example, separating rail tracks from car traffic with a bridge.

San Diego Region residents told us they needed

safer roads, better connections between types of transportation, shuttles for short trips, safe bikeway and pedestrian paths, more EV infrastructure, completed highway connectors, improved interchanges, and solutions for emergency evacuation.

Recurring Feedback and Impact

_	-
Across the region, people said they needed:	What we're considering (and much more, as seen on the map):
Local public transportation improvements to speed up short neighborhood trips as well as regional improvements to speed up commutes and other longer trips in the short-term.	Prioritizing transit projects that can be made a reality in the next decade; adding more Rapid regional bus routes and neighborhood circulator routes, along with increased service on local bus routes and projects to speed up trolley trips.
Improved public transit that's faster, more efficient, safe, and reliable.	Funding for better transit amenities such as bathrooms, lighting, shelter, WiFi, and security; as well as funding to increase how often transit comes and adding some expanded weekend and night service.
Highway improvements: adding lanes and finishing highway connectors or improving existing interchanges.	Setting aside key lanes and shoulders to move more people at once in multi-passenger vehicles; this will reduce traffic while supporting Rapid bus routes and carpooling on these highways.
A safe network of bikeways throughout the region.	Continuing to deliver key regional bikeway projects and expanding the bikeways across the region.
Pedestrian and cyclist paths that are protected when crossing highways and major streets to safely access key neighborhood destinations.	An active transportation network that includes connections crossing over highways and major streets that are safe for all ages and abilities.
Microtransit and shuttles for short trips and to connect people to public transit stops, especially for older adults and those that are transit dependent.	Adding more neighborhood shuttles and microtransit (flexible fleets) that can connect people to common destinations and transit stops.
Electric vehicle discounts and infrastructure.	Continuing to support electric vehicle infrastructure and programs to incentivize people buying electric vehicles.
Projects that improve air quality and reduce greenhouse gas emissions.	Prioritizing improvements to our transportation network that reduce pollution and emissions.
No regional road usage charge.	No regional road usage charge; other flexible funding sources are proposed.
Make transportation more accessible and affordable for people with disabilities, children and seniors, and for low-income households.	 Funding for transit amenities which can improve access for those with disabilities Continued funding for free youth transit and studying expanded transit discounts
Better connections between different types of transportation.	Planning ways to create seamless connections between transportation modes such as safer biking and walking paths, shuttles and microtransit, secure parking, and e-charging stations.
Safer roads and more transit options in rural, unincorporated communities, and especially providing emergency evacuation solutions.	 Exploring shoulder widening, reducing road curves, and technology solutions to improve travel and enhance safety in emergencies Planning further improvements to rural transit routes; new opportunities for community-based microtransit services

Recurring Feedback and Impact

In North County, people said they needed:	What we're considering (and much more):
 Better traffic flow on highways: especially the SR 78, SR 76 and I-15 Safer/easier connector between I-5 and SR 78 	 Managed lanes on the SR 78 and managed lane connectors between the SR 78 and I-5 and I-15 Straightening out SR 76 from Rice Canyon to the Pala Reservation, Harolds Rd to Pauma Rancho, adding intersection improvements in three places, and widening the shoulder for emergencies Connector between I-5 and SR 78
 Better public transit service: COASTER, SPRINTER, and buses that come more often and that can make faster trips More service at night and on weekends Expanded transit or microtransit access for communities where routes don't currently go such as San Elijo Hills, Rancho Santa Fe, Fallbrook Connection to Riverside County Access to Palomar Airport 	 Improving the SPRINTER and COASTER routes by increasing frequency, making rail improvements to speed up trip times, and adding more evening and weekend service More Rapid routes, including one from Carlsbad to Kearny Mesa stopping at the Escondido Transit Center, and another connecting San Marcos (CSUSM and Palomar College) to Riverside County
Better transit, shuttle and microtransit options to make it easier to access COASTER and SPRINTER stations and community destinations.	Fourteen shuttle or microtransit service areas (flexible fleets) which will increase access to common local destinations, including transit stops; includes service area providing access to Palomar Airport.
 Safer walking and biking routes, either improving existing routes or expanding the network Protected bike lanes on major roads to connect to the coast 	 Upgrading existing bike routes or adding new ones across the region with separated bikeways on high-speed roads Bike trails with coastal access, along with other east to west bikeway connections

