SANDAG

2019 Methamphetamine Use by San Diego County Arrestees

Data from the SANDAG Substance Abuse Monitoring program

Research findings from the Criminal Justice Clearinghouse

SANDAG Board of Directors

The 18 cities and county government are SANDAG serving as the forum for regional decision-making. SANDAG builds consensus; plans, engineers, and builds public transit; makes strategic plans; obtains and allocates resources; and provides information on a broad range of topics pertinent to the region's quality of life.

Introduction

Interviews with adult and juvenile arrestees regarding drug use and other risky behavior have been conducted by SANDAG since 1987. As part of this effort, all arrestees who are randomly selected to participate in the Substance Abuse Monitoring (SAM) program and report methamphetamine (meth) use in the past 30 days are asked to answer additional questions (i.e., the meth addendum). The meth addendum was added to the research protocol because meth has consistently been one of the most commonly used illicit drugs by arrestees in San Diego County and the risk the drug poses to the user, children in the household, and the community in general. This CJ In Brief summarizes data from these interviews and is the fourth in the series of CJ Bulletins, In Briefs, and Flashes for this program from this most recent calendar year 2019.

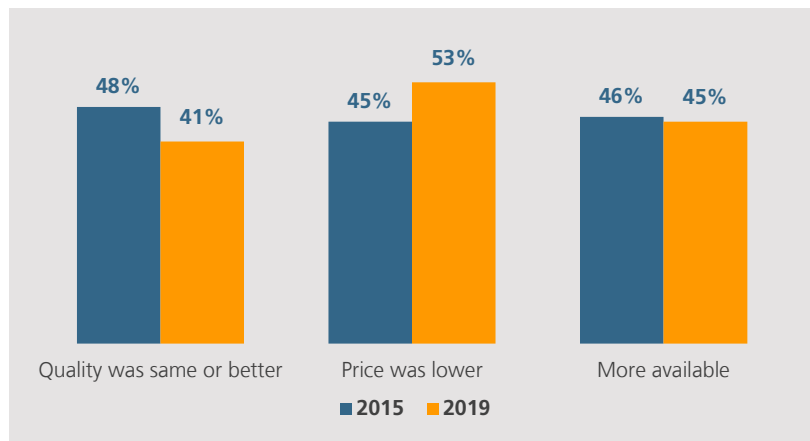

METH USE In 2019, the percent of adult males positive for meth remained the same as in 2018 (55%), but increased from 62% to 66% for adult females, a new 20-year high. The proportion of juveniles positive for meth was up in 2019 (11%) from 2018 (10%).

Percent of arrestees positive for meth, 2000–2019

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
Adult males	28%	32%	34%	38%	43%	44%	36%	24%	20%	22%	25%	26%	31%	41%	40%	48%	55%	55%	55%	55%
Adult females	29%	37%	37%	47%	42%	51%	47%	44%	31%	38%	33%	39%	47%	46%	53%	52%	58%	58%	62%	66%
Juveniles	11%	11%	12%	15%	13%	21%	10%	8%	10%	6%	8%	4%	4%	10%	13%	8%	14%	11%	10%	11%

AVAILABILITY OF METH A 5-year comparison shows that a smaller percentage of arrestees in 2019, compared to 2015, said that the quality of meth was the same or better this year; more said the price was lower; and around the same percent said it was more available (just under half).

“I wish I would have never tried it. It caused so many issues in my life.”

33-year-old male arrested for obstructing justice

According to law enforcement, over the past several years, drug trafficking organizations in Mexico responded to legislation that banned the legal importation of ephedrine/pseudoephedrine by changing their production method to the P2P method. Since the production process is continually improving in efficiency, prices can be lowered, and quality maintained. In “super labs,” multi-ton quantities of meth are now being produced daily.

