The PSC met again on February 19, 2016. Agenda Items included El Niño 2015/2016: Protect, Prepare, Plan presentation by Holly Crawford, Director of County of San Diego, Office of Emergency Services; presentation by Katie Lembo, President and CEO, South Bay Community Services, on Alternative to Detention: Regional Efforts to Strengthen Juvenile Delinquency Prevention; and a presentation by Grace Miño (SANDAG) on Regional Resources for Addressing Methamphetamine in our Communities. The next PSC meeting is scheduled for Friday, March 18, 2016.

REPORTS

3. ARJIS PROJECTS FOR POTENTIAL URBAN AREA SECURITY INITIATIVE FUNDING (RECOMMEND)

Katie Mugg (ARJIS) and Director Scanlon presented the proposals for ARJIS projects for inclusion in the FY 2016 San Diego UASI grant submission to the Urban Area Working Group (UAWG). The grant timeframe is two years, tentatively November 1, 2016 through November 1, 2018. Allocations should reflect regional needs by all. The ARJIS project requests will go to the PSC for recommendation on March 18, 2016, for inclusion in the San Diego UASI grant submission to the UAWG.

The three proposed ARJIS projects are (1) Regional Computer-Aided Dispatch (CAD) interfaces for up to \$250,000; (2) Mobile ID for \$250,000; and (3) two-way Records Management System (RMS) interfaces for \$150,000. The CAD project would develop interfaces between ARJIS and agency CAD systems. To date, three agencies have been implemented to include the San Diego Police Department, La Mesa Police Department, and El Cajon Police Department. This project would allow ARJIS to continue this effort by funding the development of CAD interfaces to additional agencies. Once ingested into ARJIS, new agency CAD data would be validated, standardized, and made available to the 82 ARJIS member agencies in the region.

The Mobile ID project would entail deploying driver's license and military identification scanners to ARJIS enabled smartphones, starting with the region's Terrorism Liaison Officers. This identification verification technology enables officers to swipe an individual's official identification barcode (i.e., driver's license, military identification), rather than having to type in a name, date of birth, and/or driver's license number to confirm an individual's identity. This project would provide a secure mechanism for regional law enforcement personnel to positively identify individuals in the field.

The third request for two-way RMS interfaces would be a continuation of the NetRMS project that has been funded by UASI for the past several years. This project would complete the next phase of this on-going effort by developing interfaces back to agencies' records management systems for documents not initiated in the records management system, such as citations and field interviews. This project facilitates the rapid transmission and sharing of pertinent information across the region among local, state, and federal law enforcement agencies.

Lieutenant Roy Frank (San Diego Sheriff's Department, assigned to the San Diego Law Enforcement Communications Center-LECC), updated the Committee on LECC requests. The LECC is requesting monies for (1) staffing at San Diego LECC; (2) Palantir maintenance; and (3) critical infrastructure protection. The SD-LECC is the designated fusion center for the region and is a 100 percent grant funded program. Chief Froomin, suggested that perhaps some of the fire department grant requests could be incorporated at LECC, for example the geographic information system applications. Some fire applications may be helpful for law enforcement needs. Grant project monies would be beneficial for both fire and law enforcement.

Action: Upon a motion by Assistant Sheriff Barnett and a second by Chief Bolduc, the Committee recommended the Public Safety Committee recommend the ARJIS projects for inclusion in the San Diego UASI grant submission to the UAWG.

Yes – Chair Rodriguez, Interim Chief Gallucci, Chief Bejarano, Chief Froomin, Chief Carter, Chief Vasquez, Assistant Chief Investigator Rosario, Chief Bolduc, and Assistant Sheriff Barnett. No: None. Abstain: None. Absent: El Cajon Police Department, Oceanside Police Department, and San Diego Police Department.

4. 2015 SANDAG PUBLIC SAFETY ACCOMPLISHMENTS (INFORMATION)

This item was pulled from the agenda.