North County residents told us they needed

better traffic flow on SR 78, SR 76, and I-15, more frequent COASTER and SPRINTER service with expanded night and weekend hours, safer walking and biking routes, shuttle and microtransit services to connect to transit stations, and connections to Palomar Airport and Riverside County.

Central & East County residents told us they needed

improved traffic flow on SR 52, I-8, and SR 67, the completed SR 94/SR 125 connector, faster connections to job centers, beaches, the airport, more frequent transit connections with expanded night and weekend hours, and safer walking and biking routes.

Recurring Feedback and Impact

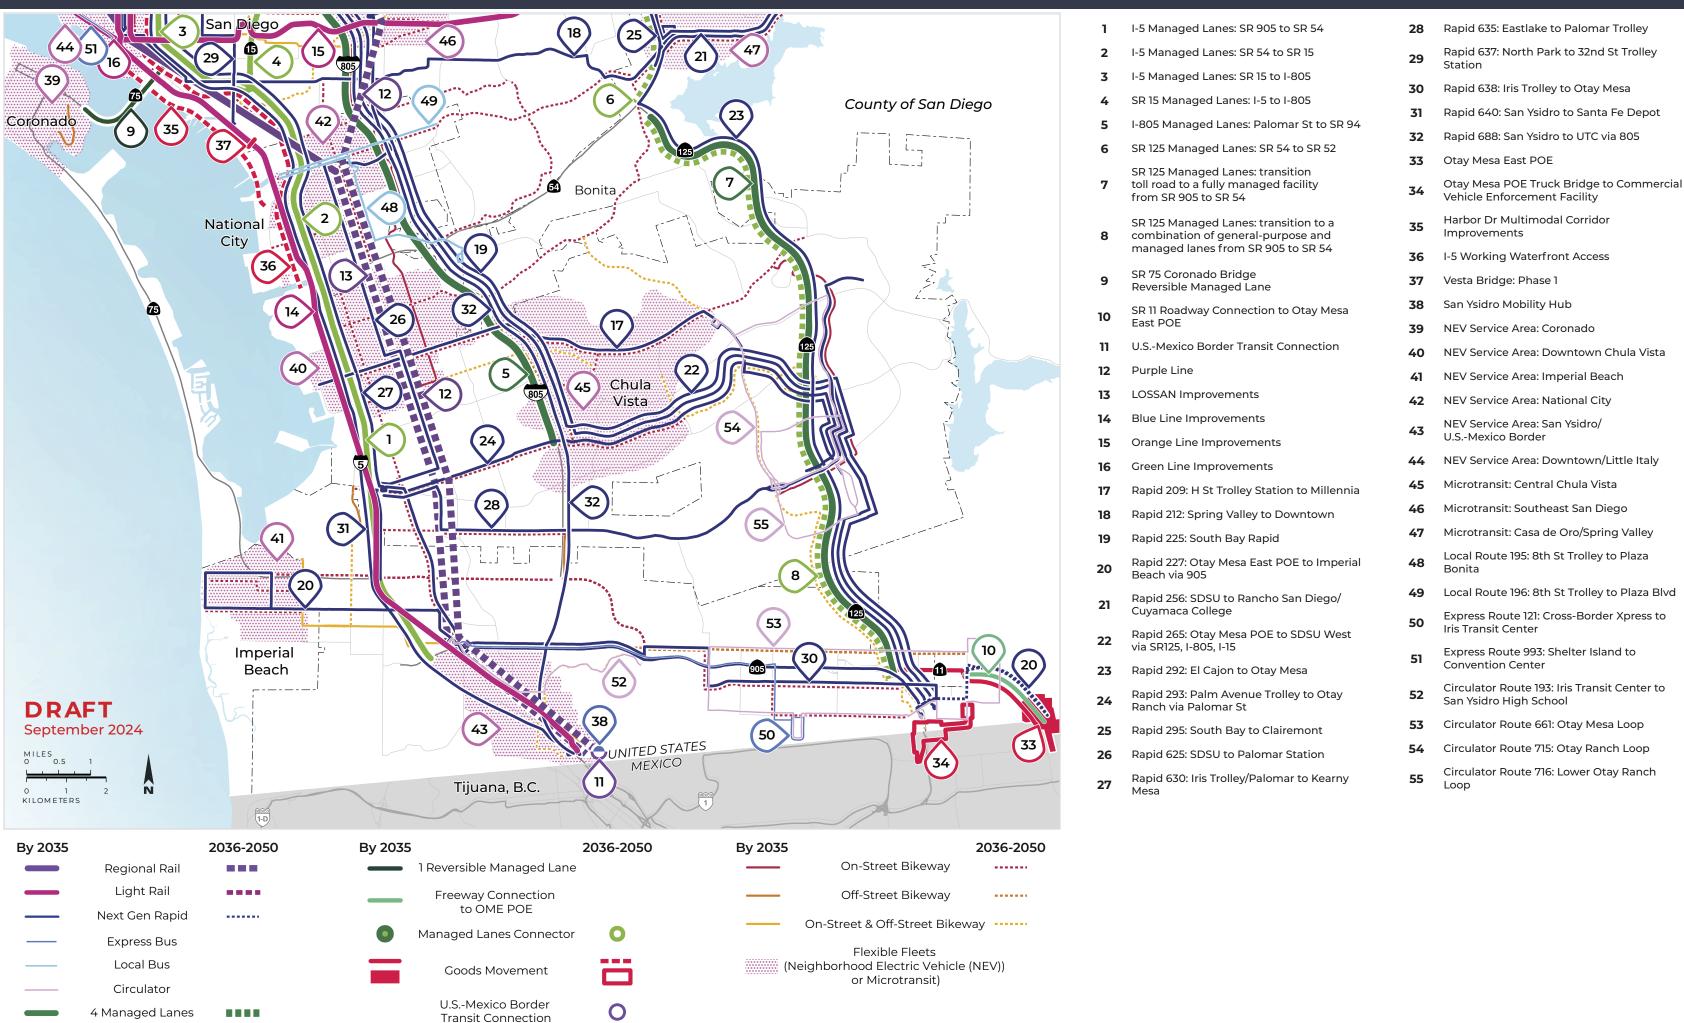

In San Diego, people said they needed:	What we're considering (and much more):
 Expanded routes and more frequent service, including later evening and more weekend hours Faster connections east to west including beach access, and east of the I-15 More connections to job centers, beaches, and major landmarks Faster transit to the airport Faster trips through high-traffic areas More bus lanes on major streets Transit station amenities like shade and lighting 	 More Rapid buses and trolley improvements More frequent service and expanded night and weekend hours Routes maximize access to jobs and high-traffic destinations