Method for obtaining meth	Pattern of use (on average)	Duration and mode of use
<i>How do “typical” meth-using arrestees get the drug?</i>	<i>How often and how much do they use?</i>	<i>How long and how do they use it?</i>
<p>97% purchased in San Diego County</p> <p>38% have sold meth or acted as a middleman in last year</p> <p>41% have a main source</p> <p>62% usually buy from someone else when main source not available</p> <p>60% have bought from someone they didn’t know</p> <p>33% have carried a weapon with them when they got meth</p>	<p>Use 3 times in a day when they use</p> <p>Use 15 days in a row during longest run in past 30 days</p> <p>Use 1 gram of meth each day they use</p>	<p>78% usually smoke it (alone or with another drug)</p> <p>40% have also snorted it in the past year</p> <p>25% have injected it in the past year</p> <p>On average (median), adults had used meth for 15 years, with a range of less than a year to 53 years</p>

LOCATION OF METH PURCHASE Most arrestees reported they bought meth in the Central or East Suburban major statistical areas of the County in 2019.

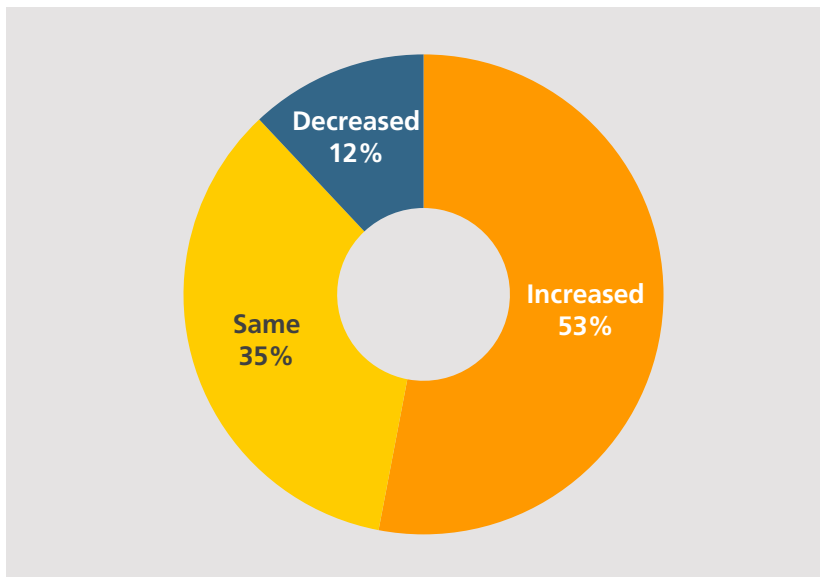

72%

of those employed or who were a student reported using meth before going to work or school.

The most common job types reported by these arrestees were construction, food service, and unskilled labor.

DEMAND FOR METH According to arrestees involved in distribution, 53% said the demand had increased in 2019 compared to one year ago.

"I regret doing. If I knew how it was going to get me I would have never used."

39-year-old female arrested for a drug offense

Study background

This SANDAG CJ In Brief, **2019 Methamphetamine Use by San Diego County Arrestees**, is part of a series of reports highlighting findings from data collected as part of the SAM program. As part of this program, adult and juvenile arrestees are approached within 48 hours of their arrest (and booking) to participate in an interview regarding their drug use and other recent behaviors.

In 2019, a total of 482 adults were interviewed as part of SAM, regardless if they provided a urine sample. Of these, 250 (52%) reported having used meth in the past 30 days. The meth addendum was completed with 242 adults, including 146 males and 96 females. For the 109 juveniles interviewed, 9 (8%) reported meth use in the past 30 days and all 9 completed an addendum, including 7 boys and 2 girls.

Acknowledgements

This effort would not be possible without the cooperation of the San Diego County Sheriff's and Probation Departments, and the funding support of the Southwest Border High Intensity Drug Trafficking Area (HIDTA), County of San Diego, and SANDAG member agencies. To learn more about the SAM program and to access other current reports, as well as aggregate data from the meth addendum, please visit sandag.org/sam.