5. UPDATE FROM THE BUSINESS WORKING GROUP (DISCUSSION/POSSIBLE ACTION)

This item was pulled from the agenda.

6. UPCOMING MEETINGS (INFORMATION)

The next meeting of the Chiefs'/Sheriff's Management Committee is scheduled for Wednesday, April 6, 2016, at 9:30 a.m. at the La Mesa Police Department.

7. ADJOURNMENT

The meeting was adjourned at 10:50 a.m.

ACTION REQUESTED - APPROVE

**AUTOMATED REGIONAL JUSTICE INFORMATION SYSTEM
PROJECTS FOR POTENTIAL
URBAN AREA SECURITY INITIATIVE FUNDING**

File Number 7351900

Introduction

The Office of Homeland Security has initiated the development of the grant application for the Federal FY 2016 Urban Area Security Initiative (UASI) funding. At its March 2, 2016, meeting, the Chiefs/Sheriff's Management Committee reviewed the proposals and recommended three Automated Regional Justice Information System (ARJIS) projects for inclusion in the Federal FY 2016 San Diego UASI grant submission.

Recommendation

The Public Safety Committee is asked to review the ARJIS projects and approve their inclusion in the Federal FY 2016 San Diego Urban Area Security Initiative grant application to the Urban Area Working Group.

Discussion

CAD Interfaces - \$250,000

A focus of the ARJIS Division the past several years has been on the development of interfaces to agency Computer Aided Dispatch (CAD) 911 systems. To date, three CAD interfaces have been implemented at the San Diego, La Mesa, and El Cajon Police Departments. Once integrated into ARJIS, agency CAD data is geo-validated, standardized, and made available to the 82 ARJIS member agencies in the region. The data is displayed on the ARJIS Dashboard application, which provides a single integrated map view of critical infrastructure, CAD calls, and police incidents throughout the region. This information is regularly used in both investigative and interdictive efforts, supporting both law enforcement and homeland security functions. This project would allow ARJIS to continue this effort by funding the development of CAD interfaces to three additional agencies.

Mobile ID Pilot Project - \$250,000

ARJIS has an advanced mobile program that allows 450+ officers from 35 local, state, and federal agencies to access critically needed data in the field. In an effort to increase officer and public safety, ARJIS would utilize this funding to implement a program that would enable officers to swipe an individual's official identification barcode (i.e., Driver's License, military identification), rather than having to type in a name, date of birth, and/or driver's license number to confirm an individual's identity. This process results in officers losing visual contact with an unknown person during a field contact. With this new ID verification technology, more than 200 unique Department

of Motor Vehicles and other identification barcode formats, to include every state and military branch, all Canadian provinces, and select Mexico states will be able to be authenticated immediately. The mobile devices and applications meet the California Department of Justice and Federal Bureau of Investigation privacy and policy mandates. No data will be saved on the device. Funding will be used to add this capability to the devices used by the Terrorism Liaison Officers. ARJIS will collect metrics on the effectiveness of the application in enhancing officer situational awareness.

ARJIS NetRMS Interfaces – \$150,000

Through a collaborative effort with the San Diego County Sheriff's Department, ARJIS has developed a reliable, real-time interface to the NetRMS, the Department's records management system, which captures data related to crime and arrest incidents. Initially procured by the Sheriff, six additional law enforcement agencies within San Diego County have implemented the NetRMS system, and real-time interfaces to the regional ARJIS database. The ARJIS interfaces, funded with previous years' UASI grants, are used for regional applications, data validation, classification, and standardized regional Uniform Crime Reporting. This project would complete the next phase of this on-going effort by developing interfaces back to the records management systems for documents not initiated in the records management system, such as citations and field interviews. This two-way interface will allow agencies to use the validated and standardized data in their agency specific systems and programs, preventing information silos and facilitating the rapid transmission and sharing of pertinent information across the region among local, state and federal law enforcement agencies.