Microtransit or shuttles connecting people to transit stops too far to walk to – particularly in areas with limited parking	Fourteen microtransit and/or shuttle service areas (flexible fleets); parking district funds will partially fund shuttle service in those areas
Better traffic flow on and between highways including: ► Smoother connections to the SR 52 ► I-5 and I-8	 Managed lanes and truck climbing lane on SR 52, and connecting the I-15 and SR 52 managed lanes Operational improvements on I-8 (not mapped) Finishing managed lanes on I-805 and I-5, converting an existing lane to a managed lane on State Routes 94, 52, and 163
More protected biking/walking routes on high-speed roads and crossing busy intersections: improving existing routes, finishing projects, and connecting more neighborhoods, including: ► Between Point Loma and the Marina along the coast ► Around SDSU ► Routes that go over a freeway such as I-5 ► Nimitz Blvd, Rosecrans St, Pacific Coast Highway, Old Town ► Better connections from the I-15 bikeway over I-8	Our Regional Bike Network includes existing bikeway improvements, additions, or finishing routes addressing all of these location-specific concerns. For more information, visit the interactive map on our website.
More amenities for bicyclists at transit stops and other common locations (ex. bike racks and lockers).	Investing in bike amenities as part of bikeway projects, transit projects, and transportation demand management programs.

In East County, people said they needed:	What we're considering (and much more):
To improve highways by: ► Finishing the SR 94 and SR 125 connector project ► Helping traffic flow on State Routes 52 and 67	 Improving the SR 94/125 connector Managed lanes and a truck climbing lane on SR 52 and connecting managed lanes between I-15 and SR 52 Widening the shoulder for emergency purposes on SR 67
 Public transportation improvements: More Rapid transit and transit options for Cuyamaca College and La Presa ► Transit that comes more often and for extended hours in the evening 	 More Rapid buses including routes 256: SDSU to Rancho SD/Cuyamaca College; and 292, El Cajon to Otay Mesa via La Presa Next Gen Rapid bus routes may include infrastructure and technology to speed up trips Green and Orange Line trolley improvements More transit frequency and evening hours
Microtransit and shuttles: ► Connecting suburban East County to transit stops ► Service from unincorporated communities to San Diego	Shuttles and microtransit (flexible fleets) in El Cajon, La Mesa, and in several unincorporated communities in the County.
 Safer bike routes, not mixing bike routes with vehicle traffic on high-speed roads More bike routes east to west 	Regional bike network includes separated bikeways on high-speed roads and various east-to-west routes.

South County residents told us they needed

faster, more direct transit access to and from the border and CBX, more transit routes to major destinations and housing, faster access to the airport, more protected bike and pedestrian routes, and to remove the toll on SR 125.

Recurring Feedback and Impact

In South County, people said they needed:	What we're considering (and much more):
 Better and faster transit options coming from the border, including a rail connection directly at the border Expanded network of transit with service to major destinations such as job centers, shopping areas, event venues, and schools 	 Adding more Rapid routes and eventually a COASTER connection to the border and improvements to the Blue Line; San Ysidro Transit Center improvements and surrounding connections; exploring options for additional border transit Managed lanes with bus priority on various south-to-north highways Purple Line transit route from the border to Sorrento Valley via City Heights and Kearny Mesa
More transit routes to reach housing developments in areas isolated from transit and microtransit service for shorter trips.	Six new microtransit or shuttle service areas (flexible fleets) in Southeast San Diego, National City, Downtown Chula Vista, Central Chula Vista, Imperial Beach, and San Ysidro.
More transit access to the Cross Border Express (CBX).	Express bus from Iris Ave trolley station to CBX and a bus route between Otay Mesa and CBX.
Faster transit access to San Diego International Airport from South County.	Adding an airport transit connection based on potential concepts currently being studied.
 More protected bike lanes, pedestrian walkways, and signals overall, and specifically: ► Connections to parks, transit stations, malls, and other commercial areas ► Connections from communities near Sweetwater reservoir to central Chula Vista 	 Improving and expanding separated bikeways on high-speed roads across the region, including intersection improvements such as bike signals On street, protected bikeways to connect communities near Sweetwater Reservoir to Bonita, National City, and Chula Vista
To remove the toll on SR 125.	By 2035, changing the SR 125 toll road to a fully managed facility (use of lanes may vary depending on demand). By 2050, add lanes and change to a regular highway with a mix of free and managed lanes.
